Now wait a second "Big L from Memphis." First off, Hammer007 is a grade A schmuck who writes likes one because he is. It's meaning less drivel mixed with infant intellectualism.
Secondly I was in Washington and beautiful northern Virginia visiting my aunt Beulah and uncle Ashley Wilkes III. Southern aristocrappy.
Now this political stuff is upsetting because you're associating me with those I dislike while leading this board into believing the opposite.
As far as Drudge goes, I know nothing about him except that he sits with a Walter Winchell hat and pretends to be a hotshot. Is he right, center or left?
Regarding Bush, of course if he wins in November, I'll stand behind him because unlike Republican crybabies who've been carrying on about Clinton, I'm a true patriotic American. But I won't like it because of these reasons:
1. I don't know if he's his OWN or his daddy's man
2. Has he gotten over his problem with alcoholism?
3. Is he guilty or innocent of financial hanky panky?
4. Does his wife look 30 years older than he as his mother does his father?
5. Will he construct a lethal injection death chamber in the White House?
6. Will he cater to the big petroleum companies as do Republicans to all big money boys?
7. Will he help construct a decent pharmaceutical plan by which our elderly will no longer have to decide whether to eat or buy pills?
8. Will he sell arms to a country that kidnaps and holds American hostages?
9. In case of illness or death, will his Vice Prez. have more brains than his daddy's Quayle?
10. Will he kiss the rear ends of the Christian Coaltion monsters instead of standing up for the rights and choices of ALL Americans?

9.400 mHz is a 'PATRIOT LATRINE" frequency. Bo Gritz spits out hatred until noon and then the brainless reactionary insipid Alex Jones of "www.infowars.com" is on from one to three. But at times there's a break in Jones's program during which a guy named Dave, station director, comes on with some kind of rightwing shtick trying to sell some sort of garbage. Today he was trying to make the listeners believe that FIELD DAY is a "PATRIOT PREPAREDNESS"event every year to fight off the big bad government which is going to poison our water supply, throw us in concentration camps etc. Dave is WA4SZE who played for all, trying to sell shortwave radios with USB and LSB, tapes of his" superb achievements" during Field Day. Imagine, there he was in Georgia and was able to work while mobile, MICHIGAN!WOW! Too bad I didn't tape it for posterity. Anybody know this guy Dave, the putz "Patriot?"
I'll tell you this-if these rightwing bastards don't stop trying to sell Maadi Griffin handguns, preaching insurrection and urging us NOT to pay income tax, you're going to read about more FBI raids and RIGHTLY SO!

Thanks for inquiring about the Icom W32A, It is in Mint condition and had
the original 5 watt battery and an additional 5 watt Icom Battery, Also
another 1000 MHamp after market battery.. Also included is the wall
charger, and an Icom Stand up Quick Charger, also an Icom Speaker Mic, and
an Icom Vox headset boom mic...
I am sure that you will acknowledge that this is a great deal...since this
is the second time that you have inquired about it...
Thanks for the interest in my listings..bobo...
I hope you have a Happy and Safe Fourth .

GOOD POINTS! Here is more "fuel" for the fire....
(proof that Al Gore is a 2-face'd lying sack of shit who feathers his
own nest at the expense of the rest of us. Please read the following
article)

------- begin -------------

Sale of Federal Oil Lands boosts Gore fortune

By Bill Sammon
THE WASHINGTON TIMES

Vice President Al Gore's push to privatize a federal oil field added tens of
thousands of dollars to the value of oil stock owned by the Gore family,
which has been further enriched by skyrocketing gasoline prices.

Shares of Occidental Petroleum jumped 10 percent after the company purchased
the Elk Hills oil field in California from the federal government in 1998.
Mr. Gore, whose family owns at least $500,000 in Occidental stock,
recommended the sale as part of his "reinventing government" reform package.

The sale, which constituted the largest privatization of federal land in
U.S. history, transformed Occidental from a lackluster financial performer
into a dynamic, profit-spewing, oil giant. Having instantly tripled its U.S.
oil reserves, the company began pumping out vast sums of crude at low cost.

As the months went by, Occidental was able to sell the oil, which ends up at
gasoline retail outlets like Union 76, for more profit. Rising oil prices
have significantly improved Occidental's bottom line, said analyst
Christopher Stavros of Paine Webber.

This year, the company posted first quarter revenues of $2.5 billion, or 87
percent higher than a year earlier. That's a bigger increase than at nine of

10 other oil companies listed in a survey that Mr. Gore cited last week as evidence of price gouging.

The rise in Occidental oil prices, coupled with the acquisition of the Elk Hills field, has paid handsome dividends for the Gore family.
The vice president recently updated his financial disclosure form to put the value of his family's Occidental stock at between $500,000 and $1 million. Prior to the Elk Hills sale and gasoline price spike, Mr. Gore had listed the value of the stock at between $250,000 and $500,000.

Gore aides insist the vice president's push to sell Elk Hills does not constitute a conflict of interest. They point out the family's Occidental shares were originally owned by Mr. Gore's father, who died in 1998, leaving the stock in an estate for which the vice president serves as executor.

Although Mr. Gore continues to list the stock on his financial disclosure forms, aides said the shares are in a trust for the vice president's mother, Pauline.

"He doesn't own stock because he's trying to avoid conflicts of interest," said Gore spokesman Doug Hattaway. "He's the executor of the estate, but he's not the trustee of the trust. It's a separate thing."
Still, Mr. Gore's recommendation to privatize Elk Hills ended up enriching his mother, who is expected to eventually bequeath the stock to the vice president, her sole heir.

Last week, Mr. Gore began a concerted effort to blame skyrocketing gasoline prices not only on "big oil," but also on Texas Gov. George W. Bush. Gore aides have emphasized that Mr. Bush once ran several oil-exploration firms and has accepted more campaign contributions from oil companies than the vice president.

The Texas governor has dismissed the attacks as an attempt to divert attention away from Mr. Gore's energy and environmental policies, which have driven up gasoline prices. Political analysts say the spiraling gas prices could imperil Mr. Gore's presidential bid because they are highest in the Midwest, which he must carry in order to win the White House.

The political and financial fortunes of the Gore family were established largely with oil money from Occidental's founder, Armand Hammer. Part capitalist and part Communist, Mr. Hammer became the elder Gore's patron more than half a century ago, showering him with riches and nurturing his political career through the House and Senate.

The elder Gore enthusiastically returned the favors. In the early 1960s, Sen. Gore took to the Senate floor to defend Mr. Hammer against FBI Director J. Edgar Hoover, who wanted to investigate Mr. Hammer's Soviet ties.

In 1965, the elder Gore helped Mr. Hammer obtain a visa to Libya, where he opened oil fields that turned Occidental into a multinational powerhouse. When the elder Mr. Gore lost his re-election bid in 1970, Mr. Hammer installed him as head of an Occidental subsidiary and gave him a $500,000 annual salary. The man who had begun his career as a struggling

schoolteacher in rural Tennessee ended it as a millionaire oil tycoon.
The younger Gore also benefited from Mr. Hammer's generosity. He was paid hundreds of thousands of dollars in annual payments of $20,000 for mineral rights to a parcel of land near the family's homestead in Tennessee that Occidental never bothered mining.
When the younger Gore first ran for president in 1988, Mr. Hammer promised former Sen. Paul Simon "any Cabinet spot I wanted" if he would withdraw from the primary, according to a 1989 book by the Illinois Democrat.

Mr. Gore and his wife, Tipper, once flew in Mr. Hammer's private jet across the Atlantic Ocean. They hosted Mr. Hammer at several presidential inaugurations and remained close to the oilman until his death in 1990.
In 1992, when Arkansas Gov. Bill Clinton was considering Mr. Gore as his running mate, the elder Gore wrote a memo describing his son's ties to Mr. Hammer. The document was designed to provide Mr. Clinton with answers to possible questions from reporters, most of whom did not focus on the connections after all.

Mr. Hammer's successor at Occidental, Ray Irani, has continued to funnel hundreds of thousands of dollars into the campaigns of Mr. Gore and the Democratic Party. For example, two days after spending the night in the Lincoln Bedroom in 1996, he cut a check for $100,000 to the Democratic Party.

Meanwhile, the vice president has reciprocated in much the same way his father did decades ago. In 1995, Mr. Gore recommended the sale of the Elk Hills field, which had been zealously guarded by the U.S. Navy as a strategic oil supply since 1912.

When the $3.5 billion sale to Occidental went through in 1998, the Energy Department dispensed with its customary assessment of environmental impact. Instead, it allowed the assessment to be handled by a private firm that was run in part by Tony Coelho, who served as Mr. Gore's campaign chairman until this month.

The privatization of Elk Hills, which covers 74 square miles near Bakersfield, Calif., was a dramatic departure for the Clinton-Gore administration, which has used federal funds to purchase vast tracts of private land in order to block development

Mail order/Internet: http://www.aesham.com (for AES)

In my state (In fact, I am one of the VE's that gives exams in a room above the store): http://www.juns.com (Jun's Electronics - Culver City, CA).

Also, there's "HRO" (several states), and Barry Electronics (New York City), but I have never shopped at either.

If that's not enough to get you started, pick a manufacturer and look for a "dealers" list on their website.

Charlie is moonlighting as a bus driver for the islamic group that opposed the execution of Gary Graham. Recent reports, which have not been confirmed are vague, but an official observer was noted as saying that Charlie was riding shotgun and filling in as bus driver for the group known as "He Bin Executed". The Next stop will be Florida where they will try to buy "Ole Sparky" and use it as the bus drivers stand-by station. So there you have it, Out of the country he is not, he will probably go to Easley, and pick up his ole buddy " Porkbutt Bin Lying", if anyone has any further information will they please keep us posted.

Now this was TOO funny. Except for one thing. The Radiosigs-Guy is, indeed, out of the country. I think Jamaica or the Bahamas or Switzerland or somewhere like that. He is at a high level meeting with Governor Bush, Matt Drudge, Jesse Helms, Pat Robertson and Jerry Falwell.

They are finishing off the master plan to bury The Amazing AlGore (inventor of the internet) under an avalanche of taxpayer votes this November. On RRAM alone, the Radiosigs-Guy has, single-handedly, generated no less than 20 million new votes for Governor Bush.

Once their master plan is unveiled to the public, I fully expect The Amazing AlGore (inventor of the internet) to withdraw from the race and plead guilty to everything he's done and go quietly to jail. It would be far less humiliating than facing the ballot-box thrashing that the Radiosigs-Guy has set up for him.

But other than that, it was a funny post, Hammer-Man. Now where's that Rrrrrrrrrrroooollllll Calllllllllll you promised us?

Does anyone have any experience with the squelch mod for the TS-680S that adds squelch function to all modes? Does it work? Is it worth doing? etc, etc... any help on the subject would be appreciated.

I am bested, as Brians asks:
>Do you just like to argue? Or am I wrong about the fact that his statement
>may be a little fucked up

Well, Brian, if I liked to argue, I'd still be married. But I don't .. so I ain't. :-)

Now as to the nature of ND8VMIKE's original post, let's safely say it was .. "off topic". Beyond that, yourself and others have editorialized with both positive and negative reactions. No harm done. Hence the "M" in "RRAM".

Now is it fair or accurate to call Mr. ND8VMIKE an idiot? Probably not. Racist, maybe. Others may call him a bigot. Not so fast there. Look up the word "bigot" in Webster. The etymology will astound you. And you'll know why we should not, without more information, call Mr. ND8VMIKE a bigot.

I hope this alleviates your frustration with me. And I hope the "M" in RRAM remains as strong as ever.

being ...
> FAT ! ! !

Hmmm...
You can't blame a two year old. Two year olders are not legally responsible. You can't blame the partents of the two year old because in most states parents are not fully responsible for what their children do. You can't blame Rosie...she is just an actress. You can blame Rosanne even less (she is an actress but she, as a self-motivated person, debated with Charlton Heston...who was offended by her strong opinion and who admitted that he is just an actor/spokesperson for the NRA.)

Who is left to blame?

IMHO the whole American attitude toward guns stinks. I have the guts to blame the NRA for their part in endorsing that stinking attitude. You may not agree and that is your right as you may interpret it from the Constitution. You certainly have the right to disagree until such time that our Constitution can be ammended to bring it up to this century.

Does all of this have anything to do with Ham Radio policies? Not directly...but it IMHO kind of shows that national organizations do tend to shape the policies of hobbyists. Unfortunately the NRA is to guns, what the ARRL is to radios....NOT what Rosie O'Donnald is to spoons.

Please keep thinking,
Hams need MORE license classes,

At the Ham Radio exhibition in Fredrichshafen, Germany last weekend there was a demonstration of amateur digital video transmission. The receiver was a standard DVB (european equivalent to DBS) receiver from Nokia. This was fed from a modulation converter. The transmitter was a completely home brewed affair.

According to Buckmaster, ND8V was an Extra in 1-99, prior to that he was an Advanced. Both licenses were issued long before the restructuring took place. You must have meant "the realms of" Extra "no brains." :>)

As is typical in today's junk society, I heard many jammers while tuning across the bands on Field Day 2000. Whistlers, tone generators, music, "lady in heat" CB noise toys, and other various forms of malicious interference.

Gee, I'm not that old...and even I remember when ham radio used to be a respectable hobby.

Wow-what a brain! Congrats Jerry on a wonderful thought- provoking and highly intellectual post which will undoubtedly exceed the ability to understand by these "patriotic" Conservatives.

Incidentally I will admit that I did vote Conservative once-for Barry Goldwater in 1964 because I knew instinctively that Lyndon Johnson didn't have a clue about Viet Nam and the lamebrain would cost us dearly. I was correct.

The dopey Conservatives on this board think liberalism is socialism and socialism is communism while in fact they know nothing about all three. The hate is taught to them by Rush the Loser and his rightwing parasites on AM and shortwave.

Gosh, your post is so good I'm now going to read it a second time and I'll bet I'll appreciate it even more.

------Cut-----snip------mohel------slice------dice-----OJ stab---oy vey--

What a fantastic post! What ability you have in slicing and dicing these meathead Conservatives! However I must admit that I did vote Conservative once-for Goldwater in '64 because L.B.J. didn't have a clue about Viet Nam and I knew it would cost us dearly. I was 100% on target.

Jerry, the "thing" on this board is to accept the fact that in order to be patriotic, one MUST be a Conservative or a Christian Coalitionist. If one then is liberal, he MUST be either a socialist or a communist but not an anarchist since they don't know what that means. And one MUST love guns because the prevailing Conservative interpretation of the Second Amendment is that GOD loves guns too since GOD gave us the Constitution. Everyone must have a gun to protect himself against everyone else who has one too thereby creating enough bravado and machismo whereby shooting each other becomes the "in thing." GOD intended all of us to shoot ourselves to death. Duh. It makes no difference that people are being shot stone dead every day--keep in mind it's not guns that are responsible. If not guns, then we'd all be stoning each other to death or shooting arrows or even burning tar on catapaults. Duh again.

Without liberalism this country would be in the Dark Ages all over again. For examples- No unions. No social security. No medical benefits. No disability income. No day care centers. No athletic scholarships. No hate crime legislation. No abuse centers. No progressive legislation period designed to enhance the lives and productivity of the working men and women of this nation. We'd be stale even lifeless. The idea of CARING would be U.S.A. nonexistent. Ah ha..that's the key word defining the main difference

between Conservatism and Liberalism-CARING. Feeling for the other guy. Helping when needed. Giving the other guy an even break. Liberals say, "Here, let's work and live together" while Conservatives say, "Do it our way or we shut down the government" and by golly, they do it and then regret it at election time.

And that brings up another point. Conservatives equate Liberalism with weakness. Nuts! The single most important completely voluntary decision made by any President in the history of this country was that of a midwestern Liberal named Harry Truman. The use of the atomic bomb. That decision changed history forever. And let's not forget that a Liberal President named Franklin Roosevelt was the one who gave the okay to the Manhattan Project to begin with. The Conservative spin? Truman gave away too much money saving western Europe from being taken over by Russia and F.D.R. intentionally led us into W.W.II. Hello?

Conservatives are narrow minded oafs who can't see beyond today while Liberals have the vision to work for a more secure future because they are able to see it.

Hams are thinkers. Thinkers do more than discuss QSLs and DXCC and all the rest of the stuff that's fun but nonetheless unimportant. Stay on this board and you'll get an education equal to "Haavad's." And lastly if you don't care to read political viewpoints then I suggest you find a ham radio newsgroup.

Listen up, J.S.L.--- Jerry Schroeder's post confused you because of it's insight, truth and relevence. The only thing you could counter with was Clinton and Lewinsky? For a reprobate President he's sure done one hell of a fine job because he was able to push through progressive legislation approved by both sides of the House while shutting down and shutting up the G.O.P. bigmouthed hyprocrites hell bent on splintering the country. The next time you care to debate with or pick apart Schroeder's posts,first get a brain.
Doc,AF2Y

Not to be difficult, but isn't this a ham radio newsgroup? You suggested that I find a ham radio newsgroup. I thought I had found one at rec.radio.amateur.misc.

I guess I just expected better things from a ham radio group. Usually the items being discussed in a newsgroup have some kind of relation to the title of the group. I would expect a discussion about politics in maybe alt.politics but not here. There are better discussions about the radio hobby happening in the cb newsgroups than here it seems. Maybe I haven't given it enough time yet.

Keep in mind after Jan.20,2001 that one of the most complimentary things any caring American can say about Bill Clinton was that he wasn't Newt Gingrich!

Thats interesting- what format were they useing? MPEG2? If so, there are many off the shelf MPEG receiver/converter sets for the tvro market.

Receiveing should be the simple part of the equation...which from your message seems to be the case. Transmitting compressed digital video at reasonable frame rate takes up a fair chunk of bandwidth (certainly more than my cheesy 48k internet connection is capable of handleing). It is unfortunate that the amateur community has lagged in adopting and implementing high speed digital communication modes.

Although I eagerly await the launch of P3D due to financial constraints I am going to have to sell my dual band Icom and 2.4ghs downconverter setup... I was really hopeing to be able to play around with P3d's microwave bands, which is one reason for my initial question about non-standard uses for DBS hardware- the ku band stuff isn't all that far from the 10ghz band and there is a ton of stuff out there that could be modified... the 2.4 ghz downconverter I have is a drake wireless cable converter that a Japanese amatuer figured out how to convert to a 2m IF! Perhaps someone will be able to transmit digital video over p3d someday :-)

Aaron,

Can't answer the question, but I would suggest posing it on
r.r.a.homebrew, which is a much more technically oriented NG than this one.

The best book by far is the ARRL's "Now You're Talking". Just make sure its the 4th edition. Most Radio Shack stores sell the book or you can go to http://www.arrl.org/catalog/index.php3?category=Licensing and order it directly from the ARRL.

Good Luck!

The Now You're Talking book is, in addition to a study guide for the questions and answers, a reasonable first reference book to help one get on the air. I will add that if a prospective new ham has an older edition, the basic electronics radio and reference material is still valid and that he or she can study that to learn and study the new question pools, which can be downloaded from a number of sources, including the ARRL Web page.

Those that want a book more tailored to the specific exam questions can study the ARRL Q&A books, or the study guides sold by Gordon West, W5YI publishing, etc.

Good luck on your exams.

> First of all Bob you sound a lot like Clinton and Algore trying to
define "is"
> or tell us that "there is no legal controlling authority."
Yep...but the problem is that there is no ONE controlling authority for
these matters. This is because both the states' and the Federal
government's responsibilities and controls overlap. There are
differing opinions about the fairness of that. While breaking a window
can usually fall under local civil laws, there are Federal as well as
state gun laws that may get involved. Don't blame Clinton or Gore or
me for this condition because it started when there were 13 collonies
and no telephones, so the collonies had to take control before the
central government could send a messenger on horseback to determine how
justice could be applied.

> Just let me say that if that two year old threw a rock and broke a
window who
> is responsible?

A lot unfortunately depends on what state the toddler was in and in
what state the window was in. It also might depend on how rich the
parents and/or gusrdians of the toddler are; If they could afford to
hire lawyers or if they could or couldn't afford to pay for the window.

Just look at what Hams go through in some neighborhoods when they want
to erect antenna towers...It depends often on local politics...sooo
Don't be so quick to blame Clinton or Gore because these types of
things have never relied on Federal laws alone. In short the Feds are
not entirely in control of civil matters and they never have been.

Now we know that Math, Physics, Biology and all science applies equally
all over the USA. (In fact all over the Earth.) So why are there
different school boards in each township and different state controls
over schools in each state of the USA??? This is even worse than the
kid who breaks a window or the Ham who wants an antenna tower...it is
the denial of uniform accurate education to future generations of
Americans. The text book writers do not want to take the blame for
publishing out of date and wrong scientific information in the text
books that children are given in school...No, they want to blame the

states and the towns and all the local school boards that have asked for those text books as well as the dumbed down teachers who have done little to keep up with technology and science. IMHO it is everyones' fault!

Yep we are all responsible...Maybe we are all a little responsible for that toddler if he breaks a window or finds a loaded gun too...because it is all of us, as a nation, who are the people who form the society which develops the culture that makes these things more probable than not. Our morality may be based on our religious culture.. as they say, fear of G-d...BUT IMHO we do not need to fear G-d to be responsible for the actions of our young children...We just have to use common sense. We have to love our children and hate noone and teach our kids not to hate anybody. Before they are old enough to understand we have the responsibility of carefully watching our children. Without hate...broken windows are accidental.

I hope that answers your question and I apologize if you think I have gone too far off topic...but I like to connect the dots...

Responsible 73,
Bob Wex w2ilp (Increase Learning Potential) (Independent Logic Politically)...neither Democratic nor Republican, that is.

I guess that the only one who should fear
broken Windows is Bill Gates.

Charleston, W. Virginia (AP) - Federal authorities think that they have uncovered the primary reason for the nations highest reported incidents of child molestation. These record high reportings are all associated with Marshall county which is located in the infamous W. Virginia "panhandle". Authorities surmise that the above is mainly due to the extremely lax consanguinity laws in effect. A secondary cause is probably due to its geographic location. That is, its being squeezed between two other parochial backwaters in Pennsylvania and Ohio. Vice-President Al Gore has vowed to make this a very big issue during the upcoming campaigns. A spokesperson for Gov. Bush has equated this effort to that of flogging a dead horse.(ind. stop)

I'll try to keep you guys abreast of the news if I see any more about it in the Daily Mail. Lots of 88's ... Milly

IMHO most of the study quides are OK as study guides. Those sold by the ARRL, W5YI, Gordon West, etc. are OK if you just want to pass a Ham test...
BUT
If you want to learn about Ham Radio then I would suggest that you get a recent ARRL Handbook and start reading through the whole book. When you come to anything that you can not understand, I suggest that you look for further references on that specific subject and borrow the books required from the Public Library. If that does not help I suggest that you get help from a Ham who understands the subject. Memorizing the questions and answers can be accomplished with any guide which includes all of the questions and answers that are in the questiion pool...BUT all study guides are deficient in explaining in detail the physical or technical concepts that are involved in truly comprehending why the correct answers are correct. For some people it is far easier to learn the CONCEPTS rather than to memorize the exam Q & A question pool without knowing what it all means. Others must struggle with study guides alone.

If you are truly motivated either method may be good for you...Each takes somewhat of a different kind of work.

It is good to read about someone who wants to be a Ham in this NG.

Anyway Lots of Luck

children.
> How can anyone think otherwise? We are suppoesed to protect our young
> children.

I agree totally with the concept that parents should be fully
responsible for young children...BUT this does not seem to always be
the case in the USA under present laws.

Why have the Ramseys not been punished for not being responsible enough
to hear their own daughter's crys in their own home??? Even if they
did not kill her themselves, why are they not tried for failing their
responsiblity to safeguard their young child?

The answer is - most Americans forget the parental responsibilities
when it comes to law. This dates back to a pioneering spirit which
makes young kids, rather than their parents, responsible. It is
supposed to give kids more feeling for their own independence as well
as the responsibility that goes with the freedom of having some
independence... It goes along with the idea that kids can sue their
own parents if it can be profitable for lawyers.
BUT can we expect a little four year old girl to be responsible for the
protection of her own life without her parents being responsible to
watch over her and hear her the way most responsibile people are
expected to do when they have any young child living in their home???
Unfortunately the Ramsey child is not alive...So she can not sue her
parents for shirking responsibility nor for more directly killing
her...and the justice system can do nothing but permit the Ramseys to
sell a book, which I won't buy, so I don't even know if they have
admitted their failure to be responsible. Perhaps they blame some
servant...who took the day off because it was Christmas. They forgot
that Joseph and Mary were responsible on the first Christmas day...or?

I suggest that you read the study guides before you make blanket statements like this, Bob? That last statement is patently untrue. The study guides are more than just the question pools. (Those can be downloaded for free.)

Even the "Q&A" book goes into detail to help the applicant learn the concepts. Let's take a simple technical area from the Tech pool, a question about capacitors.

T5B08:
Q: What is one reason capacitors are used in electronic circuits?
A: To block the flow of direct current while allosing alternating current to pass

First, the Q&A seems quite self-explanatory; in "memorizing" that answer, one is learning one fundamental aspect of capacitors.

Then, the Q&A text goes on to explain:

Capacitors play several important roles in electronic circuits. When a dc signal is applied to the capacitor, the capacitor will charge the applied voltage and then no more current can flow in that circuit. So capacitors block the flow of direct current. When an ac signal is applied to a capacitor, however, the capacitor will alernately charge and discharge as the current reverses direction. A capacitor will have little effect on the current, so alternating current is allowed to pass freely.

The Now You're Talking book goes into even more detail. There is about a page of text, with two figures, in the "Understanding Basic Electrical Pictures" chapter and about 3 pages of text with 3 figures in the "Circuit Components" chapter.

The Gordon West and W5YI study guides offer a level of explanation on a par with the ARRL Q&A book.

And, for the record, there were no questions about capacitors in the 1963 Novice test I took to enter ham radio. The ARRL study guide for that exam was 4 pages long.

> It is good to read about someone who wants to be a Ham in this NG.

Yes, it is, Bob, but giving unchecked information based on supposition will not help newcomers make the choices they need to study ham radio in a way that is best for them.

Andrea, good luck to your husband in ham radio!

Although, as an experienced ham, I find the ARRL Handbook to be a valuable reference, I agree that it is probably not the first book a new ham wants to buy. As I started in an earlier post, the Now You're Talking book is about 300 pages of information tailored for the beginner. (Only 65 of those pages are the actual Q&A pools). For those that want to concentrate on learning the technical fundamentals, I recommend "Understanding Basic Electronics." There are also lots of electronics tutorials available from TAB, etc., that will serve equally well. The Handbook is a book that hams grow into over their first few years, but I sure wouldn't start there.

'Just received my ARRL VEC update. Among other things, it
focused on a person who had failed his bid for an extra class
license 19 times! Upon being pressured by a barrage of fax
and e-mail, the head of the ARRL VEC, Bart Jahnke, admitted
that his name was Roger Wiseman from Glendale, W. Virginia.
Bart commented that this was a new failure record. Pursuant
to league policy, however, Mr. Wiseman is being referred to
the Handi-Hams organization. Failing that, Mr. Wiseman will,
in all liklihood, be referred to Puerto Rico. Where, it is
said, one can acquire an extra-class license for nominal cash
donations. 'Try to keep you guys posted on further developments.

I don't like guns. I do like radio equipment. I think that those who like guns can have them. I have experienced a time when a loaded gun was pointed at my head by a drunk. I will not forget it. But I can not take away the right to own guns, that seems to be guarenteed by the U.S. Constitution...Nor do I want to take away the joys that people who use guns in their hobbies might have. (Hunters, Target shooters, Vigalantes, militia synthesizers, etc. or even the adult nuts who haven't grown up and say "Let's play guns" and pretend we are early pioneers, tough cowboys, bank, stage-coach or rail-road robbers, civil war soldiers [on either side], or skin-headed NAZIs). Guns are too serious to be play things.

I only hope that those people who legally own guns can keep them away from children who are not old enough to be legally or mentally ready to handle the guns. That is THEIR RESPONSIBILITY, if they want to own guns....but I can not punish them for their failures to safeguard their own children...perhaps they are not much more mentally ready to deal with guns than their children are.

I enjoy the right to build and own radio equipment that is capable of transmitting in the Amateur Radio bands. I have the responsibility of operating within the law...and I have the RESPONSIBILITY of not permitting anyone who is not licensed to use my equipment without me being in control. If you are a licensed Ham you have the same rights as I do...AND THE SAME RESPONSIBILITIES. It doesn't matter what the editorials in QST say (recently it was said that an SWL is spiritually as good as a licensed Ham - Whatever that is supposed to mean)...AND it does not matter what the NRA's spokesman/actor Charlton Heston says.

RESPONSIBILITIES ARE RESPONSIBILITIES!

I would like to blame the NRA...but the NRA is an organization of many people...many of whom own guns and handle them in a responsible way. Some believe that in their location they need the guns for their own safety and the safty of their families..While I don't agree, I can not entirely blame them for their fears and their unwillingness to give up what they believe is an American tradition and a manefestation of the freedom of Americans. I just can hope that they don't forget their responsibilities and don't point any guns at me after they have imbibed of too much alcohol...and/or listened to too many Hestonisms.

Don't blame Clintonisms or Algorythms for the lack of responsibilities that some people have. There are lots of people who won't take responsibilities seriously either because they are too rich or too poor to do so or because they seem to get away with it under our legal system, which has evolved to be what it is long before Clinton's watch and will probably remain the same if Bush gets elected. Bushisms can't make people more responsible...so I wouldn't blame Bush either.

73,
Bob Wex w2ilp (Intentionally Lawless Pioneers?)

A directional antenna, and I assume he wants to rotate it, would be a
LP-1001. It was made by Hy-gain and it covers 4-30MHZ. It is a log
periodic design. It came with a prop pitch rotar at the base of a dual
105 foot tower. The actual antenna consisted of a tower section of 85
foot for the boom, and the longest element (19 of them) was 86foot long.

It worked under 2 to 1 down to 3.8 mhz as I remember. It was basically
equivalent to a 3 element mono bander, however without the good front
to back.

Why does he want directivity on say 75 meters?

Good luck.

Dan/W4NTI

EYEWITNESS TO THE GRAHAM EXECUTION

(vote for Bush in 2000 and let's cook more of the F-N blackass coons!)

Huntsville,Texas June 22, 2000

At approximately 8:49 pm,following numerous last minute appeals,including a brief review by the U.S. Supreme Court,and a last minute civil appeal brief filed on behalf of a condemned Texas inmate,convicted murderer Gary Graham was put to death by lethal injection,in what may prove to be one of the most controversial executions in recent history.One witness,an Associated Press reporter, gave a blow by blow description of Graham's last minutes on Earth.

"Gary Graham",announced AP stringer Carl Rove,"was handcuffed to the death gurney.He was surrounded by several witnesses,including the Reverends Jesse Jackson,and Al Sharpton.He already had intravenous tubes connected to his arm,and was awaiting the injection of the lethal drugs,when he was asked if he wanted to say a few words."

"Mr.Graham made an angry,rambling statement,at this point,which actually went on for several minutes.In this statement,he claimed that he was being unfairly executed for a crime that he did not commit.He blamed the white race for all his problems,and called on the black race to take up arms,and fight against the so called tyranny perpetrated against blacks by the white race."

"After his speech,Mr. Graham was slowly injected with the combination of drugs that ended his life.He turned his head to the side,looked at Jesse Jackson,closed one eye,and died."

Rove continued,"And then he shit his pants.And let me tell you,people,I mean this guy pinched a loaf!It kind of spewed,so to speak.It was actually something to see,quite mesmerizing.But Oh my Holy God,did it stink to high heaven!Hoooeeee!!!"

Rove described Graham's last turd banquet as "an explosion,kinda sorta.It actually sprayed across the room,and struck several witnesses,including Jackson and Sharpton.And boy was Sharpton pissed!"

"Shit nigga!",exclaimed Sharpton,"this muthafucka cost me 500 dollahs!Gib ma money!!"Then,according to Rove,Sharpton launched his short,fat body into the air,landing on Graham's dead corpse,beating him with his fists,shrieking,"Muthafucka!!I'm gonna beat the black off a you!!"

A horrified Jackson immediately set upon Sharpton,and tried to pull the short squat toadstool off the malodorous cadaver.
"Reverend Sharpton!",cried Jackson,"The nigga's dead!Stop beatin' on 'im.He ain't got no money,anyway.We'll pay the guards to toss his cell later.Jesus H. Christ on a fuckin' Ritz cracker,somebody light a fuckin' match.This boy's shit is funky!!",he implored to the remaining crowd.

"But,to tell you the truth",Rove continued,"We beat feet outta that stink chamber,I'm here to tell ya!That boy's shit STANK!!Man.my eyes were waterin'! That funk ain't gonna leave my nostrils for some time.I just hope they bury that boy deep!"

Rove then proclaimed,"Man,let's get drunk,folks.I'm buyin' Let's hit the nearest bar,preferably one with a lot of cigarette smoke.SHEEIT THAT NIGGAH STINKS!!!!!"

1628. Re: INDEPDANCE DAY with handgun, musket and honor

Newsgroup: rec.radio.amateur.misc

Source record: 108415

That'll never happen! Liberal Democrats are more and more Socialist leaning, anyone with more than two brains cells can see that whether they listen to Rush or not. Personally I don't.
Now onto the subject at hand
~~~~~~INDEPENDANCE DAY~~~~~~~
INDEPENDENCE DAY ---

Have you ever wondered what happened to the 56 men who signed the Declaration of Independence?

Five signers were captured by the British as traitors, and tortured before they died.

Twelve had their homes ransacked and burned. Two lost their sons serving in the Revolutionary Army; another had two sons captured.

Nine of the 56 fought and died from wounds or hardships of the Revolutionary War.

They signed and they pledged their lives, their fortunes, and their sacred honor. What kind of men were they?

Twenty-four were lawyers and jurists. Eleven were merchants, nine were farmers and large plantation owners; men of means, well educated. But they signed the
Declaration of Independence knowing full well that the penalty would be death if they were captured.

Carter Braxton of Virginia, a wealthy planter and trader, saw his ships swept from the seas by the British Navy. He sold his home and properties to pay his debts, and died in rags.

Thomas McKeam was so hounded by the British that he was forced to move his family almost constantly. He served in the Congress without pay, and his family was kept in hiding. His possessions were taken from him, and poverty was his
reward.

Vandals or soldiers looted the properties of Dillery, Hall, Clymer, Walton, Gwinnett, Heyward, Ruttledge, and Middleton.

At the battle of Yorktown, Thomas Nelson Jr., noted that the British General Cornwallis had taken over the Nelson home for his headquarters. He quietly urged General George Washington to open fire. The home was destroyed, and Nelson
died bankrupt.
~~~~~~

Francis Lewis had his home and properties destroyed. The enemy jailed his wife, and she died within a few months.

John Hart was driven from his wife's bedside as she was dying. Their 13 children fled for their lives. His fields and his gristmill were laid to waste.

For more than a year he lived in forests and caves, returning home to find his wife dead and his children vanished. A few weeks later he died from exhaustion and a broken heart.

Norris and Livingston suffered similar fates. Such were the stories and sacrifices of the American Revolution. These were not wild-eyed, rabble-rousing ruffians.

They were soft-spoken men of means and education. They had security, but they valued liberty more. Standing tall, straight, and unwavering, they pledged: "For the support of this declaration, with firm reliance on the protection of the divine providence, we mutually pledge to each other, our lives, our fortunes, and our sacred honor."

They gave you and me a free and independent America. The history books never told you a lot about what happened in the Revolutionary War. We didn't fight just the British.

We were British subjects at that time and we fought our own government! Some of us take these liberties so much for granted, but we shouldn't. So, take a few minutes while enjoying your 4th of July holiday and silently thank these patriots. It's not much to ask for the price they paid.

Remember: freedom is never free!

The Fourth of July has more to it than beer, picnics, and baseball games.

The doorway to freedom is framed in muskets!

just run across a 1930 UT class book
has THE VOLUNTEER 1930 across the front

it has the name ODESSA DANCAN inside front cover

DR H A MORGAN WAS PRESIDENT
AND MAJOR ROBERT R NEYLAND
WAS THE FOOTBALL COACH

it tells about the 3 years the football team
went undefeated 27 / 28 / 29 and one loss in 26

any one need any info about this book email me
im not a big UT fan but i live in tenn

1634. Linux radio receivers?

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-28 00:00:00 UTC
From: aaronp@removeme-shore.net
Message-ID: <o4d65.73$YH5.14339@news.shore.net>
Source record: 108421

I'm looking to setup an online automated SIDS receiver. Basically I need a radio kit that I can use to pick up 24Khz and hook it up to linux through an analog to digital converter and thereby record it. Then I can write a perl script to do all sorts of fun with it. I'm having a heck of a time finding any info on this though.
Does anyone know of an A2D converter that works under Linux? The WinRadio card works well (i use it to monitor meteor showers and forward scatter) but it doesnt go down as low as 24Khz.
Any help is appreciated. Thanks!

You believe everything that you read on a webpage? If so I'll put one up - just for you, the non-thinker. LOL :-)
Your link, the one YOU provided offers no PROOF that the previous post is inaccurate. The link, the one YOU provided claims that proof was offered at a different location and provides a link to it (the new page). That link, the one provided by the one YOU provided, links to a post, a freaking newgroup with another opinion from a liberal. Where's the proof? I checked several of the links and some looked as though they were created by a child, the others gave more info but didn't disprove or dispute and claims made previously.Granted, some of what was is that post I made may not be accurate but the one you gave was way the hell off.
Besides that why would you attack the piece, call ME a non thinker, and do it all without contradictory evidence. I guess it's just a liberal Democratic tactic to do those type things.
Ps. I notice that you have no name, no spam, no call, no credibility.
Now Go Do The Right Thing !

1636. Best study guide for Technician Exam?

My husband has had a ham license for years now, and is encouraging me to at least a technician ticket so that we could keep up from car/home via VHF. (Beats the heck out of celluar, he says).

Can someone recommend a good/efficient study guide for today's FCC Technician exam?

thanks very much

Excellent points, all, Radiosigs-Guy. Let's take them one at a time.

1. If he's a daddy's boy, then maybe our troops will go after military targets instead of asprin factories like we did under Komrade Klinton's regime.

2. Regarding the alcohol thing, I don't think he inhaled.

3. Financial hanky panky .. that was where Queen Hillary "coincidentally" made a bundle on a commodities trade .. without insider information.

4. Who cares what his wife looks like. Maybe Komrade Klinton will leave Monica's phone number in the presidential rolodex. As long as character doesn't matter ... right?

5. Not a lethal injection chamber. Ole' Sparky would be a lot more fun.

6. He darn well better cater to big oil. The Amazing AlGore (inventor of the internet) would lose a fortune if he didn't. Occidental was it? Yeah .. Armand Hamer and Big Al was buds on that one. Left Little Al set for life. We should all be so well off.

7. With a Republican administration, maybe we can stop the KommieKrats from robbing the Social Security fund to pay for their give-away programs, and the elderly can again afford to buy medicine.

8. I feel sure President Bush will make our national security a top priority. Hopefully he can finance his campaign without selling the rest of our secrets to the Chinese. Assuming we have any secrets left. (Fat chance.)

9. Good point. At least Komrade Klinton had The Amazing AlGore (inventor of the internet) for his VEEP. Maybe these 2 VEEPs would be tied for smartness. Or not. Quayle mis-spelled potato. The Amazing AlGore (inventor of the internet) came away from a Buddhist Temple with $65,000.00 in his pocket and didn't realize he had been fund-raising. (Yeah .. right.)

10. Well, Radiosigs-Guy, you gotta remember who brung you to the dance. I don't see Governor Bush getting a lot of support from NOW, NEA, NAMBLA, NARAL, etc. Instead his support seems to be coming mainly from those aligned with Queen Hillary's "vast right wing conspiracy". The Christian Coalition is a sub-set of this multitude.

Gotta give Komrade Klinton credit .. he remembered who brung him. And he worked to keep his promises to them. Hopefully, President Bush will do likewise.

Now, now, Ych-Man. Let's be a little more statesman-like. This is, after all, a public forum.

Not all the asses Komrade Klinton and The Amazing AlGore (inventor of the internet) kissed were fat or kosher. Some were Chinese. Some were Buddhist (from who knows what nationality.)

Like Charlie Trie and Maria Hsia. And then the poverty-bound Buddhist monks who just happened to have five grand apiece on them when The Amazing AlGore (inventor of the internet) stopped by to say hello.

You see .. The Amazing AlGore (inventor of the internet) always stops at Buddhist temples to say hello. It's that just this once, all the guys were packing five grand. It must have been a miracle. A room full of guys who had taken vows of poverty just happened to have five grand on them, and in walks The Amazing AlGore (inventor of the internet). And they say there's no god.

Oral Roberts should convert to Buddhism. Sounds like the kind of miracles he likes. Somebody call Robert Tilton and Benny Hinn, too.

Regarding the things Komrade Klinton may have kissed .. well, I guess we'll just have to wait and catch Monica and Genifer on Jerry Springer. But rumor has it that he kissed plenty. I guess it takes a lot of kissing to keep "the most ethical administation in history" on track.

1642. Re: It'd be nice to call G-2SZ...

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-28 00:00:00 UTC
From: Steven Gibbs <sgibbs@guernsey.net>
Message-ID: <3959B383.8F3DCD35@guernsey.net>
Source record: 108429

I've tracked down a copy of the RSGB's history, "World at
their Fingertips", and on p.101:
"Cecil Goyder, a former pupil of Mill Hill School in North-West
London, using the school's transmitter (G2SZ) made the first two-
way contact with New Zealand (Frank Bell ZL4AA) on October 19,
1924 ...."
A footnote says
"Goyder was a student at the City and Guilds of London College
at the time and his visit to Mill Hill School on October 19, 1924
was the first he had made for some months."

Frank Bell's QSL is reproduced, and it shows the callsign Z-4AA,
so the reference to ZL4AA above is to the call he was subsequently
allocated, not to the unofficial Z-4AA he was using at the time.
Likewise, the school call would have been 2SZ, or G-2SZ with the
unofficial prefix for England.

I don't recall hearing that the 75th anniversary of the contact
was celebrated last year.

> some of what was is that post I made may not be accurate but the one you gave
> was way the hell off.

Yes your post was "not accurate" (another way of saying that is
misleading), and you would not have been caught if the Folklore Society
had not looked into the claims. They say:

"We're left with the impression that many of the signers of the
Declaration of Independence suffered the loss of their property, their
health, or their lives because they dared to put their names to a
document that repudiated the sovereignty of the British government.
Aside from the fact that many of the statements in the original piece
about the losses suffered by some of the signers are greatly
exaggerated, one searches in vain to find more than one man (Richard
Stockton) who came to harm as a direct result of having put his
signature to the Declaration."

> Besides that why would you attack the piece, call ME a non thinker, and do it
> all without contradictory evidence. I guess it's just a liberal Democratic

Love the labels, don't you? Typical sign of the non-thinker .

And in case you don't get it (and you don't), my qualifications don't
matter. It is the San Diego Folklore Society that says your're wrong.

LOL!!!

from Dave's link:

snip

This is all generally true, but it's also the simplified comic book version
of history we present to second graders, a version which glosses over all
the incongruities that get in the way of a good story.

snip

many of these men were slaveholders whose concept of "liberty" was a
decidedly narrow one by modern standards

snip

Thanks, Dave, for the reminders:

1. Of the drubbing the second-graders' brains get, which passes for
'education', from their teachers' unions' members. First impressions of
history can last a lifetime.

2. Injection of judgment by 'modern standards', of history, which is typical
of debunkers like snopes.

Who debunks the debunkers?

I have for sale Svetlana 4cx800a & 4cx400a nos tubes. These are new tubes. They have never been used. These tubes were made to the rigid specs of the Russian military. They are very heavy duty tubes. The are every bit as good as any tube offered for sale anywhere! Including the tubes offered for sale by the large commercial tube distributors. The price on the 4cx800a is $200.00 plus shipping for a matched pair and $110.00 for a single. The 4cx400a tubes are $90.00 each plus shipping. You can learn more and see my references at my web site. http://msnhomepages.talkcity.com/ClassifiedsCt/tomstubes/ Thanks for your time.

1652. Warning! Is Export R US going out of business?

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-29 00:00:00 UTC
From: John Amero <" johnaNO§PAM"@island.net>
Message-ID: <395C1D20.2EA92CD2@island.net>
Source record: 108189

Export R US keeps warranty radio.

They have my Galaxy 99 for warranty repair which failed in the two days that I had it. It took 6 seeks for it to come to Canada by parcel express which they insist on sending it by. This method is not traceable across the boarder.

After I sent it back for repairs Export R US _s a y_ they sent it by regular post. It is now lost!!!! And I am pissed!!!! They have had my money in CAD since December... $587.86 plus $80 Canadian customs.

To all Canadians do not deal with Export R US.... you will will just waste you money.

BTW Export R US is not answering their phone, E-mail, or phone messages.

John, sorry to hear you're having
trouble with Exports R Us. I went
through my records and found the
following info that you might want for
your records.

1. Radio was received by us on 3/8/00
2. New DX99 ser# 913827 shipped to
Exports R Us on 3/30/00
3. Our outgoing inv# 000911

I just called them and left a message
because they aren't answering
phones for some reason. Keep me posted.

John

Janet Reno cooked a big dinner for all her lesbian girlfriends. Her guests raved about the delicious meal and asked Janet if she had a secret recipe, to which Janet replied: "Not really, it's just shake and bake".

"Political Correctness is nothing but tyranny with manners."

One can deduce several conclusions from the speech.

1. It is a Machievelian shot across the bow. They're going to get our VHF & UHF because they are mamma and we don't deserve it.

2. The US ARS must desperately look for and foster a socially redeeming value the
voting public understands and appreciates, that can be used as a political shield. And, deploying a self-serving wireless internet ain't it.

3. The FCC is continuing to be misled by stock kiting press releases from the likes of Motorola and Qualcomm about miracle products that are just around the corner. Of course those pesky amateurs holding on to those frequencies are holding up all of the progress.

4. Perhaps the US ARS should take note and make their own smoke and mirror projections about socially redeeming, miracle products they are just about to release.

73,
Clay N4AOX

Did you actually read the speech? If so, how could you have possibly
"deduced" this? Mr. Hatfield stated:

"Fifth, as the rest of the telecommunications world makes the transition
to digital techniques, and there are very few exceptions to that trend,
the amateur service will look antiquated if it is not making progress in
that direction as well."

I couldn't have said it better myself.

Source record: 108302

Hi, I just upgraded my license, and got all this expensive radio equipment. But I am having this problem. I have a Sony ICF-2010 Shortwave radio that receives on ham bands. When I transmit CW on 10 meters i can't hear the tone of the code on the shortware radio. I only see the signal strength bar go all the way up. The shortware radio is set into LSB/CW mode. Is this what is heard (or in this case, not heard) on every radio, or just the shortware radio? If this is what is heard on every radio..then what am i doing wrong?

Thanks, Felix

Agreed, if we are limiting the discussion to editions of study guides published in the last ten years. The older guides, particularly the ARRL editions, are super as general reference titles. This has a lot to do with the format. Even today, the ARRL format is to treat a topic, such as antennas and propagation, with text and photos and drawings and figures, and to follow that up at the end of the book with Q&A. The other publishers simply list the questions and the answers, with a bare minimum of explantory notes and elaboration.

While not strictly study guides, there are other first books like _A Course in Radio Fundamentals_ and _Understanding Amateur Radio_ (both ARRL pubs written by the late great George Grammer) that I feel are superior to the current edition of the ARRL Handbook, for the reason that the quality and clarity of the writing are far better, and also because they deal with the real fundamentals, like impedence, resonance, tank circuits, Q, etc. in a manner that is much clearer and easier to undertstand for the beginner, but without sacrificing any accuracy or hardly any completeness.

In fact, for the raw beginner, a 60's era ARRL Handbook is probably a better choice than a recent edition. While the older editions obviously don't cover topics like computers, data communications (other than RTTY), CMOS, microwaves or the like, they give the reader a better introduction to basics of AC and DC electronics, as well as a more solid, useful grounding in fundamental radio circuits. After reading the 1998 editions of the ARRL Handbook & Operating Handbook & Antenna Handbook, I went back to the Grammer titles and the 1959, 1963, & 1968 Handbooks, and learned a lot more, and more quickly.

Just a point of clarification: r.r.a.m was created expressly for the
purpose of housing all the discussion that spilled-over and was not on
topic in the other NGs in this heirarchy. Thus, if hams are discussing a
subject and the thread drifts off the territory covered by the NG
charter, then that thread should be brought here. This group is
basically anything goes, and is necessary so that the other groups
remain on topic.

1671. Independence Day / Price of Liberty urban legend

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-29 00:00:00 UTC
From: nospam@fastband.com
Message-ID: <8zqqhf$RZ91$2@nnrp1.deja.com>
Source record: 108310
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,alt.folklore.urban

The "Independence Day" essay has been around for several years, but is better known as "The Price of Liberty" essay. It surfaces around the 4th of July each year because of its apparently patriotic content. Nonetheless, it has been listed as an urban legend by http://www.snopes.com, based upon a detailed examination of its claims by a professor of history then located at Elizabethtown College in Pennsylvania. His name is Professor E. Brooke Harlowe.

Prof. Harlowe has since moved to Susquehanna University and his new web pages can be found at http://www.susqu.edu/FacStaff/h/harlow. His original study is now posted by The Connecticut Society of the Sons of the American Revolution at http://www.ctssar.org/articles/price_paid.htm. It is in a much more legible format than in the URL referenced by www.snopes.com.

The upshot of it all is that this professor of history finds "The Price of Liberty" to be seriously in error in too many places; i.e., it is indeed the stuff of urban legends, having been irresponsibly reprinted by several newspapers which took it as fact, as well as by organizations which should have known better, such as the City of Annapolis (www.annapolis.gov). The number of web pages which have republished the essay as though it is factual are practically beyond count.

The essay employs the classic method of mixing generous doses of fiction with a dash of truth here and there, to come up with something which will be swallowed whole by the gullible.

As a result, the essay does a large disservice to the *real* history of the founding of the United States. Unfortunately, it will likely reappear in many places as July 4, 2000 approaches and continue to spread its misinformation.

I just got screwed on e-bay on an Alinco DJ-480C1. This model only
transmits on 420.000 to 440.000 (European)
Does anyone have a mod to extend the TX to within the US portion of the
band???

Your transmitter is probably blocking the signal. In order to hear
yourself the receiver must be capable of not overloading when a nearby
transmitter is on the air.

No, normally you will hear the cw as a tone.

1685. math problem?

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-29 00:00:00 UTC
From: "G.Singer" <kc0cat@hotmail.com>
Message-ID: <GQO65.2141$482.460608@den-news1.rmi.net>
Source record: 108324

I'm working on a remote control project and would appreciate it if someone out there could check my math. Something seems amiss.

If I pretend that the maximum allowed signal strength levels published by the FCC in OET bulletin no. 63 are in english, I wind up with calculated allowable levels of output power in microwatts. My hope is that when radio geeks using standard typewriters get lazy, they start making up shorthand for hams. In some other spots, nomenclature like f/3 means third harmonic rather than freq. divided by 3.

For (125/3) x f(MHz) - (21250/3) microV/m @ 3m
is this supposed to be 11000 microvolts/m for f=433.92 MHz?
That works out (using FCC approx. equation) P=0.3(E squared)
Therefore P = 36.3 microwatts. I'm supposed to be at least P=1 milliWatt
What do you think?
Thanks,
Gerry

You've confused reception and transmission. If the remote control xmtr even nudges a 5 watt scaled wattmeter, you're home free. You'd have to be into some serious power before the FCC frowned. Come back to the board and let us know what kind of project you're cooking up. With any antenna at all on either end, I wouldn't sweat anything except distance.

To get the remote control passed by the FCC for consumer distribution I must abide by their spec and the unit must be tested by a recognized lab before I can obtain an FCC ID#. Not sure what you meant when you said I have confused Reception with Transmission, can you explain further. This formula sets forth the requirements for emissions to be measured at 3 meters.

I have a mint EDX2 auto tuner I would like to sell/trade. This tuner will plug directly into the DX70/DX77 HF radios, or can be rewired to work with most any HF rig. I have gone mobile and don't require it anymore. Paid $549 Canadian, approx. $300 US. Will sell for $150 US or trade for any sort of HF gear. If you have something laying around collecting dust, let me know, I might be interested.

You can view at http://www.alinco.com/usa.html

Please reply direct as I don't check the newsgroups too often.

We certainly do need to think about what the public would want
us doing with their airwaves. (need I mention the likely thought of
John Q Public on Morse Code here?) that is something only a few of us
are thinking about now

However a selfserving wireless interenet that could survive in
various type od disater would certainly help the ARS as a building
block in said shield

The Radiosigs-Guy is a little quick on the trigger with:
>It's a boring site, a waste
>of bytes and therefore I request you scrap it.

A little editorial restraint might be in order, here, Radiosigs-Guy. There are many characteristics about the post that you, of all people, should appreciate.

1. The post has no mention of the Tiny-Tenna.
2. The post has no links to The Great Liberty Net.
3. The post has no links to your old friend "Stromitler".
4. There is no mention in the sig file that he is still Chairman of the Board of BARF Enterprises International, Inc.

So cut him some slack for now. Tighten the screws later if necessary.

Further, the Radiosigs-Guy puzzles:
>Do you get your jollies by looking at or stroking/petting all
>or some?

Perhaps all of the above, Radiosigs-Guy. Truth be known, he has a tough time keeping real friends. Can't make up his mind who he likes, and resorts to a little back-stabbing when he thinks it'll get him points with someone he admires. So people tend to stay away from him in a short time. (Personal experience .. long story. I have witnesses.) (Not Jehovah Witnesses, just plain witnesses.)

Hi Don -- The following usually gets posted on the first of the month,
but providing it now might be more timely:

X-Newsgroups: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors
X-Newsgroups: rec.radio.amateur.digital.misc,rec.radio.amateur.dx
X-Newsgroups: rec.radio.amateur.equipment,rec.radio.amateur.homebrew
X-Newsgroups: rec.radio.amateur.misc,rec.radio.amateur.policy
X-Newsgroups: rec.radio.amateur.space,rec.radio.broadcasting,rec.radio.cb
X-Newsgroups: rec.radio.info,rec.radio.swap,rec.radio.scanner
X-Newsgroups: rec.radio.shortwave,rec.answers,news.answers,
Subject: List of the rec.radio newsgroups
Followup-To: poster
Approved: news-answers-request@mit.edu,rec.radio.info-moderator@primenet.com
Distribution: world
Expires: 01 <following month> 2000
Summary: This article provides a list of the rec.radio newsgroups; it is
posted alternately with the longer "Guide to the Rec.radio NGs"
Keywords: radio amateur ham cb scanner shortwave netiquette
X-Last-Updated: 2000/06/01
Version: 1.1 created 98/03/05 03:50:23
Posting-Frequency: Posted on the 1st of each month

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)

rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

1707. Re: FCC's Dale Hatfield's View on Amateur Radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-06-30 00:00:00 UTC
From: Jeff B <ka1ogmNOkaSPAM@gis.net.invalid>
Message-ID: <14ca1faa.6cfc1574@usw-ex0105-034.remarq.com>
Source record: 108203

Unfortunately, Dale Hatfield's employer killed any hope of
amateur radio's previously burgeoning activity on TCP/IP &
Packet when the posting of a commercial 1-800 number on the
bulletin board network prompted the FCC to rush right in and
start slapping fines up and down the Eastern Seaboard upon those
amateurs whose only infraction was to operate the BBS's.
Despite the outcome, who wants to have that kind of shit hanging
over your head for a year, just because you decided to try a new
digital mode? The whole ARS internet domain simply died as a
result.

But, of course, that's really just a small and moot point.

More to the point, the FECES has absolutely no interest in doing
anything but migrating all amateurs into the lower frequencies
on HF, and off of the VALUABLE spectrum space that Hatfield so
tenderly warns us about in his speech. The FECES is a bought
and sold shill for big business, and regardless of what he or
any other commissioner might say in a speech, the ARS's only
value to the FCC is from the games they can play by forcing up
the price they get for OTHER space as long as we have our
allocations in place. Then, later on, every little slice they
take away from us will fetch even better prices.

The only future that will ultimately left for hams is below
30mHz. Get used to it.

Doc,
Are you real sure that the NRA sponsored the kid's
carrying of a hand gun? Did you get the kid's NRA
membership number? How about his mother's membership
number, think he may have been covered under hers?
By the way, I agree with you about the 'gun nuts',
we just have a problem on the definition of who the
'gun nuts' are. I define them as irresponsible gun
owners, and non owners. I also 'lump' in those who have
an unreasonable fear of guns. Those that can't understand
that 'people' cause things to happen, not inanimate
objects. And, while they don't usually own/have/carry
guns, ANY 'crusader' for ANY cause. (Maybe I should just
classify them as 'plain nuts'.)
I wish you'd find another 'cause' to 'stump' for,
this one is getting 'old'.

Bob,
I agree with your sentiments. I also would like to disagree
about the ~way~ you stated a couple of things. First, the words
of the U.S. Constitution are very clear. There is no doubt, at
least in my mind, as to what the 2nd Amendment says. It doesn't
"seem" to say, it does say.
Another statement I tend to have a problem with is where you
say, "Some believe that in their location they need the guns for
their own safety and the safty of their families". The way it's
stated seems to imply that this isn't a reasonable sentiment. I
assure you that there are places in this country where having a
fire-arm of some kind is a very reasonable 'insurance' policy.
These places aren't just in large urban areas, but can be anywhere.
So, having 'picked' on you for these two statements, I'll
go back to reading again...
Paul/W5LZ/'Doc(different one!)

Hi !

Hereby I inform al DXers of our annual IOTA DXpedition. This year we will be on the Archipel of LOS FRAILES in the Caribbean Sea.

Callsign: YW5LF
IOTA: SA-059

Our activities will be on all bands (incl. WARC).
LOS FRAILES will be QRV (if all works as planned) from July 12 to 16, 2000 on CW &SSB.

The expedition is organized by the Venezuelan Navy and our DX-Clubs.

QSL via W4SO (maildrop)

CUL

Ray

Here our problem. During field day we decided to go QRP on batteries to get the 5 point multiplier. Well at the time we thought that the free stations where not limited to QRP so we ran our VHF/UHF and satellite stations at full power. Is this correct or should he have QRP on the free stations?? Dose this mean we can still be the 5 point multiplier on the stations that did count?? Thanks in advance.

I am studying for Element 1 Morse code exam. My problem is I am a counter (oh, that was four dots, that's H). You get the picture, I lose time and miss several letters in the mean time. I have tried various speeds but the slower speed, below 5 WPM, makes the problem more acute. Yes, I practice, practice, practice, but at my age (and don't ask - thank you very much) I have the habit of counting; phone rings, stairs, church bells, etc. So my ham friends, if you had my miss-fortune I would appreciate hearing how you conquered the code to pass the exam. 73

1720. WTD: Windows NT/2000 IIS based interface for PCR-100/1000

Newsgroup: rec.radio.amateur.misc

Greetings:

Well, most of it is in the Subject line, however, I know of the Linux platform JAVA based program. What I am really looking for is a Windows NT/2000 based program that will allow remote control and interconnection of the Icom PCR-100/1000 radio and the Internet.

All of my current configurations are Windows NT 4.0/2000 Server varieties utilizing IIS 4/5 and I don't want to bring on an additional system just for Linux.

If anyone has any ideas you can post them to this News group, however, please also post them directly to me as well: n3yyp@arrl.net .

Thank you,

Cliff Owen

Source record: 108217

Excerpted from the Charleston (W. Virginia) Daily Mail:
UPI - Dateline Glendale, W. Virginia:

A radio operator has reported "bouncing" short-wave radio signals off Unidentified Flying Objects. Said operator claims to have contacted stations as far away as the U. S. Antarctic station at McMurdo Sound. An extremely reliable source claims to have heard of "bouncing" signals off meteor trails but never UFO's. The Radio Society of Upper Volta is investigating these claims. (stop ind.)

Do you listen to music? In particular, how about Beethoven's Fifth
Symphony? Do you count the "Daa Daa Daa Dum" part? If you do, I
can't help you. If you don't, you're using rhythm. That's how you're
supposed to tell the difference between the characters. It's the
rhythm. Make music out of it...

I wish I could help more, but I really don't know what else to say.

Try a program called HAM UNIVERSITY
In addition to the new exams, it has Morse practice exams. The thing that I
think might help you is a game called PENTODE on the disk. It is a MORSE
recognition game, You place characters on the screen as you hear them with the
mouse. It has a scoring system that keeps track of your progress. As you
improve, it adds letters and increases the speed. Students in my ham class
find themselves "playing the game" rather than counting dits. If you can't
find a copy, drop me an email and I'll send you a demo disk with the program.

73 and good luck with the code.

They invented atomic submarines, I didn't sell my sailboat.
They invented the Hubbell satellite telescope, I didn't sell my 6" reflector.
AlGore invented the Internet (Gasp, choke giggle, SURE ..) I have not thrown
away my key.

Try studying using the "Farnsworth" method. Increase the character --speed-- to 18-20 wpm. Increase the character --spacing-- to make the overall rate 5 wpm (Most code practice computer programs support this). The higher character speed makes "counting" more difficult and allows you to hear the characters as an entity, rather than a series of dots and dashes.

Some claim this also helps when attempting to increase copy speed. You don't have to "re-learn" the character sounds, just "close the gaps" between characters.

73 es gud luck,
Bill

> free stations??

The rules state that in order to get the 5X QRP/battery multiplier, ALL FD contacts must be made using 5 watts or less output power, AND must be powered by energy sources other than commercial mains or petroleum-derivative engine-generator sets.

Decades ago, it was possible to have multiple power levels. But today, the power level of the highest-power rig in an FD setup is the one that determines the power level for all FD QSOs from that setup.

> Dose this mean we can still be the 5 point multiplier on
> the stations that did count??

Unfortunately not. Using more than 5 watts in any station disqualifies.

But there may be a way out:

The FD rules say that any station that begins setup before 1800 UTC Saturday is limited to 24 consecutive hours of operation, while stations which wait until 1800 can go 27 hours. However, I have read of stations that set up before 1800, yet operated the full 27 hours - they just did not claim the QSOs made in the last 3 hours for point credit. (I recall that the late great KH6IJ used to do this, just to maximize the number of hams who could work Hawaii on FD.) The hams who worked him got QSO credit, but he didn't.

It might be possible to apply this idea to your situation. You might consider not claiming the contacts made with more than 5 watts for point credit. Tally up the point scores both ways, and see which is greater.

Your best bet is to email the folks at ARRL Hq, and ask what they will allow in this area.

The old adage applies yet again: "If it sounds too
good to be true, it probably is"

Seems that application of it to "ham radio" dealers and
repair shops is MUCH higher than that for ur average consumer
goods. With today's surface mount electronics it is near
impossible for hams to fix their own equipment.
Perhaps like almost all other Jap electronics
products, it's now cheaper to toss a rig into the trash
and buy a new one instead of getting the old one fixed.

the free stations should have been 5 watts also, plus if you ran 1A Battery
you didn't get VHF/UHF for free. That was for 2 and above.

I had one of those DX-100's.
It got killed in a lightning storm. :(
I like their 1970's shortwave, the one that did something like 100khz to 30mhz.
It was silver and metal and had a separate speaker that was also silver and metal and matched the receiver.

Well thanks for the info I guess we will just have to trash our 6m and Satellite logs :-(. Maybe next year. At least we will still be able to count the other stuff! :-) BTW we where 2A so the VHF/UHF station would have been fine if I ran the right power(all that work for nothing) Thanks again! .

On the one hand, change is certain as are death and taxes, on the other there is to everyone's benefit a great deal of variety in life. Color B&W, and now digital, stereo mono, and what ever happened to quadrophonic? Oh surround sound of course! We people undoubltedly everyone, prefer this or that, myself included, but to shun one thing for the other is to deny ourselves a well rounded enjoyment of life. I have and use B&W TV as well as color, as well, stereo and mono sound equipment. I do not send or receive morse code to any fruitful degree, but I listen to whatever my radio will pick up. Isn't it a wonderful thing that I can hook up a reader to my radio and let it transcribe the code? Or would it be better to learn how to do it myself? It doesn't matter for I may just learn and in any case I have the choice.

Not bad, however I can't help but make one comment.
Don't take it as a put down but rather as a suggestion.

On the personal picture section of your web page the statement
under one pic said something like this: "I spend 50% of my time on the
radio and 50% of my time on the computer." This is obvious if you
look at the picture.

It would be better if you could some day post a new improved picture
and a explaination below that says: "I spend 33% of my time on the
radio, 33% of the time on the computer, and another 33% of my time
looking after my health.

Okay, Mr. Anonymous -- let's have a race: You build a transceiver from
scratch for your favorite mode, and I'll build a CW transceiver. Let's
see who finishes first and can rack up 1000 QSOs. I'll send you a
soldering iron if you don't already have one. // KH6O

Firstly, G., let me apologize for the filth from some guys
in this N.G. People like kc8jbo are already on the "roundup the
usual suspects" list from the FCC.
If it's going to be commercial, it's going to cost you time
in a test chamber. Before that, go to an antenna range and
take fs meter readings. Iso readings should tell you pretty
much about strength and pattern. Still curious as to what
it is you're working on.
Again, my apologies for the human garbage that washes up here
from West Virginia.
I may have more answers, so e-mail me.

I won't say anything about Lloyd one way or another. As far as having a tech ticket for a long length of time, that is about as long as I've had mine. I haven't transmitted in years either. So what is someone supposed to do, call the FCC and cancel there ticket so they won't be accused of "failure to upgrade'? Why bother, it doesn't eat anything.

And that is just so wrong on so many levels ($1). Having the option to shift power up and down according to the bands, modes, and conditions would be right in line with the FCC requirement to use the minimum power necessary, yadda yadda.

It would also add a bit more strategy to the hard-core contest clubs.

Sure, it's another stat to accurately log in under sometimes frenzied conditions and yeah, it can be fudged by FD weasels, but so can a lot of things. If I'm underestimating this, it might be the showstopper.

Well you see CW....this guy Lllllloooooooyd feels compelled to tell
everyone all about his view of ham radio. How he badmouths higher
class operators, that he doesn't even know. How he supports a known
radio terrorist organazation and then has the audacity to not only come
back to r.r.a.m but to cross post to nearly every other group he is
involved with.

The man is a demented first class fruit cake. His ability in the CW
mode is really un-important. His presence is however. Have you ever
heard the term "Oxygen bandit"?? Thats Lllloooooooooooooooyd.

I am quite familiar with Lloyd (and his cohort, the Tiny Tenna man, who under Lloyds urging, threatened to sue me a while back). No, I had never heard that term before. Best laugh I've had all day.

Hi Fred,
You know those pictures of me were taken in Oct 1999. Since then I have
been 'looking after my health' and have been following a weight loss plan that
is been prescribed by my primary care physician. I have come down from 313lbs
to 270 and am going for more.
I hope this meets with your approval.

I'll tell you this. If we could put Robertson, Falwell, LaPierre and Helms into a space capsule headed for Alpha Centauri, we'd all be better off. Getting rid of four pain-in-the-tuchus parasites would add meaning to "life' liberty and the pursuit of happiness" for every American.
AF2Y

The wit of the Radiosigs-Guy scores again with:
>Regarding Clinton, he made his bed. Now he'll lie in it.
>

Right again, Radiosigs-Guy. Komrade Klinton lies everywhere. In bed. In court. On TV. You name it .. he lies there. The Amazing AlGore (inventor of the internet) has had 8 years of fine training for the days ahead.

Komrade Klinton:
"I did NOT have sex with that woman - Miss Lewinski".
"Vince Foster committed suicide".

The Amazing Algore (inventor of the internet):
"I invented the internet".
"I didn't realize I was fund-raising at that Buddhist temple".

Yep. Two peas in a pod. Hopefully they'll soon be two jailbirds in a cell.

You remember "Tale of Two Cities?" Based on Biblical scripture, "A time to live..a time to die...a time to sow...a time to reap.." and all that jazz? On ham radio there was a time for no Rich and now for Rich. My question is how Riley took his accidental "resignation" by e-mail as formal when the bill was just now passed legalizing such a thing? Isn't that depriving someone of his rights? Obviously there was a time for Riley to appear and now there's a time for him to disappear.

If that happens, who'll run the country-Dennis Hastert, the Speaker of the House? Al Gore, who really did invent the Internet in a Tennessee retreat(maybe at Polly's farm?) should not be equated with Clinton's misdeeds. Al's a square shooter, the inventor of the environment as well as the Internet, a provider of havens with flush toilets to outhouse- minded white trash, a big" tipper" and a man who'd turn your guns into plowshares as the Good Book preaches. What more do you want of the guy? He's the male counterpart of Mother Theresa. Amen.

Thanks for the insight, Radiosigs-Guy. Tennessee is indeed a great state. Home of myself, KF4TOH, Elvis, Purty Miss Lo-Retter Lynn and a few other fine folks. As a hot bed of innovation, the state is without peer. FedEx was invented here by a home-town boy who made only average grades in college. And country music were invented here. All the greats .. Roy Acuff, Flatt & Scruggs, The Wilburn Brothers, Roy Clark, Buck Owens .. everybody.

And according to Elvis, hound dawgs was invented here, too. And now you tell me that the internet was invented here. By none other than The Amazing AlGore (inventor of the internet).

Now as far as The Amazing AlGore (inventor of the internet) being counterpart to Mother Theresa, there's a few drawbacks here. It seems that he's polluting his favorite boyhood swimming hole with by products of his zinc mining operation. And netting a measly $20,000 a year from it.

And he is in favor of his oil company doing some environmentally unnn-friendly drilling in South America. Just to enhance his half a million dollar holding in Occidental.

Would Mother Theresa pollute the land for "filthy lucre's sake"? I think not. But then there was the prayer breakfast where she got in his face for being pro-abortion. So at least The Amazing AlGore (inventor of the internet) met Mother Theresa once.

Regarding where The Amazing Algore (inventor of the internet) stands on "the Good Book" .. well it stands to reason he'd want to turn guns into plowshares, when "the Good Book" says turn SWORDS into plowshares. There is no mention of turning guns into anything.

Remember when The Amazing AlGore (inventor of the internet) said his favorite verse in "the Good Book" was John 16:3? So much for what The Amazing AlGore (inventor of the internet) knows about "the Good Book".

True enough, though, The Amazing AlGore (inventor of the internet) does have a big Tipper lately. But I think in her younger days she was probably a few pounds lighter.

Keep the information and insights flowing, Radiosigs-Guy. Without you on here, the "M" in RRAM stands for "Mighty Dull".

If You "Suckboys" want your "Master" WB2OTK "PORKBUTT"
back, I suggest you talk him into serving his time off the amateur
bands like should have in the first place. Instead he sent a letter of
cancellation, then said he didn't , then said it was all a big mistake
and somebody else sent it etc. Riley wasn't fooled and God bless him
for it.

Lets face it, you guys are lost without him and have no purpose in your
lifes if he is not with you. That is really sad. Get a life!!

The Radiosigs-Guy has a good idea, but his details are slightly skewed with:
>I'll tell you this. If we could put Robertson, Falwell, LaPierre and Helms
>into a space capsule headed for Alpha Centauri, we'd all be better off.

No, no, no, Radiosigs-Guy. Sending someone somewhere is a GREAT idea. Your passenger list and your suggested mode of transportation are slightly off, though. Here, let me help you some.

We need to send Komrade Klinton, The Amazing AlGore (inventor of the internet), Queen Hillary, Web Hubbell, James Carville and a few of their other KommieKrat Kompatriots to JAIL .. in a BUS. THEN we'd all be better off.

THESE are the PARASITES who are sucking the life out of our country and bleeding the taxpayers of all incentive to achieve. (Komrade Klinton has apparently been sucking a few other things, too, but we won't go there this time.)

Radiosigs-Guy exhibits his usual brilliance with:
>My question is
>how Riley took his accidental "resignation" by e-mail as formal when the
>bill was just now passed legalizing such a thing? Isn't that depriving
>someone of his rights?

You may be on to something, there, Radiosigs-Guy. I think this question is worth pursuing to the end. The departure of Mr. WB2OTK has been an emotionally charged issue from day one. Personally, I don't have a dawg in the fight. But others do, so I heartily endorse a full press on the question of the legality of his resignation from ham radio.

There is a potential road-block to his access to justice, though. If Mr. WB2OTK has ever paid taxes or voted Republican or attended church, he may be in trouble. General Johnny Reno's Justice Department is too busy smoke-screening for The Amazing AlGore (inventor of the internet). With this workload, they don't have time to do a REAL investigation to see if any wrongdoing occured. And if there was any wrongdoing, it would probably be smoke-screened, since that's what General Reno does best.

Johnny Cochran or F. Lee Bailey could probably get at the truth and see if Mr. WB2OTK's license should be restored. But if Mr. WB2OTK is left to the mercy of the KommieKrats and bureaucrats, abandon all hope. Till November, anyway.

The Radiosigs-Guy closes with:
>Obviously there was a time for Riley to appear and
>now there's a time for him to disappear.

Bingo again, Oh Wise One. Good idea, but the "passenger list" is off a little this time, too. Let's tweak it some and see what you think. Here goes ..

There is a time for Komrade Klinton and The Amazing AlGore (inventor of the internet) to appear .. in court .. and then a time for them to disappear .. behind bars.

There .. like it?

> to be awarded to us? // KH6O

Yep maybe an equivalent new citizens band. If Ham leaders have their
way all the Ham bands can eventually, one by one, become Citizens'
Bands and Ham Radio can become Citizens' Multi-Band (CMB).

Jeff...
Anything that the government does can be subject to change. That is
why we have a Congress. In the political arena obsolete laws and
concepts can stay on the books long after they have any real meaning...
BUT On the other hand backlash reform bills are common and when the
need arises the laws and regulations can be changed.

Few politicians economists or sociologists are not in agreement that
the technical education of future Americans is of prime importance.
Most are willing to agree that the future technical abilities of
Americans have become weak. The USA has become a retail and service
economy, with over half of its working population so employed. There
has been a vast loss of manufacturing employment in the USA and this
leads often to a loss of innovative invention. A factory is also a lab
for new development and a starting point for new inventions as well as
value added employment. In my area, Long Island, NY, we have seen the
demise of Republic Aviation and the downsizing of Grumman and the loss
of many smaller firms which supported them.
New York Polytechnic, which has been a first clsss engineering
college, plans to shut its doors in Farmingdale, Long Island in the
near future. It is recognized that there will not be a sufficient
number of engineering students who will qualify or even want to qualify
for future entry. Perhaps this is because of many of the same reasons
that we aren't finding enough serious techie types who want to be Hams
here. What is the answer? You can not get more people interested in
becoming technologists, engineers or hams by making entry easier. IMHO

you have to start in elementry schools and teach stuff that leads toward modern technology from the start. Ham Radio can be both a hobby and a serious start to learning modern technology.
When one starts early the concepts of Radio are not magic, they are not abstract, they are "visualized" and learned with confort and confidence not with fear of failure and the idea that technology has grown so far that it can no longer be mastered. Like all interests, gifts and talents technical abilities have to start in youth and be exercised. Playing a violin may be more complex than beating a tom-tom but with the proper motivation the world has seen many gifted drummers and violinists...almost all having practiced from an early age.

In a recent speech, at the Dayton Hamvention, Hollingsworth stated that Ham radio IS a serious hobby. This is perhaps a step in the direction that I like to take by saying that Ham Radio is a serious TECHNICAL hobby. This is because in order to maintain government support Ham Radio must at least have some basis and purpose. Although I admit that compliance with the basis and purpose, as stated in Part 97, is voluntary and optional as regards each individual Ham...It can not be overlooked for hams as a group. It must be a general goal or the whole concept of Hams will not remain. Sooo...if Hams, as a group, do not continue to take Part 97 seriously they can simply be eliminated. Perhaps at that time there can be special permits issued for the very few real radio experimenters who can be technically qualified...but they would no longer be the Hams that now exist (in the imagination of some Ham leaders) or the CMBers of the future, or members of the ARRL, who are primarily buyers of finished store bought toys and do not take the hobby very seriously.

73,
Hams now need MORE license classes,

As I said earlier, it's an emotionally charged issue, and some proof is:
>If You "Suckboys" want your "Master" WB2OTK "PORKBUTT"
> back

I think the words Suckboys, Master and Porkbutt prove my point. The "other side" should respond promptly, to keep the debate alive.

Mr. WB2OTK certainly has his detractors. Commentary (on and off the air), the tape of "Porkbutt Song", etc etc etc. But he also has a few friends here and there.

Some friends of mine in SC who know of him say he makes fine HF amplifiers. One guy went so far as to say, "Rich can do magic with a pair of 8877's".

Radio homebrewing, gentlemen, is becoming a lost art. If Mr. WB2OTK brings this talent to the table, I feel safe to say he has other merits also.

Let him who has ever built anything from scratch cast the first flame. Ok, let's open it up to include anyone who has ever built a Heathkit .. or a Knight Kit. Appliance operators, please stand down.

Actually, Rich is a friend. That doesn't excuse his
behavior, though. Anyone who was 'there' knew that Rich
backed him self into a corner. His resignation was the
'best' way out. It's too late to cry over spilt milk,
and I'll loose sleep over your opinion of me...

First of all, Mr. Fisher, I did not "ask" to join the ham radio community. I earned that right when I took the license test and the FCC issued me a callsign. And I'm not about to let some pompus, self-rightious, moron erode that right simply to further his own morse code agenda.

You are certainly not a good example of the "traditions and values" of amateur radio, so perhaps you are the one who "mistakenly joined the wrong group." Sadly, other then those at mental hospitals, I don't think there is a group for you.

> waiting to finish what Hitler started.

Interesting that you would be so obsessed with Hitler, Mr. Fisher. Do you see a little of yourself in him? You seem to share some of his "traditions and values" (for example, the exclusion of anyone who disagrees with your views). If Germany ever does find another Hitler (which you seem to think is their goal), perhaps you might consider moving there - the "SS" is a group you could join. You would fit right in.

Good day, Mr. Fisher. Your web page is a waste of hard drive space and your posts are a waste of newsgroup bandwidth. I'll avoid both in the future.

Oh, what nonsense. That black guy (Anthony Hervey) is probably a
member of the KKK and goes around burning "black" churches. How dare
him question political correctness and the liberal reconstruction of
history (their view that civil war was about slavery). Obvious racist
like that should not have a voice in America.

The Radiosigs-Guy will reply in due time. At this moment, he is in a tele-conference follow-up to the out-of-the-country meeting he attended this past week. All the heavy-weight right-wingers are on board. Pat Robertson, Jerry Falwell, Wayne LaPierre, Jesse Helms .. the whole crowd.

They have The Amazing AlGore (inventor of the internet) on the ropes now. In this tele-conference, they are planning the knock-out blow that will send him to jail for life. Thanks to The Radiosigs-Guy, Governor Bush will win Election 2000 in a walk. And The Amazing AlGore (inventor of the internet) will give his defeat speech from Leavenworth.

I know that this won't help, but I have to say that your problem is precisely the reason that I opposed a reduction in CW speeds. At speeds below 10 WPM, almost everyone tends to count. AAbove 10 WPM, it is almost impossible to count, so you *have* to learn the characters as an entire unit of sound. I learned at a character speed (a la Farnsworth and Koch) of 18 WPM. Perhaps you could learn at 10 WPM+ character speed, and persuade a VE to give you the test at the higher speed. It might solve your problem, and has the bonus that if you ever intend to *use* CW, you won't have to start over from scratch to master a speed that is actaully used.

Hey, Dave:

Profundity would escape your notice by default, fella. You probably pay half-price at the mindreader's place. Let's try it this way:

Some government entity, maybe the CDC, or the FDA, wrote about saccharin being the carcinogen of the century 20-30 years ago, since rats, fed the equivalent of 800 soft-drinks-worth of the stuff per day, developed tumors. Turns out, in later research, it's one of those urban legends that snopes and that ilk bleat about, cuz just the other day, saccharin was declared fit for human consumption again by the debunkers. Can't they get it right the first time?

"Unsafe at any speed" by everyone's urban hero Corvair debunker, Ralph Nader, was itself debunked.

NBC was shown to have rocketed passenger vehicles so their gas tanks would explode.

A pox on junk debunkers. Including you, if you throw your lot in with them.

I repeat: HEY, DAVE: WHO DEBUNKS THE DEBUNKERS? HMMMMMM???

..... there is the New Jersey signer, Abraham Clark.

He gave two sons to the officer corps in the Revolutionary Army. They
were captured and sent to the infamous British prison hulk afloat in
New York harbor known as the hell ship "Jersey," where many other American
captives were to die. The younger Clarks were treated with a special
brutality because of their father. One was put in solitary and given
no food. With the end almost in sight, with the war almost won, no one
could have blamed Abraham Clark for acceding to the British request
when they offered him his sons' lives if he would recant and come out
for the King and parliament. The utter despair in this man's heart,
the anguish in his very soul, must reach out to each one of us down
through 200 years with his answer: "No."
****

What a stark contrast to the events of the present ... could we, should we,
would we ... do it again?

Wonder if McCain-senior was given this choice by the g(hostile and
contemptuous term for the enemy; skip the flames; read the dictionary)ks?

Years ago, to renew an amateur license, one had to certify to the FCC
that they had operated N hours on the air...

I wouldn't mind seeing someone lose their license if they weren't
fulfilling our "fundamental purpose" as set forth by the government:

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur
radio service having a fundamental purpose as expressed in the following
principles:
(a) Recognition and enhancement of the value of the amateur service to
the public as a voluntary noncommercial communication service,
particularly with respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to
contribute to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules
which provide for advancing skills in both the communications and
technical phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service
of trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance
international goodwill.

>Bands and Ham Radio can become Citizens' Multi-Band (CMB).

Are you opposed to the band of 27 MHz frequencies, or the operators?

"Equivalent band" means just that -- if 20m were taken away, a band
equivalent to it (propagation-wise) would replace it.

(My friend, Clay, N4AOX, informs me that the bill I mentioned has not
yet been passed by our Congress.)

>Perhaps this is because of many of the same reasons
>that we aren't finding enough serious techie types who want to be Hams
>here.

How many engineers of past decades were hams? The *main* attraction
to amateur radio has always been long-distance communication via the
refraction of RF in the ionosphere. For most of the million-plus hams
licensed since licensing began in 1912, *that* was the main reason for
getting into the hobby.

>Ham Radio can be both a hobby
>and a serious start to learning modern technology.

Sure it can, but you're making it into something was it necessarily
wasn't in the past; for the million-plus hams of the past, they didn't
need to know much technology -- building a radio from someone else's
plans didn't take much (if any) background ("Heathkit"; but building
from just a schematic didn't even take much technical experience).
The Art Collins were a fraction of a percent of those million+ guys
and gals. Most were the town baker, teacher, construction worker,
banker, businessman, et cetera.

>Radio must at least have some basis and purpose. Although I admit that
>compliance with the basis and purpose, as stated in Part 97, is
>voluntary and optional as regards each individual Ham...

That's where we part company. All the rules must be followed individually
and globally; Section 97.1 is no different. Section 97.1 is not the only

paragraph that contains lettered subparagraphs; any other such lettered section is to be followed completely by each and everyone one of us. I don't see any "or" placed between Paragraphs A, B, C, D, E, in 97.1. All five are our goal. IMO if an amateur cannot certify that he is working toward all five parts, then his license should be revoked.

Just to put this 97.1 controversy to rest (local versus global obedience), I'll send an email to the FCC and get their opinion. It's a waste of time to try to second-guess them. (That reminds me of a League request from decades ago: "Ask us for a legal opinion before you ask the FCC! You might end up opening a can of worms!")

I also have a DX-100, but it's not a radio, it's an old Yamaha
synthesizer.
It does work on FM (Frequency Modulation) though.
Mere coincedence, or electronic syncronicity?

That's meaningless now, Dwight. That same FCC no longer even requires
that a technician have a First Class Radiotelephone license to work
on radio or TV broadcast transmitters. Now anyone can tune or repair
a police, fire, aircraft or commercial band transmitter. That's not
progress -- that's scary.

You folks speak of wanting the amateur service being more progressive;
heck, our own regulating agency is taking us back to the stone age.
The standards need to be raised, not lowered.

Not everyone. Even here in far off Hawaii, I know that only *one* side of the debate sees it in terms of racism; the other side believes in their heart (now) that the flag stands as a memory of their war dead. I can accept that. I'm just a tiny bit suspicious of why the flag was raised just 38 years ago rather than some 140 years ago...

For your information, a high powered linear is the easiest piece of amateur equipment to build, I have built many of them. Now if Porkbutt would build his transceiver that would be a feat. But a linear, no , they are easy to build with the proper parts. I understand he a CB customer base with those splatter boxes

Anyway a pair of 8877s is overkill and a temptation to run over the limit power as Porky did while he was a amateur.

Source record: 108134

Here we go again. It seems that anyone using 3950 other than the net members stirs the imaginations of some while pissing off the "self proclamed owners" of that frequency. The frequency of 3950 is a "public" frequency and any licensed amateur operator is allowed to "camp out" (use it) if they wish. Whether BEFORE or AFTER the net.
Remember the "two" warnings w1wcr recieved from Riley. The net does NOT own 3950. If it's in use by "other" amateurs, whether you like them personally or not, you, and the net must find another frequency to use unless the occupants release it to the net, which they have done for the past 6 months or so with no questions. Now stop whining !
Ps. just what "results" have you come up with? NONE - I'd bet. If you have, go ahead, make your accusation. LOL !!

No name spewed,
>>Listening to w9art camped out on 3950
a half an hour before Liberty Net starts
at 10:00. (Like we were born yesterday
eh?) It may be a good idea to check the
RF signatures of stations which show up
BEFORE the Net. Say an hour before on 3950.
Compare the RF when the QRM'ers start
up. The results will amuse you.<<

Porkbut CAN build his tarsnceiver, because even though he is a multi-zillionaire, the one he owns is an old one that they stopped producing long ago. Most of the parts are available at Radio Shack or in old parts bins.

Personally, I can't wait to start slapping old Porkie around if he ever manages to come back. Maybe he will not be back because Snaggle-Tooth is getting so used to him having time to finally pitch in and help instead of being on the radio 23 hours a day that she won't let him e-mail his letter of apology to Riley. (Although SHE will probably send it accidently and he will get his license back)

Ho Ho!

I'm looking for a good logging program and was wondering if folks could suggest some. I would prefer one that was free, however you get what you pay for so I'm not opposed to buying one that was pretty good.

Some of the features I'm looking for are:
1) interface with a CDROM database, like Buckmaster,s'
2) ability to calculate bearing and distance,
3) generate reports for DXCC and WAS, and such, and just in general help me keep up with it all,
and lastly (though I don't think I'm going to find it)
an ability to interface with an ONLINE database while I'm connected to the internet instead of using a CDROM.

Please - give me some suggestions.

Thanks
Bill

1844. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <8joe2d$5ms$1@news.hawaii.edu>
Source record: 108140
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and its
content drifts further and further away from being "on-topic" in the
various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, KH6O

Burt wrote:

> <snip> And you are the one that cannot
> even pass an exam that my little child
> passed?

You actually have a child? That's amazing. Are you sure its yours? But anyway, the key words to that phrase should be changed to "will not," not "cannot." I have no desire to take another test at this time. And I'm satisfied with the operating options I already have. When that situation changes, I'll take whatever test _I_ want to take. In the meantime, that does not make me any less of a ham than you (in fact, I don't think there can be any less of a ham than you).

> No but with your affinity for Germany
> I see it in your ass.

Stop looking in my butt, Burt. Perhaps you like looking in some guy's butt, but I'm not that kind of guy.

> An open mind was not expected from your ass.

An open mind? A closed mind is better than no mind at all, and, at this point, I seriously doubt you have one. But, like I eluded to earlier, if you do have a mind, it is seriously messed up.

Calm down, Burt. Step back for a moment and look at how negative your web site is. Your web site says volumes about you. And, based on that web site, all I see is an close-minded, highly opinionated, self-rightious, individual who is out to ridicule and offend everyone else. And then you have the nerve to get upset when that negative attitude comes back at you.

Isn't there anything positive you can put on your web site? Isn't there anything positive you can say about others? Isn't there anything positive you can say about this hobby? Isn't there anything positive you can post to this newsgroup? Or is your life so screwed up there is nothing left but the negative?

In a way, I feel sorry for you. It must be so sad to have so little positive aspects in your life. Of course, that sadness quickly leaves me whenever I read your nonsence. Especially when I see you trying to spread that negative attitude to others.

I don't have time for people like you, Burt. I have more positive things in my life to attend to. So, again, good day.

> just 38 years ago rather than some 140 years ago...

Actually, I think the discussion is about the flag debate in South Carolina, not North Carolina (so that should read SC Statehouse, not NC Statehouse).

Anyway, one of the reasons the flag was not flown 140 years ago is because it was illegal to fly that flag during the period following the Civil War. Later, the flag, and the dispute between the North and South, was simply forgotten about in the effort to rebuild the South (and eventually just forgetten completely).

It is not until early in the last century, when the South began to reassert itself, that some in the South began to openly challenge the misinformation about the war. By the mid-fifties, it was changing attitudes that led to the flags again flying proudly throughout the South. By that time, the flag had pretty much become a symbol of the battle to change opinions about the war, not a flag to represent the war itself.

Did we live thru the same 60's? The Rebel Flag (actually the naval ensign)
became the symbol of every tinpot segregationist, demagogue, and shit
disturber in the Civil Rights era as well as every outlaw motorcycle gang in
creation. Rebels Without a Clue.

The NAACP is perfectly justified in doing whatever is necessary to get this
20th Century piece of childish nonsense put back in the toybox. The 19th
Century is a whole different subject.

So far as the Civil War goes, U S Grant said it best: (paraphrased) Never
has so much courage and heroism been expended in so poor a cause. You will

probably find a lot of my ancestors represented in the Confederate honor rolls, a number from SC and a few Jayhawkers, too -- a fact in which I take no pride whatsoever.

I am not opposed to anything or anybody...BUT in my way of thinking
Hams are Hams and CBers are CBers and viva la difference. Are
shoemakers opposed to the people who milk cows? If they are should they
be opposed to shoes and cows because they don't make or milk them?
These are foolish questions.

> "Equivalent band" means just that -- if 20m were taken away, a band
> equivalent to it (propagation-wise) would replace it.

Nonesense no other frequency band can exactly replace any present HF
Band in terms of propagation. Just calculating a MUF tells it all.
And what would replace the 20 meter band? The frequencies just above
it and just below it are now in use mostly for broadcasting.

> (My friend, Clay, N4AOX, informs me that the bill I mentioned has not
> yet been passed by our Congress.)

IMHO even if it is passed it will be watered down and subject to
change. The FCC has taken away commercial frequencies for little or no
logical reasons in the past..They took away the first FM radio band
from Armstrong and gave an equivalent FM band to Sarnoff. IMHO it could
take more than an ARRL lobby to stop it if commercial interests
continue to support political parties with more bucks. Hams are a non-
profit group and are basicly (in spite of the advice of Steve
Mendleshon) apolitical. That means - Hams as a group are non-profit
and do not as a group belong to any one specific political party.

> getting into the hobby.

More engineers were Hams, percentage wise, in the 30s, 40s and 50s than in the 60s,70s,80s,90s and today. In 30s-50s you were either an electrical power engineer or a radio engineer...now there are many electronic engineers that are not radio engineers by specialty and thus less likely to be interested in (or start from) RF experimenting as a hobby. Hams were interested in Short Wave propagation when it was a newly found phenomena but as it became better understood it lost some of its early magical appeal. Hams became interested in Radio generally for two basic reasons...one I admit was just for the fun of it and the other was to learn the technology involved with radio communication and feel at home with radio equipment of their own. The curiosity involved with unkown DX capabilities was not just seen as a sport by most Hams. Some were practical experimenters who did become technicians and engineers as a result of their hands on Ham experience. The reasons that people became electrical engineers change from time to time. At one time you could get deferred from the draft by becoming an engineer and working on a military project. Some intelligent folks were motivated into engineering because at some times the starting pay was higher than in other professions and at some time jobs were plentiful. People avoid engineering at times when the reverse is true. The supply and demand is not leveled by feedback as the delay due to the time it takes to educate new engineers causes a big delay in any logical correction.
The types of people who want to be engineers are often steered into engineering by default because they do not want to deal with lots of people as most lawyers, doctors and teachers must. Unlike hobbies people do not always choose professions because they are fun for them. I know some engineers who never seemed to enjoy what they were doing at work and didn't want those who worked for them to enjoy any of the fun of discovery if they could prevent such fun....but that might be off-topic here. Field and Sales Engineering types must be able to deal with all kinds of customers, while design engineers can be very introverted types. Many of the types that would rather deal with people than with circuits are allowed to advance into managenment so that they can supervise others who do most of the real work...again this gets off-topic.

> >Ham Radio can be both a hobby

To play pilot with a model airplane is one hobby. To play rail-road engineer with a Lionel toy train is another hobby BUT there are no

radio stations that are just toys themselves...even QRP Ham setups may make DX contacts and cause EMI...in that respect Ham Radio can not be considered as being just a scaled down toy version of commercial radio...unless the Ham Radio equipment is not understood by the operator and the operator by his own limitations is scaled down in the head. Although his or her xceiver is not a scaled down toy, he or she is using it like a toy. In that case the operator makes it a toy hobby, as his or her only ability to be a Ham rests mainly on his or her ability to pay for Ham Radio equipment.

> >and a serious start to learning modern technology.

Let us keep it a serious start to learning technology...both for those who want to learn for a career and those who want to learn in order to be better at being better Hams. Many Hams say that what they learned has prepared them to be ready for a disaster type of emergency. Let us hope that the "disaster emergency" can also include economic disasters that can result if the USA continues to lose its technological capacity and there is a shortage of technicians and engineers that can not be solved by a brain drain from elsewhere.

> Sure it can, but you're making it into something was it necessarily
> wasn't in the past; for the million-plus hams of the past,

Times are changing and we can not continue to use the past as our guide. We are IMHO at a fork in the road. We can not promote Ham Radio both as everyman's fun hobby and as a serious technical hobby for very long. We must make some hard choices...some of which may have to change our official exam structure and some which may have to change some of our operating regulations as well...and most of which must change our PR methods.

> they didn't

> banker, businessman, et cetera.

Building a Heathkit and debugging, aligning and testing it is a big step away from the Hams who purchase radios and don't even want the schematics...because they can't even read the schematics.

> section is to be followed completely by each and everyone one of us.
> I don't see any "or" placed between Paragraphs A, B, C, D, E, in 97.1.

Oh boy..You disagree with yourself here. Read all the paragraphs of the BASIS and PURPOSE as defined in Part 97. Even I do not expect all hams to follow all of those pargraphs as individuals, although I recognize all as worthy group goals. If Hams all followed all paragraphs there would be no need to debate whether Ham Radio is a serious technical hobby.

> All five are our goal. IMO if an amateur cannot certify that he is
working
> toward all five parts, then his license should be revoked.

You mean a Ham who doesn't work as a DX good will ambassador should have his ticket revoked? What about Hams who refuse to become part of the "cadre of technical experts" and just want to be Tech repeater clunkers?

> Just to put this 97.1 controversy to rest (local versus global

> League request from decades ago: "Ask us for a legal opinion before
> you ask the FCC! You might end up opening a can of worms!")
> KH6O

Who will you send your E-mail to? What can you suggest? Hollingsworth made a speech at Dayton expressing his interpretation of what is expected of Hams. Other FCC leaders and enforcers have done so in the past. All of their wishful opinions are not enforcable by the actual regulations...some are optional...some are just opinions that need no enforcement but appeal to the general nature of the Ham community.

It is not easy to change the attitude of John Doe Ham for what I consider to be the worse or the better...but certain good features of the whole Ham culture must be steered properly for Ham radio to continue to evolve and survive. Obviously it can not continue to thrive and grow in the same manner that it has grown in the past and its culture must change to meet modern technological changes, competition and social interests. Diluting its purpose is not a way to keep it alive BUT extremely stern enforcement may not be a good way either, unless it results in the hobby being more like a serious technical hobby.
I like some of the ideas that Kennard expresses, which might take some of the freedoms that have been given to Internetters and other communicators and give them to Hams as well. I don't fault the FCC. I see them trying to fairly weigh all of the communications issues of which Hams are but a tiny part. I believe that they are trying to do the best they can at this time and I can believe that they do not

always follow the demands of the ARRL by default. I fear what the FCC might be forced to do to Ham radio 5, 10 or 20 years from now..if the new Hams and new Ham leaders don't shape up. Petitioning the FCC at this time might not help unless we all could petition for both easier and harder technical exams for Tech minus licenses and Extra Plus Plus Plus licenses. I don't think I can hope for that until all living Hams have a good easy chance to hold Extra class Ham licenses and they start to understand that they have all fooled themselves.

I do not run off and write to FCC leaders myself. I would certainly be ignored if I did. Before we can petition for change we must establish a reasonable consensus among ourselves. I find that hard to do both in this NG and in the Ham clubs that I am a member of. My only hope is that Hams who are now motivated only by their own self interests will consider the future of Ham Radio. Remember that I am not selling anything and I am not running for any office. I hope that my posts make you think and consider other points of view. I don't expect that many will agree with all that I say because most did not come to be Hams from the same origin that I did and most did not need to apply self education and research in the manner that I did during my working career.

Please keep thinking,
Hams need MORE license classes because there are different classes of Hams and for Ham Radio to survive there must be different classes of Hams,

I have two sons who recently passed their amateur certification (basic) exam here in Canada. I need some recommendations for a good-quality and hopefully affordable 2m/70 cm handheld unit for the boys. Since they are young (under 13) I am somewhat concerned about RF radiation close to their heads. Is there any research on this matter that is pertinent to the power output of a ham set as opposed to say a cell phone?

At the risk of drawing any flame my way let me add that I was not prepared for the level of vitriol that I have seen in the ten minutes that I spent perusing this news group.

> well as every outlaw motorcycle gang
> in creation. Rebels <snip>

That may be true, Richard. Certainly that flag means many things to many different people, just like the American Flag does - a symbol also commonly worn on the jackets of motorcycle gangs (and many other groups). But that does not change what that flag means to the people I refer to in my previous post (just like I'm sure the American flag has a different meaning to you then it does to some others who wear it).

By the way, while the "rebel" flag is the CSA Naval Ensign, it has become the generally recognized symbol of the South. As I eluded to in my previous post, the square-shaped Confederate Battle Flag was outlawed following the war. Therefore, when people displayed a flag to represent the Confederacy, they used the rectangular Navy Jack instead (both look the same except for the shape). It really does not make that much of a difference, since the rectangular Navy Jack was also occasionally used by ground troops in battle also.

> The NAACP is perfectly justified in doing
> whatever is necessary <snip>

The NAACP is absolutely full of it. They start a boycott in an effort to blackmail SC into removing the flag from the capital building (remove the flag and we'll remove the boycott). When the leadership agreed to that, they change their demands to include all government owned property in the State (including, it appears, all civil war sites).

As far as I'm concerned, the NAACP can keep the boycott in place as long as they want. I've not seen any negative effect from the boycott, so who cares (obviously not the millions of tourists visiting here)? Besides, I see no reason for SC to continue responding to a group with so little integrity.

Beyond that, I'll keep my opinions about the NAACP to myself.

> So far as the Civil War goes, U S
> Grant said it best: (paraphrased) Never
> has so much courage and heroism been

> expended in so poor a cause.

But, Grant was right there in the fight over the "cause." However, just because he (a Northern General) disagreed with the Southern cause, it did not make that cause any less valid. People disagreed - that's why there was a war.

If you ask 20 hams their opinion on which radio is best, you will get no less than 20 different answers! I would say you should use your bank account as your guide. There really are no hand held radios I would avoid.

In terms of RF exposure, you might consider the death of Louis Varney, the inventor of the G5RV HF antenna. No doubt this gentleman spent a lot of time around some pretty high levels of RF and he recently passed away at the age of 89 and I dare say it was not due to RF exposure! I should live so long! There have been volumes written about RF exposure to the human body, but you will drive yourself crazy trying to interpret it and then spend needless time worrying about your heirs developing a brain tumor because of their transmitters.

Spend as much or as little money as you care to on the radio, kiss them on the forehead and wish them a long and healthy life enjoying ham radio!

73,
de Scott N0IU

I would start with a speaker mic.
I have the Yaesu VX-5R and would suggest this radio to anyone
although a little pricey.
It is a little complicated to program from the keyboard, but if your
kids are that young and in ham radio it sound like they are willing
to learn.

Start with the VX-5R and speaker mike for about 4 weeks, then get the
programming software. It make life a lot easier with the software,
but knowing your radio without a computer comes in handy when out in
the middle of no-where.

Keep in mind that a cell puts out less then a watt while these can
put out up to 5W.
I also am from Canada, Edmonton to be exact.

We can agree to disagree and that makes horseraces. The NAACP to be sure has organizational difficulties of its own and would probably be well advised to let its opponent find an honorable fig leaf as the state seems to have tried to do. The south certainly has no monopoly on backward racial attitudes. So far as what the Civil War was about, that seemed to change over the course of the war and probably can never be restricted to one item for all time.

The trick is to make it thru the next 140 years -- in spite of the last 140

>73, Jeff KH6O

That was an old joke. I'm surprised you hadn't heard it before.

As to having a chip on my shoulder. I'll tell you a little something about myself I've never told you before. After being in the work force for over 20 years, I started back to school last year in an effort to get a degree in computer science. It's not easy, especially when working odd hours. It also seems that as I get older, learning new things becomes more difficult, but I'm able to maintain a B+ to A- average.
I had to take a semester of economics with a professor that was a total ass. If you didn't understand some concept, he did his best to humiliate you in front of everyone. There were even two girls who left the classroom in tears on separate occassions. I know this guy hated my guts, because he can't stand to see anyone that's a little older and has this thing called "life experience" come into the class. He knows he can't bullshit me the way he can someone younger and more impressionable. I say this because most of the time he just ignored me. It pisses me off to see the way he treated the other students, but I had to bite my tongue because I wanted to pass the class and get my degree. One of his lectures was an entire hour of him defending the government's actions against Microsoft. As a Libertarian, this had me fuming as other impressionable minds hung on every word he said.
You can be assured that once I have my degree in my hand, I'll certainly tell him what I think of him.

I tell you this because I think you both have a lot in common.

One thing that might help those who have written recently having trouble learning the code.

If you have any kind of musical background, try learning the code as music.

When I first started learning code, I did the WORST thing possible.....I started counting dots and dashes.....again, the WORST thing possible.

Well, after figuring out that didn't work, I started thinking of it as rhythm. And, lo and behold, I found I really don't think about dits and dahs or dots and dashes, I simply recognize them as the letters.

I know some of y'all are gonna ask me HOW I do that, and I wish I could answer that question. I guess the only answer I have for that is that I relaxed. I realize that's not much of an answer, but it worked for me!

Alinco DJ-V5. $239.00 from Ham Radio Outlet.

Finally, your not going to get away from the problems with
RF. Alinco can be set down to 1 watt out. A compromise.

Finally, some of the new cordless home telephones are operating
up a 2.4 gHz. well above the frequencies used by cellphones. Guess
peiople don't mind settin their noggin next to a small "microwave oven"

Just a quick note, you and I have a lot in common. After 20 years in the work force, I, also, started back to school about 2 1/2 years ago, working on a degree in Physchology. (Specifically, family and marital counseling) And it HAS been very, very interesting......the difference between those of us who have lots of life experience, and those who are "professional" students. It seems our higher educational system is slanted towards those who have lots of book knowledge...instead of experience.
But, like you, I've been able to maintain a 3.89 GPA, while working full time and taking care of all the responsibilities that married homeowners have to take care of. :))
Anyway.............just a quick point, one is NEVER to old to learn!!

>From: "Richard McCollum"

>The south certainly has no monopoly on backward racial
>attitudes.

FACT

>The trick is to make it thru the next 140 years -- in spite of the last 140

FACT

As I travel alot with my job, Dick's first statement is gospel. If the south thought that they had a monopoly on this, then more of us need to visit particularly the midwest.

As for the flag issue and boycotts, with regard to what's happing here in SC right now is a prime example in exercises in futility. I am surprised that an organization like the NAACP did not think that they needed to have all of their bases covered when dealing with a government..... that is to say that if flying the flag 'any where' is deemed unacceptable, they should have stated that up front verses demanding it's removal from the state capitol building ONLY.

Also..... unless I am living in a vacuum and have missed something..... why have I heard nothing about states that have the rebel flag as an inclusive part of their state flag? Seems odd to me, and as SC does not include the rebel flag as an inclusive part of the state flag of SC,..... is their some hidden agenda here that I haven't heard about?

Dick is right..... the trick here is to make it through the next 140 years, inspite of the last 140. It seems to me that agendas should be crystal clear from those who do not live in, do business in, or, as in the case of Rev. Jackson, no longer live in SC.

There is no doubt that I'm sure alot of this is all played down here in SC..... but, it sure seeme like the usuall case of 'outsiders' making demands and threats when those of us who live here, black or white, couldn't give a rip less one way or the other.

Being Welsh myself..... I see little difference between many of these issues and how the English treat, and have treated the Welsh for years..... as far as many SC whites agenda, it's all an act of defiance against outside demands. Is this 'wrong'? If so, I am curious as to why it is wrong. We have our fair share of seperatists, but, it seems to me, a darn site fewer than pretty much every place I visit almost daily north of the ole Mason - Dixon line. Is anyone guilty of hurting the feelings of others? Sure there is, but, I would wager that they are alot fewer than most would think.

I find it hard to believe that anyone still really thinks that the rebel flag stands for racism and racism alone verses two distinctly different things:
1) defiance
2) ignorance
The first being noble, the second being typical.

Everyone has an agenda and a plan..... so why do they always have to be secret agendas?

73 de KU4MY, Tom
(Have a great holiday everyone..... and remember the reason for the season!!!!.....

I have just started a Icom W32A mailing list on egroups.com. Since just purchasing this nice radio I thought it would be nice if owners could exchange information like the Q7 and R2 mailing lists on the same site. Same radios being owned by myself also. Please feel free to subscribe. Thanks and 73s... Scott, KA7FVV

Visit the Giant Page O'Shortwave links, a site strongly focused on
shortwave broadcast listening but slowly branching out, including many
links to HAM-related sites. Updated *often* (next update scheduled
for tomorrow), and always being checked for 'dead links'.

http://swlinks.webalias.com

AOL Users: <A HREF="http://swlinks.webalias.com">Click here!</A>

Hope you enjoy the site, and suggestions for improvements are welcome.
I can't get rid of the pop-up that appears when you access the page,
that is the result of the webalias.com site redirector. I recommend
you browse the links by right-clicking and selecting "Open in New
Window," so you can easily return to the page without the pop-up
window displaying again.

Enjoy,

Tim

> This is *absolutely* true. It is truer than any law of physics.

The physics of projectile paths (including those made by cannon balls,
bullets, missiles and rockets) is called ballistics.
Are people who shoot to kill going ballistic themselves?
If they plan to kill ahead of time this is not just going ballistic..it
is premeditated homocide!

IMHO the people who want to fight it out PHYSICally without guns but
with fists are the ones who have the balls to do so and the ones who
tend to draw guns and go ballistic are actually ball-less-istic!
>
> Someone Else wrote:
> >
> > You never pull your gun unless you are ready in your heart

The heart is but a muscle. IMHO you must be ready (or not) in your
brain. Your heart is responsible for pumping blood but your brain is
responsible for everything else. Keep thinking.

> to kill someone and when you do
> > shoot, you shoot to kill or the person could come back and sue you
or destroy your life
> > in some other way.
> > You should also know when to pull your gun and when to fire
responsibly.

IMHO the biggest responsibility is the responsibility to avoid firing.

> > Alot of people with guns give themselves a bad rap because they
start pulling their guns
> > in a situation that doesn't need a gun but the gun being pulled
escalates the whole situation
> > and someone always gets hurt.
>
Agreed. This comes from watching too many cowboy movies or reading too
many NRA pubs...just like pressing the push-to-talk button without
seeing if you have a clear frequency may come from watching too many
disaster movies and only reading dumbed down Ham Q & A guides.

> "A greyhound needs no fanfare." - Jean Boone 1917-1998

Ahhh...but he needs a litter box and he can't fly in the cabin without
air fare or in the baggage compartment without underware. He can't go

ball-istic if he is ball-less-istic (neutered) either. - w2ilp 1933-?

Animal rights people complain because the race promoters kill the greyhounds that can't run fast. (Dog-gone is this racial predudice?) Gun drawers can get killed if they don't draw fast. With all the talk about Ham emergency operation I dunno if any ham ever got killed if he didn't beep fast enough in an emergency. At any rate such a catastrophe is not likely to happen in the future at least for any ham who can talk fast.

Don't shoot guns on the Forth of July.
Fire works!

1878. FOR SALE - ALINCO DJ-S41T with extended receive and transmit

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-03 00:00:00 UTC
From: jcsarp@aol.com
Message-ID: <20000703163417.18260.00001322@ng-fd1.aol.com>
Source record: 108174

FOR SALE - ALINCO DJ-S41T with extended receive and transmit.

This Alinco DJ-S41T (70 cm HT) is in MINT condition. It has only been used a few times and looks like brand new. It receives AND transmits from 421.300 MHz to 478.300 MHz. Only the early versions of this radio can be easily modified to receive below and above the 70 cm amateur band. This unit is an early version. It makes an excellent 70 cm amateur radio AND works great on the new FRS (Family Radio Service) band located at 462 MHz and 467 MHz. This DJ-S41T also works very well on the GMRS band.

The radio is for sale as a package deal with the following:

Early Version Alinco DJ-S41T
421.300 to 478.300 MHz receive and transmit
1400 mAh NEXcell NiMH batteries
Alinco EDC-78 battery charger
Alinco ESC-27 soft carry case
Belkin swivel clip (radio clips on your belt like a cell phone)
Original factory box
Owners manual

DJ-S41T SPECIFICATIONS

GENERAL
Frequency Coverage MHz (RX) 425.000-449.995 (TX) 425.000-449.995 MHz<
Channel Spacing: 5, 10, 12.5, 15, 20, 25KHz steps
Memory Channels: 20 Channels + 1 Call Channel Memory
Antenna Impedance: 50 Ohms Unbalance
Frequency Stability: +/-5 ppm
Microphone Input Impedance: 2K Ohms Nominal
Signal Type: F3E (FM)
Power Supply Requirements: 3.6V ~ 4.5V DC (4.5V standard with 3 AA batteries)
Current Consumption@4.5V: Transmitting: Approx. 260mA (High Power Receiving: Approx. 33mA Squelched)
Operating Temperature: -10 to +60 Degrees Celsius 14 to 140 Degrees Fahrenheit
Ground: Negative
Dimensions (Radio Only): 2-1/6(W) x 4(H) x 1-1/10(D) Inches
Weight: Approx. 6.5oz. (Batteries Included)
Sub Audible Tones Encoder Installed (50 Tones)

TRANSMITTER
Output Power High: Approx.340mW Low:Approx. 50mW
Emission Mode F3E (FM)
Modulation System Variable Reactance FM
Max. Freq. Deviation +/- 5KHz
Spurious Emission -60dB Or Under Below Carrier Level

Tone Frequency 67.0 to 254.1Hz (50 Selections)
Microphone Electret Condenser
Operating Mode Simplex/Semi Duplex 5KHz Steps Minimum Between 0-15.995MHz
CTCSS Encoder Built-In And Included as standard

RECEIVER
Receiver System Super Heterodyne Dual Conversion
Sensitivity 12dB SINAD : Less Than -15dBu at 445.000MHz
Squelch Sensitivity Less Than -17dBu
Intermediate Frequency 1st IF: 23.05MHz; 2nd IF: 450KHz
Selectivity More Than +/- 7.5KHz at -6dB
Audio Output More Than 100mW @ 10% THD
Speaker Impedance 8 Ohms

Photo of DJ-S41T at: http://www.durhamradio.ca/djs41t.htm

Price - $150.00

>
>And that's to say you haven't been snookered by the government's bullshit?

I thought M$'s action were *questionable* Waaaaaaay back in the DOS
days long before I had net access with any pro/con Government/M$
debate. I had been using Stacker disk compression and along comes a
new version of DOS and M$'s got *free* disk compression included.

> I
>happen to use Linux and Windows, and I find Linux far superior. Microsoft
>certainly didn't twist my arm in an effort to keep me confined to the use of
>Windows only.

You aren't a computer manufacturer (OEM) like IBM, Dell, Compaq etc.
Some of them complained to the Govm't as well as Netscape. They
depend on a Window's OEM license for their income, if they had
dared use a different operating system M$ would have retaliated.

>Microsoft's only crime is that they haven't padded the wallets of
>Washington politcians the way that the automotive and oil companies have.

Part of M$'s crime was using Windows in preventing new , innovative
products from *ever* reaching the market because it wasn't in *their*
financial interest for them to do so. If it weren't for DoJ, companies
like Dell etc wouldn't have DARED preload Linux etc on new computers ,
they'd have had faced severe retaliation from M$. M$ is about as DIRTY
as they come.

So If your computer came with Linux preloaded you can *thank* DoJ for
that one, not M$.

One prior practice the government made M$ stop was the 'Per Processor'
agreement. Before their ruling OEM's (Dell Compaq etc) had to pay M$
for *EVERY* computer system that left the factory whether it had
Windows on it , Linux on it or NO Operating System at all !!

Sound like a sweet deal to you ? M$ tries to eliminate *my* choices or
make me pay for Windows when I'm running Linux and I'm supposed to

wave the M$ flag ? Screw M$.

I suppose you must also feel sorry for the Oil companies ? That mean old nasty Gumm't has blocked the merger of BP(British Petroleum) /AMOCO with ARCO until some properties are sold off so that some competition remains in the area of the country where the 3 merged companies operate. I guess without Gumm't intervention BP/AMOCO/ARCO would merge and give us all lower Gas and Oil prices right <GUFFAW> ?

How can they let anyone work on a TV transmitter? New transmitters need very little maintenance. Mostly, you vacuum out the dust, change the coolant, and take reading for five or more years before anything quits. On the other hand, all the digital and analog processing equipment at a station needs constant attention. The last station I worked at I spent more time servicing the studio cameras and some custom circuits than anything else. Sunday at midnight we shut the transmitter down, checked it out, and had it ready to go back on the air at 6 AM Monday morning. It was a five year old Comark on Ch 55 in Orlando, Fl. A 5 MW ERP with the antenna at 1749 feet. The tower had a freight elevator that ran to the top, but it was a two hour round trip, and I never got a chance to go up and get back down before the morning crew fired up the transmitter.

A grand total of 2 dollars and 47 cents. :-| I'm mostly doing it for the fun, but what's wrong with asking for some small reimbursement for the time spent on maintaining the site?

Actually, there aren't that many ads. A couple linked to Amazon.com, and 7Search (which is actually a reasonably useful search engine).

It's the pop-up ad that webalias.com inserts that's the real pain in the rear, as far as I'm concerned. The only other option is a page full of ads with a link to the main page, which IMO is even uglier.

I would have gone with cjb.net or another 'totally free' redirector, but unfortunately I'm already using those for other sites, and they only allow one site per customer.

I have also pondered buying a domain name through Network Solutions, but what's in it for me? Why should I pay $40/year? If swlinks.webalias.com is useful to you (and a few ads don't give you panic attacks) then visit all you like, otherwise it's purely your choice.

>Hmm.. You should create such pages for lotsa different topics..
>You shouldn't have much trouble coming up with list of that quality on just
>about any subject...

Sure, the page will be expanding in the future. I've been soliciting people to come up with some interesting topics (I don't just want to rehash stuff on other pages) but so far nobody has responded. I can't do this all by myself. If you want to suggest pages with "lotsa different topics," how about some suggestions? Cough 'em up.

Yep although a gun is an object that may if you are lucky be used to
save someone. In many cases the person who holds that gun may not dfo
as well as a movie hero. A gun which kills or seriously wounds anyone
can never be a good thing. I can respect guns but I can never like
guns.

The thing is that once upon a time a drunk held a loaded pistol close
to my head. I did not wet my pants very much...but this was not
because I had decided not to previously.

If you have decided beforehand that you can draw as fast as Billy the
Kid, swing from trees like Tarzan, or fly away like Superman then are

you sure that you really could? What about it if the guy choking my daughter had also decided before hand that he would kill her no matter what I had decided??? Giving him more reason to kill us both might not be such a great idea. I admit I don't think I could keep sending him long e-mail messages to convince him that he is evil.

The truth is that most soldiers decide before hand that they will be heros. That is part of their confidence training. Unfortunately in actual combat only a few can be real heros and live to tell about what they had decided. Many who survive had decided to be heros but wound up doing things that they never decided that they would do which prevented them from being real heros...
I have decided that it is not necessary to describe what they did instead of being heros in detail. I have decided that you can't blame them for not doing exactly what they had decided previously. Some of the biggest real heros were the ones who never decided to be heroic. I believe that the biography of Sergent York is true.

Hams need more heros who can decide to take MORE Ham exams,

True. There's an on-going civil trial concerning that incident;
one of the survivors has testified that the fires were started
by the Dividians themselves.

Bob, do you like cars? A car can be just as deadly as a gun. In fact,
many, many more people are killed each year by cars than by guns. Cars
are objects. Guns are objects. Either can be used for either good or evil.

> What about it if the guy choking my

How's he gonna kill her after he has a .357 Magnum bullet through his brain?
Sorry to say, Bob, you seem to consider your daughter's life not worth saving.

> National Guards. We had to defend ourselves against the British and Indians
> and banding together into state defense forces was mandatory.

The militia nonsense is a smokescreen. All of our forefathers owned guns, and they did not just use those guns solely for the militia activities - they also used guns for hunting and self-defense. The militia mention in the 2nd Admendment is is just one example offered for the right to own a gun - our forefathers thought the other uses were obvious to anyone with a brain.

I live in the country, about 45 miles from the nearest police station. Who is going to protect me if I'm not allowed to own a gun? If I call the police right now, it could take them as much as a half hour to arrive (that's assuming they have someone available at the station to send right away). Do you have any idea what could happen to a person in a half hour?

And I'm not the only one in this situation. Millions of Americans live in remote parts of this country (many even much further away from police "protection"). My grandmother lives even further out in the country (in another State) - and a shotgun has been over her bed for as long as I can remember. The need for gun ownership is just as valid for these people today as it was 200 years ago.

And, yes, that includes assault weapons. Just like the police, I want a weapon that is going to take someone down quick if need be. When someone is walking through my door in the middle of the night (something that has happened around here), that person is not there for a prayer service - he intends to harm someone.

Now you may not like that attitude, but that is the way the world is. And until the world is filled with nice people, who pose no threat to others, I intend to remain armed with a gun.

Think about that, radiosigs, before you continue with your efforts to disarm Americans. Are you going to protect the people you disarm? Or are you going to go to the funerals of those that you disarmed? What will you say to the surviving family members - the 2nd Admendment right to own guns only referred to the militia?

Well, add another one.
I had 26.1 credited years when I quit and went back to college full time.
I never made the money back from lost wages while working, but I never
regretted going back to school.

I ended up with a degree in CS and minors in art and math at the age of 50
and just a little over 3 years in school. I was picked up on a graduate
assistantship, which was good as the money was starting to run out. About
half way through the first term I was offered a job, finished out the term
and went back to work.

I have some real GOODIES for SALE......Will be moving soon....

ICOM STUFF..............

1. I HAVE A VERY NICE ICOM 756 HF, & 6 METER TRANSCEIVER. S/N 001311
I AM THE ORIGINAL OWNER, AND A NON SMOKER, IT HAS 2 OPTIONAL FILTERS
FL-223 9 MHZ 1.9 KHZ SSB FILTER, & FL-222 455 KHZ 1.9 SSB FILTER.
I HAVE THE ORIGINAL BOX,MANUAL, PACKING, POWER CABLE, AND HAND
MICROPHONE $1399.00 PLUS SHIPPING IN THE US ONLY

2. I have for sale a very nice ICOM 575H 100 WATT 6/10 METER ALL MODE,
TRANSCEIVER, WITH ORIGINAL BOX, MANUAL, HAND MICROPHONE, ALL ORIGINAL
PACKING. I AM THE ORIGINAL OWNER, NON SMOKER, LOOKS AND WORKS GREAT
OPTIONAL VOICE SYTHESIZER, ANDTHE AM FILTER. ... $915.00 SHIPPED, &
INSURED IN THE US ONLY..

3. I have for sale a very nice ICOM 275H 100 WATT 2 METER ALL MODE,
TRANSCEIVER, WITH ORIGINAL BOX, MANUAL, HAND MICROPHONE, ALL ORIGINAL
PACKING. I AM THE ORIGINAL OWNER, NON SMOKER, LOOKS AND WORKS GREAT
OPTIONAL VOICE SYTHESIZER, AND I THINK I ALSO HAVE THE CW FILTER. ...
$915.00 SHIPPED, & INSURED IN THE US ONLY..

4. Icom SM-6 desk micrphone $50.00 shipped

HEATH KIT STUFF.....................

5. HEATH KIT HW-22 40 Meter SSB transceiver. " THIS IS A HEATH KIT
COLLECTORS DREAM RADIO" I bought it from a avvid Heath bulider, that
assembled it used it once , and put it on the shelf, and covered it.
It is in "LIKE NEW " condition, and I have the matching Heath Kit
power supply, Heath hand micrphone(white), and mobile mounting
bracket $185.00 shipped US only

6. HEATH KIT HW30 TWOER 2 meter am transmitter, again this was from
the same guy as the HW-22, assembled used once, and put on the shelf.
It is in "LIKE NEW" condition, with the matching Heath microphone, and

AC cable. $85.00 shiipped US only

7. Heath AM-2 reflected power/swr bridge $40.00 shipped in US

KENWOOD STUFF.............................

8. Kenwood IF-232C interface unit (2) left $75.00 @ shipped in US
Comes with data cabel, and copy of instruction manual
Can be used with the TS-140,680,440,940,850,450,690,950
9. Kenwood IC-10 (chip set) $40.00 shipped, used with the TS-440S, &
R-5000

10. Kenwood TU-6 tone unit for the TH-21,31,41 handhelds $40.00
shiipped
11. Kenwood TU-4C tone board for the TW-4000A $40.00 shipped
12. Kenwood YK-88C 500 hz CW filter for the TS-120S,130S,130SE, 430S,
440S, 530S, 530SP, 670S, 180S, 830S, 660, R-5000 $69.00 shipped
13. Kenwood YK-88CN 270 HZ CW filter for the TS-130S,130SE, 430S,
440S, 530S, 530SP, 830S, 670S, 660, & R-5000 $69.00 shipped
14. Kenwood MA-5 HF antenna 10,15,20,40, 80 meters in great condition
with carrying cloth case with manual $125.00 plus shipping
15. Kenwood MS-1 mobile stand for a TR-2500 handheld $25.00 shipped
16. Kenwood SMC-25 speaker mic for a TR-2500 $22.00 shipped

17. CUBEX matching transformer "new in the box" for a 2 element
cubical quad 10,15,20, and capable of 12, & 17 meters model number is
2229 of maybe its the serial number

PALOMAR STUFF.....

18. Palomar PT-310X preamplifier $40.00 shipped
19 Palomar PT-340 Tuner Tuner $40.00 shipped
20. Palomar Noise Bridge $35.00 shipped

YAESU STUFF.....

21. YAESU YC-500J frequency counter $70.00 shipped
22. Yaesu black speaker that matches the 300 series for $20.00 shipped
23. Yaesu LL-301 phone patch $40.00 shipped

24. Collins 189A-1 phone patch for the KWM-1 $40.00 shipped in good
condition with a very small switch..

73, & Thank You

Leo KJ6HI (310) 670-6969

1900. FS WOW less than half off Standard C-228A

I don't buy that for one minute. Netscape succeeded through the same aggressive
marketing tactics that MS used. It's not the fault of MS if the rest of them
rolled over and died, and then cried because they couldn't compete. Borland
still has a strong share of developement software market. Microsoft certainly
hasn't hurt them.

>So If your computer came with Linux preloaded you can *thank* DoJ for

Again, that only depends on whatever business agreement they made with MS. If manufacturers took advantage of the popularity of Windows and entered into an agreement with MS in an effort to sell more computers, that is their fault. No one can take advantage of you without your permission.

>Sound like a sweet deal to you ? M$ tries to eliminate *my* choices or

>would merge and give us all lower Gas and Oil prices right <GUFFAW> ?

Wrong! A strong telephone and letter effort by constituent watchdog groups prevented the merger. Had it not happened, the bought politicians would have let the merger go through without so much as a squeek.
Unlike oil and automotive companies, MS isn't buying off all new technology so that it is the only game in town. If they did, they would have bought Netscape a long time ago, as well as Borland, Corel Office, and Linux. We should have clean-burning cars that get 100 to 200 MPG, yet today, cars are no more efficient than when Henry Ford made his tin lizies. It's to bad that health Nazis waste their efforts on cigarette companies when the real culprits are the automotive and gas companies which fill our air with a lot more poisons than cigarettes.
The bottom line is that when any business uses the government to control competitors, everyone suffers.

True. But that's how I came to question M$'s behavior waaay back then.
It had *nothing* to do with the Govmt's case.

In order to compete in the marketplace with other OEM's they had to.
Windows per copy with an OEM license is about $50 - $65.00 without it,
it's about $130.00. That ~ $65.00 or so could be their whole profit
margin on a PC. Unlike M$, OEM's don't have 40% margins, they have
competition and operate on about ~ 5% - 8% margins.

Where's Netscape's 90% market share Operating System (Windows) to
tie the product to ?? That *Leveraging* (Tying) practice has been
illegal for about 100 years. IBM got tabbed for it back in about 1910
for tying only their paper to the use of their highly popular office
machine. A mechanical calculator IIRC.

> It's not the fault of MS if the rest of them

See above about not having a 90% market share operating system to
tie products into.

Not much *choice* if you want to sell desktop computers.

>No
>one can take advantage of you without your permission.

How about the consumers that bought systems *without* an operating
system but still wound up paying M$ about $60.00 ? How many of them
knew that ? That has been sarcastically referred to as the 'Microsoft
Tax.'

Baloney. This administration has been quite active with respect to

You know, I am sure your Prof really is every inch the orifice, but let's lay off accussing teachers of living in ivory towers. Just like everyone else, teachers pay taxes, drive home in rush hour traffic, worry about their health (or health care!), worry about their kids, deal with workplace politics, and have to patch the leak in the roof. The classroom is as squarely in the "real" world as the office or street. Every place or space has its special rules, quirks, and privileges. Conversely, the world of corporate work is as "unreal" as any school or university. It is just that most of us spend longer living in the artificiality of work than of school. If I could, I'd live in the insulation of school rather than the insulation of corporate offices. There wouldn't be software companies to go to, streets to drive on, grocery stores, movie stheaters, doctor's offices, or churches if there were no schools. The "real" world wouldn't exist if not for the academic. Everything we have, from hydroponic strawberries in January to PCs to antibiotics to big screen TVs to Goretex hiking boots came from the academy. Sorry if one arse has managed to sour you enough on education to throw the whole system out the window.

As an advanced PC user, you have the education and experience to make intelligent, informed choices. The problem is that most consumers know absolutly nothing about operating systems or hardware or anything else that they really should and need to in order to make informed buying decisions. Add to this Microsoft's well-documented (and they admit it unashamedly) practices of intimidating hardware makers into bundling Explorer, Office, and other products in order to get a Windows license, threatening license cancellation if they do business with MS competition, buying out the competition in order to stifle it (and allowing them to hand out any old crap they like, as consumers have no *practical* choices, not at least until they become *very* proficent users, even expert [Linus ain't for Grandma, you know!]). Oh, I forgot to mention: isn't it impolite, to say the least, to use your customers as beta-testers? Oh, I guess since GM did that with cars in the 70's and 80's, that's OK?

Microsoft has become what it is by buying out, co-opting, pirating, copying, and bamboozling everything else (read: CPM/DOS, Finder/Windows, Wordperfect/Word, Lotus/Excel, etc., etc., etc.). Microsoft's announced intention, in their little PR ads of late, to "continue" to inoovate is laughable and insulting. Microsoft has made precisely zero innovation at the root level, ever. Sure they have refined a few things around the edges. The right mouse button was a nice touch, and Explorer's auto-page memory is handy, but as for *conceiving* of anything that is utterly new and revolutionary, they are about as progressive as the Vatican.

As for MS's only crime being padding the wallets of politicians, I find that to be one of the most egregious crimes imaginable. Bribing officials for treatment that benfits a small group (Gates, Ballmer, and the stockholders) chafes the public trust, and shows that the supposed free market isn't free at all, but costs big bucks, and then only for the advantage of the few. Entreprenuerial capitalism would be a great thing, if it ever were introduced honestly to the US.

While "the rest of them" surely have *yet* to "roll over and die", the ability to compete presupposes a fair fight. MS has never liked a fair fight. It has not only played dirty, but walked away from the table wherever it sensed it had to compete on the basis of the merit of its products. The free market is only a blessed thing if it benefits us all in the end, and that benefit is yet to be seen forthcoming from Redmond.

Although I admit that firing in extreme cases may be necessary. Firing
for any reason can not be a good thing.

> With that
> decision goes a ton of responsibility. If your daughter was being
> choked to death by a guy twice your size, Bob, would you fire? 73, Cec

I dunno Cecil...I would kinda like to avoid making such decisions
unless they are absolutely necessary.

> http://www.mindspring.com/~w6rca

The story is told that Jack Benny was being robbed. The bandit
held a gun to his head and said "Your money or your life!" To which
Benny replied, "Hold it! Let me think! Give me time to make a
decision!"
Unfortunately I am almost as thrifty as Jack Benny; I might also
need time to make any decision..even if I was also holding a gun. I
can have fewer choices without having a gun myself...but common sense
tells me that the best choice is to give up the money and don't try to
shoot the robber or give him any good reason to shoot me.
If the intruder is a crazy maniac he might not be responsible for his
action and if he was threatening the life of my daughter or any human,
I might be expected to do whatever I could to stop him....This is not
something that can be easily decided in a timely successful manner.
Sometimes there is no possible life saving action that can be taken.
Reality is like that. Good people get hurt or killed sometimes...even
in good movies.
I actually believe that any human life (both the robber's or
maniac's and the victim's) is worth more than money or property but if
an innocent human life is involved the choice is very much more
difficult. Maybe it is easy for me to say this because I don't own so
much money or property....and this is the policy that bank tellers are
told to follow tho' they may be responsible for a lot of money.
Sometimes there is no chance or time to make a good decision. In
that case you and/or your family can get murdered...and you can only

hope that 50 years later your living grandchildren can get some cash reparations....which ofcause wouldn't help you if you were not willing to give the NAZIs your money and properties early enough to escape with your life.
My family members were all American citizens, most of them born as US citizens long before WW2, but if my forefathers had not managed to immigrate to the USA from Germany and Austria in the 1800s...I too would have been faced with such decisions. I get mad when people say, "Why are Jews pacifist wimps? Why didn't they fight the NAZIs?" Those people just don't read history. Some Jews who had guns did fight back in the Warsaw, Poland ghetto...but they all got killed. Jews have proved to the world that they are all not cowards, although like most people, they place great value on both life and money. Many of the Israeli Jews are quite militant and are now well prepared to use their guns if the need arises. I'm no Zionist and this scares me too. Decisions...Decisions.
Choices? Choices?

Today is July 4th! Independence Day! We in the USA can all be glad that we do have many freedoms of choice.

Hams need MORE license classes...another case of needing MORE choices,
Bob Wex w2ilp (Intelligent Lifesaving Policies?) (I Like Pacifists)

He who fights and runs away
Lives to fight another day.
--A Saps Fable--

He who tries to draw his gun
Might get shot by anyone.

Mark Pitcavage heads the Militia Watchdog site which maintains an excellent bead on these subversive creeps who pose as patriots

I wrote him to ask a few questions. The first dealt with Irwin Schiff who used to give lessons on the air on how and why none of us should pay income tax. Obviously he wants to hurt our government in her pocketbook. I had wondered how the nut got away with his stuff for so long and if his disappearance from the shortwave frequencies signalled a jail sentence?

Mark wrote that Irwin once did serve time but is no longer on the air probabaly due to a sponsor having pulled out. Goodbye shiftless scumbucket Schiff!

My next question dealt with a vicious anti-Semite named Randall Scott whom WGTG puts on in the middle of the Alex Jones program. This Scott fellow takes all his materiel out of "Mein Kampf" as well as the ideologies of Nazis like Himmler, Goering and today's Ernst Zundel types, the apologists for mass murder.
Mark answered by saying that he himself hasn't heard the fool and doubts if the authorities bother listening.

The last should interest the gun loving boobs. Ever hear of the Maadi Griffin Company headed by a guy having the last name of Stewart? He's a friend of and a big sponsor of another hunk of dung named Alex Jones, the "Waco Wacko" and Fuhrer of "Infowars.com."
This Stewart geek sells guns which must be assembled. Supposedly they are high powered, accurate and based on the insinuations culled during advertisements, an excellent weapon to stop federal officials in their tracks.
I believe the famous Bo Gritz runs commercials for the Maadi Griffin too and I didn't understand how these subversives got away with it.
I asked Mark about it and we have good news. The Feds raided the joint and the owner's in jail on federal charges. Let's hope the snotnosed creep gets 20 years minimum.

Why am I making all these points? Today is July 4th and every American who is one instead of pretending on one hand to be one while trying to overthrow the government on the other is proud of Independence Day. Remember, that July 4,1776 led to our Constitution which stressed the fact that in this land, change comes about by BALLOTS, not BULLETS.

Militias? In 1776 they were important because of the lack of today's state National Guards. We had to defend ourselves against the British and Indians and banding together into state defense forces was mandatory. But to accept the thought nowadays that private state armies are necessary to defend oneself from attack by our own central government goes beyond

irrational-it's insane and a creation of internal subversive ANTI-AMERICANS rather than true patriots. A patriot ABIDES by the law, honors and respects the Constitution and is prepared to fight FOR the country instead of AGAINST her.

John,
I did some checking and here is what happened. The
'Slobber head' recently upgraded to Extra. The FCC
help up, then refused the up-grade. The 'Slobber head'
is still an Advanced class till 25 JUN 2001. I think
the FCC will then refuse to renew the 'Slobber heads'
license.
'Doc

Of course it can, Bob. A gun is an object. It can be used for good or
evil just like any other object. If I save my daughter's life by
firing, I consider that a good thing.

If you haven't decided beforehand, you and your daughter may well wind
up dead with an evil person walking away free to perform the same
atrocity next month. You are like a person who says he will learn to
swim when he needs to. By the time he needs that skill, it is too late.

Source record: 108056

Beginning of part of Doc's dithyramb:

Why am I making all these points? Today is July 4th and every American who is one instead of pretending on one hand to be one while trying to overthrow the government on the other is proud of Independence Day. Remember, that July 4,1776 led to our Constitution which stressed the fact that in this land, change comes about by BALLOTS, not BULLETS.

End of part of Doc's dithyramb.

I suppose the 2d American Revolution, AKA the War Between the States, was conducted by ballot.

And ballots hit Medgar Evers, RFK, JFK, John Connally, George Wallace, JP2, MLKing ... and Lee Harvey Oswald.

No, Doc, invincible ignorance of 911's limitations is no shield against up-close-and-personal criminal action.

K3BHJ

ballistic..it
> > is premeditated homocide!
> >
>
> --
> "A greyhound needs no fanfare." - Jean Boone 1917-1998

BUT Sally Rand needed fans.

I don't always speak for myself when I qoute others.
Examples:

You ain't nothing but a hound dog.
--Elvis P.(silent guitar pick)--

BUT I have to get analogous when I quote myself.

Nothing is exactly perfect.
Even hounds come in shades of grey.
--w2ilp--

A statement that is absolutely true is either
absolutely obvious or paradoxically false...
So is this statement. Take your choice - It's
Independence Day!
--w2ilp--

73,
Consider my apologies analogously.

Hams need MORE license classes,
Bob Wex w2ilp (Infectious Lice Picker)

Go to http://www.qrz.com/download/mods-i-k/icq7a.txt and use the second modification (titled "icom Q7A mods from the factory"). I recently did this mod and it works just fine.

You will need refer to the parts layout at
http://www.qrz.com/download/mods-i-k/icq7a.gif

I also found the mic gain was way too high. Try a 560 ohm resistor across the back of the microphone element.

regards,

Gee, must have been suffering from brain vapor-lock! I mrealized right
after I posted that I sent the info for the Icom Q7A modification. (I
recently did both the Q& and FT-90R modifications). Sorry for any
confusion!

Here is the information for the FT-90R:

go to: http://www.mods.dk/mods.php3?model=ft90&radio=yaesu

I hope this will work for you - it's an easy mod, I did it a few weeks
ago and it works just fine. The previous comments about the mic gain
modification WERE for the FT-90R, not for the Q7A.

regards,

ICOM Q7a is available several places at at VERY good price - is easy to use,
firs in shirt pocket, runs on 2 AA batteries, has excellent reciever
coverage from 30-1000 MHz, and wouldn't be a total disaster if it got
lost......due to the price. Only downside is the 300mw output - but
depending on the repeaters in your area this may not be an issue.

The Radiosigs-Guy tries hard with ..
>in this land, change comes about by BALLOTS, not BULLETS.

Right again, dude. There's a revolution coming soon. The ballots are gonna fly. And when it's over, Queen Hillary is gonna whine, "I wanna re-count". And The Amazing AlGore (inventor of the internet) is gonna come home to Tennessee and raise tobacco and pollute the river with his zinc mine.

And the Wise One is even more profound with ..
>A patriot ABIDES by the law, honors and respects the Constitution and is prepared to fight FOR the country instead of AGAINST her.

Excellent point .. and furthermore, the patriot is willing to fight against enemies, both foreign and domestic. So when the KommieKrats abuse their power by roasting babies at Waco with army tanks and by giving our nuclear secrets to China, and by blowing up aspirin factories abroad, it appears that the enemy is domestic.

Whatta you do then? I sure hope this one can be won at the ballot box. Peaceful solutions are best. Komrade Klinton's days are numbered. And he knows The Amazing AlGore (inventor of the internet) doesn't have a McGovern's chance of winning. So no telling what kind of stupidity he'll pull between now and November.

Hopefully he can get there without sending the lunatic fringe on a frenzy. But if he does, who do we blame .. the paranoid .. or the purveyor of paranoia?

> escalates the whole situation
> and someone always gets hurt.
>
Yeah...
that is because they believe...
An eye = An eye
A tooth = A tooth

BUT logically...
All men are created =
BUT are their parts to be = parts of their whole?

I don't always think that all eyes or all teeth are exactly =. That is
my self bias. BUT I believe that all men are created = although some
men may be more = than others. (especially in a court of non = law
breakers). I am not a bigot and I have no fettishes...(I like women as
a whole.) I like to consider each case seperately and change all of
the = signs to ~ signs. Analogously similar is not exactly always =.

I don't think that I need self-defense lessons. The only belt I need
is the one that can hold up my pants. Take no offense because I've
learned no self defense (as some of my ideas may not be completely
defendable)....except what I had to from experience.

If we knew ahead of time what situation doesn't need a gun we woldn't
need guns...but since we don't usually know for sure IMHO we ought to

ferget the whole thing so we don't shoot anyone for sure and find out
after we shoot - if it actually should have become a shooting situation.

Hams need MORE license classes...BUT IMHO they don't necessarily all
need guns. Gun ownership is an optional matter of choice in the USA
for those who can qualify. I'm for keeping it that way,

Heck...Its July Forth! Shoot em if you got em!

IMHO some Hams need Ham Classes more than they need self-defense
classes...High powered Hams may need to learn how to defend themselves
from their own RF radiation!

Seems I recall hearing a tape about 'Setting the fires' from the
Davidian bunch inside the compound. Not to mention that Reno
inherited the WACO mess, it was already started when she took office
and she had to RELY on an FBI / BATF that had been staffed by *TWELVE
YEARS* of Republican administrations. (8 Reagan - 4 Bush)

If you want to see two actions that Reno had time to develop policies
for etc. check out the Texas Freemen and Elian Gonzalez, then tell me
how many died in those two vs Ruby Ridge and WACO ??

Why NO mention of Randy Weaver's UNARMED Wife that was holding a CHILD
when she got a good portion of her Head BLOWN OFF by an FBI agent
under the BUSH PRESIDENCY ?? I'm curious about that one ??? Do Tell
???

Still have some good equipment left to dump, before I get into the CB radios and small parts/accessories. Dropped some prices and included shipping on most. Check out the details and photos at www.hightechspecialties.com (I am not a dealer). Please inquire via email: toomuchstuff@pobox.com Thx, Jon

Well, that certainly rules out Bill Clinton and his Kosher Kabinet from being patriots.

Another revolution is clearly overdue. Let's show these treasonous commie scum what the 2nd amendment is REALLY all about.

"Political Correctness is nothing but tyranny with manners."

> Keep in mind that a cell puts out less then a watt while these can
> put out up to 5W.

True; however, a cell phone is constantly transmitting at around .6 watts during the "QSO", while a ham transceiver will only be intermittently and briefly transmitting (unless the speaker is of the long-winded type).

Moreover, 800-900MHz is of potentially different concern than say 440 or 144MHz.

Also, as mentioned on this thread, the 2.4GHz phones I personally avoid since that is 2400MHz, and my trusty MW oven heats my beanie-weenies at 2450MHz. I realize that the phone is emitting a fraction of the 700 watts my MW oven is, but I am still weary of that frequency range, especially when I have alternatives such as my faithful Sony cordless in the 49MHz range.

Best of luck, and welcome to your two boys to the hobby!

Chip makes it easy.
>And George DuhhhhhBya (with some OIL MONEY inheritance & contributions)

Sorta like what The Amazing AlGore (inventor of the internet) inherited from his father's dealings with Armand Hamer. Notta lot to admire there if you do a little background on Mr. Hamer. And hopefully Governor Bush will get LOTS of contributions. Wonder if would be ok for him to visit the same Buddhist temple where The Amazing AlGore (inventor of the internet) mopped up. Nahhh .. he's with the wrong party. Plus, The Amazing AlGore (inventor of the internet) wasn't fund-raising that day. I know because he said so. And the inventor of the internet would never lie to us. Ever.

Chip-Man reads my mind (a little late) with:
>Rush out now and buy that new Ram V10 Monster Truck :)

Been there .. done that. Only it's notta Ram. It's an F-250 Lariat Super-Duty 4x4. Notta V-10, though. Power-Stroke Turbo-Diesel V-8. Got it March 11 of this year. Lovin' it more as the miles go by. Wanna jpg?

Chipper-Guy won't stop stepping in it ..
>. Not to mention that Reno *inherited* the WACO mess, it was already started when she took office

Inherited what mess? I didn't know there was a mess to inherit. Were the Davidians bothering somebody? Were they bothering you? Were they selling drugs to the locals? Selling illegal weapons to crack dealers? I didn't think so. So what were they doing that was so terrible, that, after 60+ days to "develop policies", Janet Reno developed a burnt baby policy. And he used military forces against American citizens to do it.

Ahhh yes, the child abuse rumor. A few problems with that one. One being that child abuse is not a federal thing. It's within the jurisdiction of the states. And Texas has some fine law enforcement agencies who could have handled it .. if there was anything to handle. Nahh .. Janet Reno to the rescue .. "rather than rescue the abused children, let's burn them alive. That way, nobody will be able to abuse them any more". I just can't wait till Janet Reno has time to develop some more policies. He sure handled that one fine.

And finally, the Chipper-One is half right with ..
>The paranoid and purveyors of paranoia seem to be almost exclusively right wingers.

Nahh .. the "paranoid" might be predominately to the right. But the reason for their paranoia comes mainly from the unnnn-constitutional shenannigans of Komrade Klinton and his Klan of KommieKrat thugs. I don't think they qualify for inclusion as right-wingers. W1WCR put(s) it so forthrightly when he says that Komrade Klinton "never met a kommunist dictator he didn't like".

>
>Inherited what mess? I didn't know there was a mess to inherit.

It had begun *BEFORE* she took OFFICE Mr. history professor.

By the FBI/BATF that had been staffed by 12 YEARS of REPUBLICAN
Administrations... I know that's REAL HARD for you to SWALLOW but get
used to it.

> Were the
>Davidians bothering somebody? Were they bothering you? Were they selling

>drugs to the locals? Selling illegal weapons to crack dealers? I didn't think
>so.

Ask your REPUBLICAN STAFFED FBI/BATF ???? They were the ones that
started the Davidian investigation and had the SHOOTOUT *BEFORE*
Reno took OFFICE .. The truth is a bitch at times isn't it ?

> So what were they doing that was so terrible, that, after 60+ days to
>"develop policies", Janet Reno developed a burnt baby policy. And he used
>military forces against American citizens to do it.

Waco Started Feb 28, 1993
http://www.pbs.org/wgbh/pages/frontline/waco/timeline.html

Reno sworn in march 12, 1993
http://www.whitehousedrugpolicy.gov/about/bios/reno.html

AFTER WACO had been started, as I said by an FBI / BATF staffed by
12 years of Republicans.

Waco ended April 19th , Reno was in office ~38 Days. No doubt she
comes into office in the middle of a crisis that's drawing
international attention with satellite coverage to every part of the
globe and completely changes the FBI/BATF policies, actions etc , the
whole nine yards, in 38 days. Yeah Right.

You left this part below out ???? WHY ?????

"Why NO mention of Randy Weaver's UNARMED Wife that was holding a
CHILD when she got a good portion of her Head BLOWN OFF by an FBI
agent under the BUSH PRESIDENCY ?? I'm curious about that one ??? Do
Tell" ???

How come no mention of the above ?????? Do Tell ???.. Can you maybe
somehow blame that one on Clinton / Reno too ?? Try real hard, Rush
Limbaugh occasionally blames it on Clinton / Reno why not you too ?

>

>Reno has time to develop some more policies. He sure handled that one fine.

I've listened to David (Mr. Seven Seals) Koresh's tapes and he sure
does mention *dying* by fire a heck of a lot. as I mentioned there
seems to be some tapes of 'Are the fires lit' that came from the
compound.

You right wingers sure have a odd point of view. It's perfectly OK for (psychotic) Koresh to fool the dimwitted into thinking he's an apostle of 'God' and have sex with every married woman (and possibly some children) in the compound. But oh My God NO !!!! if poor old Bill Clinton gets a BJ in the White House ... Wanna Bet Ole Bill never told Monica he was an Apostle ?? Perhaps that was his mistake ?? He could have told Monica he was an Apostle sent from 'God' and it was in God's plan for them to have sex !! That NO DOUBT would have freed him from blame in the eyes of the far right ;)

I'm an independent and voted for Bush the first time Clinton ran for office. But I have to say he's been hounded by the right wing nutcases more than anyone in political office I've ever seen. I think poetic justice will probably be served by having Duhhh Bya win in November.

Such as ?

I may not like Duhhhh Bya et all but unlike the Militia think crowd I doubt he or any other US president has/will be building many prisons / concentration camp for mass general population imprisonments. Neither do I fear impending takeover by the UN, the Illuminati, (add your group here) , the One World Government. I'm not the one(s) sitting in my radio room reloading shell casings and greasin' up the sniper rifle.

Check out Logger. http://www.chroniclenetworks.com/~dwm/Logger.htm.
It does have everything except for the online database search.
Wish it did. I would guess that online lookup would not be permitted by
the online service.

The features I like is:

It's free,
WAS, DXCC, IOTA support,
contest SEQ #,
CDROM lookup,
Telnet DXcluster support,
radio and rotor interface
plus much more.

What I don't like is:

closed source,
VB,
no API,
it doesn't handle crashes well (do backups often).
Needs a little work on GUI to make it more friendly.

All and all for the price I don't think it can be beat!

Not possible within the AX.25 protocol specification itself.

However, one can use a UI frame as a broadcast. Other stations would have to
have software that recognizes it as such and respond with their own UI frames.
However, you have two problems:
1) You may have to write such software, and
2) The responses may have collisions if more than one station is to
respond to the broadcast.

Yes, and after he makes Pseudo-general, he'll need to get a copy of the
study guide: "So You Want to be a Welfare Extra.", which is also published
by the CBRL, Citizen Band Radio League, in Newington, CT.

Chipster,
Just tell me whom you find as an annoying rightwing Christian
Coalition-loving, revolution-minded, government hating, conspiratorial
anti-Semitic and white extremist G.O.P slob on this board and let's both of
us rip the moron a new heinie. I don't know about you but I love Aunt Janet
and Uncle Bill as well as the good people in the F.B.I. and A.T.F. and I say
it's time to clear the rats' nest outta here before I leave on vacation this
month. I'm sick of these knotheads running down the people in D.C. who CARE
ABOUT THIS NATION and respect every man and woman for whom they are instead
of whom they want them to be. I'm sick and tired of the Rush "Limbaughers"
whose anti-government rhetoric buoy and enthuse the Timothy McVeigh types.
Three cheers for Aunt Janet; God bless that woman.
AF2Y,Doc

You forgot to tell him about the IR RF protection on the VX5. Very simple design, if the user transmits for more 2 or 3 minutes, the radio gets too hot to hold. This is even more true if you have an external power supply. Don't get me wrong, it is a great radio. I have two!

Good luck!

There's too many to chose from. I don't understand their mindset either. I can find some fault with most every government agency or leader we've had / will have. But I'm free to *voice* my opinion and cast my ballot (not bullets) to make changes as I see fit. This is about as good as it gets on planet earth. We've got full employment (if you've got a pulse you can get a job) , with about the best opportunities known in the universe. You're free to do just about as you please unless you begin to interfere/threaten the rights of others and you're always free to vote to change those laws. You're also free to pack your bags and head out to those other bastions of freedom such as N. Korea if you feel the desire.

I thought yesterday (as I frequently do but especially on the 4th of July) about how *lucky* I am to have been born here instead of N. Korea, China, Iraq, Libya, Afghanistan etc etc. Why some feel the need to heavily arm themselves, and voice and fear ridiculous invasion/imprisonment plots involving huge numbers of people and fear people that are of a different race, culture or of a different sexual orientation is beyond me.

Geez come on, everyone know that Belize is where ya go to get a good deal on
used American cars. So, after the insurance company settles up with you after
your car is stolen.......... and you have replaced it with a new one.........
pop down to Belize and buy your 'missing' one back at pennies on the dollar!!!!
Why? Heck, why NOT have a spare?!?!?

You don't think that they (liberal socialist democrats) would tell the truth about the gun issue, the stats, or the founding fathers intent do you?? Come on, if they ever told the truth about any of it their agenda would be down the drain. You see, there are just enough *un-informed* liberal socialist democrats out there to believe the crap the media and spin doctors tell them. Thus perpetuating the lies. NOW, on the other hand, there are an awful lot of *informed* democrats and Republicans out there to keep them honest. Just ask any of the **southern democrats** whats going on, they'll tell ya.

By her own admission, she accepted the responsibilty of what happened in Waco.
She ordered the attack when she knew there were children inside. No one needs
to demonize her, because she's done a great job of doing it herself.

The parallels between Waco and the Warsaw ghetto uprising are frightening, especially in the way they were reported. It's really sad that you have so much hate in you, that you can't realize that you are believing lies.

Bob, sounds like you are not aware that shooting is an Olympic sport.

A lot of guns are designed for sport and do NOT meet the Webster's
definition of a weapon. My .22 rifle would be next to useless as
a weapon against a real weapon.

When the Civil War was over, the Rebels were allowed to keep their
guns without which they and their families would have gone hungry.
I rarely buy meat. Mother Nature provides it for me every deer season.

I swear you're immune to intelligence. A puppet if I ever encountered one for whom I feel sorry instead of anger.
I don't believe what and how you write because it's beyond my comprehension how anyone could be so gullible and paranoid as to believe that the FBI intentionally murdered Branch Davidians. Since when, except in your own confused mind, did this government become a dictatorship? When, except in your own confused mind, did the citizens of this nation forfeit their rights? I remember reading nothing about the shredding of the Bill of Rights, do you?
Tell me Tim, when you look into the sky and see a plane flying over your home, do you get the feeling you're being spied on? Are you worried about your phone being bugged? What is it that makes you a shill for the extremists? For the ultra right wing of the Republicans? I hope you do realize that something's wrong with you; there is.
Do you know why you feel threatened by the government and I don't? It's because you're nuts--just plain off the wall. Maybe it's the desert heat that's doing it because to have your common sense impaired to such proportions is progressive.
Or then again, being I know nothing about you, maybe it's either because you're very young and ill- informed or very old and demented? It's like I said-you fall into the catagory of the post Reagan screwball Republicans who've lost their sense, sensibility, compassion and decency. I feel sorry for anyone who views the United Nations as an organization trying to take control of the U.S.A. By the same token I feel sorry for the knuckleheads who, under the influence or not, believe that the Branch Davidians were a lawful Christian religious organization instead of what they really were-nut cases following a self-serving phony Jesus who collected illegal weapons instead of souls.
For the ATF and or FBI to go after a person, he's gotta be one bad dude and Koresh fit the bill. One miserable sick s.o.b who should have been locked up years ago instead of being allowed to run free and burn himself up and his lackeys too. It's called self-immolation which, for example, the VietNamese Buddhists used to escape from war. We call it suicide by fire.
Koresh wanted to escape from a society which recognized exactly what he was worth-diddly squat and decided take his followers along for the ride and you have the audacity to state that an organization dedicated to preserving the internal security of the United States intentionally burned down that Waco compound?
Hell, if you weren't so confused and brainwashed, I'd call you outright crazy. And so you keep on defaming this government and its agencies while I, on the other hand, honor them. I don't know how you feel about things but I'm very proud to be an American. I suppose if I had the bitterness you have, I'd pack up and leave. Think about it.

I'm looking for an answer to a problem that I have had with my last five digital AM/FM stereo pocket radios. All five of them have died the exact same death. Two of them were Radio Shack Optimus radios and three of them were Sony SRF-M32 Walkmans. They all ran on two AAA batteries. The Optimus has a small external speaker (which I never used), and the Sony radio does not. These radios were priced in the $30 to $40 dollar range and performed exceptionally well at first. I used each of these radios for about 3 to 5 hours every day with a variety of quality headphones or earbuds. 95 percent of the time I listened to FM music stations, a lot of the time I had the volume up fairly loud. Battery usage was excellent on all of the radios (using Duracell Ultra's). Now my problem: after about 3 or 4 months each of these radios lost output on the left "speaker". The loss was gradual, but quick, and after a short time the left channel just quit. So of course I am puzzled by this pattern of malfunction. I really need a radio like this for my job, but I don't want to waste any more money. So, first of all, why are my radios konking out like this? And is there a quality pocket digital AM/FM stereo on the market that I can depend on? Thanks in advance for any help.

Yep, and the President Bush had been gone for a little over a year by Feb. 28, 1993, so they were taking their orders from .. ??

And he plows me under even more with:
>Waco ended April 19th , Reno was in office ~38 Days.

Reno in office 38 days till the big bbq? He works fast for a new-comer, doesn't he?

Now Chipper-Guy, you're warm-hearted where it matters. At least you voiced sympathy for the late Mrs. Weaver and her late son. Us right-wingers ain't figured that one out yet.

Oops .. I overlooked Chipster's best one yet,
>I think poetic justice will probably be served by having Duhhh Bya win in November.

Poetic justice would be if President Bush would keep Mr. Reno on as Attorney General and send him after The Amazing AlGore (inventor of the internet) over the fund-raising thing.

For that matter, there's lotsa neat things General Reno could do under the Bush presidency. Komrade Klinton and a lot of his kronies need to do some time. And it wasn't brought on by the "right wing nutcases" hounding him.

The "right wing nutcases" were in Idaho or Montana or somewhere cleaning their guns and loading .223's while the Klinton Klan was doing TravelGate, FileGate, ChinaGate, etc etc etc.

Wouldn't it be .. poetic .. to see General Reno serve arrest warrants on the whole crowd .. ?? Heh heh. Well, we can always dream, can't we?

Sid,
a couple of things that helped me out, and might help you, are:

1. practice sending as well as receiving. Get a page of text, sit down with a code practice oscillator & a key, and send it.

2. When you are out, say driving, and you see a sign, just mentally think the "dits and dahs" of the letters you see on the sign.

Good luck,

Blair NP2F

We can talk about making the decisions, but they are only academic exercises
and no one really knows until the moment of truth.(No matter how much we
think we have decided) Generally we are rulled by the situation and
training/conditioning.

We might differ on scemantics, but it is the conditioning taking over.
We may decide ahead of time, but the conditioning of a lifetime will almost
always win out.

A *BUSH* carryover IIRC.

>And he plows me under even more with:
>>Waco ended April 19th , Reno was in office ~38 Days.
>
>Reno in office 38 days till the big bbq? He works fast for a new-comer,
>doesn't he?

Here's what Janet Reno as head of the Justice Department gets to
oversee:

--
The Dept. of Justice comprises six specialized divisions (the
Antitrust Division, the Civil Division, the Civil Rights Division, the
Criminal Division, the Environment and Natural Resources Division, and
the Tax Division). The Justice Dept. also comprises the Federal Bureau
of Investigation, the Bureau of Prisons, the United States Marshals
Service (the nation's oldest federal law enforcement agency), the U.S.
Central Bureauï¿½International Criminal Police Organization, the
Immigration and Naturalization Service, the Drug Enforcement
Administration, and the Office of Justice Programs.
--

Now then if you think in ~ 38 days the (former) Attny General of Dade
County Fla. whips into the big leagues in Washington DC and
completely revamps FBI/BATF policy etc can I have some of that
'White Lighting' you're drinking ?

>Now Chipper-Guy, you're warm-hearted where it matters. At least you voiced
>sympathy for the late Mrs. Weaver and her late son. Us right-wingers ain't
>figured that one out yet.

IMO the FBI was out of control internally. I could go look up who was
AG under Bush when that happened but unlike Limbaugh and his
demonizing of Reno I suspect the problems occurred at lower levels.

Does anyone know if AX.25 allows a broadcast to get an answer from
every station listing on the currently used frequency.

We are thinking about using AX.25 for transfer data in emergency
operations (e.g. telemetry or technical data of breathing apparatus).
There for it is neccessary, that every radio turned during the
emergency operation can send a broadcast to find the radio that
receives all the data for monitoring purposes.
If this shouldn't be possible, we will get a problem, because in every
operation another radio may be used for monitoring.

I'm redesigning an old board to get rid of the TBA-810 that has become obsolete. TBA-810 is a 5-watt automotive radio type chip that is fairly stable and for a communications radio where you aren't asking for 5 watts on a CW basis, it works just fine.

I'm trying my best to find a 5-watt chip like the 386, in that there must be a bazillion of them in use, they are in ready supply, and they are cheap. They aren't the best for distortion, they are sort of cranky as to stability, but they are like the 6V6 or 50C5, they will be around into the NEXT millenium and they are available almost everywhere.

I'm considering the LM383, but given National's move to go away from through-hole packages, it sort of scares me that they won't be around much longer. That and I can't find a second source for them. There are half a dozen proprietary chips around from Motorola, Philips, and so forth, but not one that seems to be an industry standard.

Any suggestions?

Windy,
What you do is to take the postive and stress the negative. There are
exceptions to everything and what you write says that the rule of ballots
not bullets is not valid because of the exceptions to that rule.
Who's living in Utopia? The USA is an imperfect nation in an imperfect world
but we have more going for us in the way of respecting the dignity and
rights of man than elsewhere.
Regarding the USA, I'm an OPTIMIST and always will be.

What revolution coming soon? By George W. (the executioner)? Hey dude, lighten up. Your worst enemy Bill will not be back and neither will Aunt Janet because of her medical condition. Personally speaking I think she's gorgeous but beauty's in the mind of the beholder.
My point is that itchy twitchy guys like you will be able to go to the booths and vote in YOUR candidates, so why the bitching and confrontational dissension? You prefer another way to accession of power?
And don't give me your never ending Waco crap. Neither the FBI nor ATF planned any conflagration-Koresh did. He knew he was on the way out and decided to take as many as possible with him.
A church compound? What a joke-it was a friggin' CULT compound in which crazed Koresh was engaging in sex with underage girls. He was no better than Jim Jones and you know it. The Feds had it up to HERE, moved in FINALLY and Koresh set things up to make them look bad AND YOU FELL FOR IT.
Additionally George W. (the executioner) would have done things no differently not would have his Attorney General whomever. And how do you know that Comrade Clinton as you call him will not be replaced by Fuehrer George W. (the executioner)?
Your problem is that you don't appreciate the wonders performed by Mr. Clinton since 1992. The guy's made life more rewarding and stable for the average working man and woman here and that's all that counts. He's alllowed those with alternative life styles to come out of closets and take their places in society along with the rest of us. And if the damn Republican rightwingers hadn't sabotaged Hillary, she and Bill would have been able to come up with a comprehensive medical program years ago. Why? Because DEMOCRATS CARE and Republicans just plain suck! They're nothing but mean spirited Hoovers dominated by the parasitic Christian Coaltion who want to do away with the word RIGHTS.
Sorry bud but I'm sticking with Al Gore, the Inventor of the Internet and the environment and am steering clear of George W, (the executioner).
AF2Y,Doc

Attaway to go, Chipster baby. I'm witcha 100%. They think the executioner from Texas, if elected, will walk on water. Bullsnot. He'd be lucky to have anyone better than Aunt Janet as Att. General. But the downside for George W.(the executioner) is that he's not getting in. Gore will destroy him in the debates which will bring all the undecideds over to Al while Pat Buchanan siphons off enough to put Georgie into the lethal injection chamber.

What mess? Those Branch Davidians had enough illegal weapons in their "church" to start W.W.III. Phonies. I live in a melting pot with every type of church and synagogue imaginable and will guarantee that none is a warehouse for murder. This business about the "innocent Branch Davidians" is naive, shallow and intentionally misleading. Too bad the fire happened but Koresh made it happen. Blame that phony Jesus instead of Aunt Janet and her troops.

Dwight,
You don't get it, do you?
What does a person like you, a responsible gun owner living in a region where ownership of same is mandatory, have to do with , for example,the run of the mill bunch of screwball paranoids who hate this beloved country to such an extent as to warrant the formation of private armies to fight and destroy those forces sworn to protect and defend the Constitution by which we're fluorished for over 200 years?
Responsible gun ownership is right and proper. Carte blance unregistered and unlicensed gun ownership is a menace to us all.

Source record: 108027

Just so there won't be any misunderstand :)))
Here is my standing challenge to Burt.

He (Burt) seems to think I am a man that everyone has a low opinion of. I'm willing to allow him to contact ANYONE I have regular contact with.....Employer, Church, Friends, Family, Ham Radio Friends, whatever, and ask their opinion of me.

In return, I ask the same of him. I can contact his employer, family, friends, ham radio friends, whatever, and ask them of their opinion of him.

We will post the results publicly. OK, Burt, what is it. Are you willing to back up what you say, in public, for everyone to see? ;))) The challenge is yours! :))

73,
Rick N9GSU

It does make one wonder sometimes. If you were creating a resume or
filling out a job application, should you mention amateur radio as a
pastime or skip that for fear of being branded a nut case ?,

It sounds like you're worried, there, Georgie Porgie. Worried that your
hypocricy will be exposed.

>People like kc8jbo are already on the "roundup the
> usual suspects" list from the FCC.

I am????? HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
When W4AMP QRMED me a couple of Saturdays ago, I phoned Riley and he
returned my call within a short while. He already said that W4AMP was
going to get some correspondence and he advised me on what to do if
this happens again. I only received 1, ONE warning letter. The other
letter was an avisory to N8WGM and myself not to take our dispute over
the air.
Jimmy, unfortunately, can't say the same.

Poor Georgie Porgie, still fondling his granddaughters and grandsons.
Georgie Porgie has no answers, because his head is a permanent fixture
of his anal orifice.
The only human garbage is YOU, Georgie, living in your public housing
there in Orange, TX.

The Radiosigs-Guy may be in the process of outdoing himself. Not that we're surprised, he's the Cassius Clay of RRAM.

This thread is up to 84 posts, counting the 10 that somehow got out of the thread. With over 12 hours to go, this one could outdo "Elian Has Been Snatched". Sure shows promise.

Sorry right-wingers. I was beaten into submission as of yesterday morning, so I must bid you farewell for now, with these pleasant thoughts ..

Hillary for Senate ! !
Down with the 2nd amendment ! !
He did NOT have sex with that woman - Miss Lewinski.
Tobacco causes cancer ... unless it was grown on Vice President Gore's farm.
Vice President Gore is NOT polluting that river in Tennessee .. he's just .. dumping the by-products of his zinc mine into it.
We need socialized medicine.
Vice President Gore was NOT fund-raising at that Buddhist temple. He was simply .. letting people give him a lot of money.
Let the government pay for it. That way the tax-payers won't have to.

I'll be back with more later.

Before you nitwits further slander our beloved Attorney General, try reading this short biography of that brilliant woman. Obviously she has credentials and deserves to be our top law officer of the land. Detractors-whatcha got going for you besides bird seed for brains?
AF2Y

Janet Reno is the first woman Attorney General of the United States of America. Nominated by President Bill Clinton on February 11, 1993. She was again appointed in 1997 by President Clinton and remains Attorney General of the United States.
Attorney General of the United States Janet Reno has several key priorities: * Reduce crime and violence by incarcerating serious, repeat offenders and finding alternative forms of punishment for first time, non-violent offenders. * Focus on prevention and early intervention efforts to keep children away from gangs, drugs and violence and on the road to strong, healthy and self-sufficient lives. * Enforce civil rights laws to ensure equal opportunity for all Americans. * Ensure that the Department of Justice reflects a diverse government, making integrity, excellence and professionalism the hallmarks of the Department.
This is now. The early life and career of Janet Reno helps us understand the reasons why Janet Reno is the remarkable person she is. Born on July 21, 1938 in Miami, Florida. Her father, Henry Reno, came to the United States from Denmark and for forty-three years was a police reporter for the Miami Herald. Jane Wood, Reno's mother, raised her children and then became an investigative reporter for the Miami News. Janet Reno has three younger siblings. Strong roots for a strong woman
Janet Reno attended public school in Dade County, Florida, where she was a debating champion at Coral Gables High School. In 1956 Janet Reno enrolled at Cornell University in Ithaca, New York, where she majored in chemistry, became president of the Women's Self Government Association, and earned her room and board.
In 1960 Janet Reno enrolled at Harvard Law School, one of only sixteen women in a class of more than 500 students. She received her LL.B. from Harvard three years later. Despite her Harvard degree, she had difficulty obtaining work as a lawyer because she was a woman.
In 1971Janet Reno was named staff director of the Judiciary Committee of the Florida House of Representatives. She helped revise the Florida court system. In 1973 she accepted a position with the Dade County State's Attorney's Office. She left the state's attorney's office in 1976 to become a partner in a private law firm.
In 1978, Reno was appointed State Attorney General for Dade County. She was elected to the Office of State Attorney in November 1978 and was returned to office by the voters four more times. She helped reform the juvenile justice system and pursued delinquent fathers for child support payments and

established the Miami Drug Court.
The strength, vision, tenacity and commitment of Janet Reno makes her a role model for all who seek justice. Women's International Center is privileged to present the 1997 Living Legacy Award to Janet Reno in honor of her many contributions.

The Regency RH256B radio transmits/receives from about 140-155 Mhz w/ 15-25 watts out and PL encode/decode. This radio has been optimized for the amateur radio two meter band (144-148 Mhz). The radio is field programmable by flipping a toggle switch on the back of the radio to the "programming" setting. For more information and photos, please follow link below:

I realize that this is the wrong group, but I'm hoping someone will see
this and know where I can find a book on this repeater.
I have one of these units in which the receiver "drops out" after a
"warming period". Can anyone help me find a manual and/or schematic?

KK7HO stirs the pot again with:
>Regardless SHE called the *shots* and said so herself. Remember?
>

There, there, Timmy .. let's not cloud the issue with facts. Come on over .. join up with us KommieKrats. It'll be fun. That way Radiosigs-Guy and Chipster-Man won't have to beat us up all the time. Come on, Timmy .. take the pledge ..just a few lines and you'll be fine ..come on .. it won't hurt a bit. Say it with me ..

Vince Foster committed suicide.
He did NOT have sex with that woman - Miss Lewinski.
Down with the Second Amendment.

Go on, Timmy .. say it .. it worked for me. I took the pledge a few hours ago and they haven't ripped me a new heinie since.

KK7HO won't stop ..
>Your so full of it Charlie your eyes have to be brown.

Timmy you're starting to get on my nerves. The official government report is out and it is now official .. the federal agents did NOT start the fire or the shooting. And we both know that the government would not lie to us. This is the most ethical administration in history. Get over it. Now about that pledge .. say it with me ..

Hillary really didn't know how that stack of FBI files wound up on her night stand.

He did NOT have sex with that woman - Miss Lewinski.

Come along, Timmy .. say your lines .. we'll make you into a good KommieKrat yet.

As would any leader worth their salt even though she probably barely
could find her way around DC in a 38 day time span.

>She ordered the attack when she knew there were children inside.

Koresh knew good *pawns* when he saw them. Did you *ever* think for a
nanosecond how *crazy* that POS Koresh was ? How many so called "Holy
Men" do you know that would allow/keep women and children inside an
armed compound after there's been shots exchanged with federal agents
? Did you ever read about WACO and see the numerous religious scholars
the authorities dealt with in trying to get inside the demented brain
of that psychotic POS Koresh to let/force the women and children out
? Have you any idea of all the psychological tricks and ploys they
tried to make that POS come out for 51 days ?

Did you realize even with Waco's horrible ending more people survived
Waco than they did in Jonestown Guyana where there was another
religious fruitcake (Jimmy Jones) of purple Kool Aid fame ? You mix
psychotic paranoid nuts with Guns N Bibles and it's worse than a loose
cannon.

> No one needs
>to demonize her, because she's done a great job of doing it herself.

Didn't they wait 51 Days ? And isn't that 51 days longer than the
agents under George Bush's AG gave Vicky Weaver to put down that
DANGEROUS BABY in her arms before they blew her skull apart ?? Why
no demonizing there ?

>
>American Heritage magazine reported that Koresh had fewer firearms than what
>some Texas ranchers have.

WOW !!!

Some of those Texas ranchers must have a HELL of a worse infestation
of Critters than I ever thought possible. I guess the SILENCERS must
be so that the prairie dogs can't hear where the bullets are coming
from and return fire and the GRENADES are for those occasions when
the gophers hole up in a bunker ?

A 'portion' of the ammo recovered in a pile 5 feet high x 20 feet long
x 12-14 feet wide sounds pretty normal for a rancher or Sunday Morning
worship services too doesn't it ?

You might want to put your reading glasses on before you scroll down
through this.

http://www.treas.gov/press/releases/pr950713.html

WEAPONS RECOVERED FROM THE BRANCH DAVIDIAN COMPOUND:
TREASURY SUMMARY OF REPORT PREPARED BY THE FBI FOR PROSECUTORS
AND THE TEXAS DEPARTMENT OF PUBLIC SAFETY

The second photograph "government exhibit 594" presents a portion of
the ammunition rounds that were destroyed by heat ("cooked off") and
found in an interior bunker; the pile in the photograph is
approximately 5 feet high, 20 feet long, and 12 to 14 feet wide. The
cooked-off ammunition is being shoveled into a Bob Cat front-loader in
"government exhibit 593." "Government exhibit 599" shows one of the
live hand grenades found on the premises.

In total, the Texas Department of Public Safety, led by the Texas
Rangers, recovered more than 300 firearms from the Branch Davidian
compound. In addition, a number of live grenades and more than 300
grenade components were uncovered. Hundreds of thousands of rounds of
ammunition were also seized.

The Bureau of Alcohol, Tobacco and Firearms investigated David Koresh for conduct involving: the illegal manufacture of machine guns and the illegal manufacture and possession of destructive devices. The FBI report provides evidence that the Davidians' arsenal did indeed include weapons unlawfully manufactured. The weapons listed include semiautomatic firearms illegally modified to fire in full automatic mode, as well as grenades and silencers. All of these weapons were unlawfully possessed.

ILLEGAL WEAPONS RECOVERED
Machine guns

The FBI determined that 46 semiautomatic firearms had been modified to fire in full automatic mode: 22 M-16 Type Rifles 20 AK-47 Type Rifles 2 Heckler and Koch SP-89 2 M-11/Nine

The FBI also determined that two AR-15 lower receivers had been modified to fire in full automatic mode.

Silencers 21 Sound suppressors or silencers

Hand Grenades 4 Live M-21 Practice Hand Grenades

The possession of lawfully manufactured machineguns, silencers, or grenades requires the owner to register the weapon with the Bureau of Alcohol, Tobacco & Firearms. None of the compound's residents were registered to own such a weapon, therefore it would have been illegal for them to possess these weapons.

WEAPONS RECOVERED FROM THE BRANCH DAVIDIAN COMPOUND: TREASURY SUMMARY OF REPORT PREPARED BY THE FBI FOR PROSECUTORS AND THE TEXAS DEPARTMENT OF PUBLIC SAFETY

These lists do not include dozens of other items recovered from the
Compound such as dust covers, extractors, front and rear sights, gun
cleaning equipment, bolt release levers, compensators, .50 caliber
belt links and numerous other parts.
--

You've convinced me. After reading the above I can't see why any
family in America wouldn't want a good natured , fun loving bunch of
Christians like the Davidians living right next door.

Actually its come out in the recent ongoing trial that she was told to 'bug off' when she tried to intercede in some of the FBI's plans. The religious nut cases seem to have a habit of killing themselves off no matter what you do. Witness Jonestown Guyana , Heavens Gate / Hale Bopp, the recent religious group suicides in Africa, and another one in Scandinavia not too long back IIRC.

Sounds like the phones sockets were getting contaminated with dirt.
The left channel on a jack plug is usually the tip, so when you insert
the plug into the radio it sometimes carries in a little muck.
Eventually this will build up in the socket and stop the plug tip
making contact. Solution - open the radio case and clean or replace
the headphoones socket.

"Blindly follow and believe" Who ?

It seems this government (*imperfect* though it may be) has turned
over something called the 'Internet' to general public use. Its opened
up doors, methods of communications, information access, _FREEDOMS_
to hundreds of millions of people in just a few short years. Maybe I
should arm myself , slip on my Cammies and greasepaint and start
running through the woods practicing for the coming Apocalypse ? Nah ,
sitting here and trying to keep up just a tad on the 131 newsgroups
I'm subscribed to keeps me rather busy already.

>You'd give up freedoms for so called promises of security.

You'll have to be a *MUCH* better salesman not only to me but to the
American public in general before anyone with an ounce of brains
thinks you or your ilk have anything to offer.

FWIW: as far as TV goes I *hear* about 5 minutes a night , I flip it
on when I hit the sack and set the timer for 30 minutes, I'm usually
out like a light in 5 minutes or less.

From what I have read two of the DIvidians were licensed wepons
dealers and they conducted legal businesses. Profits of which went to
support the group.

<snip>

One of the "government exhibits" I saw was a photograph of several guns scattered on the charred remains of the compound. Everything else was burnt to a crisp, yet the guns in the picture were intact and in pristine condition, including the wooden stocks.
Anything that the government has presented as evidence in this case is questionable.

"LED TO"...but through a very circuitous route, that never really got to that stage of utopia. There was a movement in this country following the Revolution, to install a monarchy... with Washington as King. There were the Articles of Confederation, which were written by a core of Statesmen who so feared the potential abuses of a strong central Government that what Federal authority did exist was scarcely enough to manage the Postal Service.

When the Constitution was written and ratified, Jefferson was away. He was so horrified when he about the power vested in the Federal Government by the Constitution that he called for immediate Amendments to the Constituition, 10 of them, specifically limiting the power of the Federal Government to infringe on the Freedoms of the Citizens, by Citizen force if necessary. By Bullets not Ballets.

The Constitution calls for peaceful Revolution, by ballot. But guarantees, through the amendment preventing the Government from disarming The People, that the final say will be the People's...by bullet if necessary.

July 4th 1776 led to the Constitution which stressed that in this land change comes by Bullet....by Ballot if we allow it.

2057. FCC re-affirms exclusive CW band segments

From: Glenda Gadzoox <w2dne@my-deja.com>
Message-ID: <8k214f$u73$1@nnrp1.deja.com>
Source record: 107907

The FCC has turned down a request asking it to change the amateur rules to permit SSB and digital modes in the 6 and 2-meter CW-only subbands. The petition, filed last August by the California Six Meter Club, was assigned rulemaking number RM-9806 by the FCC, which sought comment on the proposal early this year.

I have in my hand the May 2000 SAM database CDRom.
The SAM product has been sold to VIS, an outfit out of
Alabama. They are regulars at all the larger hamfests
and a distributor for TexasBugcatchers.

The Toll free number is 1-800-655-4267
The address is
VIS
PO Box 284
Coffeeville, AL 36524

Hope this answers your questions.

> could find her way around DC in a 38 day time span.

"Finding her way around DC" was not required. Her responsibility was
only to know US law and see it was applied correctly. And she failed
the test miserably.

> >She ordered the attack when she knew there were children inside.
>
> Koresh knew good *pawns* when he saw them. Did you *ever* think for
> a nanosecond how *crazy* that POS Koresh was ?

Think for a nanosecond how crazy it is to send tanks to rescue
children by smashing their house while the children are inside.

> How many so called "Holy Men" do you know that would allow/keep
> women and children inside an armed compound after there's been shots
> exchanged with federal agents ?

How many so-called police forces strafe a house from helicopters in
order to serve a warrant?

> Did you ever read about WACO and see the numerous religious scholars
> the authorities dealt with in trying to get inside the demented
> brain of that psychotic POS Koresh to let/force the women and
> children out ? Have you any idea of all the psychological tricks and
> ploys they tried to make that POS come out for 51 days ?

Have you ever listened to the so-called negotiators on the tapes? Do you have any idea what they were doing during (what they called) "negotiation"?

"One of the things you can sometimes do in negotiations, especially if you have someone with a delusional system, is to point out the weaknesses and the fallacies in the delusional system," said Wayman Mullins, a hostage negotiating expert who has closely followed the Waco siege. "Koresh's is so well-developed, it just wouldn't work."

http://www.public-action.com/SkyWriter/WacoMuseum/war/doc/w_doc03.html

In other words, they were trying to "deprogram" the Davidians, while pretending to the US public that they were negotiating surrender.

Note also the casual discussion of summary execution by sniper without benefit of trial. I don't remember that in the US Constitution, but Reno may have an updated version.

> Did you realize even with Waco's horrible ending more people
> survived Waco than they did in Jonestown Guyana where there was
> another religious fruitcake (Jimmy Jones) of purple Kool Aid fame ?
> You mix psychotic paranoid nuts with Guns N Bibles and it's worse
> than a loose cannon.

Easy enough to kill 80 people, and then call them all paranoids who did themselves in. Like, he committed suicide, boss. Tried to stop him, but he was crazy. He poured cement all over his own shoes and jumped in the river. Wink.

> > No one needs to demonize her, because she's done a great job of
> >doing it herself.
>
> Didn't they wait 51 Days ?

And enjoyed every minute of it. According to the Justice Report, they wrapped the "compound" in razor wire, and patrolled the grounds with Bradleys and squads armed with flash-bang grenades.

Meanwhile, they used military grade laser cannons and sound weapons on the (illegally imprisoned) Davidians, with hidden psi-war voices buried in rabbit screams and white-noise at volumes your shop steward would never permit in a modern factory.

Ladies and gentlemen, is this police work? You jest.

> And isn't that 51 days longer than the agents under George Bush's AG
> gave Vicky Weaver to put down that *DANGEROUS* BABY in her arms
> before they blew her skull apart ?? Why no demonizing there ?

Plenty of well-deserved demonizing there. The state of Idaho tried to put the murderer (Lon Horiushi) on trial for murder, but Reno and the boys went to court and sprung him.

I guess they realized that if the trigger-man was convicted, the next indictment would be the commanders and others as conspirators in the murder. And then who knows? Indictments over the Waco deaths?

Equal Justice Under the Law is all very well, but it takes a real AG to see that you don't get too much of it.

Darryl

My radio doesn't over heat at all, unless I operate outside the ham
bands.
Remember, there is a TX save feature that reduces your TX level if
you are close to a repeater.
I don't always operate at 5W.
I can operate on most repeaters around here with reduced power, even
from my basement.

Since she was in office 38 days and relied on FBI/ATF policies that
had been set by 12 YEARS of Republicans maybe she should get the
electric chair ? Sounds like Typical Militia-Think to me.

It happens not infrequently when someone is holding *CHILDREN* , I've
seen instances of my own State Police killing a hostage taker by
sniper fire.

You kill several law enforcement officials for whatever reason ,
justified or not, then hole up with some women and children while
you're heavily armed. Tell me what happens when you stick your head
out the window ? How naive are you ??

>
>> Did you realize even with Waco's horrible ending more people

Naw Koresh was a *model* of sanity. He wasn't some kind of pseudo
Messiah paranoid fruitcake that was heavily armed.

> Like, he committed suicide, boss. Tried to stop
>him, but he was crazy. He poured cement all over his own shoes and

Sounds about the same psychological MO as they used with Noriega (sp),
high level rock and roll, rabbit screams , bright lights. They weren't
trying to make it a nice stay at the Holiday Inn.

They wanted the morons to COME OUT. Maybe in Militia-Think They should
have run in every morning with housekeeping to ensure their nice stay
and left a mint on the pillow ?

>> And isn't that 51 days longer than the agents under George Bush's AG

On GEORGE BUSH'S Part ????? Where ??? Why no DEMONIZING of BUSH and
HIS AG ?????? ??? Why didn't BUSH FIRE HIS Attorney General ??? Why
all this on Reno's Back when Ruby Ridge happened under Bush's Watch ??

> The state of Idaho tried to
>put the murderer (Lon Horiushi) on trial for murder,

As I would , if I had the authority.

> but Reno and the
>boys went to court and sprung him.
>I guess they realized that if the trigger-man was convicted, the next
>indictment would be the commanders and others as conspirators in the

Which would lead to higher ups in the BUSH ADMINISTRATION ???? Was there some kind of PLOT In the George BUSH Administration that Reno is Covering up ?? Is that what You're trying to say ?? Janet Reno is covering for Plots in the George Bush administration ??? The plot thickens.

> And then who knows? Indictments over the Waco deaths?

Yeah, who knows ??? And how much blame do you think would fall Reno's way since she had been in office 38 Days ??? Sounds like this goes back in the BUSH/REAGAN ADMINISTRATION But you Right-Wing Militia-Think types keep dancing around that Elephant in the Parlor and Try and pretend it isn't there .. Good Luck.

I don't think the 383 is going away anytime soon -- it has been used in
a lot of consumer equipment. As someone else pointed out, Philips
second-sources it as the TDA2002. Replacement parts should be available
on an individual basis from ECG / NTE sources at least until Judgment
Day.

Perhaps we should collectively take up arms and make changes on our
own (who needs that damn ballot box anyway ?) and install someone
reasonable ,such as yourself, as say 'Fuhrer' ?

Another display of your Blinding Adult Rapier Wit Eh ?? <grin>

I'm certainly NOT perfect, but whip over to the Merriam-Webster online
dictionary here:

http://www.m-w.com/

And type in 'consentual' (as you spell it) , then tell me what it
says ? <grin>

>Most folks that were/are upset by Slick Willie's actions are

On the order of concerns, I'd much rather have a president that gets
of age, consensual , legal BJ's than a Nazi prosecutor that runs amuck
issuing subpoenas to bookstores. YMMV

>PS: Your webcam scenario is a strawman.

It's not too far fetched if Nazi Ken had his way.

2072. Standard C-1208DA problem...?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-06 00:00:00 UTC
From: Mark Wilson <ac892@osfn.org>
Message-ID: <3lv9mscgkkramig4pl92ebbuq2pa8jg2mo@4ax.com>
Source record: 107922

Hello everyone...
I have a Standard C-1208DA 2 meter radio.
Anytime I switch bands to receive in either 400Mhz or 800 Mhz,
the ENTIRE display blinks and I can not receive anything...?
This ONLY happens on 400 and 800 Mhz...?

Does anyone else have this radio or has anyone else experienced this ?
I know this radio used to receive in these bands without a problem...
I reset the microprocessor but it did nothing.

I enjoy being able to listen to the local police on 400Mhz...
Unfortunately, I can't anymore...

Other than this, the radio works fine.

Any input or suggestions would be appreciated.

Thanks !
Mark / ka1mla

Koresh and two other Davidians had FFLs. All of the weapons were legally owned by the applicable federal laws. There is also no federal law that restricts the number of weapons a person may own.

Return to the statement that she "accepted responsibility". If she had
done that for real, yes, she should shake hands with Ol' Sparky. But
Janet ("Not From This Planet") Reno took all the responsibility for
the violent death of 80 people -- and none of the blame.

Nice work if you can get it.

And if they did NOT want to, YOU for one would not care enough to find
out about it.

Most of the Davidians were long dead by April 19th, anyway. The
autopsies show that many of the bodies were slimy rotten, crawling
with maggots, with the flesh falling off the bones. They were either
murdered by the helicopters and assassination squads doing "warrant
service", or they died from some other violence during the "seige".
The bodies were butchered with hands and heads chopped off in many
cases, an obvious attempt to hide identitities.

To spell it out, that is not suicide, Toto.

http://www.public-action.com/SkyWriter/WacoMuseum/death/map/d_list00.htm
l

The peculiar thing is how hush-hush the government played it all,
pretending the Davidians died in the fire. That was a big lie,
brother. And he who lies about a violent death should be the first
suspect.

It is a very simple principle, and it applies in all cases, whether
you get your paycheck from the US Treasury or private sources: You lie
about murder, you face the jury when the truth comes out.

> involved with them.

Religious nutcases are no worse than any other nutcases, including
atheist nutcases. (Recall Lenin, Stalin, Mao, etc.)

And remember this, Deep Thinker: Calling a man a nutcase does not
provide adequate justification for murdering him -- not in this
country. Yet.

>
> It happens not infrequently when someone is holding *CHILDREN* ,
> I've seen instances of my own State Police killing a hostage taker
> by sniper fire.

Killing people with sniper fire is not permitted by US Constitution. Ah, I know, there are plenty of concocted "tough situations" invented for television and movies where they just HAD to "take him out" with sharpshooters to save the planet, stop an airplane full of people from falling out of the sky, or preserve the virginity of the girl next door.

But there is no provision in the Constitition for this Summary Execution. The government can only inflict death by Due Process of Law. Just "take 'im out" is not good enough. Either you live in a nation of laws, or you live in Dodge City, where the sheriff IS THE LAW. Obviously you would prefer to get rid of the laws, and just have Matt Dillon shoot the "bad guys". Government made for TeeVee.

What is your proof that Koresh was holding children as hostages?

> You kill several law enforcement officials for whatever reason ,
> justified or not, then hole up with some women and children while
> you're heavily armed. Tell me what happens when you stick your head
> out the window ? How naive are you ??

And your proof that all this was taking place?

If you had even the smallest familiarity with primary sources of evidence, you would see the US government was lying to all the world about the Davidian deaths.

Just take one fact: The ATF agents who died in that attack were all killed by shots worthy of professional assassins. Either a bullet through the aorta, or a bullet through the center of the brain.

http://www.public-action.com/SkyWriter/WacoMuseum/war/doc/w_doc20a.gif
http://www.public-action.com/SkyWriter/WacoMuseum/war/doc/w_doc20b.gif
http://www.public-action.com/SkyWriter/WacoMuseum/war/doc/w_doc20c.gif
http://www.public-action.com/SkyWriter/WacoMuseum/war/doc/w_doc20d.gif

Now you try that trick from a few dozen feet away, dodging and hiding while people are shooting at you.

Obviously, those shots were not fired by Davidian Bible students hiding in this house:

http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21.jpg

> covering for Plots in the George Bush administration ??? The plot
> thickens.

Of course. The two-party system recognizes only two parties: The Ruling and the Ruled. Since both Bush and Clinton both belong to the Ruling Party, they stick together when times get tough. That is why the Republican Congressmen were so soft on the Waco "Investigation", and the Democrats never pushed for a shake-up after the Ruby Ridge murders. The ranking lawyers in all departments are career professionals, and they all "play nice" like professional wrestlers when the bell rings.

Incidently, the Waco raid was planned during the Bush Administration. The Democrats could have pushed for investigation of why a "police force" was being trained at Ft. Hood for a supposedly civilian police action, but they played nice, too.

Are you really surprised?

Holy smokes Chip, I never realized the enormity of the weapons cache in the name of Jesus. Huh? In the name of the Prince of Peace who taught love, compassion, understanding, brotherhood and adoration of his father? Isn't that what Christianity's all about and isn't the Branch Davidian movement Christian not bowel?
Gee I don't know about such hypocrisy because when I go to the synagogue I see the Torah being taken out and read rather than an automatic weapon to be cleaned. And in the basement the caretaker of the shul keeps some wine and herring and pastries to be eaten at Kiddish after services end. The last time I was at shul I did ask Joe the caretaker if he had ordnance hidden as did the Davidians and he whipped out a can of horse radish while saying it was the most lethal thing on the premises.
How glad I am that his name was David Koresh and not Kosher because a bastard like he disgraces instead of enhancing any religion with which he was associated.
My aunt Janet should have blown that rotten scumbag away long before he burned up his own naive, stupid but well-meaning followers.

Godwin's law. I win.

I would expect that a handful reading here would understand what I wrote, and the balance such as yourself would respond viscerally to what they fear most, instead of what was actually being said.

I'll not be dragged into an argument defending what I did not say. But if you decide you want to debate the actual content of the post, I'll be more than glad to discuss that with you.

Citizenship is hard. And the only safety comes from the clarity of vigilance and the realization that when more than one person gather in the same place freedom is the first thing attacked, and in most cases the first thing surrendered in the interests of 'getting along.' And those demonized first as being the most rigid, and unreasonable, are those whose philosophies are "Live Free and Let Live Free."

> > > evil just like any other object. If I save my daughter's life by
> > > firing, I consider that a good thing.

Well let us look at the gun as being simply an object. Some might call
it a tool. I think of guns as tools for making holes at a
distance...which is not very practical. I prefer a boring drill which
is easier to control because local rather than DX hole making is more
practical and accurate for people like me whose hands may not always be
steady. I don't forget that guns are designed as weapons <period> They
are not designed like other tools primarily for any other practical
purpose. The thought of weapons brings to mind guns in the minds of
most people and guns are imediately recognized as weapons by all people
(and even some smart animals). I must admit however that some horror
movies have given a bad rap to chain saws.
> >

> > guns.
>
> Given the death toll, you mush despise the automobile.

I do not despise automobiles because they were not designed primarily
to kill people (regardless of what Ralph Nader thinks). Cars are made
as transportation vehicles to bring people and things from here to
there. They are not associated with weapons by everyone...although I
once wrote an essay about cars. I wrote (and I quote myself) : -

Cars are many things to many people...
To the salesman a wearhouse...
To the lovers a boudoir...
and
To the reckless a coffin!

> What is even worse is societie's cavelier attitude toward death and
the
> automobile.

I dunno about societies cavelier attitudes. IMHO they might comes from
watching too many movies with chase scenes, where cars always can make
it across the railroad tracks in a split second before the train comes
along and where speeding cars can fly between mountains and over rivers
without turning over.
Such movies are as bad as the movies that show that the only good Hams
are dead Hams.

,,,
AND nervous or automatic human reflexes? Man has his limitations..His
control systems are not always critically damped and robotic unless he
is an Arnold Schwartzenager and/or a zombie.
It is a know fact that human infants don't have to learn to hold on
to their mothers because we are all born with the fear of falling.
Some say that we inherited that fear from tree dwelling monkeys, which
we may have an ancestor in common with. I dunno. But I do know that
the fear of falling does not have to be taught. IMHO I was born with
the fear of getting shot to death and I need no training/conditioning
to dislike guns. Maybe I had an ancestor who was a common horse thief.
>

> > late.

Yeah like Hams who know nothing and get permitted to use 1500 watts of
RF output without exceeding the RF hazzard level. RF travels faster
than water.... A human can last up to three minutes under water but get
cooked by microwaves faster than a tiny frozen dinner.

I'm not worrying about the conditioning of a life time...I have enough
trouble thinking about death time taking over which is inevitable for

us all...It can happen very fast, it can happen only only once and no matter what the conditions it will happen sooner or later.

Whatever...We can differ on schemantics
BUT
schematics are universal!

> Roger
>

A man has got to know his limitations.
--Clint Eastwood as Dirty Harry--

The police are always right and O.J. is guilty.
--Excused Black Juror as Uncle Tom--

A man who can't swim can still take a
shower.
--w2ilp as Clean Dick--

Skeptical people have been conditioned not
to believe every Tom, Dick and Harry.
Some people also refuse to have much faith in
what they read on bumper stickers.
--w2ilp--

Radiosigs is on a roll ..
>I'm telling you rightwing conspiratorial galoots--don't mess with this
>Chipster fellow.

You got that right, Radiosigs-Guy. He sure beat some sense into my head the last few days. Thanks to the Chipster-Man, I have been re-educated. Why just this morning, I decided .. if you can't beat 'em .. join 'em. So .. I decided to turn into a KommieKrat. Here listen to this ..

Confiscate all guns ! ! !
He did NOT have sex with that woman - Miss Lewinski.
A welfare check in every mailbox and a fist full of food stamps in every pocket ! ! !
I admire Rosie.
I hope Hillary wins.
He did, too, invent the internet. And he was NOT fund-raising at that Buddhist temple.
Down with the NRA.
Let the government pay for it.

There .. see ?? I've been de-programmed, so you and Chipster-Man won't have to rip me a new heinie on here any more. Can't we just get along now?

I guess it would be a better victory if I were a member of the NRA and owned a few tons of re-loading equipment. But I'm not and I don't.

Now .. with that behind us, let's get after George Dub-Yah (the Executioner) before it's too late.

It seems that your source of info doesn't know what he's talking about Charlie, on many counts. Irwin Schiff is active in radio and seminars. Not that I agree with him or anything but the guy is from Vegas, is on regularly, I think Thursdays, and his office is not located too far from me.
As for your liberal socialist democratic view of what was, and what is, regarding the gun issue, militias, Second Amendment, Declaration of Indepenance. Stick it - You don't have a clue. Might I suggest that you do some reading, not the liberal socialist democratic propaganda but some sound historic facts. get your nose out of the damn television. It may help straighten you out on this subject. Until then - Take a hike

Call me when you get a second source in the US for the LM2585 switching regulator too! Digikey has the 383 in stock. If you search on NSM's webpage you can check availability, but Avnet-Marshall (funny, they also own Allied) often has a minimum lot size.

Ridiculous. Those folks were exercising their 1st-amendment right of free speech and had every right to have their march, however misguided they might have been.
You see, us folks on the right actually RESPECT freedom of speech and don't try to limit it ... unlike SOME folks in this newsgroup, and the Clinton Administration.

"Political Correctness is nothing but tyranny with manners."

I "get it" very nicely, thank you. The problem YOU have not addressed is how you're going to disarm some of the people and not all of the people. How can you disarm "militia groups" without disarming people who own weapons for protection (for example)?

Don't these people (members of "militia groups") have a right to a gun for protection also? Or a couple of guns (one for the living room and another for the bedroom)? Or a dozen guns for that matter (one for each room in the house)? Where are you going to draw the line?

In other words, how many guns does a person have to own before you consider him a "screwball?" And you're not really saying that you plan to start depriving people of their rights (any right) just because they have different politics (a different view of this government)?

Now, if they have comitted a crime, then that is another story. But I'm not going to support any effort to eliminate rights based solely on what a person has said (even if he has said that he hates the government). That is not what this country is supposed to be about.

> Responsible gun ownership is right and
> proper. Carte blance unregistered and
> unlicensed gun ownership is a menace
> to us all.

We already have registration, Doc. I had to register my gun when I purchased it. In fact, as far as I know, every legal gun owner in this country was required to register their weapons. And we already have license. Anytime I take my weapon out of the house (to hunt, to carry concealed, etc), I have to have a license.

So, if we already have both of those things (registration and license), what are you advocating? What more do you want? As you well know, the majority of the anti-gun lobby is not after registration and license - they're after the total elimination of gun ownership. If that is also your goal, why are you not honest enough to admit it?

That Limbaugh fellow smells like week old fish wrapped in a few pages of the New York Post and I told him so by e-mail to rush@eibnet.com/ He'd better pray that Gore gets elected or he's out of a job.
Here we have a pompous slob making 24 mil/year with the littlest regard for the average Joe imaginable. Sure, what does he or any other affluent Conservative care about the poor, ill and aged?
They live in their own private rich world, devoid of understanding and compassion that make and break us, because as long as they have theirs, then screw the rest of you.
Look up the word conservative and you'll get the message. TO REJECT CHANGE. Can you imagine that? For God's sake, don't these fools understand that the only thing that never changes is change itself? And the pathetic thing about it is that the morons have a spokesman earning 24 mil/year and they believe that his rotten selfish philosophy is correct
I swear-the more I listen to that arrogant buffoon the more I go from Independent to Democrat. According to him, nothing's right in America and it's all Clinton's fault.
He calls himself "El Rushbo." I call him "El Trashbo." Just listen to the way he sits there and taps his pen on the desk and pounds his fist on it and bitches and moans 'til the cows come home. And the unfairness of it all because it's obvious he stole Herbie Schoenbohm's style while KV4FZ reaps none of the rewards. What a crime!

Source record: 107686

I know this is not exactly ham radio related, but I need help with Internet Explorer. I have to describe a method to enter a web site address into a browser to some not exactly computer literate people in a newsletter. I use Netscape, and have not used Internet Explorer in some time, so I want to verify a few things before going any further.

My basic question centers around the easiest way to enter a URL address in Internet Explorer. In other words, what method would you recommend?

Netscape users can type an address directly in the "location" box and hit return (the "location" box shows the URL of the site you're currently accessing). Or, as an alternative, users can select "Open Location" under the "File" menu and type the address into the window that appears (followed by a return).

Are either of these two methods available in Internet Explorer? Is there a better method available? Please describe the process step-by-step (don't forget to mention the computer type - PC or Mac).

By the way, for those wondering, I posted this message to this newsgroup simply because it is one of the very few newsgroups I subscribe to.

I truly appreciate any advice offered.

> freqs. There's a distinct possibility that you'll have to explain yourself
> and your actions later, but if the reason warrants, the FCC would stand
> behind you.
See 97.405, it covers this in full detail:

(a) No provision of these rules prevents the use by AN AMATEUR STATION
in distress of any means at its disposal to attract attention, make
known its condition and location, and obtain assistance.

(b) No provision of these rules prevents the use of a station, in the
EXCEPTIONAL CIRCUMSTANCES described in paragraph (a), of any means of
radiocommunications at its disposal to assist a staation in distress.

Might have to explain your emergency to the FCC afterwards but this
covers EMERGENCY stuff but if Amateur gear is installed and it isn't an
emergency, then explainmthat also. This is a deep subject with many
interpretations but to say emergency comms are covered by Paragraph 405.

BTW-Amateur Station is defined as an installation of Amateur Gear.

Well I am a supporter of Mr. Buchanan's polices. I am behind his "America First" policy. I want to share one of his hard hitting articles to you.

The Millennium Conflict: America First or World Government

Boston World Affairs Council January 6, 2000
(Text prepared for noon delivery)

Patrick J. Buchanan

Five years ago, historian Christopher Lasch published The Revolt of the Elites. It was a book about how our national elite was literally seceding from America. Pointing up the huge and growing gap in incomes between the elite and the middle class, Lasch argued that a more ominous gap existed in how each perceived America.

The old elite, Lasch wrote, had a sense of obligation to country and community. But the new ruling class, more merit based, brainy, and mobile, congregates on the coasts and puts patriotism far down the list in its hierarchy of values. Indeed, said Lasch, "it is a question of whether they think of themselves as Americans at all."

Lasch did not name names, but the new elite is not difficult to identify. A few years ago, Ralph Nader wrote to the executives of 100 giant U.S. corporations, suggesting how they might show their loyalty to "the country that bred them, built them, subsidized them and defended them." At the annual stockholders meeting, Ralph said, why not begin with a pledge of allegiance to the flag?

Only one company responded favorably. Half did not respond at all. Many sent back angry letters declaring that they were not American companies at all. Motorola denounced the request as "political and nationalistic." Other companies likened the idea of a pledge of allegiance to loyalty oaths of the McCarthy era. Why were the heads of these corporations outraged? Because for years they have been trying to sever their bonds to the country of their birth.

In 1997 the head of Boeing told one interviewer he would be delighted if, twenty years hence, no one thought of Boeing as an American company. My goal, said Phil Condit, is to "rid [Boeing] of its image as an American group."

Back in the 1970s, Carl Gerstacker of Dow envisioned a day when Dow would be free of America. "I have long dreamed," he said, "of buying an island owned by no nation and of establishing the World Headquarters of the Dow Company on the truly neutral ground of such an island, beholden to no nation or society." A spokesman for Union Carbide agreed: "It is not proper for an international corporation to put the welfare of any country in which it does business above that of any other." In any test of loyalties, for such as these, the company comes before the country.

Early in the 1970s, Zbigniew Brzezinski, later Jimmy Carter's national security adviser, wrote, "A global consciousness is for the first time beginning to manifest itself...we are witnessing the emergence of transnational elites...composed of international businessmen, scholars, professional men and public officials. The ties of these new elites cut across national boundaries, their perspectives are not confined by national traditions...and their interests are more functional than national." The one force that can derail the rise of this new elite, warned Zbig, is the "politically activated masses," whose "nativism could work against the cosmopolitan elites."

Brzezinski knew that the creation of any New World Order would have to proceed by stealth. As Richard Gardner, Carter's ambassador to Italy, wrote in 1974: "The 'house of world order' will have to be built from the bottom up. An end run around national sovereignty, eroding it piece by piece, will accomplish much more than an old fashioned frontal assault."

Advancing on little cat's feet, they have done their work. By 1992 Mr. Clinton could appoint as Deputy Secretary of State his roommate from Oxford days who openly welcomed the death of nations and the coming of world government. Wrote Strobe Talbott:

All countries are basically social arrangements. Within the next hundred years, nationhood as we know it will be obsolete. All states will recognize a single global authority. A phrase briefly fashionable in the mid 20th century, citizen of the world, will have assumed real meaning at the end of the 21st.

Last year in Istanbul, Bill Clinton declared himself "a citizen of the world."

This, then, is the millennial struggle that succeeds the Cold War: It is the struggle of patriots of every nation against a world government where all nations yield up their sovereignty and fade away. It is the struggle of nationalism against globalism, and it will be fought out not only among nations, but within nations. And the old question Dean Rusk asked in the Vietnam era is relevant anew: Whose side are you on?

Last fall, accepting the highest award of the World Federalist Association, the Most Trusted Man in America declared his loyalty.

..[I]f we are to avoid the eventual catastrophic world conflict, we must strengthen the United Nations as a first step toward a world government... we Americans will have to yield up some of our sovereignty. That would be a bitter pill. It would take a lot of courage, a lot of faith in the new order.

Indeed it would, Mr. Cronkite.

Walter went on to urge U.S. ratification of the UN Law of the Sea Treaty rejected by Ronald Reagan, of the Comprehensive Test Ban Treaty rejected by the Senate, and of the Rome treaty for a permanent international war crimes tribunal. He urged America to surrender its veto power in the Security Council, and called for a standing UN army to enforce the peace of the world. We now no longer see as through a glass darkly, but face to face, the internationalists' vision of world government.

But the American ship of state has long been shifting course to that destination. In October 1991, President Bush told the UN that a New World Order was America's goal. In 1993, the Clinton White House, in a secret national security directive, declared its intent to put U.S. troops under UN command. When young Americans were killed in an accident over Iraq, Al Gore offered his condolences "to the families of those who died in the service of the United Nations."

In a lame-duck session of Congress in 1994, both parties voted to ensnare the United States in a World Trade Organization where America gets one vote out of 135, and gives up its right to negotiate reciprocal trade treaties that serve America's national interest.

Under the treaty on global warming Al Gore brought home from Kyoto, the United States must radically slash its use of fossil fuels like oil and coal, while no commensurate cut is demanded in the fossil fuel use of 132 "underdeveloped countries," including China.

The house of world order is indeed being built from the bottom up; but resistance is also beginning to build. In December globalists were astounded there was so much anger in Seattle at the WTO. But our trade-uber-alles elites do not understand America, or American history. It was the will of this people to be masters in their own house that steeled our first patriots to stand up to the troops of the British Empire, just outside this city in 1775. A spirit of liberty is bred in our bones. Let me tell you about an American who put trade in its proper perspective.

Thomas Nelson, a merchant, was Governor of Virginia and head of its militia at Yorktown. As his artillery was firing on the British, Nelson walked up to the gunners to demand to know why they were avoiding one sector of Yorktown where his own home was located. "Out of respect to you, sir," came the reply. Nelson had the cannons turned and ordered them to fire at his own house. It was shelled to pieces.

But when that spirit of patriotism dies within a nation's elite, the aspirants of global power smell opportunity. Two years ago, a Mr. Bacre Waly Ndiaye of the UN Human Rights Commission came to the U.S. His mission: Tour U.S. prisons to determine if they are up to UN standards. Mr. Ndiaye interviewed condemned killers on death rows to see if their human rights were being violated.

There is, of course, something comical in a UN official from a continent where the criminal justice system is still, shall we say, pre-Miranda, ripping the U.S. for its prison system. But the issue behind the Ndiaye tour is deadly serious. For he insists he has the right to investigate our prisons because his UN commission speaks for "the world"—an authority higher than the United States, and he claims the 1992 International Covenant on Civil and Political Rights, signed by President Bush, justifies UN inspections of U.S. prisons.

Last month, UN High Commissioner for Human Rights Mary Robinson toured northern Mexico. Her concern: the U.S. Border Patrol. By heavily patrolling the accessible crossing points, said Ms. Robinson, our Border Patrol is "forcing" illegal aliens to take more perilous routes into the United States. It is, presumably, a violation of the human rights of people breaking into our country to "force" them to seek out less safe passages across our borders.

It is easy to see where Mary Robinson and her colleagues are heading. They seek a regime where UN bureaucrats from Third World despotisms demand that America open her borders and grant sanctuary to all who wish to settle here. Americans who wish to control their borders will be told that sovereignty is outdated, and that our great fertile plains and cities are, compared to Bombay and Lagos, under-populated.

From UN declarations of "world heritage sites" in the U.S, to putting U.S. troops under UN command, to creation of a UN war crimes tribunal with the power to seize and prosecute U.S. soldiers, we are on the road paved by Bill Clinton when he said that he hopes to leave America tied down in a web of global institutions.

Last month, we learned that the UN tribunal to prosecute war crimes in the Balkans has opened a file on U.S. Air Force pilots. The chickens of globalism are coming home to roost.

Another milestone was crossed last year when UN Secretary General Kofi Annan asserted that only the Security Council can authorize the international use of force; and a nation's sovereignty no longer protects it from intervention, if the UN determines that human rights are being violated. The Brezhnev Doctrine of Limited Sovereignty has been replaced by the Annan Doctrine.

Upon what meat has this our Caesar fed? The United Nations was not established as a world government, but a forum for settling disputes. Kofi Annan is not the conscience of mankind; he is a civil servant, an employee of the UN; and he should begin behaving as such.

But it was not Mr. Ndiaye, Mrs. Robinson or Mr. Annan who announced the death of the nation-state. That was Strobe Talbott, Richard Gardner, and those Republicans who have made the Global Economy a Golden Calf to fall down before and worship. And the political globalists have their own Fifth Column of fellow travelers inside the conservative elite.

Wall Street Journal editor Robert Bartley has been quoted as declaring "the nation-state is finished." He calls for an amendment to the Constitution to throw open America's borders to immigration from all over the world. Bartley's vision of America as Global Mall, is embraced by the global corporations that advertise in the Journal and seek access to an inexhaustible supply of low-wage foreign labor. As British author John Gray writes, America's neo-conservatives have become little more than "ranting evangelists of global capitalism."

Let it be said: Loyalty to the New World Order is disloyalty to the Republic. In nation after nation, the struggle between patriotism and globalism is underway. In England, the Tory Party draws a line in the sand at giving up Britain's pound. In France, farmers riot to preserve a way of life. In Canada, the fight to preserve the national culture is gaining recruits. In Germany, Gerhardt Schroeder makes a political comeback by embracing economic nationalism.

And Mr. Cronkite's talk of world government ushering in world peace notwithstanding, the end of sovereignty means endless war. Trampling on the sovereignty of Yugoslavia, President Clinton demanded that the Serbs surrender Kosovo and cede domination of their country to NATO. When Belgrade rejected his ultimatum, Mr. Clinton began 78 days of bombing, using as his casus belli allegations of Serbian genocide against Kosovar Albanians. We now know there was no genocide. We now know it was Clinton's bombing that spurred the killing. We now know Clinton's War did not create a "multi-ethnic democracy," but a vengeful little statelet where Serbs are burned out of their homes for sport.

If ever sovereignty becomes obsolete, we may expect America's involvement in endless wars until, one day, we pay the horrific price in some act of cataclysmic terror on our own soil. For interventionism is the spawning pool of international terror.

Admonishing Russia for her war on Chechnya, Madeline Albright declared, "Killing the innocent does not defeat terror. It feeds terror." Exactly, Ms. Albright. But that is as true of Serbia, as it is of Chechnya.

If we wish to see the future our globalists have in mind, we need only look at the superstate rising in Europe. The nations of the European Union have ceased to be sovereign. They have given up control of their currencies, their budgets, their borders, and are giving up control of their defense. Britain has been forced to comply with a ruling by the European Court of Human Rights requiring the British army to accept homosexuals. Earlier, the court demanded that Britain end corporal punishment in its schools. "What doth it profit a man if he gain the whole world, and suffer the loss of his own country?"

In 1939, in his work, The New World Order, H. G. Wells wrote: "Countless people...will hate the New World Order...and will die protesting against it...we have to bear in mind the distress of a generation or so of malcontents..."

Well, Mr. Wells, we are your malcontents. But we're not going to die protesting your New World Order; we're going to live fighting it. And Seattle may just prove to be the Boston Tea Party of that New World Order. "I believe globalization is inevitable," Bill Clinton told Larry King at year's end. Well, I don't.

My vision of America is of a republic that has recaptured every trace of her lost sovereignty, independence, and liberty, a nation that is once again self-reliant in agriculture, industry, and technology, a country that can, if need be, stand alone in the world.

My vision is of a republic not an empire, a nation that does not go to war unless she is attacked, or her vital interests are imperiled, or her honor is impugned. And when she does goes to war, it is only after following a constitutional declaration by the Congress of the United States. We are not imperialists; we are not interventionists; we are not hegemonists; and we are not isolationists. We simply believe in America first, last, and always.

And we don't want to be citizens of the world, because we have been granted a higher honor-we are citizens of the United States. Asked on his deathbed to make a toast, John Adams, the great Bostonian, declared: "Independence, forever!" That is my vision for America; that is our cause; and it shall prevail.

>therefore it would have been illegal for them to possess these
>weapons.

The BATF had several oportunites to arrest Koresh when he was in town by himself. They also had a chance to conduct a raid on the compound during the week when it wasn't occupied. The BATF knew this, yet still conducted a raid on a Sunday morning, when they knew that it would be full of women and children. ...and don't forget that the search warrent listed such items as those ever-so-deadly cardboard tubes and plastic containers.

Unless you can show me some law that says it's illegal to be a Christian and
own a gun, your opinion of how Christians are supposed to behave is worthless.

>They are perfectly legal.

Machine Guns

The FBI determined that 46 semiautomatic firearms had been modified to
fire in full automatic mode:

22 M-16 Type Rifles

20 AK-47 Type Rifles

2 Heckler and Koch SP-89

2 M-11/Nine

The FBI also determined that two AR-15 lower receivers had been
modified to fire in full automatic mode.

The possession of lawfully manufactured machineguns, silencers, or
grenades requires the owner to register the weapon with the Bureau of
Alcohol, Tobacco & Firearms. None of the compound's residents were
registered to own such a weapon, therefore it would have been illegal
for them to possess these weapons.

Make up your freaking mind. Are you more against Clinton for being sexually aggressive or Reno for being ostensibly asexual? What's with you rightwing loonies? You care nothing about the fantastic credentials of our beloved Attorney "Generaless" and have the gall to make up ridiculous stories about her private life as if they were important.
I don't give a flying fig about who likes sex and who doesn't. I don't give a flying fig about anyone's sexual preferences, race, religion and nationality. I care about those things that IMPACT the ability to govern and steer and guide and Miss Reno has done a wonderful job and I salute Bill Clinton for appointing her.
You see that's what I like about the man. He's for ALL the people; nothing pompous and bigoted about the fellow. He gave gays a chance in the military and why not? What do their alternate life styles have to do with flying a plane or sending off missiles or picking up a rifle or for that matter, anything related to our ability to defend ouselves and to beat hell out of an adversary? Homophobia is MENTAL ILLNESS!
Look at his cabinets over the past eight years. Blacks, Jews, Christians, homosexuals, women, men, Latinos...you name it. America is a melting pot which made her great and nobody needs or wants exclusivity in control of her. It's INCLUSIVENESS that counts; Bill has done just that and it's obvious that Al Gore will follow suit.
And so I ask you undecideds to carefully consider what I write and REJECT George "Dubayou". He's done a great job as Texas Governor; takes no pity on Lone Star murderers and has no qualms about allowing them to get a spritz of lethal liquid poison because of their evil. Therefore keep the Spritzer in Austin.

Has anyone got these newest US/FCC amateur exam question pools
(that are freely doadloadable for example at www.arrl.org) to work
with any free exam generator/practise programs?

I have tried for example the old wnexam11, and it seems to work with
the new technician and extra pools, but not with the general pool.

> Four dead ATF Agents.

Have you never heard of the Gulf of Tokin Incident? Fully documented
and validated origin of the Viet Nam War. The US Navy Sailed into the
gulf of Tonkin and bullied and bothered, shelled, murdered, and sunk
North Vietnamese ships until one day the VNs shot back, killing some
US sailors. Then the Pentagon went to congress and lied up and down
about an unprovoked attack on the US. The US Congress, the media, and
the public bought the story, and that was how the War was sold to
America, and we paid with hundreds of thousands of dead Americans.

And the Pentagon got the war they wanted. Undisputed American
history.

But you would believe unprocessed sewage was fine wine -- if the
government told you.

>
> Gee that's a new spin.

Not at all a new "spin", except to those who take all their understanding of the world from the TeeVee and comic books. It is obvious from many aspects of the original evidence of the event.

Look closely, for instance, at the photograph of the truck and trailer used as cover by the soldiers (Dallas Morning News, March 1, 1993).

http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21.jpg

Not a single bullet hole in the windows, tires, body, or trailer. You can read all about it and see magnified views of the pictures for the convenience of your tired old eyes at the following URL:

http://www.public-action.com/SkyWriter/WacoMuseum/war/page/w_j.html
http://www.public-action.com/SkyWriter/WacoMuseum/war/page/w_m.html

> I haven't even heard the Davidians proclaim that one of their
> members didn't fire the shots. According to reports over 10,000
> rounds were fired at Waco.

Given that most bullets in a fire-fight miss their targets, and given that a bullet will travel thousands of yards if it does not contact a barrier, and given the countryside behind the soldiers was mostly empty prairie with nothing to stop a bullet ...

And given that the ALL the ATF recording equipment coincidentally malfunctioned, so that -- gosh darn -- essential evidence was unavailable to corroborate the official record ...

It is pretty damned hard to know HOW many rounds the Davidians fired ... unless you're a government spin doctor, or a TeeVee weenie who believes everything he's told.

> Perhaps the shots came from some sort of Alien spacecraft ?

If that is what your government spin doctor told you, I am sure you would believe it.

For example, you believe that the Davidians had "armed watchtowers", manned 24 hours a day, 50 caliber machine guns, roving squads of armed guards, and shoot-to-kill orders, with dire predictions that "any day" the government was coming to wipe them out. And you believe that the ATF, having all this information, arrived with 100 agents in -- are

you ready for this? -- canvas topped trailers, and they pulled up BROADSIDE across the front of the house to offer the best target.

And furthermore, you believe that the Davidians shot so accurately, they could knock down all four ATF casualties with heart-shots and head-shots (two from the side, one from the back), but with all their fire-power and the ATF stupidity, they only got four victims?

I think you better stick with your alien spacecraft hypothesis. It has more credibility.

In the event of immediate danger to life and/or property I don't care
about the legalities. It would be far easier to ask forgiveness than
get permission.

BD,
Yes, in an emergency situation, one that involves life, or
'limb', or property damage, anyone can operate an amateur radio.
Not just an amateur radio, but any radio, in almost any manner
that's required.
It revolves around being 'reasonable'. If you declare an
emergencey, you can do anything that is reasonable to rectify
that emergency. You may be required to explain the situation
later, but that's 'small stuff' if it's your 'neck' that's in
trouble (or anyone elses for that matter)!
'Doc

As a practical matter, who is going to tell you not to?

Emergency (i.e. immediate danger to life or property) communications are pretty much exempt from any of the licensing rules. Running out of Pampers probably won't do it, however, although some might think this is an emergency of major proportions.

We had a similar situation some years ago in St. Louis where our ham club member happened to also be a medical-type and figured his presence was better spent on an accident scene than behind the mike so his friend did it. We brought up the patch, summoned the medics and fire laddies, and worked thru it quickly and things worked out. The only one who seemed to care that his friend was unlicensed was our hero (his friend was ready to plead ignorance and necessity). One of our lawyer members dug up the chapter and verse in the regs where this was not only legal but encouraged.

In emergencies, Communications equipment is to be used to communicate. Pretty much as simple as that.

Well, Indianapolis has one of the more active 2 meter communities I've ever seen. You can usually find some to chat with any time of day or night. (and I know about the night, since I usually work the graveyard shift!:)))

Muncie and Anderson Indiana are also pretty active, but, it's one of those unusual places that it seems simplex takes priority over the repeaters. 146.520, 147.42 are both pretty busy, but activity drops off about midnight and starts up around 5 AM.

Knoxville and the Great Smoky Mountains area also seem to have a lot of activity, I think that might be due to all the mountaintop wide coverage repeaters.

That's fine, you're too far gone anyway. Anyone that thinks that the
Davidians 'Murder Warehouse' full of automatic weapons, with some 50
caliber guns, silencers , grenades etc tossed in represents anything
remotely resembling Jesus and his teachings needs to have their head
examined anyway.

OK, so my grammar wasn't so great on the Subject line, but I think it does get my point across. We, as hams, as evidenced by this, and other newsgroups, on the air behavior, magazine articles, etc etc, are a society of those who'd rather gripe than DO.

We sit around and gripe because our clubs are declining, yet we, as a whole, refused to do anything about it. We sit around and gripe because there isn't anyone interesting to talk to on the air, yet we're too busy griping to pick up the michrophone and talk. We sit around and gripe about the lousy job the ARRL is doing, but few of us have the guts to vote to change things. We site around and gripe because there are no young people in our hobby, but we refuse to go out and recruit them.

So, what's my point? ANYONE can gripe. I takes a special few to do something. What are you DOING, instead of griping about, today for Ham Radio. :)))

Climbing down off of my soapbox,
Rick N9GSU

My bet would be Los Angeles..... been in New York City and was surprised how
quiet 440 was, let alone 2m. 2m around Detroit area is fairly active both
on simplex and the repeater freqs... even quite a few side-banders.

Yep.... FCC rules allow almost anything when it comes to a REAL emergency (life threatening, etc), including transmissions on otherwise 'off-limits' freqs. There's a distinct possibility that you'll have to explain yourself and your actions later, but if the reason warrants, the FCC would stand behind you.

Tommy Gun,
You got it a bit backasswards. Put the blame on Koresh the murdering, psychotic phony Jesus instead of Aunt Janet who indeed tried to save as many lives as possible but failed thanks to David's planned mass suicide which worked. There was no difference between him and Jim Jones.

Hi,

I don't have one yet, at least for General. Mine is located at:

http://www.shecora.com/ham and it does support Tech and Extra.
I will have it supporting General by next weekend. This program
leans your weak areas and drills you on them. I haven't proving
it yet, but I believe if you can get above 50% or so on my
program you will pass the test.

This is a freeware program which I will release as open source
when I get the General added in. It is currently written in
Delphi but hope to port it to Java.

Hope this help!

"Murder Warehouse" ? As I recall, the Davidians were no threat to anybody. Even the local law enforcement authorities stated that they were a quiet group and kept to themselves. They never fired a shot until they were confronted with a paramilitary attack. Then they did what most would do if a bunch of soldiers with machineguns started busting through the windows - they defended themselves.

AND THIS is exactly what the government is so afraid of, and what they will go to any means to stop. The Fed's biggest fear is that they lose the ability to control the populace through fear and intimidation. If this fails, then they will use bullets to make an example to keep the rest "in line"...

>has more credibility.

Well now we have Alien Spacecraft firing shots and at least *ONE*
Davidian has *admitted* Firing at the agents.

http://www.rickross.com/reference/waco/waco119.html

Davidian admits firing at ATF agents
San Antonio Express-News, Feb 23, 2000
By Dick J. Reavis
For the first time, a Branch Davidian survivor of the Feb. 28, 1993,
shootout at Mount Carmel has admitted that he fired at two of the four
U.S. Bureau of Alcohol, Tobacco and Firearms agents who were killed
during the battle.

Livingstone Fagan, who was one of 11 Davidians tried in San Antonio
six years ago, said in a deposition that he shot at ATF agents on the
roof of Mount Carmel. Fagan gave the deposition in a wrongful death
lawsuit Mount Carmel survivors and their families are bringing against
the federal government.

Fagan was convicted in 1994 of manslaughter and a weapons charge and
is serving a 40-year prison sentence. It's unclear whether prosecutors
will file new charges based on his admission.

So tell me was that one Davidian the *only* one that fired or were
there others ? Perhaps the plot thickens with the involvement of Alien
Craft sent from God to fire at the ATF ?? Come of think of it Koresh
did get excited when a comet came into view during the standoff,
perhaps that was the home base of the Alien Craft ?

What really amazes me is that all you *Brilliant* Militia-Think types
are wasting your lives at some other profession. Why with your
uncovering of facts and hidden truths you could set the whole world on
its ear as investigative journalists or attorneys.

Perhaps your place of worship stockpiles automatic weapons , grenades,
silencers etc. Hell Koresh and his followers had more weaponry than
any drug dealer I've heard of recently.

Here's some reading material composed *before* the raid on Waco by a
couple of local papers. Material in the article was taken from
former cult members.

If you need to see the list of illegal weapons recovered I'll be happy
to attach that next time as well.

All 8 Sections at this URL

http://rickross.com/reference/waco9.html

Section 1

The Sinful Messiah

The Waco Tribune-Herald Series, Fort Worth Star-Telegram, Wednesday, March 3, 1993

by Mark England and Darlene McCormick
On Saturday, the Waco Tribune-Herald published the first story of an indepth series exposing the Branch Davidians and their leader, Vernon Howell. The series has become part of the unfolding story in Waco. Managing editor Barbara Elmore said federal authorities asked the newspaper "not to run anything." But the newspaper, which had been investigating the sect for eight months, decided that it had held the stories long enough. The head of the federal Bureau of Alcohol, Tobacco and Firearms task force, asked this week whether the series had triggered the agency's raid on the Branch Davidian compound near Waco, said there was no connection. Here are the stories that made up what was to be a seven-part series. The articles have been edited to eliminate duplication and redundancy.

Part 1

Waco - If you are a Branch Davidian, Christ lives on a threadbare piece of land 10 miles east of here called Mount Carmel.

He has dimples, claims a ninth-grade education, married his legal wife when she was 14, enjoys a beer now and then, plays a mean guitar, reportedly packs a 9mm Glock and keeps an arsenal of military assault rifles, and willingly admits that he is a sinner without equal.

David Koresh is now his legal name.

He changed it two years ago in California, supposed to enhance his career as a musician. To former cult members and law enforcement authorities, though, he is still Vernon Howell.

Many of Howell's follower's are former Seventh-day Adventists. The Seventh-day Adventist Church strongly denies any connection with Howell's group.

Howell's followers have come to 77 acres near the Elk community from Australia, New Zealand, Canada, England, Hawaii and throughout the continental United States. The end of the world is near, they believe.

Howell, 33 is their salvation.

They pay dearly for those beliefs, say former Branch Davidians like Marc Breault, a one-time confidant of Howell's.

An eight-month Waco Tribune-Herald investigation that involved numerous interviews with Breault and more than 20 other former cult members and a review of court records and statements to law enforcement officials revealed complaints that Howell:

abused children physically and psychologically;
boasted of having sex with underage girls in the cult;
and has had at least 15 so-called "wives."

Authorities have not acted on the complaints. Some officials said former cult members making the allegations have not appeared in person to swear out a complaint against Howell, though they have mailed sworn statements to local, state and federal authorities. Other official said they needed evidence, not allegations.

Former cult members in Australia pooled their money and hired a private detective, Geoffrey Hossack, to lodge their complaints with authorities. Hossack said he believes authorities will act only if someone is killed.

Although many followers have fled, Howell remains with about 75 faithful in a compound they built to await the end of the world. Former cult members and authorities say it is heavily armed. Guards reportedly walked the grounds at night. Perched above the compound is a tower with lookout windows facing all directions.

Howell rules Mount Carmel by virtue of the Branch Davidian's belief that he alone can open the so-called Seven Seals in the Bible Book of Revelation, setting loose catastrophic events that the Branch Davidians believe will end mankind and propel Howell and his followers into heaven.

Former cult members, though, said Howell is headed in the opposite direction.

They said Howell abuses all his followers, from the very young to adults.

Howell has taught that babies as young as 8month should be whipped forcefully, former cult members said. Two women said he hit their babies until their bottoms bled. Howell banished his then 3-year old son, Cyrus, to a garage in Pomona, Calif., for the night, said James Tom, a former Branch Davidian. Howell reportedly told the boy there were rats in the garage who liked to gnaw on children.

2138. FS:Ham Radio Equipment Kenwood 10 to 80 Meter Transceiver, TenTec 10/80 Meter CW...

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-07 00:00:00 UTC
From: patddd@my-deja.com
Message-ID: <8k5a6g$299$1@nnrp1.deja.com>
Source record: 107817

All equipment listed comes with Manuals and other documentation...

This is a Kenwood TS-520...
Well taken care of...
Comes with a Shure Handheld Mic...
Powers up and receives not sure about transmit... Never tried...

The Ten-Tec CW Transceiver is in real good shape as well... Powers up
and receives haven't tried transmitting on this either...

Also available in the package is a Dentron Super Tuner...

All this is going to for $250.00 At this price it is a great deal even
if they need some work...
I bought them from a guy that told me everything was in "tip top shape"
and I have no reason to doubt him...

I need the $$$ so have to let them go...

Sold as is...However garanteed not DOA...

Pat!

Not at all. The US Government has a history of Big Time Lies when
some powerful group, like the Pentagon, wants something bad enough.

Lying to Congress under oath is a felony, by definition. So if two or
more people cooperated in the lie (as they did), it was a (try not to

faint) Conspiracy, by Department of Justice definition.

When this information came out, there were no prosecutions, of course, because everybody looks after everybody else in Big Time Government. That is how it works. Get used to it.

And get over that sweet school-girl pose ("Ah jest kain't buhLEEV owah guvment would DO thayet!"). They do it all the time in every government of the world in every age. What makes America different is the impossible number of fools in America who try to pretend different.

Like you.

Say, they don't pay you to write this stuff, do they?

> >But you would believe unprocessed sewage was fine wine -- if the

Well now, there you go again. You don't read, either. "Never fired a shot" is not a quote from me. But I can tell you that the dead ATF soldiers did not die by Davidian bullets, and also I can say, based on photographic evidence from the scene, the Davidians did not shoot much.

> Snip:

My, you pick your sources with all the care of a dung beetle, don't you. Rick Ross has a felony conviction record for kidnapping and other violent activities against Christians. He is a terrorist, and he pumped the press full of his "special" hatred of the Davidians from the day of the first raid. It is hardly surprising he would be pushing this swill now.

> Alien Craft sent from God to fire at the ATF ?? Come of think of it
> Koresh did get excited when a comet came into view during the
> standoff, perhaps that was the home base of the Alien Craft ?

Grasping at straws, aren't you? ... a signed confession from a poor tortured soul in prison for the rest of his life. He could shout his innocence until the cows came home, and it would be of no interest to you. But if he whispers guilt, you're all over him like he was a prophet of God revealing a Truth of the Universe.

In short, you have your preconceived notions, and you are interested in evidence only if it confirms your opinions. You do not address anything else, like the obvious government lies I have shown you.

Here is another government lie. This one shows the Ft. Hood-trained "ATF" soldiers standing out in the parking lot in front of Mt. Carmel, obviously NOT facing live fire from the Davidians. How do I know? Because people to not willing attract bullets with their own flesh, as these idiots (apparently) are.

http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig24.jpg
(Soldier of Fortune magazine, July, 1993)

Conclusion? Live fire from Mt. Carmel was not a problem at the time this picture was taken.

Now compare that with the words from the "Department of Treasury" (ATF) report on the incident:

"Koresh appeared at the front door and yelled, 'What's going on?' The agents identified themselves, stated they had a warrant and yelled 'freeze' and 'get down.' But Koresh slammed the door before the agents

could reach it. Gunfire from inside the Compound burst through the door. The force of the gunfire was so great that the door bowed outward. The agent closest to the door was shot in the thumb before he could dive for cover into a pit near the door. Then gunfire erupted from virtually every window in the front of the Compound." (Pg. 96)

Note the broken windows on the house in the picture, and no broken windows on the cars. Obviously the picture was taken after SOMEone was shooting, and it is obvious the bullets were going from the outside in, with few (if any) from inside Mt. Carmel.

Now why would the government lie about an obvious fact like that? And why don't the "investigative news media" reporters ask penetrating questions?

Because they are like you. You don't examine the evidence, you simply believe what you want to believe and call people names when they disagree with you. Good thing they still make coloring books. Otherwise you wouldn't get any news at all.

I doubt you'll find a radio to solve this problem; it's built into the very design of mini headphone jacks. The springiness that holds the circuit in place is built into the jack, not the plug (unlike RCA jacks, RJ11s, coax, etc.) The jack is difficult, complicated and expensive to replace, usually requiring soldering.

Annoying enough on a Walkman; they make 'em to die on $300 shortwaves and MP3 players just the same.

The honest solution among manufacturers would be to acknowledge that headphone jacks are really consumable items, and design them to be unscrewed from their sockets, with replacements available at Radio Shack. This will happen with headphone jacks the day it happens with your portable's whip antenna.

A frequent occurance would be, and as an example for what is acceptable as an 'unlicensed' transmission..... a ham is involved in a car accident, is incapacitated and no other immediate form of communication is available (as in, the lack of a cell phone - for example), this would constitute 'legal and proper' emergency transmissions via amateur radio to facilitate help by an unlicensed operator.

Chipster scores again ..almost ..
>And chances are about 99.9999... to one it's all BS with as much
>validity as an Elvis sighting.

Sorry Chipster .. gotcha this time. Unless Iran-Contra was a figment of our imagination. Don't take my word for it. Go to Mena and ... ask around.

Or better yet, call the DA's office in Benton (Saline County) and ask to speak with Mr. Dan Harmon. If they say "he can't come to the phone right now", ask them why. Insist on the whole story. See what "wile-eyed" conspiracy theory comes down THAT pike.

Compare the "conspiracy theory" to the official coroner's report .. the boys were out playing and got tired and laid down on the railroad track to take a nap. And they fell asleep. And the train came along. And killed them.

Take your pick, Chipster. Use 10-10-220 and call for cheap. I'm sure Mr. Harmon will be glad to return your call if he's .. "out of the office". Go for it .. I dare you.

Now about that Elvis sighting. He was 3 cars ahead of me at Taco Bell this past Tuesday. The one near Ridgeway and Quince.

No, Chipster. I told you already .. I have a job. 3rd shift bathroom scrubber at McDonald's.

You don't know the origins of Occidental? Knock me over with a feather. I thought you knew everything. I'm disappointed. Me and the Radiosigs-Guy was counting on you heavy to keep these right-wingers in line.

That's ok. When President Gore takes over, maybe there'll be an Occidental station on every corner. He can give the Dub-Yah family some competition.

Speaking of President Gore, I sure hope he institutes a lot of new social programs when he takes office. Sure, it'll be expensive, but they're sooooo cost effective. And those darned middle class taxpayers have had too much for too long, anyway. It's time for them to give more of it back.

I was so happy to see that Mrs. Rodham-Clinton is doing well in the polls. I sure hope she gets elected this November.

No DOc, no apology on this one. You claim to have some conservative
feelings , where? Because you say you voted for Goldwater in the
```

60s? I don't think that hold water Doc. Look, you have spent the better part of a year on here showing everyone that you are a liberal. Why do you find it necessary to now say your not? That makes no sense to me.

I believe I have a good handle on the dynamics of history Doc. I understand there is some give and take, and all that. But you see Doc, if you truely were a bit of a conservative then you could never agree to allowing the greatest country on earth to go socialistic. In olden days, say about 1880, you would have been called a traitor and guilty of treason. Now they call them "socialists and liberals".

Source record: 107830
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Just caught up with this thread ... sorry to have missed it first time through.

This short speech is a heartening view of the current and potential status of radio and the Amateur Service in particular.

Not wishing to get embroiled in one of those nit-picky troll wars that have been so prevalent of late, I almost hesitate to suggest ...

1. The accelleration of technology narrows the possibilities that any individuals without more sophisticated training (or interest) will be able to contribute very much in the "experimentation" arena. This very interesting facet of the Amateur Service will probably become less and less critical as the "geeks" <meant positively not negatively> and engineers determine the state of the "appliances" we use. A similar thing occurred in computers. Only the most talented and most interested actually program or design. The rest of us use.

2. Some will probably argue that the Amateurs' role in emergency service is lessened by the saturation of cell phones and other radio services. But if we take Mr. Hatfield's next few tenets in combination, we may be defining the future value of the Amateur Service. That is, _trained_ operators who know how to communicate information concisely and accurately. There have already been emergency situations where only the battery-operated (or generator powered) Amateur radios were serviceable. Cells were overloaded. Trunked public safety bands were offline. FRS systems were not prevalent enough. Practicing these skills in local clubs and teams sometimes becomes tedious and "laughable," but the skills being developed may be quite valuable, despite the artificiality of the practice.

Certainly "worth considering,"
Thanks, Ed.

Yes, because we all know that one round from a firearm wouldn't do a thing.
And the Davidians were using special magic bullets that leave the signature of
the shooter on the victim. And I suppose you are a balistics expert who
was at the scene after it happened, right? Or were you inside the
compound? I mean, how else could you know it wasn't shots fired from a
Davidian firearm that killed the ATF officers?

And the crap your pushing? The first thing wrong with your source is the fact
it is comparing this to the Jewish Holocaust! For shame!

//snip//

> > So tell me was that one Davidian the *only* one that fired or were
> > there others ? Perhaps the plot thickens with the involvement of

> anything else, like the obvious government lies I have shown you.

And what about your preconceived notions? You are only interested in twisting
the truth, quoting sources with NO credibility, and pushing this government
conspiracy CRAP at us.
I am not one to sit there while the gov. tries to take away our freedoms.
I do not believe the gov. ALWAYS tells the truth. But come on, everything
they do
is not a huge cover up of a government conspiracy.

>
> Here is another government lie. This one shows the Ft. Hood-trained
> "ATF" soldiers standing out in the parking lot in front of Mt. Carmel,

> (Soldier of Fortune magazine, July, 1993)
>
> Conclusion? Live fire from Mt. Carmel was not a problem at the time
> this picture was taken.

When was the picture taken? Live fire must not have been a problem for
the Davidians. How do I know? No bullet holes in the house.

>
> Now compare that with the words from the "Department of Treasury" (ATF)
> report on the incident:
>
> "Koresh appeared at the front door and yelled, 'What's going on?' The
> agents identified themselves, stated they had a warrant and yelled
> 'freeze' and 'get down.' But Koresh slammed the door before the agents
> could reach it. Gunfire from inside the Compound burst through the
> door. The force of the gunfire was so great that the door bowed
> outward. The agent closest to the door was shot in the thumb before he
> could dive for cover into a pit near the door. Then gunfire erupted
> from virtually every window in the front of the Compound." (Pg. 96)

Looks like the agents were JUST going up to the house to serve the warrant
in the picture.

>
> Note the broken windows on the house in the picture, and no broken
> windows on the cars. Obviously the picture was taken after SOMEone was

> shooting, and it is obvious the bullets were going from the outside
> in, with few (if any) from inside Mt. Carmel.

I disagree. As I said, there are no bullet holes in the rest of the
house. Look at some of the other pictures on the site, bullet holes
scattered along the face of the house. So if there was gunfire it must
have been coming from INSIDE the house. I also do not see any broken
windows in this picture. I see some messed up blinds. Maybe from some
Davidians pointing their weapons out the window through the blinds.

>
> Now why would the government lie about an obvious fact like that? And
> why don't the "investigative news media" reporters ask penetrating
> questions?

The media was there, not me. What did the government lie about? Take a
second look at the picture.

> Because they are like you. You don't examine the evidence, you simply
> believe what you want to believe and call people names when they
> disagree with you. Good thing they still make coloring books.
> Otherwise you wouldn't get any news at all.

Hmm, maybe you examine the evidence only seeing what YOU want to see. Maybe you
already figured it was a conspiracy before you even saw the evidence.
I was told by a co-worker today that the Independance Day is comming.
Why? Because of the peace talks in the Middle East. How does he know?
The christian Bible says so. He than showed me a passage. I didn't see
it. He was shocked.
As far as believing only what you want to believe, look in the mirror. Or
better yet, maybe I'll put up a website with some "evidence" that the
Davidians were in it with the government. David Koresh and his followers
were actually actors. Yeah, I think I saw them on "Melrose Place"....

Havin fun in the great divide..
Jay

2153. Scanner Dweeb comic update (Episode 71)

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-07 00:00:00 UTC
From: scannerdweeb@aol.comicstrip
Message-ID: <20000707194342.22454.00000330@ng-fs1.aol.com>

Source record: 107833

I'm sure you know about the aging process in both sexes but in case you're from Mars, a woman in her early fifties goes into "the change of life, menopause (cessation of menstruation) concurrent with a lack of estrogen which turns them into argumentative bitches causing great stress on their husbands which usually results in the latters' demise thereby leaving the ladies with a chunk of life insurance booty.
Now for us guys, we too suffer from a form of menopause and our enemy becomes a gland that's been helping the semen flow for many decades-the prostate. We get BPH(benign prostatic hyperplasia) if we're lucky because too many develop prostate cancer and if not caught in time, metastasizes into the pelvis, bones, lungs and brain and that's all she wrote. BPH causes a constriction around the uethra, the one tube that used to be two ureters(one from each kidney) which extends through the penis and ends as the penile opening in the glans. The urinary stream weakens, lack of complete emptying takes place and a guy untreated goes insane from a condition called polyuria which means no matter how hard you try, you're never drip dry. However with drugs like Hytrin, Cardura and Proscar, the situation is ameliorated considerably but not cured, so get used to it bunky because as the Jolly Green Giant says, "There's nothing better than a good pea," and yours are over.
But something else happens to both sexes with the emphasis seemingly on the male-forgetfullness due to gradual diminution of matter near the circle of Willis which is the professional way of saying our brains turn to crap.
Now for the most part, this thing about forgetting is BENIGN bu we hams have an edge on the rest of the population. It's called CHARLIE WHISKEY, cw., code.
The rationale goes this way: anything associated with the human body ATROPHIES because of lack of exercise, BRAIN included. I can't stand cw and the last time I took it seriously was for passing the 20 wpm Extra test in April of '78. But now as I close in on 62, I'm seriously thinking about whipping out the key to help save my wilting ability to concentrate and REMEMEMBER. See, I nearly forgot how to spell "remember."
I don't recall ever reading about how the brain is exercised and stimulated through the use of code but it is common sense, right? Now stop a minute and think about it. You're sitting behind a mic speaking in a so-called unmeticulous manner. How much concentration is there to a SSB QSO? Hell, give a mic to a monkey and you have 14.313. Ah but cw is a horse of a different color and that's no horse bleep either.
Code communications requires METICULOUSNESS and to achieve it, one must THINK and CONCENTRATE. That brain undergoes a workout but good. Hence cw is helping you to offset deterioration concomitant with aging and/or forms of dementia.
Now you can see what a great injustice the FCC and ARRL did by lowering code requirements. Five words per minute stimulates nothing. Cranial glial cells

lie dormant therefore it's true that the FCC wants an infusion of YOUTH into the hobby/service rather than ALL. The young are inherently dumb and lazy anyway with no threat of, for example Alzheimers, on the horizon.
Why then does the FCC care nothing about the deteriorating brains of us fifty and over? In every western society but ours, the aged are venerated and honored while here in the glorious 50, a government agency tells us to go let our brains rot.
Let us old timers take matters into our own hands by forcing ourselves to keep those brain cells viable. Put away the mics and as you might exercise your body daily, exercise your brains in the cw segments. And for those who might like to work me using code, forget about it. I hate that stinking outdated mode of communications and will have nothing to do with it.
Best 73,
Doc,AF2Y

I guess it wasn't enough that I turned into a KommieKrat yesterday, so Chipster hammers me some more with ..
>Nancy wasn't really giving
>him guidance from astrologers. Wonder if she used the Psychic Hotline

Yep, the one where Dionne Warwick tells you all about your future. But .. hooray for Hillary .. she had the good sense to go straight to the source .. seances with Eleanor. But that's ok. Cause it was Hillary and Eleanor talking. Two of my fellow KommieKrats. So that's our business, not yours.

Now knock it off, Chipster. Leave me alone and go after KK7HO. He's the one who needs to see the light. I've seen it already. Ask the Radiosigs-Guy.

Radiosigs-Guy is finally proud of me as he asks ..
>Right on Lloyd. I'm glad you've seen the light. How much are you
>contributing to the DNC?

Great idea, Radiosigs-Guy. With what I make at McDonalds, it won't be much. But I called the precinct today and they said there's an opening at the local monastery, so I'm going to enroll Monday.

I think it's Branch Brother Stair-ians or something like that. They've beaten their wives into plow-shares. Well maybe that's not the right word. But their wives were pulling the plows, that much I saw.

Once I take the vows of poverty, I'll be able to give THOUSANDS. Maybe after November, I'll be invited to spend a night at the presidential tobacco farm.

2158. Re: AUNT JANET

That was beautiful, Radiosigs-Guy. Brought tears to my eyes. What have I been thinking all this time? How dare these right-wingers assail her for not appointing a special counsel to investigate Vice President Gore. How dare them accuse her of stonewalling and obstructing justice.

Vice President Gore said he didn't break the law. He said he was NOT fund raising. That's good enough for me. And those e-mails .. hey, anyone could have a hard drive crash .. right?

(Damn .. I'm getting good at this ! ! Chipster look out .. here I come)

In article <3965daa4.4449334@news.usol.com>, chipster66@hotmail.com says...

>>Since when is it the governments place to say how a "holy man" is supposed to
>>act?
>
>They *didn't*
>
> He was investigated for illegal weapons etc.. Looks like they found
>one or two.

The search warrent that the BATF "served" listed such items as cardboard tubes and plastic containers, (Oh yeah, that's some real deadly stuff!) and the firearms listed were perfectly legal to own. There is no restriction on the number of firearms an individual is allowed to own in this country.

>> Have you ever heard of the First Amendment?

Yeah, right. Now, if Clinton's cabinet were mostly White Christians, you'd be bitching and moaning about it nonstop. The left is always complaining when Whites, especially if they're Christians, control something. So why do you poo-pooh the fact that Jews have so much control over Clinton?

Can you say "hypocrite"?

"Political Correctness is nothing but tyranny with manners."

What a diatribe chuckie. Your pitiful. I know you don't see anything wrong.
Clinton didn't lie
gore didn't lie
reno had nothing to do with it
top secret technology has not been stolen
87 witnesses didn't take the fifth
another 30 didn't leave the country
he didn't have sex with that woman
no such thing as wag the dog
he didn't molest her
he didn't pay 800,00 dollars
he didn't commit perjury
he's has been impeached
there's no scandal in the travel office
what whitewater deals?
there isn't 10 in jail because of those deals
he's not being disbarred
there isn't 1000 fbi files missing
they didn't find them in the living quarters.
indonesia didn't donate to the dnc
he's not guilty of obstruction of justice.
he's just your hero isn't he chuckie.
I know - I can feel your pain. Just keep saying there's nothing wrong, there's nothing wrong, and one day - in Nov. it will all get better - when dubba U - WINS.

I am aware of lots of sports. Some of which I myself am not interested in. Letting bulls run through the street and having them step on and gore people who don't run fast enough is also a sport that I am aware of. I don't like it...but if there was nothing else to eat I'd eat the bulls...there is no way that I'd eat a gun.

> A lot of guns are designed for sport and do NOT meet the Webster's
> definition of a weapon. My .22 rifle would be next to useless as
> a weapon against a real weapon.

BUT..
If you shoot sombody in the eye with a .22 there is no way he will be able to read Webster's definition of a weapon with good depth perception..

> When the Civil War was over, the Rebels were allowed to keep their
> guns without which they and their families would have gone hungry.
> I rarely buy meat. Mother Nature provides it for me every deer season.

The Rebels needed their guns to chase their freed slaves off their property. Those that didn't free their slaves also needed guns to keep them on their property. There would be a lot of hunger to be had if the slaves could not be kept to pick vegetables, flip pancakes and convert rice...so some of the ex-rebels, who couldn't fish or pluck chickens but had the guts eat crow, 'possem, 'coon and deer might have needed some hunting guns. I dunno if the freed slaves were allowed to keep any guns. I guess not because they had no guns to keep. I do know that it is a myth that they could live solely on watermellons while working for peanuts...But historians tell us that they did survive without any guns. Some eventually became boxing champions without guns...another traditional sport.
Before there were cars people needed horses. A man left stranded without his horse might die...Thus horse thieving as well as gun robbing was a capital offense. I'll admit that long ago folks had to protct themselves from Wild Indians...but that was long before they rounded them up and let them work in gambling casinos. The world has

become civilized and guns are no longer needed as weapons...but as you say guns to some sportsmen are fun toys. I guess the Olympics are just an old tradition like Morse code. Before they start the Olympic Games some guy has to run miles and light up the stadium with a fire torch. Doesn't he know that electricity can run faster and make more light and less smoke? No. Because he is involved in a fun tradition that might be fun for millions of people to watch...but logically it is technically decadent.
I guess it is all due to my sheltered city up-bringing which began long after the Civil War. You see I was taulght not to play with fire or with guns when I was a kid. There were no deer to shoot in the Bronx during the depression so we ate spagghetti. I learned how to work and play with soldering irons.
Ham Radio can not exist as a traditional decadent sport that doesn't even learn how to start a contest without starting a fire. Ham Radio is not an Olympic game.
Mother nature has provided me we the common sense to stay away from guns that are no longer needed.

Hams need more license classes,
Bob Wex w2ilp (With 22s Its Less Painful?)

>Doc,AF2Y

The government had no proof, other than the statements of a disgruntled ex-Davidian, that the citizens of Waco were going to be attacked. To give you an idea of how accurate his information was, he wrote in a book that Koresh owned a copy of the Anarchist's Cookbook, which, according to the BATF, was banned in the USA. It's news to me that we've started banning books in this country, especially since the book is in it's 23rd edition, and the local Borders has two copies on their shelves.
I think that the real "gullible braindeads" are the ones who won't look beneath the surface of the government's lies, to find that they are full of holes and contradictions.

Chipster babbled
>Sales of silencers , grenades and fully automatic weapons is legal
>business ?

yes believe it or not chip. They are with the correct license. Do your homework. Ohhh , does that scare you? They always have been with the correct license.
Oh by the way, I don't think that I've seen anything in your propaganda list that could not be owned by anyone, with an exception for the supressors. which need an additional license.

Persecution of religion and those in practice of it has been a
time honored tradition in this country. Many times in the most
breathtaking ways at the end of a gun barrel. I'll refer you to
the rout of the Mormons at Nauvoo.

The Mormons have advocated preparation before Nauvoo...but most
certainly since.

Read the story than ask your question again.

The clueless KK7HO asks ..
>TL how could you do that? What's the Right wingers gonna do without you.

Timmy .. one can only take so much abuse from the Radiosigs-Guy and
Chipster-Man and then it's time to toss in the towel. I hope you'll realize
this soon and come on over to "our side".

I think Mrs. Clinton would make a great senator.
Our strength lies in our diversity.
James Carville is sooooo articulate.
The Chinese are our friends.
We need more immigrants.
What nuclear secrets?
The middle class don't pay enough taxes.

There, Timmy .. I can't wait to get you over on "our side". It's great ! ! !

>hiding in this house:

Gee that's a new spin. I haven't even heard the Davidians proclaim
that one of their members didn't fire the shots. According to reports
over 10,000 rounds were fired at Waco. Perhaps the shots came from
some sort of Alien spacecraft ?

Ych-Man doesn't realize how cruel he is with:
>OK, but they forgot to mention "her" life's biggest milestone, namely the
>deluxe penile implant with accessory scrotum.

Now Y-Man. Shame shame. A penile implant without a scrotum is like a .. a .. car without a windshield .. an incomplete package. So you can't fault our illustrious Attorney General for needing one. Now let's play nice on here or Radiosigs and Chipster will come after you. Now we don't want that do we?

No, I'm not a gun-nut. I'm not familiar with the FFL at all. But just
a tad of common sense told me that some goofball like Koresh wouldn't
be licensed to sell machine guns, grenades etc.

> They always have been with the correct
>license.

Ooops. looks like your boy(s) didn't have one. Read the last paragraph
below.

WEAPONS RECOVERED FROM THE BRANCH DAVIDIAN COMPOUND:
TREASURY SUMMARY OF REPORT PREPARED BY THE FBI FOR PROSECUTORS
AND THE TEXAS DEPARTMENT OF PUBLIC SAFETY

ILLEGAL WEAPONS RECOVERED
Machine guns

The FBI determined that 46 semiautomatic firearms had been modified to
fire in full automatic mode: 22 M-16 Type Rifles 20 AK-47 Type Rifles
2 Heckler and Koch SP-89 2 M-11/Nine

The FBI also determined that two AR-15 lower receivers had been
modified to fire in full automatic mode.

Silencers 21 Sound suppressors or silencers

Hand Grenades 4 Live M-21 Practice Hand Grenades

****
The possession of lawfully manufactured machineguns, silencers, or
grenades requires the owner to register the weapon with the Bureau of
Alcohol, Tobacco & Firearms. None of the compound's residents were
registered to own such a weapon, therefore it would have been illegal
for them to possess these weapons.
****

http://www.treas.gov/press/releases/pr950713.html

> Oh by the way, I don't think that I've seen anything in your propaganda list
>that could not be owned by anyone, with an exception for the supressors.
>which need an additional license.

You're right , I don't know much at all about firearm laws, it's not
my area of interest. But I don't think I'm too shabby with a search
engine.

---
http://www.treas.gov/press/releases/pr950713.html

The Bureau of Alcohol, Tobacco and Firearms investigated David Koresh
for conduct involving: the illegal manufacture of machine guns and the
illegal manufacture and possession of destructive devices. The FBI
report provides evidence that the Davidians' arsenal did indeed
include weapons unlawfully manufactured. The weapons listed include
semiautomatic firearms illegally modified to fire in full automatic
mode, as well as grenades and silencers. All of these weapons were
unlawfully possessed.

The possession of lawfully manufactured machineguns, silencers, or
grenades requires the owner to register the weapon with the Bureau of
Alcohol, Tobacco & Firearms.

None of the compound's residents were registered to own such a weapon,
therefore it would have been illegal for them to possess these
weapons.

In Reply to: Re: $$How to Make Easy and Fast Money Legally$$ posted by =
j-man on January 16, 1999 at 16:36:37:=20

Now here is how you can make Millions of $$$$s or =A3=A3=A3=A3=A3s or =
any currency in the world!!!=20

PRINT THIS PAGE NOW OR YOU WILL BE SORRY!!!!=20

Now you probably have been scanning different news groups to find out =
which one is the best, haven=91t you? I certainly did. But don=91t leave =
just yet. You=91ve probably seen newsgroups which start =90 I was =
looking through a newsgroup, just like you are now=91 =90I was sceptical =
at first=91 and =90I=91ve spent more than that on lottery tickets=91 I =
have seen many of them around. Asking for you to send $6 and you=91ll =
receive $15,000.=20
Well I=91m asking you to send $10 and receive well over $5,000,000 (5 =
million bucks).
I know it sounds crazy but here is what you have to do. Follow the =
instructions CAREFULLY.=20

1) Get 10 $1 bills and wrap them in separate pieces of paper each saying =
" Add me to your mailing list Please." Also your name and address.=20

2) Put these separate pieces of paper and put them into separate =
envelopes, sending each one to the names below. You should now have 10 =
envelopes with each $1 in and with your name inside.=20

3) Now you need to send this message to 200 newsgroups on the Internet. =
What you do is put your cursor at the top and highlight it all and =
select =90copy=91 then open up =90Word=91 or anything to write on and =
select =90paste=91. Now all you need to do is place your name and =
address on the number 10 spot and move everybody up a place, so 10 =
becomes 9, 9 becomes 8 ect, ect, now knock number 1 off the top, so 2 =
becomes 1.=20

4) Here are the names you need to send the money to.=20

1) R L Enterprises, P.O. Box, 808 Festus, MO 63028, USA=20

2) W.C. Daniels, 5910 Transit Rd. Depew, NY 14043, USA=20

3) Chris Adkins, 127 Cupsaw Dr., Ringwood N.J. 07456 USA=20

4)Simon Belgian, 1212 Viola Ave., Glendale CA, 91202 USA=20

5) Creative Consulting, 4302 N. 16th Ave., Phoenix, AZ 85015 USA=20

6) M L Enterprises 27-1300 King St. E. Box 135 Oshwa Ontario, Canada L =
1H-8J4=20

7) S. Soudakov Elmshurst House Bromsgrove School Worcs B61 7Du England=20

8) S. Kerr 21 Serpentine Rd Selly Park Birmingham B29 7HU=20

9) Ewan MacTaggart 10 Cordingley Close Churchdown Gloucester GL3 2EN =
England.=20

10) Pauj Espon Enterprises, 441 Avocet Ave. Davis CA 95616 USA

Now this is how it works.=20
As you post this, to 200 newsgroups and people read and think =90 Ah I =
will join up to this.=91 And let=91s say only 5 people reply (a very low =
number)=20
That is $5. Now those 5 people send out 200 news groups and follow the =
instructions as your name is at number 9. Lets say 5 people answer to =
each 200 news groups, then that=91s another $25. Now if they follow the =
instructions carefully, your name is at number 7 and you get $125. Now =
if those 125 people send out 200 news groups you receive $625. And again =
your name moves up to 6 and you receive $3,125. They now post the news =
groups and your name moves up to 5 and those people reply you get =
$15,625. Now this is where the newsgroups I was speaking about earlier =
finish, that=91s it. $6, 6 places. But now your name is now sent out at =
your name at number 4 and you receive $78,125. Your name has still got 3 =
more places to go yet. So now with your name at no 3 you get a whopping =
$390,625. Once again your name moves to 2 and you are going to receive =
$1,953,125 (1 million nine hundred and fifty thousand, one hundred and =
twenty five dollars!!!!!!) But wait, you=91ve got one more place to move =
up. Number 1. You will receive $9,765,625. Can you grasp how much that =
is Nine Million. Oh no, your name had drooped of the list, oh well just =
start again and get some more MILLIONS rolling in. These numbers have =
only been calculated, if only 5 people respond to each 200 newsgroups, =
just think of how many people are on the net!! It has been estimated =
that 20,000 to 50,000 join the Internet every month!

The reason why you must send off the money in the first place is that =
you create a legal service and this is not fraud. If you did NOT SEND =
THE MONEY then you would be committing FRAUD and can be put away, =
because you are using other people=91s name for your own good.=20

Please play fairly and send the money and you will receive tons, in the =
next few weeks!!=20

------=_NextPart_000_0004_01BFE812.52888FC0

The only such conversion was a removable trigger attachment that allowed the riffle to fire a 4 to 5 round burst. I see these sold at gun shows all to time. They are perfectly legal.

Based just on what you've said I would hazard a guess the young
fellows dying on the train tracks is true, that wasn't what I was
calling into question. My '99.9999 .... to one' chances remark
referred to their deaths being 'Iran-Contra' related.

TRUTHFULLY Nearly the *exact* same thing happened within 50 miles
of where I live about 1 1/2 years ago. Two young guys in their 20's
were tossed out of a bar about 1 am for causing a disturbance. Their
bodies were found the next morning on a nearby RR track where they had
both been run over by a relatively slow moving train. The authorities
to this day haven't been able to determine *why* or what happened (I'd
suspect one or more bar patrons involvement) . But no one yet has
made some kind of streeeetch into Bill Clinton's involvement.

>Now about that Elvis sighting. He was 3 cars ahead of me at Taco Bell this
>past Tuesday. The one near Ridgeway and Quince.

Well I hope he was in good health ! I haven't seen *nearly* as much of
him since I switched from Rum & Coke / Tequila to straight Diet Coke
:)

Chipster is getting mellow ..
>My '99.9999 .... to one' chances remark
>referred to their deaths being 'Iran-Contra' related.

'Fraid so. Seems they seen some stuff they won't s'posed to see. Rat thar at Mena International Airport. Federal ... rather Former Federal Prosecutor Dan Harmon might tell you about it someday. He's preoccupied at the moment. Well, actually he's preoccupied for another 11 years.

I was a little skeptical about it, too. The I/C connection, that is. Living in Little Rock for 2 years cleared up a few things.

>I haven't seen *nearly* as much of
>him since I switched from Rum & Coke / Tequila to straight Diet Coke :)

Advantage mine .. Diet Coke is it .. and living in Memphis since 98 has helped a lot too. :-) If I see him outa the car next time, I'll try to get his autograph for you.

There's lotsa conspiracy nuts out there think he died in ought-77. Despite the fact that National Enquirer had pictures of him in the casket .. sweating .. and in another casket in different clothes. You just can't get through to some people.

I stopped reading when I came across the name Marc Breault. It's upon his and Keri Jewel's <sp> lies that the government based their case. It was Marc Breault who wanted to take control of the Davidians, and was booted out for his infighting. He had a personal vendetta against Koresh. It was in his book that he stated that the BATF told him that the Anarchist's Cookbook was banned in the U.S.
Keri Jewel stated that she had sex with Koresh when she was twelve. Later recanted her statement. We she testified before congress, no committee member had the guts to ask her this, simply because she was "just a little girl" (who happened to have a lot of coaching by her father.)

No murders had occured prior to the February 28th raid. There was no proof that any murders were going to occur. Are you proposing that we arrest people based on their potential for murder? And since when is it the government's job to interpret the teachings of Jesus?

Not me. It's the right-winger's here that know everything. They've uncovered *astounding* evidence that the Davidian's attorneys and the press have overlooked. "How'd those ATF agents get shot in the head moving around on the compound " (if they actually did get shot in the head) ? " It couldn't have been those Davidians , they were engrossed in Bible study at the time. " , or "They couldn't have made that accurate of a shot(s) " That's one piece of 'Brilliance.'

It's a shame such *genius* goes unappreciated, I've tried to get some of them to contact the press or the Davidian's attorneys without any luck so far. But I'll keep trying.

I know it , and the rich have been *struggling* under that oppressive estate tax that goes into effect if your estate is over ~ $650,000.00 and now the Rep's are going to repeal it. Leave it to the Republicans to always be thinking of the 'little guy.'

Read the thread, Clyde. Of the four "ATF" soldiers who died, two were shot in the side of the head, one behind the ear, and the fourth in the aorta from the front. That shooting is just too good to credit to Bible students shooting at live targets and hiding from return fire.

Remember, a hundred agents emptying their entire stock of ammunition in less than an hour is pretty intense return fire. The odds are too much against it that the Davidians could face that and still hit the ATF soldiers so accurately. Only a sniper squeezing off shots at his own pace could manage that.

Incidentally, the autopsy of Davidian Peter Gent shows exactly the same aorta shot -- the assassin special. Isn't that a coincidence.

Why? Death is death, regardless of who dies. No death is greater
than any other, yes? And death by government is death by government.

What shame should I feel for that?

Have the Dallas Morning News, the Justice Department, and the Treasury
Department no credibility? That is your statement, and we seem to be
on the same side of the issue.

> I am not one to sit there while the gov. tries to take away our
> freedoms. I do not believe the gov. ALWAYS tells the truth. But
> come on, everything they do is not a huge cover up of a government
> conspiracy.

Conspiracy is a term used by the US Justice Department in everyday
prosecution of criminals. There is nothing magic or creepy about it.
Whoever does it, whatever the source of their paycheck, regardless of
their standing in the community, if they work together to plan or
commit a felony, they are committing Conspiracy. It covers the
Tuskeegee denial of medical care to blacks, whitholding Whitehouse
papers from Congressional subpoena, knowingly distributing tainted

blood though Red Cross supply lies, and laudering money.

It covers three men in a bank robbery, and a hundred Columbians in a drug ring. It is a real word in the English language, and it refers to very real and ordinary human events.

And like it or not, getting a job with the government does not change the criminal character of a criminal. Like, check out the sitting president, for example.

Wrong. The windows are busted and blinds destroyed from gunfire. The initial contact has already happened, and the damage was all done to the house, not to the cars.

> > Note the broken windows on the house in the picture, and no broken

> scattered along the face of the house. So if there was gunfire it
> must have been coming from INSIDE the house.

Wow! Were those Davidians ever good! Not only did they shoot dead on target, they did it through walls without seeing the target!

I thing you better quit playing with your charged capacitors. I know lots of kids do it for fun, but it can burn out brain cells, and you just passed the irreducible minimum.

Anyone else reading this dialoue would realize that bullet holes in the siding of the house was caused by the soldiers trying to hit unseen people inside the house.

Shooting people through walls from the outside in is like shooting fish in a barrel. Shooting people through walls from the inside out is like shooting blindfolded. The first you might try if you have lots of bullets and you are willing to take pot shots. The second, no one would try.

> I also do not see any broken windows in this picture. I see some
> messed up blinds. Maybe from some Davidians pointing their weapons
> out the window through the blinds.

Sorry bud, but that is just as stupid. The soldiers would not be approaching the house if the Davidians were pointing guns at them through busted blinds or busted windows. Not even ATF soldiers are that stupid.

> > Now why would the government lie about an obvious fact like that?
> > And why don't the "investigative news media" reporters ask
> > penetrating questions?
>
> The media was there, not me. What did the government lie about?
> Take a second look at the picture.

I have taken many looks at that picture and dozens of others. There are no bullet holes in the cars, in this or later pictures, despite the government statement (Treasury Report):

"Gunfire from inside the Compound burst through the door. The force of the gunfire was so great that the door bowed outward. Then gunfire erupted from virtually every window in the front of the Compound."

Now, YOU have the Davidians shooting through walls, and STILL never hitting the cars.

The government also lied about the date of the deaths of the Davidian women and children. The reports both claim the children died on April 19th in the fire, but the autopsies (from bodies recovered only a few days later) show they had been dead for weeks, with mushy entrails,

flesh falling off the bones, and live maggots in cool April weather.

Why would they lie about a thing like that?

No doubt. If there's one thing you wild-eyed conspiracy theorists have cornered the market on, it's intelligence and common sense. ;-)

>Say, they don't pay you to write this stuff, do they?

Nah, I'd demand better sources of information rather than having to scrounge through the web and search engines to get it.

>shot" is not a quote from me. But I can tell you that the dead ATF
>soldiers did not die by Davidian bullets,

There's that *brilliance* again !!

Why waste your time on small fry like me when you can contact the Davidian's attorneys and show them your *shocking* find ?? Failing that contact all the news services ?? With your *Amazing* / *Brilliant* discovery you could break this case wide open !!!!

> and also I can say, based on
>photographic evidence from the scene, the Davidians did not shoot
>much.

Another *Expert* analysis !!

With lots of semi-automatic rifles modified to full auto and the left over cache of shells that was in a pile ~ 5 ft. tall x 12 ft. wide x 20 ft. long I doubt the Davidians fired more than say 10 or 15 rounds

? Which makes it even *more* amazing. Maybe it was some kind of
double-cross by the ATF itself ? Maybe connected to Iran Contra or the
NWO ?? I *strongly* suggest you report this sensational news to the
Davidian's attorneys and the press.

>
>> Snip:

He sure seems to have some 'qualifications' and has been quoted /
interviewed in the press and on the news a lot. It appears he's Jewish
? Is that the reason for your dislike of him ?

A pretty good run down on him here:

http://www.rickross.com/cv.html

Here's a list of sites that he's lectured at:

Arizona State University
Auburn University
Baylor University
Carnegie Mellon University
Concord College
Duquesne University
Georgia State University, Atlanta
Humanist Society of Greater Phoenix
Jewish Federation of Boston
Knox College
Lynchburg College
Maricopa County Medical Center Mississippi State Legislative
Committee
Phoenix Bureau of Jewish Education
Phoenix College
Southern Utah University
The McCallie School of Chattanooga

University of Chicago
University of Pennsylvania, Philadelphia
University of Portland
University of Southern Mississippi
Washington State University
WV West Virginia State College

It doesn't look too shabby to me.

>He is a terrorist, and
>he pumped the press full of his "special" hatred of the Davidians from
>the day of the first raid. It is hardly surprising he would be
>pushing this swill now.

HE didn't write the article, it was merely on his site. Here's who
wrote the article (Dick J. Reavis) and the *newspaper* from whence it
came.

Davidian admits firing at ATF agents
San Antonio Express-News, Feb 23, 2000
By Dick J. Reavis

>
>> ------
>> Davidian admits firing at ATF agents
>> San Antonio Express-News, Feb 23, 2000
>> By Dick J. Reavis
>
>> For the first time, a Branch Davidian survivor of the Feb. 28, 1993,
>> shootout at Mount Carmel has admitted that he fired at two of the
>> four U.S. Bureau of Alcohol, Tobacco and Firearms agents who were
>> killed during the battle.
>>
>> Livingstone Fagan, who was one of 11 Davidians tried in San Antonio
>> six years ago, said in a deposition that he shot at ATF agents on
>> the roof of Mount Carmel. Fagan gave the deposition in a wrongful
>> death lawsuit Mount Carmel survivors and their families are bringing
>> against the federal government.

It seems that most of the liberal socialist democrats have their thinking processes assbackwards. They ASSume that if "their" man (sic) has this stand or that stand on a certain issue that the person is moral. For example; if he's pro-choice, anti-gun, or an enviromental nut case then he's moral. What flawed thinking they have. Give them (the liberal socialist democrats) all of the social programs, the giveaways from the gov, more taxes, less freedoms, all of the handouts the can take and - well, you've got their vote. LOL

: I'm looking for an answer to a problem that I have had with my last
: five digital AM/FM stereo pocket radios. All five of them have died
: the exact same death. Two of them were Radio Shack Optimus radios and
: three of them were Sony SRF-M32 Walkmans. They all ran on two AAA
: batteries. The Optimus has a small external speaker (which I never
: used), and the Sony radio does not. These radios were priced in the
: $30 to $40 dollar range and performed exceptionally well at first. I
: used each of these radios for about 3 to 5 hours every day with a
: variety of quality headphones or earbuds. 95 percent of the time I
: listened to FM music stations, a lot of the time I had the volume up
: fairly loud. Battery usage was excellent on all of the radios (using
: Duracell Ultra's). Now my problem: after about 3 or 4 months each of
: these radios lost output on the left "speaker". The loss was gradual,
: but quick, and after a short time the left channel just quit. So of
: course I am puzzled by this pattern of malfunction. I really need a
: radio like this for my job, but I don't want to waste any more money.
: So, first of all, why are my radios konking out like this? And is
: there a quality pocket digital AM/FM stereo on the market that I can
: depend on? Thanks in advance for any help.

: Martin S. in Arizona.

: Reply to: relaxn at frontiernet dot net, remove "deletethis".

The problem, as others have noted, is generally the jack....not so much
that it wears out, but that it's terminals get detached from the circuit
board.
In most cases, the jack is only held in place by the soldered connections
themselves(and sometimes by a plastic pin or 2(which do nothing to solve
the real cause of the problem).
Solder is intended to make a electrical connection, not a mecanical one.
(standard solder is WAY too soft to do this well).
Things to do:

1.don't use LONG headphone plugs....they act like a lever, and pull the
jack off the board.(if you are buying a new pair...DON'T get one with a
1/4" plug...the 1/8 adapter is trouble for the same reason.
If you have to use a adapter, use a right-angle one(trust me, it DOES
help).

2. try not to yank the headphone cord....if it is too short, then use
a extentsion cable to lengthen it.

3.if possible, use a headphone with a right-angle plug(or get a right-angle adapter).

4.get a inexpensive soldering iron, a small pack of solder, and a set of small screwdrivers, and take the time to learn to resolder the jack terminals back onto the circuit board...it's NOT that difficult!
A hint:if possible, a bit of contact cement or silicone sealant(urethane cement should work too) BUT NOT hot-melt glue...it pulls off the board too easily, and thus becomes useless!), put on the circuit board under the jack(keep it away from the contacts, of course!) will help anchor the jack in place, taking some of the stress off the terminals).
Don't use super glues either...too thin, and the fumes can oxidise the jack contacts.

Btw, some jacks ARE better than others..some of the Sony ones seem better than most. but they STILL fail quickly at times.

I've resoldered MANY jacks over the years, with excellent results in almost EVERY case.

Dwight,

I am using Internet Explorer with Windows98. Since almost every URL begins with http://www and ends with .com, all you have to do is type in the actual name in the address box and then press CTRL-ENTER.

Example: if I want to go to http://www.widget.com (do not try and go there, it is a made up name!) all you have to do is type widget in the address box then hold down the CTRL key and press ENTER and it will add the http://www at the beginning and the .com at the end!

Neat, huh?

It would be better when manufacturers would acknowledge that the design of
the jack plug was not a really good idea, and design a replacement plug
that allows headphone connection without wacky contact.

Unfortunately it is not simple to design better connectors while at
the same time miniturizing them.
And of course manufacturers see very well that a worn-out connector is one
of the first reasons to replace an aging piece of equipment, which they
need to keep their business running.

Further evidence of your investigative prowess. Too bad the
militia-conspiracy types such as yourself weren't acting as the
Davidian's trial attorneys. You could have pointed out that it wasn't
the Davidian's bullets that killed the ATF agents, and neither was it
their guns in use. The jury (after the guffaws diminished) would
have no doubt been astounded.

Gee Doc... it sounds like you are running for office. Tell us what you have done, or your governmental solution for the poor, ill and aged. What makes you think they want your help... or the governments. How about the hungry babies, the disabled, the undereducated, the oppressed imprisoned and aids in Africa. It's an endless list, for a liberal it's easy to ask others to dig deep isn't it?

Gerd, W2ISB

constitution is often referred to as a living document because of its founders forethought to allow amendments to change it to fit the times and the needs of the people. to think that it was written in stone and ment to remain as originally drafted is totally foolish. where do all the paranoids come from? 73, XXXXXX

The man is absolutely correct. Our Constitution is indeed a living and vibrant document yet subject to revisions when necessary. But the important thing is that those revisions MUST come about by duly prescribed lawful and procedural processes and that, baby, IS ETCHED IN STONE.
What also is etched in stone is that no one's going to try to topple this government by force and if it's attempted, the Feds are going to either apprehend or kill the offenders.
What's also etched in stone is the fact that our liberty must not be taken for granted as well as our willingness to RESPECT the authorities who see to it that such liberties are with us forever. The law's the law and if you defy it, you're going to get hurt.
My father came to this beloved nation as a penniless immigrant in 1920, on the day Warren Harding was elected President. He and his family fled the worst persecution possible in what is now eastern Poland, on the Ukraine border.

The man worked all day and attended night school English classes and gradually saved enough money to open, along with his brother, a store in Passaic,NJ. He was successful but never wealthy but what was more important-he was FREE, a very proud naturalized citizen who revered and cherished this nation. My upbringing was channeled into the realization that all of us are hybrids-there's no such thing as a pure American and anyone who preaches such crap is a worthless stinking ingrate and no better than the rotten scum in Eastern Europe who persecuted my family.

I, like my father, worship the ground I walk on and respect persons for whom they are instead how they should be and anyone who struts around thinking he's a better American, or worships a better God or is willing to deny his fellow man the same respect and dignity afforded himself, is my enemy. And THAT'S etched in stone!
Furthermore isn't that what our Constitution's all about anyway?
AF2Y, Doc

I'm in agreement although I loathe Howard Stern. I enjoy Curtis and Kuby on WABC, 770 followed by Dr.Laura and then when Rush come on I take out a few pages of the N.Y.Post, just in case. The guy's opportunistic trash who feeds off hatred. I hope Phil Boyce, WABC Program Director, cans the slob.

2227. RS HTX-202 Mod

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-08 00:00:00 UTC
From: Rick Ellison <rellison@twcny.rr.com>
Message-ID: <3_I95.6261$QM2.165858@typhoon.nyroc.rr.com>
Source record: 107723

Has anyone ever tryed this mod on the htx-202 HT by RS??????

Bulletin: RS100
Vendor: Radio Shack
Subject: HTX-202 Extended RX/TX Modification

** Remember: All standard disclaimers apply. Think twice before
putting your hard-earned cash under the knife. Also, chances are
that after you modify the rig, R.S. repair centers won't touch it...

* Opens up RX to 118-227 MHZ (Aircraft & 220 MHZ Band!)
* Opens up TX to 140-159.995 MHZ

1. Remove the antenna, battery case
2. Unscrew all screws on the back and the sides of the case.
3. Carefully pry apart the two halves of the shell, pay special
attention to the fine wires attaching them!
4. Locate and remove chip resistors R45 through R69.
5. The above step opens RX to the complete range. Only remove
R55 for 140-174 MHZ.
6. Add a 0 Ohm (or solder jumper) to the empty positions of R77,
R123, and R124 - this opens the TX.
7. Most of the chip resistors mentioned above can be located on the
first layer of the PC board. A couple are harder to get to. i.e.
8. Close everything back up, tucking the extra wires in and being
sure none of them get pinched by the case.
9. RESET the CPU and your off !!!

2228. Warning! -- SONY SUBSTANDARD SERVICE

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-08 00:00:00 UTC
From: An_American_Consumer@hmwvs.com
Message-ID: <378AA7E78C6.pfrxfk@xrdfemoo.com>
Source record: 107724

Anyone considering the purchase of a Sony peripheral for their computer might want to give it some further thought. There clearly is not a reciprocal relationship between what they sell and what they service.
-
I purchased a CD-RW drive back in April that just recently went bad (won't read). When I called Sony service, I was told that I could not get a replacement and that I had to ship it across the country to be "repaired" (and we all know what that means...) - with a three (3) week turnaround. Assuming that they keep their 3-week commitment, with shipping both ways, I'd be without the use of the unit for at least five weeks!!!
-
I hardly think that's reasonable or fair.
-
Compare this to HP, who under the same circumstances would simply ship you out a replacement unit and issue a call-tag for the old one.
-
Sony is a behemoth in the marketplace and as such, they have an obligation to scale their service facilities to meet demand. To not do so is an indication of their lack of commitment to customer satisfaction and an unwillingness to stand behind their products.
-
Buyer be ware!

Tell us what our government's done for the poor, ill and aged? Are you nuts? What hasn't it done? You never heard of things like Medicare, Medicaid, Social Security, Social Security Disability, funding day care centers and homes for convalescing and the aged? Oh come on Gertie. get with it. I just outlined a few examples but you know damn well how helpful the government's been to the needy. If not, you're living in the Twilight Zone.

I'm running for office? Is that the way you see my support of the government? To be concerned means political ambition? Since when?

Regarding Africa, I can't expect our government to help everyone in distress; in fact, we dole out far too much in aid, EVERYWHERE. I've been advocating a 25% cutback across the board for years with monies to be used AT HOME since too many kids go to bed hungry in America. My suggestion is that since Africa had been nothing more than countries under European colonial rule-countries like England, Italy, Spain. France and Portugal, let THEM help those same folks whom they subjugated. Why do we have to do their dirty work on a constant basis?

I see you labeled me a liberal. In some ways I am, especially social programs,but keep in mind that I'm pro death penalty, for a drastic cutback on foreign aid, reduced immigration and a strong military. But unlike Republicans generally, I'm PRO CHOICE and the only reason why G.O.Pers aren't is because they're too damn stupid to understand any other issue. Lastly, if McCain had been the SMART choice of the G.O.P. I'd be voting for him come November. How can anyone with a brain vote for George W? Get a life.

Source record: 107728

Tom you have to understand that the chipster and his ilk are willing to believe whatever the media or gov puts out. They soak it up without question. Any "other" evidence, opinion or analysis of the issue is to them, of course, irrelevant since it didn't originate or wasn't manufactured by big brother and the major media.
They (chipster and his ilk) repeat and perpetuate the spoon fed lines that the media and big bro feed them. It would serve them well to do unbiased research regarding the issue. Knowing all about only one side, while it may make the machine happy, does nothing for them. There are two sides to every story and all they know is the media and big bro's, neither of which are unbiased. Hell, most of the time they're in bed together.
So, while chipster and his ilk continually point to one side, they are blind to the "facts" of the other, and I'll be damned if I'm going to take the time to get links and post them here in order for them to SEE that everything isn't always black and white.
There have been numerous military personnel and experts give congressional testimony that has refuted the gov's "so called" evidence and version of events. Along with infrared photog's etc. Not to mention ham sig's being jammed.
All they know Tom is that big bro and the media can do no wrong. Oh my gosh, no not them. What would this country be like if they have - done wrong and lied.
LOL

That Radiosigs-Guy .. he's the Hammer of God ..
>In no way do I believe that N0VFP understands anything he copied and pasted
>to this board.

Come, come, now Radiosigs-Guy. Have a little compassion on Elian Davies. Maybe he'll wash ashore someday. And try to be a little more insightful on the Buchanan "candidacy".

If Mr. Buchanan siphons away all the right-wing loonie votes from Gee-Dubyah (the executioner), Vice President Gore will have the presidency handed to him on a silver platter.

Frankly, I don't think Mr. B. will win the nomination of his "party". It appears that Mr. Perot owns the party. My guess is that Mr. Perot will show up at their "convention" and step up at the last minute and announce that "the volunteers" have asked him to be their candidate.

After a few hours of wild appaluse from the "delegates", he will humbly and tearfully agree to run again. His nomination will be by acclimation.

Don't laugh, Radiosigs-Guy and Chipster-Man. It's happened twice before. What would be especially charming would be if Vice-President Gore would ask Mrs. Rodham-Clinton to be his running mate. Is that a great idea or what?

Anyway, after November, Gee-Dubyah (the executioner) will remain in Texas sipping Margaritas with his oil billionaire buddies and sending people off to get the .. "ultimate vaccination".

2235. 35 GOOD REASONS **NOT** TO VOTE FOR ALGORE

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-08 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <20000708142736.22878.00001564@ng-cp1.aol.com>
Source record: 107731

quotes are from his book "earth in the balance."

35 REASONS NOT TO VOTE FOR
AL GORE, JR.

1. Gore thinks "human civilization is now the dominant cause of change in the global environment." Nevermind the sun, the oceans, volcanoes, and other natural phenomena that actually do control the environment.

2. Gore believes that "industrial civilization" is engaged in a "terrible onslaught against the natural world." Of course, without industrial civilization, we'd all be riding horses and growing our own food. Forget about cars, computers, air conditioning, television, telephones, plastic, pharmaceuticals, et cetera.

3. Gore's "strategic goal" is to "eliminate the internal combustion engine" by the year 2020. This particular kind of engine can be found in automobiles, trucks, vans, and a whole host of labor saving devices.

4. Gore believes that the "cumulative impact" of automobiles "is posing a mortal threat to the security of every nation more deadly than that of any military enemy we are ever again likely to confront."

5. Caught making campaign finance calls from the White House, something that is against the law, Gore declared that there was "no controlling legal authority" regarding this improper behavior. Like any longtime legislator, he knew federal law prohibits soliciting campaign funds in a federal building.

6. Gore favored a government crackdown on the tiny trickle of electricity used by devices like television sets, whether they are on or not, because it results in a steady emission of carbon dioxide. All his talk of greenhouse gases and global warming ignores the fact that 95% percent of all carbon dioxide produced annually comes from the evaporation of water from the oceans, decaying organic matter, and the respiration of human beings and animals.

7. In October 1997, Gore told television weathermen gathered at the White House that global warming could be eliminated if the over-population of Third World nations could be controlled. This is a kind of Final Solution approach. The entire population of the world could live in Texas. Populations in industrialized, prosperous nations have steadily decreased.

8. Gore was responsible in having Timothy Wirth named Undersecretary of State. Wirth is on record saying, "Even if the theory of global warming is wrong, to have approached global warming as if it is real means energy conservation, so we are doing the right thing anyway in terms of economic policy and environmental policy." Since there is no global warming (the earth hasn't warmed in over 50 years), this is a justification for a bad policy based on bad

science. Wirth now administers Ted Turner's billion-dollar gift to the United Nations.

9. Gore has pushed hard to make environmentalism the basis for our foreign policy. He called it "a turning point in US foreign policy." A turn for the worse since national security and the advancement of our economic growth is widely regarded as a sound basis for foreign policy.

10. While the economy of Japan remains stagnant, Gore advised them in 1997 to agree to "limit carbon monoxide and other greenhouse gases" by supporting the much-disputed UN Treaty on Climate Control. This treaty exempts nations that include China and India. The US Senate is on record saying it will never approve it.

11. Gore attended an April 29, 1996 campaign fundraising event at the Hsi Lai Buddhist Temple in Hacienda Heights, California and then called it "a community outreach" program. Three months earlier, his own staff had told him it was a fundraiser.

12. During his Democratic nomination speech, Gore told of his grief over the death of his sister caused by her having smoked cigarettes. He neglected to mention that his family's fortune had been based on raising tobacco in Tennessee and that the family farm continued to do so for years after her death or that he continued to accept tobacco industry political action committee money through his re-election as Senator in 1990.

13. Gore once told reporters that Eric Segal's novel, "Love Story", was based on the romance between himself and his wife Tipper. When Segal said this was nonsense, he disclaimed his statement calling it "a miscommunication."

14. Gore has compared the "struggle to save the environment" to "the struggle to vanquish Hitler" adding that this time "the war is with ourselves." Apparently, the entire human race is now the enemy.

15. Gore advocates that the United Nations consider "the idea of establishing a Stewardship Council to deal with matters relating to the global environment." In other words, give the UN total control over the actions and decisions of sovereign nations worldwide. Meanwhile, the UN already has a plan for "global governance" complete with the ability to tax nations, set up its own permanent army, and now has an international court which can indict and convict American citizens.

16. Gore has written that the "deforestation of Haiti, perhaps as much as the repression of the Duvalier regime" was the cause of Haitian immigration, numbering over a million, legally and illegally, to the US. Sure, they all left because trees were chopped down.

17. Gore once claimed that, if the Republicans didn't go along with the Clinton Administration's environmental legislation, "our drinking water would be dirtier; (it) would make more people sick, and would kill more people." This is typical of his habit of over-statement and harsh attacks on opponents of his beliefs.

18. Gore has claimed during a 1999 interview with CNN's Wolf Blitzer that "During my service in the United States Congress, I took the initiative in creating the Internet." The preliminary discussions for the creation of the Internet took place in 1967 and, in 1969, the Defense Department commissioned the creation of the "Arpanet." Gore was 2l years old at the time and it would be eight more years before he was elected to the US House of Representatives.

19. Gore was a supporter of the creation of the so-called "Superfund" to clean up toxic sites. It was supposed to be a short-term program costing $1.6 billion. The program still exists and has cost more than $30 billion without having successfully cleaned up more than a fraction of sites.

20. Gore was an advocate of the "V-chip" to permit parents to block out programming they considered inappropriate for their children. It is widely regarded as a complete failure.

21. Despite the viewing public's disenchantment with the television show, "Ellen", starring Ellen DeGeneris, an outspoken advocate of the lesbian lifestyle, Gore lauded the star for "forcing" millions of Americans to "look at sexual orientation in a more open light." They stopped looking and the show was cancelled.

22. A comparison between the statements found in Gore's book, "Earth in the Balance", and the "Manifesto" of the Unabomber, demonstrates that it is impossible to determine which one is the author of which statement. (See "How to Tell the Difference Between Al Gore and the Unabomber" on this site.)

23. Gore is on record declaring William Jefferson Clinton as one of the greatest Presidents of modern times.

24. Gore has placed some of the most radical advocates of environmentalism in posts throughout the Clinton Administration, first of whom would be Carol M. Browner, director of the Environmental Protection Agency. The bad science, bad laws, and lies coming out of this single agency will impact the US economy for years to come. Another Gore appointee, the former director of the White House Council on Environmental Quality, Kathleen McGinty, has resigned to play a role in his presidential campaign. There are others too numerous to name.

25. Gore was put in charge of "reinventing government" in the Clinton Administration, but not a single union job was found expendable. Nearly three-fourths of the positions that were eliminated came from the Defense Department, which lost 16% of its civilian jobs. Many other jobs that were supposedly eliminated were "privatized", using government contracts. Other reductions came from retirements. The Federal Register of new laws and regulations has increased dramatically during the term of the Clinton-Gore Administration.

26. During the 1992 campaign, Gore said that the government should fund the "information highway", but reversed himself the following year saying the private sector should pay for it.

27. The Gore family had close, personal ties to oil magnate, Armand Hammer. After his defeat as Senator, Al Gore, Sr. was given a $500,000 a year job to head up the Occidental Petroleum's coal division. Hammer, however, was a

longtime Soviet agent, a personal friend of Lenin and the only American to receive the Order of Lenin from the then Soviet government. Today, Al Gore, Jr. serves as co-chairman of the US-Russian Joint Commission on Economic and Technical Cooperation, better known as the Gore-Chernomyrdin Commission.

28. Despite being provided with evidence in 1995 by the Central Intelligence Agency of the personal corruption of Victor S. Chernomyrdin, Gore dismissed the findings and did not want to receive further reports.

29. Gore's advocacy of the widely disputed global warming theory led him to blame it for everything from floods in North Dakota, droughts in Texas, and forest fires in Florida. One would think that floods, droughts and forest fires had never occurred before, but history reveals they are a common annual occurrence.

30. Gore did serve briefly in Vietnam, but his assertion that he came under enemy fire is false. He served as a journalist behind the front lines and never saw combat.

31. While a journalist in Tennessee, Gore said that his reporting "put people in prison." An examination of the record shows this did not occur and he admitted that he lied about this.

32. Both Al Gore and his wife, Tipper, have admitted to being "recreational" marijuana smokers when he attended Harvard. The Clinton-Gore Administration is notorious for having failed to stem the flow of drugs into the country.

33. When President Clinton gave misleading testimony about his relationship with Monica Lewinsky to the Grand Jury and the tapes were shown on television in September 1998, Gore characterized his behavior saying, "My overall impression was that it was much ado about not much new."

34. On a visit to New Hampshire in 1998, Gore predicted that Clinton would end his term in office "with a distinguished record and will go down in history as a virtuoso performance, producing economic recovery and an American renaissance with new solutions to problems once thought impossible to solve." Most people believe Clinton has disgraced himself and the office of the Presidency. The nation’s economic success is attributed to the end of the Cold War and the former Soviet Union. Policies administered by Alan Greenspan, chairman of the Federal Reserve are also credited. By contrast, the Clinton Administration has been engaged in efforts to purchase more of the nation’s landmass to put it off limits to any development or the use of our natural resources. The Clinton-Gore Administration has attacked major industries that include tobacco and one of the most successful corporate enterprises, Microsoft.

35. Gore once accused then President Bush of having "taken our tax dollars and subsidized the moving of US factories to foreign countries", but omitted that the program he was describing, the Caribbean Basin Initiative, was one for which he had voted when he served in the Senate.

For these and many other reasons, Al Gore, Jr. is a proven, accomplished liar, an environmental fanatic, and co-equal with President Clinton in the cover-up of the Administration's scandals.

KK7HO .. at it again ..
<sssssssssssnipppppppppppp>

Timmy .. you forgot to say your lines. Dag-nab it, you're a sitting duck for the Chipster-Doc chain saw massacre if you keep this up. Ok let's try again. Say your lines, Timmy ..

I think Mrs. Rodham-Clinton is the RIGHT choice for Senate.
Vice-President Gore had a really great idea when he invented the internet.
Character doesn't matter.
He did NOT have sex with that woman - Miss Lewinski.
So what's the big deal if Mrs. Rodham-Clinton had a few FBI files on her night stand.

Come on, Timmy. Catcha a clue. Wake up and smell the coffee.

Timmy is cruisin' for a bruisin since he ..
>don't think that I'm likely to agree in this lifetime.

Ok, Timmy. I was trying to protect you from The Hammer of God. You wouldn't listen .. you're on your own. But for now, I'm going to say my lines ..

Gee I hope Vice Presdent Gore selects Mrs. Rodham-Clinton for his running mate.
We need more social programs like "The Great Society".
Ms. Reno sure did a fine job at Waco.
He did NOT have sex with that woman - Miss Lewinski.
The middle class should pay more taxes.
Vice President Gore is right .. there are too many cars.

Good luck with the Chipster-Doc chainsaw massacre, Timmy.

No one that I've seen, myself included, approves 100% of the
government's actions. However if you think you have *real* issues,
again why waste your time on small fry here in this NG ?

Get in touch with the Davidian's themselves, their attorneys, US &
foreign media. NO ONE is stopping you from sharing your *BRILLIANT*
discoveries, least of all ME. I personally would *encourage* you to
share your Brilliant Discoveries with all that will listen. You
could possibly get the 'innocent' Davidians released from a pretty
lengthy stay at the Cross-Bar Hotel. Though my money says you'll get
more guffaws than anything else.

Mighty funny you post a partial quote, you must have been one of the clowns perjuring yourself with the fake tapes to Hollingsworth. Like KC8JBO. If you are, I suggest you get a real good lawyer, you are going to need one. Now I will post the entire passage, jerk.

This quote is located at :
http://www.arrl.org/news/enforcement_logs/2000/0706.html

HIRAM, GA: The FCC on June 28, 2000, sent a Warning Notice to General licensee James V.
O'Brien III, W4AMP, and a Notice of Intent to designate
O'Brien's Amateur Radio station license
for a revocation hearing and his operator license for
suspension for the remainder of its term. FCC
Special Counsel for Amateur Radio Enforcement Riley
Hollingsworth said monitoring information
before the Commission dating from January of this year
indicates that the licensee is "seriously
misinformed about the basis and purpose" of Amateur Radio
and about the FCC's enforcement of the
prohibition against obscene or indecent transmissions. The
FCC alleges the offending transmissions
took place on 3894.5 kHz, 144.35 MHz and 223.5 MHz.
Hollingsworth said if the alleged operation
recurs, the FCC would designate W4AMP for a revocation
hearing and O'Brien's General license for
suspension. Hollingsworth noted that the FCC's rules
prohibit transmitting obscene or indecent words
or language and that, for indecency purposes, the FCC uses

the same standard for commercial and
amateur transmissions. "Obscene speech is not protected by
the First Amendment and cannot be
broadcast at any time," Hollingsworth said in the letter,
which also defined and detailed the
proscriptions against indecent and obscene transmissions.
In a lengthy e-mail response to
Hollingsworth that he shared with the ARRL and others,
O'Brien vigorously denied making any
obscene transmissions. He said he keeps a "complete and
accurate log" of his radio operations and
would "gladly submit it for inspection." Additionally,
O'Brien said, he has not operated on 3894.5 kHz
at all this year. He suggested that any profanity monitored
on the two VHF frequencies cited by the
FCC was directed at him by an ex-FCC employee who, O'Brien
asserted, has been harassing him for
more than four years. O'Brien pledged to operate "in full
accordance" with FCC rules. He also
requested that the FCC provide any recordings, log
information, and FCC monitoring information it
has regarding the present allegations.

In article <39672d7e.458520@news.usol.com>, chipster66@hotmail.com says...

>>It certainly looks like your opinion and the government's are one and the
same.
>
>Well tell them to quit copying 'Chipster's' opinion.

You've got that backwards. It's you that's doing the copying. You contradict
yourself in the same way as well. You write the following:

>>>>That's fine, you're too far gone anyway. Anyone that thinks that the
>>>>Davidians 'Murder Warehouse' full of automatic weapons, with some 50
>>>>caliber guns, silencers , grenades etc tossed in represents anything
>>>>remotely resembling Jesus and his teachings needs to have their head
>>>>examined anyway.

...and then in the very next post you write:

>>>No murders had occured prior to the February 28th raid.
>>
>>No one said there had been.
>>
>>> There was no proof that
>>>any murders were going to occur.
>>
>>No one said there was.
>>
>>>Are you proposing that we arrest people based
>>>on their potential for murder?
>>
>>No.

So explain how it could have been a "murder warehouse" if no murders had
happened, and there were no proof that any murders were going to happen.

Tom - N8ECW

>

The surviving "Davidians" and their attorneys do not have an adversarial relationship with the US, as you seem to be suggesting. In fact, with the wrongful death suit against the US, the plaintiffs, their lawyers, and the US are together cooperating in a huge fraud on the US Treasury.

For example, there is a big problem with several Davidians who allegedly died at the hands of the government on April 19, 1993. The problem? Their bodies have never been found. No death certificates have been issued.

Yet the Davidian attorneys are claiming monetary awards be given to their families. And the government is not even using this fact to challenge these very curious "wrongful death" claims. You can read about this collusion in "Waco Suits for Waco Suckers:"

http://www.public-action.com/SkyWriter/WacoMuseum/burial/page/b_wsws.html

[Beware wrap around URL. Public-Action must be hyphenated for URL to work]

Here, let me give you a summary:

===

Waco Suits for Waco Suckers
or
They Couldn't Even Get the Names Right!
by Carol A. Valentine
Copyright, December 1999

Hey, Wow! They're finally doing something about Waco! That video showed how the government shot the Davidians as they were trying to escape the

fire, and tough Davidian lawyers are suing the government because of what they did!

The judge is the same judge who was real mean to the Davidians back in 1994 and sent them to prison for 40 years, but don't worry, he is nice now--he had a change of heart! Now he's going after the government, not the Davidians!

The FBI has admitted it lied about stuff. Janet Reno and Louis Freeh are real ANGRY! There are Congressional investigations, too, complete with turf battles!

The nation is coming together! Folks are feeling sorry about what happened, and are helping the Davidians rebuild their church! They've even had a ground breaking ceremony, with the American flag fluttering in the breeze! It was very nice!

Truth! Justice! The American Way! Yes, indeed, it's all just around the corner!

* * *

Do you believe all this? THEN YOU ARE A SUCKER.

The lawsuits and attendant media hoopla are part of a tawdry, choreographed vaudeville show designed to cover up the Waco Holocaust yet again. The bad actors include Kirk Lyons, Ramsey Clark, Gordon Novel, Brigadier General Benton Partin, Michael Caddell, Michael McNulty, and Judge Walter Smith.

Before we get into details, allow us to pose a question. Imagine you are a surviving Branch Davidian or a family member of one of those killed. Suppose you had voluminous, incontestable, publicly available evidence that members of your family and your friends were murdered with malice aforethought and their bodies desecrated in an attempt to cover up the crime.

Would you file a lawsuit claiming that your women folk and children (a) died by accident, (b) committed suicide, (c) were murdered by other Davidians?

Would you claim your dead friends and relatives set Mt. Carmel on fire?

Would you ask that Americans who had no part in the planning or performance of the murders pay millions of dollars to you while the murderers went free?

Would you take part in the falsification of history and consider your loved ones were in any way avenged?

Now you understand the Davidian civil suits. They re-assert the government's most pernicious black propaganda against Davidians living and dead, make exotic claims against the US that are completely unsupported or supported by weak and contested evidence, and ignore the

most powerful and convincing evidence against the US.

Uhhh to bring you up to Date - Waco has *already* happened.

I used the term "Murder Warehouse" *AFTER* the fact based on the
ENORMOUS amount of weapons and ammunition found there. And the term
'Murder Warehouse' I borrowed from Doc because I thought it so
appropriate.

Is that clear now ?

Indeed it would be preferable if a more lasting design were introduced. But I was suggesting a mechanism that would preserve backward compatibility.

1/8" jacks were OK for their time...they were on small Sony portable radios at least 35 years ago for occasional use with those ridiculous little thimble-sized one-ear earphones people used back then.

But then they had to come up with a compatible stereo version of the jack/plug, which further tightened the angles, materials and contact surface area. Remember, the design doesn't just have to route the signal, it also has to cut off the speakers.

Nowadays people really stress those jacks with sports use, taping, etc. They're subject to corrosion and metal fatigue.

One way or another, the design needs to be improved, especially on units like the $750 Personal Jukebox.

Jerome

Ah, now thats perfect. Since I'm also a Mac user (yes, two handicaps
- Netscape and the Mac), I would surely have forgotten the CTRL-ENTER part.

I'm glad to see these two browsers are so similar. Netscape also has
the ability to automatically add the http:// prefix. However, it
doesn't add the www or any suffix (.com).

Gerd, as much as I want to agree with your assessment, I've also had recent incidents that have caused me to become concerned about Sony products (and, by extension, the company as a whole - which includes their warranties).

I have often purchased Sony products over the last few years, simply because their products seem to be well-made, fully-featured, and reliable. However, the last couple of purchases has raised some doubts about this.

For example, I recently purchased a mini stereo (MHC-F150). With its built-in clock, tuner memories, programable sound characteristics, and programable 50 CD changer, this thing is a nightmare to set up. Not really a problem once the setup is complete, but the darn things forgets everything if power is removed. And, since I live in a lightning prone area, power has to be removed almost everyday.

Now, this was not an inexpensive mini stereo (about $500), so I have a hard time understanding why Sony would not provide some type of battery backup for the memory in this programable unit. It cannot be that expensive, my $15 alarm clock has such a battery backup (so does almost everything else in this house - except the Sony telephone, which also forgets everything when unplugged).

In the past, Sony has included this feature in their products. I have had many devices built by Sony that were capable of retaining memory features, at least for some limit time period. Therefore, it was especially surprising that these two products did not have this.

Now, this might seem like a minor issue (well, perhaps not if you have to reprogram the darn thing everyday), but it may be just one example of the declining quality of Sony products in recent years. I know it will

certainly cause me to hesitate when considering Sony products in the future.

By the way, if some genus out there can tell me how to modify these devices to retain the memory (even just for an hour or so), I would really love to hear from you.

I've noticed this problem with many of my Walkman portable / pocket AM/FM radios. Part of the problem seems to stem from poor quality headphone input jacks. They tend to weaken and loosen to the point where the electrical contact can be lost inside the jack itself.

The tips below are pretty straight forward, and are sure-fire relief from this problem.

Thanks
gbowne

I didn't know about Ms. Thompson being rude to those who had questions. But the "March on Washington and Hang Congress for Treason" campaign was scary. Chipster will love my "conspiracy theory" on this one. Let's not keep him waiting ..

I think it was a setup. She talked a tough game, figuring that a few dozen "militia types" would show up and be quickly arrested and then she could get a lot of mileage out of their "martyrdom".

Once she realized that literally thousands were planning to show up for a shooting war, it was just too big. Not to mention the collateral casualties. So .. "we better call it off troops. Let's back up and re-group and re-schedule .. but we'll show 'em a thing or two next time".

And then Ms. Thompson's program disappeared from shortwave radio. "Lack of funds". Lack of something, for sure.

That account approximates my "conspiracy theory" on this matter. Some details have been modified to make it look lest "right wing-ish". Email me direct for my version of the "real deal".

Past that, you're right. I think some of the information and links raise some legitimate issues. Sadly, they'll never be answered.

I will not buy any more Sony products either. In my opinion and the opinions of some of my friends, the quality has gone down hill. It used to be that Sony products were top of the line. About ten years ago every Sony product I bought failed within a year or two. Two products a home receiver and a Walkman CD player broke a second time after being repaired. Five years ago I stopped buying Sony. Now I just buy Panasonic, JVC, and Technics (which is Panasonic) and these products just keep working year after year without fail.

Regards,

Duffy

Sorry Democrats but the latest polls are not looking good for the inventor of the Internet and environment. How come you ask?
RALPH NADER. Keep in mind that Perot siphoned off enough votes to destroy the G.O.P candidate twice.
Nader is going to be on the ballot as Pres. Candidate of the Green Party. Reliable pollsters wanted to know who he will affect more, Bush or Gore and these stats are in.
Before the sampling, Bush led Gore 45%-40% with Buchanan the Disgusting at 6%. After sampling asking who will support Nader more, Dems. or Reps., Bush went up to 46%; Gore fell to 32% and Buchanan fell one percentage point as if the moron amounted to diddly squat.
Excuse me, I must leave to take an aspirin for a headache.

Mighty funny you post a partial quote, you must have been one of the clowns
perjuring yourself with the fake tapes to Hollingsworth. Like KC8JBO. If
you
are, I suggest you get a real good lawyer, you are going to need one. Now I
will post the entire passage, jerk.

This quote is located at :
http://www.arrl.org/news/enforcement_logs/2000/0706.html

HIRAM, GA: The FCC on June 28, 2000, sent a Warning Notice to General
licensee
James V.
O'Brien III, W4AMP, and a Notice of Intent to designate
O'Brien's Amateur Radio station license
for a revocation hearing and his operator license for
suspension for the remainder of its term. FCC
Special Counsel for Amateur Radio Enforcement Riley
Hollingsworth said monitoring information
before the Commission dating from January of this year
indicates that the licensee is "seriously
misinformed about the basis and purpose" of Amateur Radio
and about the FCC's enforcement of the
prohibition against obscene or indecent transmissions.
The
FCC alleges the offending transmissions

took place on 3894.5 kHz, 144.35 MHz and 223.5 MHz. Hollingsworth said if the alleged operation recurs, the FCC would designate W4AMP for a revocation hearing and O'Brien's General license for suspension. Hollingsworth noted that the FCC's rules prohibit transmitting obscene or indecent words or language and that, for indecency purposes, the FCC uses the same standard for commercial and amateur transmissions. "Obscene speech is not protected by the First Amendment and cannot be broadcast at any time," Hollingsworth said in the letter, which also defined and detailed the proscriptions against indecent and obscene transmissions. In a lengthy e-mail response to Hollingsworth that he shared with the ARRL and others, O'Brien vigorously denied making any obscene transmissions. He said he keeps a "complete and accurate log" of his radio operations and would "gladly submit it for inspection." Additionally, O'Brien said, he has not operated on 3894.5 kHz at all this year. He suggested that any profanity monitored on the two VHF frequencies cited by the FCC was directed at him by an ex-FCC employee who, O'Brien asserted, has been harassing him for more than four years. O'Brien pledged to operate "in full accordance" with FCC rules. He also requested that the FCC provide any recordings, log information, and FCC monitoring information it has regarding the present allegations.

That's why I said 20+ years, IIRC the original longest sentence was
for 40 years. That has been sent back for re sentencing which will
probably be IIRC 20-25 years at the longest , hence my statement 20+
years.

>
>The Davidians will be sprung soon. The sheeple will conclude, of course,

So was I <:-))
Although it cycles somewhat and there are quiet periods, these areas will
get really busy around the morning, afternoon, and evening rush hours and
quite often on week ends. Then, depending on the repeater you will find
lots of conversations evenings.

Don't look for much during and right after a contest on low bands <:-))

2268. AF2Y: schools & bibles

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-09 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8kajfu$u91$1@nntp9.atl.mindspring.net>
Source record: 107647

When I was in grammer school, I read at least three grades better than I was in which explains why the teacher chose me to read the bible every morning. And being that I was brilliant in high school too, the homeroom teacher selected me to do the same thing.

I think I read from the New Testament because I remember, "Our father which art in heaven, hallowed be thy name." Isn't that a Gentile prayer? I think so but I also did read the 23rd Psalm and if that's also in the N.T., the Christians of course stole it from the Jews like they stole a lot of ideas they claim for themselves to then turn around to tell the Jews they're not getting into heaven. See the writings of Falwell, Robertson, Stair, Martin Luther, Friar Beavis, Father Butthead and the 3.950 scholars.

Actually it made no difference to me from what I was reading since most of it was malarkey anyway but it made the "teach" happy while doing nothing for Ronald Dowling who'd like to cop a feel off Maureen Rourke everytime I recited, "Give us our daily bread." Dowling wasn't the brightest and thought I was saying, "Give us our daily bra."

Modern day bible thumpers demand the reinstatement of prayer as a means of getting every student in the right frame of mind to take on the day as Dr.Laura says. Being someone who knows the truth, it's all bullbleep and here's why. My reciting had nothing to do with the attitude of the students; it was the atmosphere of the times that had EVERYTHING to do with everything.

I'm talking about the grammar and H.S. years approximately between 1950-'56. Back then, get out of line in class and the teacher would have no qualms about coming over to whack hell out of you and you had NO RIGHT to retalitate. Most of the kids I knew who got slapped around would go home to tell their parents and then suffer the same slapping around by them too. AND IT WORKED.

Movies weren't violent and the lucky ones to have TV watched funny sitcoms and game shows. There was no funky rap crap and obnoxious white man's music either however on WINS, 1010, I do remember a fellow holding forth nightly playing a different type of sound. He called it rock 'n' roll and his name was Allen Freed and WE LOVED IT. Politically Harry Truman was in office soon to be followed by Dwight Eisenhower as the Russians were becoming more menacing day by day. But we kids didn't really worry about it even when we had to practice evacuation to the basement in the event of atomic bombs being dropped on New York and North Jersey.

I don't remember race problems in school although I grew up north of the Mason-Dixon line. Black and white kids got along fine and the influx of Puerto Ricans was just in the incipient stage. I stress these facts in

context with bible reading in school. It was MEANINGLESS then and the same holds true today. If affected no one then and affects no one now. I read the thing because it was the "right thing to do." It was expected and that was that. I doubt if one kid back then decided to become a priest, minister or rabbi because of my recitations. Trouble makers stayed that way and the quiet and studious did likewise.

What's happened? A big stink has occurred for years over the stopping of school bible reading and I remember getting an e-mail after Columbine stating that "God would have stopped the massacre but he wasn't allowed in schools." What a crock! Guaranteed those same kids killed would have been killed had the bible been read that morning. And of course keeping God out of school filtered into the realm of a woman's right to abort and so forth and so on. Everything became enough out of equilibrium to enable these crazed bible bangers to take advantage of the instability thereby increasing their own wealth amazingly at the expense of the gullible. Up sprang the obscene "Jews for Jesus" movement. If one believes in Jesus, then one is a Christian, not a Jew and more power to that person. But to try to Christianize Judaism is indeed obscene as it would be trying to Christianize any religion having its own identity. And the reverse also holds true.

I outlined the atmosphere of the times then which had nothing to do with bibles in school and as far as I'm concerned, every school in this nation could bring in bibles and force every student to sit each morning to hear a psalm or a passage and it'd make do difference. After such daily "baptizing", those same students would head for the johns to smoke a joint. Or some dangerous lunkheads would continue to smuggle in handguns and continue to be obnoxious to teachers and so forth and so on. Violence-hell,it's the "in-thing." Video games, movies, TV, comic books, card collectibles. Drugs. Why is it expanding? Because of our tolerance toward dealers who get slaps on wrists instead of stiff jail sentences WITHOUT parole. No it's not bibles we need in school, it's DISCIPLINE and until we allow teachers to crack down, we'll be turning out morons as future leaders. We stress the rights of the students without taking stock of how detrimental they are to those who WANT to learn. Rights? Do they have a right to intimidate future leaders of this nation? Do they have a right to continue to bring down the educational system of this nation through the stupidity of social promotion? Our school systems don't need bibles to rectify things. Billyclubs are a better choice. But what's equally important is a change in attitudes and the only way that's going to happen is by COMPULSORY not VOLUNTARY means. For those who disdain government involvement in our lives, think again. It's going to get more extreme. It must to save this nation.

The Radiosigs-Guy is depressed - and rightfully so ..
>Excuse me, I must leave to take an aspirin for a headache.

Aspirin won't touch this one, Sigs-Man. This one is HEAVY DUTY. I suggest Vicodin-ES or something similar. Vice President Gore being victimized by all these fair weather friends. Of all the nerve. He should shut down the internet and see what they think of that.

Nader should take a ride across "the bridge" with Teddy K. Or he should let President & Mrs. Rodham-Clinton treat him to a free ride on the train to Mena.

As for both Nader and Buchanan .. let them eat Corvairs.

Yeppers, it's crazy to watch. IIRC the UAW (United AutoWorkers) union
is thinking of endorsing Nader and the Green Party instead of Big Al.
They're miffed that Big Al supported NAFTA and the Chinese trade deal
etc l, so who do they switch to ? Nader, who seems to hate SUV's, cars
, trucks, busses and especially Corvairs. I can't imagine a Nader
presidency being at all healthy for UAW members. Go figure.

Rog.........

I can agree with your statement as to frequency pairs, but BUSY? That's a whole 'nother story! Even in the Detroit area, it's rare to hear more than two or three 2m repeaters active at the same time, EXCEPT during rush hour. EXCEPT during rush hour, it's unusual to hear more than repeater ID's on 440 here.

You are confusing a static ground (DC - 120 cycles) with an RF ground.
You should have a good static ground, but in your case it should also include
an RF counterpoise. Why do you think the static ground will "radiate RF like
crazy."?
You know the old saw of "Doctor it hurts when I do that..." [Doctor]: "Don't do
that!".
You have to introduce RF current in the wire to do that. DON'T do that!

Chip, we gotta think fast. How are we going to save Gore with Nader breathing down his neck? The debates? Naturally Gore will bury Bush but will his genius dissuade Greenhorns liking the Green Party from sabotaging him? Chip, if we were both bald we could put our heads together and make a complete ass out of ourselves. Help...do something!
Doc

Why's that Bonnie? They owned firearms, right? No question about that?
Why shouldn't we believe they knew how to use them?

I do not agree. I would not cry over the death of, say, a drug dealer, a
child molester, a wife beater. I would cry over the death of a child, a
family pet, a friend...

>
> What shame should I feel for that?

Hmmm...maybe I assumed you knew something about the holocaust. I'm
sorry, I took you for at least a semi-intelligent person. My fault.

Boy, lost me again. Read my paragraph again. Look at the picture you
linked to. Now again. Now read your response. NO BULLET HOLES IN THE REST
OF THE HOUSE. Not in the picture you linked. With the amount of
adrenaline running through the ATF agents veins, If shots were fired REST
ASSURED there would have been bullet holes in the face of the house IN
THAT PICTURE.

>
> I thing you better quit playing with your charged capacitors. I know

> the siding of the house was caused by the soldiers trying to hit
> unseen people inside the house.

Never fired a weapon before, have you? Never felt the adrenaline rush? I agree with you. The picture you linked to, which you attached the dialog to, had no bullet holes in the house. Forget already?

>
> Shooting people through walls from the outside in is like shooting
> fish in a barrel. Shooting people through walls from the inside out
> is like shooting blindfolded. The first you might try if you have

> one would try.

Like I said, never fired a weapon before, have you? Never been involved in a tactical assault, have you? You don't shoot through walls trying to hit someone. You shoot at walls because of adrenaline. Because you were about to fire a round and someone shot at you.

>
> > I also do not see any broken windows in this picture. I see some

> hitting the cars.

I never said they shot through the walls. YOU said they shot through the walls. I said the ATF agents did, but later in the confrontation. You also must not know anything about balistics, or physics, or, well, we'll not go there.

>
> The government also lied about the date of the deaths of the Davidian

More of a reason to off the Davidians. They were killing their own. They were killing women and children. And whom ever did the autopsies must have been pretty good. All I saw in the pictures were charred bodies. Ever seen burnt flesh? Pretty hard to tell the entrails were mushy when they are hard boiled.

>
> Why would they lie about a thing like that?

Who said they did?

I watched some of the Green Party convention on C-SPAN. Most of the delegates looked like a bunch of old hippies who had inhaled way too much throughout their lives. A huge majority of them are from Doc's ethnic/racial group, including Nader himself. It looks like all the 60's campus communists finally found a place to call home.

As far as what's gonna happen come November, who knows? It does seem likely that Nader will siphon off mostly Democrats, but Buchanan will siphon off Republicans. If Gore's speeches cause too many on our highways to fall asleep at the wheel, he may be banned as a menace to public safety, and Bush will win. If Doc's co-ethnics who run the news media are sitting on some damaging info about Bush, a timely release of that info could spell doom for Bush. Needless to say, the "Kosher" news media will NEVER purposely try to harm a Democrat, so Gore has no worries in that regard.

Flip that coin, Mr and Mrs American voter!

>
> See 97.405, it covers this in full detail:

Bob, I'm fully aware of 97.401, 97.403, and 97.405. However, these are all parts of the code addressed to licensed Amateur Radio operators, therefore do not cover the original question (the use of a ham radio by an unlicensed operator during an emergency).

What I was hoping for, and what the original author wanted, was specific code and/or regulation that would allow the use of a ham radio by an unlicensed operator. Like him, I have not be able to find a specific rule that would allow this.

Yes, I'm fairly certain the FCC would not go after a person using any radio in a true emergency. But, while this seems to be the "standard practice" of the FCC, it seems strange that there is no specific code that would apply (providing specific "legal" protection).

> mini-stereo without a feature you needed, so that the manufacturers fault? I
> hope you'll reflect carefully on this because it's a hard ware to get
> through life blaming others for you own mistakes.

Gerd, you show me anywhere in Sony's promotional material where it provides this information to consumers and I'll accept your premise as truth.

Since previous similar products by this company did include this feature, and their product information does not state the feature was not available in this product, it was fairly reasonable to assume that the feature was still available in existing products. This is even more true since similar products of this type (and price range), made by other companies, do have this feature.

Sony made a decision to remove this feature from their products (to cuts costs or whatever). Sony also made the decision to not tell consumers that this feature was removed. How then can you blame the consumer for not knowing about the decisions Sony made?

In fact, your whole messgage disturbs me. Why, when I complained about a specific action by a specific company, would you assume that I go around "blaming others for" my "own mistakes?" And why were you so quick to assume that if a mistake was made, it was made by the comsumer instead of the company?

You're the ideal consumer. A company can do anything, and say anything (or, in this case, not say anything), and if a consumer is taken in by that, its entirely the consumer's fault. Companies must love doing business with you.

>
> PLEASE HELP , I have a CB Radio tester and it tests the swr the rf and
> the %mod (what is this ?????????????) got me stumped tell me what it
> is for.

John, I'll try to address each feature without getting too technical. An SWR meter is designed to test the match between your radio and antenna. For an antenna to operate properly, it must be adjusted in length to the frequencies you intend to use the antenna with. If it is not, the radio's signal is not transmitted properly (fully).

An SWR meter is designed to test for the poorly transmitted signal (in simple terms, it measures the amount of signal that is not transmitted properly). To test your antenna, the meter is attached to your radio with a jumper, and the antenna is also connected to the meter.

The first step is to calabrate the meter to your radio's output. Turn your radio to channel 20 (27.205 MHz) (AM mode), set the meter to calabrate (CAL), transmit, and adjust the knob until the needle on the meter is over the calabration mark. Obviously, make sure that nobody is using channel 20 before you do this.

Now turn the meter to SWR and transmit again. The goal is to tune the antenna (lengthen or shorten) until the lowest reading on the meter is obtained. Tuning varies with the antenna. On some mobile antennas, there is a small set screw that is loosened while the antenna is moved up or down. On a base station antenna, there may be tuing rings or some other method involved. Check with the instructions that came with the antenna to learn how to adjust it.

Once you have checked channel 20, you might also want to check channels 1 and 40 to see if the reading is still acceptable. The reading at these two channels may be higher than channel 20 (especially with a mobile antenna), but this is normal as long as the reading is not too high (lower then 2 is good, while higher than 3 is very serious). Again you might want to do some more adjusting on the antenna length until you get a good reading on all three channels.

The RF part of the meter is a little easier. This simply tells you how much signal is being sent out by your radio. There is no real adjustment that has to be made with this reading - it simply provides you with information. But it is useful information. For example, if the reading is too low, it might be a sign that your radio needs repair (see below).

And finally, the modulation reading (MOD), simply tells you how well your radio is modulating the signal (how loud your voice is). For example, when you shout, the modulation reading should increase. So obviously, when you talk softly, the modulation is lower. The ideal is to have good modulation when you are speaking in a normal voice (no more, no less).

With the last two meter functions, no adjustment is possible as a CB operator (a CB operator is not allowed to make internal radio adjustments). Improper readings can only tell you that it is time to have your radio repaired by a licensed technician.

I hope this provides you with some useful information about your new meter. It is impossible to provide further details about the last two functions without knowing what radio you have, what meter you have, and without seeing the instruction manuals for both of these. We need to know the radio's designed RF output, the meter's display information, and a range of other information. Without this info, any further info might only confuse.

Why not get a simple "extension cable" from Radio Shack or wherever that has a 1/8" stereo plug at one end and the corresponding jack at the other end. Plug it into the radio and leave it there - do not stress the radio connectors by removing and replacing it, ad infinitum. Plug your headphones into the cable jack and let that take all the abuse from repeated operation. When the connector starts wearing out, just replace it.

Now, I know that this does nothing to alleviate the problems of using the radio jack to turn the radio speaker on and off. But, if headphone operation only is tolerable, this ploy would at least minimize the wear on the delicate radio connector.

Kurpfuscher - your the one not playing with a full deck ol man. The "Amendments" have added to, not
"changed" anything as you stated..
Just for your edification you ol socialist bastard. Get busy with that CW your mind going. Now put on your thinking cap and tell me which Amendments have been discussed as *not* having been ratified and why! READ ON - ol man.

The Amendment Process

There are essentially two ways spelled out in the Constitution for how it can be amended. One has never been used.

The first method is for a bill to pass both halves of the legislature, by a two-thirds majority in each. Once the bill has passed both houses, it goes on to the states. The amendment must be approved by three-fourths of states. The bill as passed may specify whether the bill must be passed by the state legislatures or by a state convention, though the Constitution does not define a convention (for example, the 18th specifies the legislatures, and the 21st specifies conventions). This is the route taken by all current amendments. Because of some long outstanding amendments, such as the 27th, Congress will normally put a time limit (typically seven years) for the bill to be approved as an amendment (for example, see the 21st and 22nd).

The second method prescribed is for a Constitutional Convention to be called by two-thirds of the legislatures of the States, and for that Convention to propose one or more amendments. These amendments are then sent to the states to be approved by three-fourths of the legislatures or conventions. This route has never been taken, and there is discussion in political science circles about just how such a convention would be convened, and what kind of changes it would bring about.

The Failed Amendments

The Equal Rights Amendment (ERA)
The ERA's first section states "Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex." It was intended to place into law the equality of men and women. It was sent to the states in March, 1972. The original seven year deadline was extended to ten years. It expired unratified in 1982.

The text:

Section 1. Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

Section 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

Section 3. This amendment shall take effect two years after the date of ratification.

Article 1 of the original Bill of Rights
This amendment dealt with the number of persons represented by each member of the House, and the number of members of the House. It essentially said that once the House hit 100 members, it should not go below 100, and once it reached 200, it should not go below 200. Since there are over 400 members today, this amendment would be de facto moot today. It is, however, still outstanding.

The text:

After the first enumeration required by the first article of the Constitution, there shall be one Representative for every thirty thousand, until the number shall amount to one hundred, after which the proportion shall be so regulated by Congress, that there shall be not less than one hundred Representatives, nor less than one Representative for every forty thousand persons, until the number of Representatives shall amount to two hundred; after which the proportion shall be so regulated by Congress, that there shall not be less than two hundred Representatives, nor more than one Representative for every fifty thousand persons.

The Anti-Title Amendment
This amendment, submitted to the States in the 11th Congress (around 1811), said that any citizen who accepted or received any title of nobility from a foreign power, or who accepted without the consent of Congress any gift from a foreign power, by would no longer be a citizen There is some debate about whether this amendment was actually ratified or not, mostly by those who put forth the fanciful notion that if it had been, most (if not all) legislators who are lawyers, and who use the title "Esquire" would no longer be citizens, and hence, no longer be able to serve in Congress. This amendment is still outstanding. (Information refuting claims of ratification can be found here. A refutation of this refutation can be found here.)

The text:

If any citizen of the United States shall accept, claim, receive or retain any title of nobility or honour, or shall, without the consent of Congress, accept and retain any present, pension, office or emolument of any kind whatever, from any emperor, king, prince or foreign power, such person shall cease to be a citizen of the United States, and shall be incapable of holding any office of trust or profit under them, or either of them.

The Slavery Amendment
In 1861, an amendment prohibiting the Congress from making any law interfering with the domestic institutions of any State (slavery being specifically mentioned) was proposed and sent to the states. This amendment is still outstanding.

The text:

No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the

laws of said State.

The Child Labor Amendment
In 1926, an amendment was proposed which granted Congress the power to regulate the labor of children under the age of 18. This amendment is still outstanding.

The text:

Section 1. The Congress shall have power to limit, regulate, and prohibit the labor of persons under eighteen years of age.

Section 2. The power of the several States is unimpaired by this article except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

The Washington DC Voting Rights Amendment
Granted the citizens of Washington DC the same full representation in Congress as any state, and repealed the 23rd Amendment granting the District votes in the Electoral College (since it would have been moot). Proposed in 1978, it expired unratified in 1985.

The text:

Section 1. For purposes of representation in the Congress, election of the President and Vice President, and article V of this Constitution, the District constituting the seat of government of the United States shall be treated as though it were a State.

Section 2. The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

Section 3. The twenty-third article of amendment to the Constitution of the United States is hereby repealed.

Section 4. This article shall be inoperative, unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

Some Proposed Amendments

In every session of Congress, dozens of Constitutional Amendments are proposed. Almost never do any of them become actual Amendments. In fact, almost never do any of them even get out of committee.

It is interesting to see, however, the types of things our legislators want to do the Constitution. Proposed amendments are a reflection of the mood of the nation, or of a *subset* of the population.

These lists are simples, not detailed examinations of the proposed amendments, the bills that carried them, or the process they went through. If a further

examination is desired, a search of the Thomas database can be done.

some proposed amendments are proposed over and over again in different sessions of Congress. For the sake of brevity, I have used the 102nd Congress as a "baseline" and each subsequent Congress has only new ideas for amendments listed. Also note that just because a proposed amendment is not listed in prior sessions does not mean it was not proposed in prior sessions.

106th Congress (1999-2000)

To provide a new method for proposing amendments to the Constitution, where two-thirds of all state legislatures could start the process
To allow Congress to enact campaign spending limits on federal elections
To allow Congress to enact campaign spending limits on state elections
To declare that life begins at conception and that the 5th and 14th amendments apply to unborn children
To prohibit courts from instructing any state or lower government to levy or raise taxes
105th Congress (1997-1998)

To force a national referendum for any deficit spending
To provide for the reconfirmation of federal judges every 12 years
To prohibit the early release of convicted criminals
To establish the right to a home
To define the legal effect of international treaties
To clarify that the Constitution neither prohibits nor requires school prayer
To establish judicial terms of office
104th Congress (1995-1996)

To clarify the meaning of the 2nd Amendment
To provide for the reconfirmation of federal judges every 6 years
To force a two-thirds vote for any bill that raises taxes
To repeal the 16th Amendment and specifically prohibit an income tax
To provide for removal of any officer of the U.S. convicted of a felony
To permit the States to set term limits for their Representatives and Senators
103rd Congress (1993-1994)

To allow a Presidential pardon of an individual only after said individual has been tried and convicted of a crime
To allow Congress to pass legislation to allow the Supreme Court to remove federal judges from office
To provide for the reconfirmation of federal judges every 10 years
To provide for the recall of Representatives and Senators
To remove automatic citizenship of children born in the U.S. to non-resident parents
To enable or repeal laws by popular vote
To define a process to allow amendments to the Constitution be proposed by a popular ("grass-roots") effort
To force a three-fifths vote for any bill that raises taxes
To prohibit retroactive taxation
To provide for run-off Presidential elections if no one candidate receives more than 50% of the vote

To prohibit abortion
To bar imposition on the States of unfunded federal mandates
102nd Congress (1991-1992)

To disallow the desecration of the U.S. Flag
To allow a line-item veto in appropriations bills
To expand the term of Representatives to four years
To provide for direct election of the President and Vice-President (eliminating the Electoral College)
To force a balanced budget
To prohibit involuntary bussing of students
To make English the official language of the United States
To set term limits on Representatives and Senators
To repeal the 22nd Amendment (removing Presidential term limits)
To guarantee a right to employment opportunity for all citizens
To grant protections to unborn children
To provide for "moments of silence" in public schools
To allow Congress to regulate expenditures for and contributions to political campaigns
To provide for the rights of crime victims
To provide for access to medical care for all citizens
To repeal the 2nd Amendment (right to bear arms)
To prohibit the death penalty
To protect the environment
To repeal the 26th Amendment (granting the vote to 18-year olds) and granting the right to vote to 16-year olds
To provide equal rights to men and women

Gee, even the ones with 20+ years to serve have suddenly fallen in
love with the US ? Perhaps they've learned to 'Turn the other cheek' ?

> In fact, with
>the wrongful death suit against the US, the plaintiffs, their lawyers,
>and the US are together cooperating in a huge fraud on the US Treasury.

Ewww Boy, another *huge* conspiracy comprised of double crosses and
back room deals involving large numbers of people with the Davidians,
their attorney's and the US *ALL* in cahoots defrauding the US
Treasury. I can't for a moment understand why the mainstream media
hasn't picked up on this one.

>For example, there is a big problem with several Davidians who allegedly
>died at the hands of the government on April 19, 1993. The problem?
>Their bodies have never been found. No death certificates have been
>issued.

Which isn't totally surprising (even if true), I'm no fire
investigator but I remember seeing thick glass Coke bottles all fused
together after a lumber co. fire as a kid to the point where you
could hardly tell what they originally were. Just a few bone fragments
etc left after an intense fire doesn't seem all that much out of the
question.

>
>Yet the Davidian attorneys are claiming monetary awards be given to their
>families. And the government is not even using this fact to challenge
>these very curious "wrongful death" claims. You can read about this
>collusion in "Waco Suits for Waco Suckers:"

I've already read it. I think JFK, Truman Capote, Judy Garland and
John Lennon have significant payoffs coming ? (Elvis ?) ... I used to
wonder how Koresh could find/attract those *SO* gullible that he could
convince them God had chosen him to have sex with their
wives/daughters, but after reading the below , I think P.T. Barnun was
only partially right. There's a hundred suckers born every minute.
Nice to see Ramsey Clark's name appear again in another conspiracy
theory, I haven't heard much about him in years.

Probably some good information among the links. But there are two .. personalities included there who leave me curious. Yagg-drasil and Linda "Let's March on Washington and Hang Congress for Treason" Thompson.

The credibility the page and links might have otherwise had is heavily diminished by the "sponsorship" of these two at least. Perhaps others.

Don't get me wrong, Tom and Chipster. I am convinced that there is a LOT of cover-up concerning Waco. We'll never know the whole story. Too many fingers in the pie. But when I see Thompson and Yaggdrasil in the sponsorship, I'd say we're NOT getting any closer to justice. Just more BS from both sides.

Turn your flame throwers on red-hot and blast away.

Yup, there are several large areas on the west coast where 440 abounds.
As far as two meters, I'm surprised to find any areas where it's not heavily
used where there is a good sized population.

Here in Michigan I don't think there have been any two meter repeater
frequencies available for coordination for several years and even with
reginonal coordination, interferrence abounds.

I can work five or six repeaters with the mobile on 2, but not much on 450
up here. The only 450 in town is a "private" one and accessable by
invitation only.

2309. Moved...cleaning out

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-09 00:00:00 UTC
From: wb8nhv@aol.com
Message-ID: <20000709013949.13306.00001419@ng-ct1.aol.com>
Source record: 107761

After 28 years of hamming from a three-bedroom house in a Cleveland suburb, I moved to an apartment in a small town where I cannot use most of my ham gear (antenna problems due to lease restrictions and TVI troubles)--not to mention the fact I have no room in my apartment for all the equipment! I am therefore forced to clean out my excess inventory of old and outdated gear. The list follows below.

1. Commodore 64 computer with power supply, VIC1541 floppy disk drive, many software disks (many ham-related programs as well), all cables (except RF output cable and switchbox for TV used as display), but no monitor. (Use any standard TV set on channel 3 or 4). System worked the last time I used it, but has been in storage the last eight months.

2. AEA (Advanced Electronic Applications, Lynnwood, WA--now Timewave) PK64 multi-mode data controller (packet, RTTY, ASCII, Morse). With manual and cables. Will sell with Commodore computer listed above.

3. Kenwood TS-530S HF rig, 220 watts PEP, SSB/CW. Works (to the best of my knowledge), and is currently in storage. Good backup or starter rig for new ham on a budget. With instruction and service manuals. Licensed amateurs only, please. (Note: This rig may have already been sold by the time I post this notice.)

4. AEA MicroPatch MP64 RTTY/CW plug-in controller for Commodore 64. No power supply or manual. Condition questionable (unit has not been used for several years).

All equipment herein listed is offered as-is. Local sale preferred (no shipping). Contact me via e-mail (address will be shown at end of message) for prices. No telephone calls, please.

Thanks and 73,

Jeff, WB8NHV (wb8nhv@aol.com or wb8nhv@arrl.net)

Hi! my name is Eris,I am selling this inventory of vacuum tubes
for an older lady wcich her husband passed away,there are
between 3000 to 4000 tubes which 75% of them are NIB or NOS
they are mostly receiving,audio and some transmitting tubes.It would
be too long to make a list.This fellow had is own business in
electronic
and was specializing in tubes equipment.
Asking $700.00 US firm
plus shipping.
If interested feel free to email
me...Thanks....73

For improved contact while preserving (mechanical) backward compatability,
I once used a thin cable that passes through the hole in the connector,
soldered it internally to the PCB (on a soundcard), then used a set of
european (DIN) speaker connectors to connect the speakers. This solved
an ongoing problem with the ground connection (sound suddenly
"disappearing", all that is left is a differential (R-L) signal at 180 deg
phase.

Here are 10 reasons to vote for Ralph Nader:

The Concord Principles--

An Agenda for a New Democracy

Control of our social institutions, our government, and our political system is presently in the hands of a self-serving, powerful few, known as an oligarchy, which too often has excluded citizens from the process.

Our political system has degenerated into a government of the power brokers, by the power brokers, and for the power brokers, and is far beyond the control or accountability of the citizens. It is an arrogant and distant caricature of Jeffersonian democracy.

Originally written by Ralph Nader in 1992, The Concord Principles sets forth ten arguments of how democracy has been abused, and the constructive tools that citizens can use to regain their rightful participation in their own destiny. Nader urges all Presidential candidates to adhere to these principles in their campaigns and in whatever public offices they may hold.

First: Democracy must empower and enable citizens to obtain timely and accurate information from their government, enable citizens to band together in civic associations in pursuit of a just society, and communicate their judgments through modern technology.

Second: The American people should have reasonable control over the public lands, public media airwaves, pension funds, and other societal assets which the public legally owns, rather than having these public assets controlled by a powerful few.

Third: We need modern mechanisms so that civic power for self-government and self-reliance can correct the often converging power imbalance of Big Business and Big Government that weakens the rights of citizens.

Fourth: Citizens should have measures to ensure that their voting powers are not diluted, over-run, or nullified. Such measures include easier voter registration, state-level binding initiatives and referendums, public financing of campaigns, and term limits not to exceed 12 years.

Fifth: Citizens must have full legal standing to challenge in the courts the waste, fraud, and abuse of government spending. Overly complex, mystifying jargon in our laws and procedures must be simplified

and clarified so that the general public is not shut out from readily understanding and challenging them.

Sixth: Citizens should be accorded computerized access in libraries and in their homes to the full range of government information. Inserts in billing statements from monopolized utilities and financial companies should invite consumers to join consumer action watchdog groups. The public, which owns the tv/cable/radio media airwaves, which are leased for free to large commercial businesses, should have its own Audience Network to inform, alert, and mobilize democratic citizen debate and initiatives.

Seventh: Effective legal protections are needed for ethical whistleblowers who alert Americans to abuses or hazards to health and safety in the workplace, or contaminate the environment, or defraud citizens. Such conscientious workers need rights to ensure they will not be fired or demoted for speaking out within the corporations, the government, or in other bureaucracies.

Eighth: Working people need a reasonable measure of control over how their pension monies are invested, rather than it being controlled by banks and insurance companies.

Ninth: Shareholders, who are the owners of companies, should not have their assets wasted or worker morale victimized by executives who give themselves huge salaries, bonuses, greenmail, and golden parachutes, self-perpetuating boards of directors, and a stifling of the proxy voting system to block shareholder voting reforms.

Tenth: Our country's schoolchildren need to be taught democratic principles in their historic context and present relevance, with practical civics experiences to develop their citizen skills and a desire to use them, and so they will be nurtured to serve as a major reservoir of future democracy.

The Concord Principles outlines the tools for enabling a better informed and strengthened civic participation by citizens in their roles as voters, taxpayers, consumers, workers, shareholders, and students. All political candidates should commit to these principles unless, that is, they just want your vote, but would rather not have you looking over their shoulder from a position of knowledge,
strength, and wisdom.

I'm not sure this provision applies to the original question (the use of a ham radio by an unlicensed operator). This provision seems to apply only to the use of ham radio by a licensed ham (to seek assistance for himself).

Obviously most in this thread agree that emergency use of a ham radio by an unlicensed person is acceptable, but I've yet to see any specific regulations that would allow this. Is anyone aware of the specific FCC rule that applies?

Sometimes you have to take the good and bad.

I'm not familiar with Yagg-drasil, but I remember Linda Thompson quite well from Fidonet. She would become violent and insulting whenever someone would question her. To her, nothing was open to debate. She was right, and everyone else wrong, stupid, and needed to "get their heads out of their asses and get a clue." She certainly doesn't believe in the cliche of catching more flies with honey than with vinegar.

Despite this, the above link as some very good information.

The idea I've used in the case of 5V logic is to separate the memory power from the 5V bus with a low-drop Schottky diode, and put a group of 4 small ni-cad cells, chopped from a 9V ni-cad battery, on the memory-chip side of the diode (the cathode) to ground, with a current-limiting resistor so they trickle-charge. The 5V memory will run on 4.8V from the ni-cads in the absence of power.

2326. Grounding problem

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-09 00:00:00 UTC
From: Gary Knight <gknight7@gte.net>
Message-ID: <vg0a5.2361$HD.330572@dfiatx1-snr1.gtei.net>
Source record: 107778

Please e-mail replies direct if you have ideas or suggestions.

The otherwise optimal room for my ham shack is on the second floor of our house. But that area of the house extends out over a greenbelt, making it actually a third floor. And the ground beneath the window is mostly rock, so even a horizontal ground rod at a depth of 1 foot would be a serious problem to install. All the plumbing in the house is PVC. So how do I create a good ground? If I just run a #6 copper wire down to ground, it will be some 30-35 feet long and radiate RF like crazy. Any solutions out there?

Thanks,

Gary

Excuse me but aren't you the same fool who was disseminating slanderous information on the Internet about Janet Reno's put down of religion supposedly on CBS' "60 Minutes" which prompted me to e-mail CBS to then find out she never was on the program? Aren't you the same dope who disseminated on the Internet, garbage about a fringe nut group "Jews for Guns" or something like that which you hoped would convince Jewish readers to endorse the non-stop unlicensed, unregistered proliferation of same? Aren't you the same goofball who for years put down the Liberty Net as vicious government-hating sociopaths to now use just about their same lingo? And now you expect us to believe this garbage, this defamation and slander about Al Gore, our soon to be President? Your credentials which hardly exist anyway, just plain stink. I suppose you reason that everyone who lives here are as gullible as you but not so. Dissension is part of the American way of life and thank God for it but the way you go about it is plain blasphemous, lying, arrogant and deceving and my prediction is that come November, enough Americans will be fed up with the type of trash you and your socioipathic mudslinging ingrates are hurling at our Vice President to then bring him to the Oval Office from 1/20/2001 to 1/20/2005.
AF2Y

In article <20000708142736.22878.00001564@ng-cp1.aol.com>,
kk7ho@aol.communicate (KK7HO) wrote:

1. Gore thinks "human civilization is now the dominant cause of change in the
global environment." Nevermind the sun, the oceans, volcanoes, and other natural phenomena that actually do control the environment.

2. Gore believes that "industrial civilization" is engaged in a "terrible onslaught against the natural world." Of course, without industrial civilization, we'd all be riding horses and growing our own food. Forget about
cars, computers, air conditioning, television, telephones, plastic, pharmaceuticals, et cetera.

3. Gore’s "strategic goal" is to "eliminate the internal combustion engine" by the year 2020. This particular kind of engine can be found in automobiles,
trucks, vans, and a whole host of labor saving devices.

4. Gore believes that the "cumulative impact" of automobiles "is posing a mortal threat to the security of every nation more deadly than that of any military enemy we are ever again likely to confront."

5. Caught making campaign finance calls from the White House, something that is against the law, Gore declared that there was "no controlling legal authority" regarding this improper behavior. Like any longtime legislator, he knew federal law prohibits soliciting campaign funds in a federal building.

6. Gore favored a government crackdown on the tiny trickle of electricity used by devices like television sets, whether they are on or not, because it results in a steady emission of carbon dioxide. All his talk of greenhouse gases and global warming ignores the fact that 95% percent of all carbon dioxide produced annually comes from the evaporation of water from the oceans, decaying organic matter, and the respiration of human beings and animals.

7. In October 1997, Gore told television weathermen gathered at the White House that global warming could be eliminated if the over-population of Third World nations could be controlled. This is a kind of Final Solution approach. The entire population of the world could live in Texas. Populations in industrialized, prosperous nations have steadily decreased.

8. Gore was responsible in having Timothy Wirth named Undersecretary of State. Wirth is on record saying, "Even if the theory of global warming is wrong, to have approached global warming as if it is real means energy conservation, so we are doing the right thing anyway in terms of economic policy and environmental policy." Since there is no global warming (the earth hasn't warmed in over 50 years), this is a justification for a bad policy based on bad science. Wirth now administers Ted Turner's billion-dollar gift to the United Nations.

9. Gore has pushed hard to make environmentalism the basis for our foreign policy. He called it "a turning point in US foreign policy." A turn for the worse since national security and the advancement of our economic growth is widely regarded as a sound basis for foreign policy.

10. While the economy of Japan remains stagnant, Gore advised them in 1997 to agree to "limit carbon monoxide and other greenhouse gases" by supporting the much-disputed UN Treaty on Climate Control. This treaty exempts nations that include China and India. The US Senate is on record saying it will never approve it.

11. Gore attended an April 29, 1996 campaign fundraising event at the Hsi Lai
Buddhist Temple in Hacienda Heights, California and then called it "a community
outreach" program. Three months earlier, his own staff had told him it was a fundraiser.

12. During his Democratic nomination speech, Gore told of his grief over the death of his sister caused by her having smoked cigarettes. He neglected to mention that his family's fortune had been based on raising tobacco in Tennessee and that the family farm continued to do so for years after her death
or that he continued to accept tobacco industry political action committee money through his re-election as Senator in l990.

13. Gore once told reporters that Eric Segal's novel, "Love Story", was based
on the romance between himself and his wife Tipper. When Segal said this was nonsense, he disclaimed his statement calling it "a miscommunication."

14. Gore has compared the "struggle to save the environment" to "the struggle
to vanquish Hitler" adding that this time "the war is with ourselves." Apparently, the entire human race is now the enemy.

15. Gore advocates that the United Nations consider "the idea of establishing a
Stewardship Council to deal with matters relating to the global environment."
In other words, give the UN total control over the actions and decisions of sovereign nations worldwide. Meanwhile, the UN already has a plan for "global
governance" complete with the ability to tax nations, set up its own permanent
army, and now has an international court which can indict and convict American
citizens.

16. Gore has written that the "deforestation of Haiti, perhaps as much as the
repression of the Duvalier regime" was the cause of Haitian immigration, numbering over a million, legally and illegally, to the US. Sure, they all left
because trees were chopped down.

17. Gore once claimed that, if the Republicans didn't go along with the Clinton
Administration's environmental legislation, "our drinking water would be dirtier; (it) would make more people sick, and would kill more people." This is
typical of his habit of over-statement and harsh attacks on opponents of his beliefs.

18. Gore has claimed during a 1999 interview with CNN's Wolf Blitzer that "During my service in the United States Congress, I took the initiative in creating the Internet." The preliminary discussions for the creation of the Internet took place in 1967 and, in 1969, the Defense Department commissioned the creation of the "Arpanet." Gore was 2l years old at the time and it would be eight more years before he was elected to the US House of Representatives.

19. Gore was a supporter of the creation of the so-called "Superfund" to clean up toxic sites. It was supposed to be a short-term program costing $1.6 billion. The program still exists and has cost more than $30 billion without having successfully cleaned up more than a fraction of sites.

20. Gore was an advocate of the "V-chip" to permit parents to block out programming they considered inappropriate for their children. It is widely regarded as a complete failure.

21. Despite the viewing public's disenchantment with the television show, "Ellen", starring Ellen DeGeneris, an outspoken advocate of the lesbian lifestyle, Gore lauded the star for "forcing" millions of Americans to "look at sexual orientation in a more open light." They stopped looking and the show was cancelled.

22. A comparison between the statements found in Gore's book, "Earth in the Balance", and the "Manifesto" of the Unabomber, demonstrates that it is impossible to determine which one is the author of which statement. (See "How to Tell the Difference Between Al Gore and the Unabomber" on this site.)

23. Gore is on record declaring William Jefferson Clinton as one of the greatest Presidents of modern times.

24. Gore has placed some of the most radical advocates of environmentalism in posts throughout the Clinton Administration, first of whom would be Carol M. Browner, director of the Environmental Protection Agency. The bad science, bad laws, and lies coming out of this single agency will impact the US economy for years to come. Another Gore appointee, the former director of the White House Council on Environmental Quality, Kathleen McGinty, has resigned to play a role in his presidential campaign. There are others too numerous to name.

25. Gore was put in charge of "reinventing government" in the Clinton Administration, but not a single union job was found expendable. Nearly three-fourths of the positions that were eliminated came from the Defense

Department, which lost 16% of its civilian jobs. Many other jobs that were supposedly eliminated were "privatized", using government contracts. Other reductions came from retirements. The Federal Register of new laws and regulations has increased dramatically during the term of the Clinton-Gore Administration.

26. During the 1992 campaign, Gore said that the government should fund the "information highway", but reversed himself the following year saying the private sector should pay for it.

27. The Gore family had close, personal ties to oil magnate, Armand Hammer. After his defeat as Senator, Al Gore, Sr. was given a $500,000 a year job to head up the Occidental Petroleum's coal division. Hammer, however, was a longtime Soviet agent, a personal friend of Lenin and the only American to receive the Order of Lenin from the then Soviet government. Today, Al Gore, Jr.
serves as co-chairman of the US-Russian Joint Commission on Economic and Technical Cooperation, better known as the Gore-Chernomyrdin Commission.

28. Despite being provided with evidence in 1995 by the Central Intelligence Agency of the personal corruption of Victor S. Chernomyrdin, Gore dismissed the
findings and did not want to receive further reports.

29. Gore's advocacy of the widely disputed global warming theory led him to blame it for everything from floods in North Dakota, droughts in Texas, and forest fires in Florida. One would think that floods, droughts and forest fires
had never occurred before, but history reveals they are a common annual occurrence.

30. Gore did serve briefly in Vietnam, but his assertion that he came under enemy fire is false. He served as a journalist behind the front lines and never
saw combat.

31. While a journalist in Tennessee, Gore said that his reporting "put people
in prison." An examination of the record shows this did not occur and he admitted that he lied about this.

32. Both Al Gore and his wife, Tipper, have admitted to being "recreational" marijuana smokers when he attended Harvard. The Clinton-Gore Administration is
notorious for having failed to stem the flow of drugs into the country.

33. When President Clinton gave misleading testimony about his relationship with Monica Lewinsky to the Grand Jury and the tapes were shown on television
in September 1998, Gore characterized his behavior saying, "My overall impression was that it was much ado about not much new."

34. On a visit to New Hampshire in 1998, Gore predicted that Clinton would end
his term in office "with a distinguished record and will go down in history as
a virtuoso performance, producing economic recovery and an American renaissance
with new solutions to problems once thought impossible to solve." Most people
believe Clinton has disgraced himself and the office of the Presidency. The
nation’s economic success is attributed to the end of the Cold War and the
former Soviet Union. Policies administered by Alan Greenspan, chairman of the
Federal Reserve are also credited. By contrast, the Clinton Administration has
been engaged in efforts to purchase more of the nation’s landmass to put it
off limits to any development or the use of our natural resources. The
Clinton-Gore Administration has attacked major industries that include tobacco
and one of the most successful corporate enterprises, Microsoft.

35. Gore once accused then President Bush of having "taken our tax dollars and
subsidized the moving of US factories to foreign countries", but omitted that
the program he was describing, the Caribbean Basin Initiative, was one for
which he had voted when he served in the Senate.

For these and many other reasons, Al Gore, Jr. is a proven, accomplished liar,
an environmental fanatic, and co-equal with President Clinton in the cover-up
of the Administration's scandals.

The 10 *for* Nader that you listed Will certainly sound like good solid principles. If I were a democrat Nader would be the man Looong before Algore. I think people are starting wake up, they are tired of being lied to, thought of as stupid, tired of the scandals, in other words, they are tired of being Gored.

You are behind the times. On June 5, 2000, the Supreme Court ruled the lengthy prison sentences of five Davidians were unwarranted. The Associated Press report said that the matter would be referred back to the trial court where new sentencing hearings will be conducted. The AP story appeared in the Washington Post on June 6 (pg. 5A) under the headline "Waco Sentences Voided."

The Davidians will be sprung soon. The sheeple will conclude, of course, that "the system" works.

> > In fact, with

>

Yet you probably would have us believe the German government under Hitler conspired to exterminate 6 million people? Think of the conspiracy involved then. Hitler, the German military, the German lawyers and courts, the manufacturers of poison gas, the train drivers ...

But let me predict your answer. "Only Germans conspire." It happened there, but does not happen here, right?

In the books about the Nazi gas chamber holocaust, they describe your attitude as "the good German."

> >For example, there is a big problem with several Davidians who allegedly
> >died at the hands of the government on April 19, 1993. The problem?

> together after a lumber co. fire as a kid to the point where you
> could hardly tell what they originally were. Just a few bone fragments
> etc left after an intense fire doesn't seem all that much out of the
> question.
>

Rubbish. It takes several hours at 1,700 degrees F to cremate a human body. The fire at the Mt. Carmel Center was over in 45 minutes, and the temperatures in house fires vary from minute to minute--those temperatures are not sustained at 1,700 F as are temperatures in crematorium ovens.

Moreover, many of the bodies inside the concrete room (where the "disappeared" Martin girls allegedly went on April 19, and died therein), were scarcely touched by fire.

So your explanation is NO explanation. You need to read about the fire damage to the moms and kids bodies at:

http://www.public action.com/SkyWriter/WacoMuseum/death/page/d_bc.html

{Beware wrap around URL. Public-Action must be hyphenated for URL to work.]

Even so, lawyers are officers of the court. Had the Davidian lawyers been honest, they would have told the judge about "no death certificates." Had the DoJ lawyers been honest, they would have checked the death certificates and told the judge that none were issued on some of the "victims." If the judge was honest, he would be making sure both sides were honest ...

You would have us believe that while the Davidians offered their wives and girl children up to David Koresh, they would NEVER DREAM of lying in a law suit to gain big monetary awards. The attitude you assume does not

hang together.

Truth is, Chip, this latest attempt to cover up the Waco holocaust is not working very well. Too many people have taken the time to read the evidence, including people who are reading this exchange, watching you say one silly thing after another.

Carol A. Valentine
President, Public Action, Inc.

Have you seen the Waco Holocaust Electronic Museum?
See what they did to the Gentile mothers and children--

First of all chuckie your twisting and spinning of facts is starting to rival
that of James Carvell.
You believe CBS all you like. LOL

>Aren't you the same dope who disseminated
>on the Internet, garbage about a fringe nut group "Jews for Guns" or
>something like

Chuckie ol' man your the dope - the information is out there and you refuse to
see any side other than CBS's. The "Jews for the Preservation of Firearms
Ownweship is far from what YOU describe as a "fringe nut group". I think I'll
forward your comments to them and let THEM respond to YOUR slander and
defamation.

>Aren't you the
>same goofball who for years put down the Liberty Net as vicious government-
>hating sociopaths

Typical liberal socialist democratic name calling. Chuckie your the goofball -
yes I spoke out about the net just as i am about your BS. What infuriated me
about the net is they thought they owned 3950. I have always said to them and
others that I agree with a lot, not everything, of what's being said - except
the racist bigoted BS. Understand now ol man?
You attempt to use slivers of issues, people, their ideas that YOU agree
with, and when those ideas disagree with yours you socialist democrats resort
to name calling. The FACTS are there chuckie - you refuse to "believe" them. As
for credibility, I have more with the people that count than you do with your
own family. You've recieved how many letters from Riley. Do you think amateurs
are going to believe you or side with you on issues like this - hell your a
documented jammer. Creating conflicts wherever you go. LOL

It was made by Maxon. It and the HTX-202 were built by Maxon
under contract with Tandy. There really isn't much in the way
of mods for either of these radios. They're actually notorious
for their being unmodifiable. Just good radios for what they
were made for and nothing more.

Hello. I am looking for a good source of 3-500Z(G)'s. Looking for good quality at a reasonable price. RFP has a mached pair for $250.00 with a two year warranty. Anyone used these with success?
Thanks,
Randy KB8ASO.
p.s. I'll be using these in a Heath SB220.

Okay, let's put a crucifix and a Star of David in every classroom to let the kids know God's watching them as they have sex and smoke pot. The latest stats show that 50% of the kids in high school are having sex and in another poll, 35% of all kids age 13 and LOWER are engaging in it. You think bible reading is going to help? Give out condoms instead of bibles because times have changed and thinking has to change with the times. Bibles don't stop AIDS and pregnancies-condoms do, hopefully.

Nay nay. no way. Hillary would HURT Gore's chances. Just about everyone's sick of the name Clinton but being that she had a great grandfather of the Jewish faith, so says she; if she changed her name to Hillary Finkelstein, at least New York would back her and that state has a ton of electoral votes.

What you have to do is show a direct correlation between action and
consequence.

Cause and effect.

Intelligent kids can see that they have a responsibility for their
actions, no matter HOW HARD our present society tries to negate that
concept.

I realize these will be fightin' words, but here goes: "The best example
of recent lack of responsibility came from the number 1 power in the
Free World, our President, William Clinton."

Sex has a long list of responsibility that goes along with it. So does
illicit drug use. Once kids see that they will be held ACCOUNTABLE, and
that the TRADE-OFF is LIFE-WRECKING, they might choose a different path.

So long as OTHERS bear the BRUNT of IRRESPONSIBLE PEOPLE'S ACTIONS, life
will continue on its present crash course.

Just why/how the individual relinquished their rights in this country
is beyond me. Peter Maus's teacher example is truly shocking. But the
mere IDEA that his PARENTS had no right to teach him should have been
hit head on and crammed so far down that instructor's throat that she'd
STILL be choking on it. I am not criticizing his parents; but I AM
criticizing this bullsh*t idea of big government "knowing better."

What a crock!

Big gov't and no personal accountability/responsibility is the
antithesis to the Constitution. Religion is just one facet of the whole.

At the risk of furthering this discussion on obtusification of historical facts, I thought I might post the comments of Harlowe. I, for one, have found that truth is often a matter of personal perspective, and personal politics. (Geez, I'm starting to sound like Obe-wan...)

I don't find that the original post took too much liberty in paraphrasing. As one who has done "a bit" of research (legal) into the goings on of the civil war, I have found many cases of strong proponents of one view or another, arguning (or believing) that slight differences in the portrail of facts clearly misrepresents the situation. This doesn't even begin to get into the concept that the underlying difference in philosophical positions may be what colors the reader's (or reporter's) belief in what the "facts" are or what they mean.

Harlowe's credibility (for me) is stronger because he explains his conclusions and, more importantly, cites his source. What hurts his argument is an apparent reliance on a single source. One of the things that I found to be indespensible in my research was to look at opposing viewpoints.In my work, the truth was rarely in the middle, but the opinions and positions told you where to look to get information to arbitrate the "facts" that each side offered.

I've already ranted too much! On with the show:

Re: The Price of Liberty

Comments

At the risk of being termed anti-patriotic (or worse), the following clarification was published in a newsgroup where "The Price of Liberty" was posted. Other than verify
that Prof. Harlowe does exist (ref.
http://www.etown.edu/home/mcdonald/Direct.htm) I have not verified the info.

Here is the "true" story (at least as far as one researcher, Professor Harlowe, has found):

On at least one website, Gary Hildreth, of Erie PA, is listed as the author of "The Price they Paid".

Professor Harlowe says:

Here is what I have been able to find based on a few hours in my university's limited library and the book, "The Signers of the Declaration of Independence", by Robert G.
Ferris and Richard E. Morris of the U.S. National Park Service (Arlington,

VA: Interpretive Publications, Inc., 1982).

NO SIGNER WAS KILLED OUTRIGHT BY THE BRITISH. Lets examine some of the statements more closely.

>"Five signers were captured by the British as traitors and tortured before they died."

This passage, to me at least, implies that the signer were captured under charges of treason and died under torture.

Five signers were indeed captured by the British, but not necessarily as traitors.

Richard Stockton (NJ) was the only one who was probably captured and imprisoned just for having signed the Declaration of Independence. Ferris and Morris also note
that he was not well treated in captivity and was in ill health when released. He never completely recovered. He did not die in prison, however.

George Walton (GA) commanded militia at the Battle of Savannah in December, 1778. He was wounded and captured at that time. Thus he would have been considered a
prisoner of war, not a traitor. He was released within a year, which implies that his signature on the Declaration was not as important a factor in his captivity as his active
military role in defending Savannah (prisoners of war were exchanged on a regular basis, a traitor would have been hanged). Walton lived to serve as Governor of Georgia
and U.S. Senator, dying in 1804.

Thomas Heyward, Jr., Arthur Middleton, and Edward Rutledge (SC) were all captured at the Siege of Charleston in 1780. They were held at St. Augustine (then under
British control) until September 1781 with other Continentals.

Two months after his release, Arthur Middleton returned to Philadelphia to resume his seat in the Continental Congress. Despite the destruction of his estate, he was able to
rebuild it and live there until his death in 1787.

Edward Rutledge sat in the State Legislature from 1782 to 1798. He was elected Governor of South Carolina but died before completing his term...in 1800. Ferris and
Morris report that he died a very wealthy man.

Thomas Heyward, Jr. served as a circuit court judge from 1782 to 1787. He served as a state legislator at the same time. Heyward lived well into the 19th century, dying in
1809.

I checked about 8 general histories of the American War for Independence and one or two specialized works on the southern campaigns. None of them

even mentioned that
signers had been captured at Charleston or Savannah, let alone mention that any were singled out for harsh treatment. This seems to indicate that their capture was part of the
"normal" course of war, not a special effort.

After the British took Charleston, Gen. Sir Henry Clinton had men of military age left in the city rounded up. Most were released soon after, including most of the militia
troops. He had originally allowed the officers to keep their swords, but changed his mind when they began to shout rebel slogans. Only the Contintental troops were held
for any length of time (Middlekauff, The Glorious Revolution)

I found only one reference to the treatment of prisoners from the southern campaigns, in Lynn Montross, "Rag, Tag, and Bobtail". This work states that the continental
troops from the siege of Charleston were held on prison ships. Conditions were poor and about a third of the prisoners died.

If one takes the word "torture" to mean pain and suffering, then I suppose these men were tortured. To my mind, however, torture implies an intentional infliction on pain,
usually either to extract information or to punish. I have found no evidence of the latter.

Here is an interesting passage from Larry G. Bowman, North Texas St. Univ., on Prisoners of war:

"Prisoners of war did suffer during the American Revolution. No other conclusion can be reached regarding the welfare of captives on both sides. Men were beaten,
deprived of food by corrupt officials, denied bedding and clothing, and harassed in other ways but, fortunately, such incidents of outright cruelty were not routine events.
Actually, most of the suffering of the men came from the more subtle torment usually brought on by neglect on the part of their captors. Neither the American nor the British
authorities sought to induce suffering among the men in their prisons, yet men did want for basic services. The shortcomings on both sides of the conflict in providing for
the captives was evident, but the motivations behind the failures were not evil or vindictive in their origination. Neither party entered a program of deliberately tormenting
prisoners." Encyclopedia of the American Revolution, v. II, p. 1334 (New York: Garland Publishing, 1993).

>So, when Hildreth writes, "But they signed the Declaration of > Independence, knowing full well that the penalty would be > death if they were captured."

The British undoubtedly put a price on the heads of rebel political officials (not just signers) and the signers no doubt feared that the British would make good on the threat.
The reality is, however, that none were executed for their treason.

Let's look at another assertion....

>Nine of the fifty-six fought and died from wounds or the hardship of the
> Revolutionary War.

On my list two were wounded in action, but NONE DIED OF WOUNDS. My count shows 17--not 9--men who held commissions (or did medical duty) during the war.
With the possible exception of Thomas Lynch, Jr. and Gwinnett, I would not say that any death here was attributable to the war with the British. Gwinnett's death, though,
is hardly glorious:

1. Josiah Bartlett (NH) as surgeon with Gen. John Stark's troops at Bennington. Bartlett declined national offices (citing fatigue or ill health) but remained active in state
affairs and died in 1794.

2. Button Gwinnett (GA) in a failed campaign to take St. Augustine. Killed in a duel precipitated partly by an argument over military strategy in 1777.

2a. George Clymer served with the Pennsylvania militia. Died in 1813.

3. Thomas Heyward, Jr. (SC). Wounded in 1779 near Port Royal Island, SC. Recovered and served in the siege of Charleston. Died 1809.

4. Thomas Lynch, Jr. (SC) Military career cut short by illness in 1775. He then was elected to the Continental Congress. In an attempt to restore his health, he left for the
West Indies, but was shipwrecked and killed in 1779.

5. Arthur Middleton (SC) Captured at the siege of Charleston. See above.

6. Lewis Morris (NY) Brigadier General of Westchester Co. troops during the NY invasion. After the war, he served in state government and was active in public affairs.
Died 1798.

7. Thomas Nelson, Jr. (VA) commanded the Virginia militia. Served in several campaigns in Virginia, including Yorktown. Nelson's retirement from public life was
financially motivated. He died in 1789.

8. William Paca (MD) Served in the Maryland militia. After the war, he was active in MD. affairs and served as a Federal district judge after the Constitution was ratified.
Died in 1799.

9. Caesar Rodney (DE). Brigadier General of militia. Active in campaigns against Loyalists in Delaware. Despite having advanced skin cancer, Rodney served as president
of Delaware, and speaker of the state senate until his death in 1783.

10. Benjamin Rush (PA). Appointed surgeon general of the Middle Department of the Continental Army. Resigned after 8 months in a dispute over charges he made that the
medical corps was not run properly. Extremely active in public affairs, both medical and governmental, Rush died in 1813.

11. Edward Rutledge (SC) Served at the battle of Port Royal Island (1779). Captured at the siege of Charleston. See above.

12. James Smith (PA) Brigadier General of militia. Practiced law until he retired at age 82 in 1801. He died in 1806.

13. George Walton (GA) Colonel of militia. Wounded at the Battle of Savannah, 1778. Died in 1804.

14. William Whipple (NH). Brigadier General of militia. Saw quite a bit of active service, including the Saratoga and Newport campaigns. Died, aged 55, in 1785.

15. William Williams (CT). Colonel of militia to 1776. Mostly active in state affairs, he died in 1811.

16. Oliver Wolcott (CT). Rose to Major General of militia. Wolcott served in the Saratoga campaign and the defense of Ct. against loyalist raids from NY. Lived to attend
the Constitutional Convention and to serve as Governor of Ct. Died 1797.

Some, like John Hart or Thomas Nelson, died of fatigue or exhaustion brought on by travel and active service. In that sense, the war may indeed have shortened their lives.
Then again, how can we know in an age where illness was so commonplace. By the way, would we accept "fatigue" as a cause of death today? Or would we find some
more precise explanation. In any case, I don't know if I would list this cause of death in the same sentence as a reference to battle service.

Now....Let's look at some of the personal stories told....

>Carter Braxton of Virginia, wealthy planter and trader, saw his ships > swept from the sea by the British navy. He sold his home and properties to >pay his debts, and
died in rags.

Ferris and Morris tell a similar story, but watch the twist: "The War for Independence brought financial hardships to Braxton. At its beginning, he had invested heavily in
shipping, but the British captured most of his vessels and ravaged some of his plantations and extensive landholdings. COMMERCIAL SETBACKS IN LATER YEARS
RUINED HIM." (p. 42). If Braxton sold his home, he did not sell all of

them. This entry also notes that Braxton was able to retain his family seat at Chericoke, and died in
his Richmond townhouse.

No doubt Braxton's fortunes were changed by the war, but can we say, truthfully, that his death in poverty was entirely due to the sacrifices of war???

>Thomas McKeam was so hounded by the British that he was forced to move his >family almost constantly. He served in Congress without pay, and his family >was kept
in hiding. His possessions were taken from him, and poverty was his >reward.

So far, this is correct. But Ferris and Morris state that McKean was able to rebuild his fortune" "McKean lived out his live quietly in Philadelphia. He died in 1817 at the age
of 83, survived by his second wife and four of the 11 children from his marriages. He was buried in Laurel Hill Cemetery. HIS SUBSTANTIAL ESTATE CONSISTED
OF STOCKS, BONDS, AND HUGE LAND TRACTS IN PENNSYLVANIA (p. 102).

> British soldiers looted the properties of Ellery, Clymer, Hall, Walton,
> Gwinnett, Heyward, Ruttledge and Middleton.

Also William Floyd (NY), John Hart (NC), William Hooper (NC), Philip Livingston (NY), Lewis Morris (NY).

Oddly, enough, however, the British had the opportunity to loot the homes of several very prominent signers and did not do so. Although the British evacuated Boston
before the signing, why didn't the British vandalize the homes of well-known rebels such as Sam Adams and John Hancock during their occupation of Boston?

The British occupied Philadelphia through the winter of 1777, yet the homes of Benjamin Franklin (who surely must have been public enemy #1), James Wilson, Benjamin
Rush, Robert Morris. James Wilson's home was attacked by Americans, including militiamen, during food shortages in 1779 (does it count if the suffering was caused by
your own side?).

Thomas Jefferson was almost captured at Monticello. Why didn't the British burn the estate?

>At the battle of Yorktown, Thomas Nelson, Jr. noted that the British > General Cornwallis had taken over the Nelson home for his headquarters. > The owner quietly
urged General George Washington to open fire, which was > done. The home was destroyed, and Nelson died bankrupt.

Ferris and Morris also repeat this story, although they qualify it as "family legend". Nelson was unable to rebuild his fortunes after the war

and did indeed die in poverty.

> Francis Lewis had his home and properties destroyed. The British jailed
> his wife, and soon after she died.

This is true. Although Lewis lived until 1802 (and was 89 when he died), he essentially retired from public life after his wife's death.

>John Hart was driven from his wife's bedside as she was dying. Their 13 > children fled for their lives. His fields and his grist mill were laid > waste. For more than a
year he lived in forests and caves, returning > home after the war to find his wife dead, his children vanished. A few weeks > later he died from exhaustion and a broken
heart.

The story is essentially true, but Hart survived two years after his return from exhile, not a few weeks.

Morris and Livingston suffered similar fates

Philip Livingston, a member of the extremely influential NY Livingston family, had several properties in New York and Brooklyn that were occupied by the British. He
sold other properties to support the war effort before fleeing the British occupation of NY. He died, at the age of 62, in 1778.

There were two signers of the Declaration surnamed Morris. LEWIS Morris of New York, had to flee his home, Morrisania, which was damaged in the British occupation.
Ferris and Morris note that he was able to rebuild Morrisania.

ROBERT Morris, of Pennsylvania may be even more intriguing. Generally recognized for his fundraising efforts during the war, he was later accused (though vindicated)
by Thomas Paine of profiteering. As Superintendent of Finance (1781-1784) he was responsible for keeping the young country afloat financially. In 1789, he declined to
serve as Secretary of the Treasury (Alexander Hamilton got the job), but served instead as a Senator from PA. Morris' own financial dealings were not as successful. He
speculated on western lands on credit, lived extremely well, and embarked on an ambitious home building project. All of this led to personal bankruptcy and time in debtor's
prison in 1798. His wife was granted a pension that sustained the family. Robert Morris died in 1806.

So there you have it. A grain of truth in everything, but some broad wording that makes for a good story but an inaccurate portrayal of our founders. Brooke

Not at all. Parents need to be returned to their rightful place at the head of the household, instead of the Government. Right now, the climate is such that parents who enforce discipline with their kids can get a nasty visit from Child Protective Services. We all heard the story on the radio, of the Reverend who spanked his child for an infraction, and wound up defending himself in court for the privilege. Similar cases in Illinois happen all the time. My girlfriend told her son to be quiet while she was talking, he accused her of child abuse and threateded to call DCFS. Her middle son came home with book passed out is school, telling him what he should expect in the home and what he doesn't have to take. Spankings, being sent to his room, being spoken to strongly...all fell under the "You don't have to take this" heading, and he was instructed specifically to call both the Police and DCFS if any infraction occurred in the home. Infraction by his parents, by his brothers, or by visitors to the home. The toll free number for DCRS and 911 were clearly spelled out.

This book was part of a government issue, mandated program. It clearly spelled out what the child may be compelled to do and by whom and neither parent had the legal authority to firmly discipline the child.
The MOST they could expect is a 'time out,' and no television. Regardless of the infraction. This book is making it to many of the schools in this state...watch for it in yours.

The point is that it is the Parents who must take the lead. The Church must follow the parents lead and must offer guidance as well. The schools aren't interested, and the government runs interference when they try. Why do you think home schooling is so dramatically on the rise? Government is not going to be the solution, because government has been one of the problems.

> I contend the crap we encounter in our daily lives with respect to failing

> Central Park, NYC, MUGSVILLE! And so who was freeer, the guy under communism
> or the guy under capitalistic democracy? As I said FREEDOM is just a
> relative term.

That's a good point. Freedom brings with it the freedom to be
stupid, and to make bad choices. But in the Soviet Union, PUNISHMENT
of teh Guilty was a reality. Here there is nothing to compare to it.
Granted, it was harsh and overly enthusiastic, and abused
dramatically, but the deterrent to crime was that punishment was
certain.

The NYC mugger knows that punishment was a phantom. Just like the
kids in school know that they will not be held accountable. Both
cases there is no punishment, so there is no discipline. And
voluntary discipline has been taught by example in the schools and
in life as a quality left best to the saps and geeks of the world.
No punishment, no motive for discipline, no self imposed
limits...no wonder you have limitless crime. But again, it's
Government that has dropped the ball in enforcement. Government will
not be the solution, because government has been the problem.

Good! It's a needed law! There are FAR too many idiots using
cellphones while driving. Not one of these assholes are paying
attention to the road. Women are the worst offenders, not just with
cellphone usage but everything else they do while driving. Their hair,
makeup, nails, etc. Stupid bastards.

You don't have to dial a number on a little peace of shit phone to
talk to a passenger. You don't even have to look at them.
You know as well as I do that when you talk on the phone you tend to
let your eyes roam around.

It's not a "needed LAW!" It's an unnecessary and unenforceable law. In addition to everything else their jobs entail, we're now going to ask police officers to check people and make sure they're not using a damn phone while in their cars?

You CANNOT legislate common sense. Attempts to do so merely make a mockery out of our system of laws.

Just another example of the government's insatiable desire to control and regulate every aspect of our lives, from the cradle to the grave.

Where does this nonsense stop? How far must this go before people finally rise up and say "ENOUGH!!!??"

>>>>Pete, your statement "parents need to be returned to their rightful place at the head of the household...." is 100% on target. HOWEVER, that's impossible and here's why.
It takes TWO INCOMES to get by with a colorful instead of droll existence in these here United States. Momma's gotta work which explains why Dr.Laura Schlesinger coined the phrase, " I'm my kids' mom." Too many are NOT.

Women have left their kids to create mischief instead of stability. And needless to say it's becoming more expensive to live day by day. And so the days of mothers becoming once again their kids' mom is OVER.

How about dad? Forget it because he's gotta work harder than ever for the bacon. He's home to eat and sleep and then back to the corset factory. In the meantime kids feast on computer game violence, Internet porn..you name it.

Now couple the neglect with school reinforcement of kids' rights and we have pompous, spoiled bastards who become threats everywhere they go. The family structure lies in shambles and our society is supposed to produce A PRODUCTIVE future? IMPOSSIBLE.

You mentioned in one of your posts Lutheran education and its failures. The same with Jewish because my wife, before going to over to the gifted children set, taught in a private Jewish academy and the compartment was deplorable. Did the parents care? Some but not nearly enough.

I didn't mean to indicate that Detroit was a hotbed of 440 activity.
Actually in Michigan (The lower half of the lower peninsula) two meters is
pretty busy, but 440? That's where most go to talk on simplex and figure
few will be listening <:-))

I wonder how busy the simplex frequencies get? (52, 58, etc...)
I don't even remember what they are on 450.

Right on, Jeff. Congrats for recognizing the innocence of Aunt Janet, Uncle Bill, the FBI and ATF. Koresh was nothing more than a Jim Jones maniac who made sure that when he committed suicide, he would take a lot with him. And of course we all know that the conspiracy nuts turned eveything around to enable them to preach government hatred of Christians in order to galvanize Christian sentiment against the government. Unfortunately, despite the righteousness of their faith, we do have plenty of stupid Christians who actually believe they are being persecuted and will be thrown in concentration camps since lions are more expensive to come by. This government is no more anti any religion than the man in the moon as proven by our national motto, "In God We Trust." I however believe "In God We Trust. All others pay cash." Thank you.

It seems that gripers constantly point to Clinton's sexual escapades as the principal reason why the kids are going to hell. That is sheer bullroar. Some examples go as follows.

Nixon was guilty of covering up the chief political break in of all time. He got nailed for tax evasion. Reagan had a thing called Contragate. F.D.R. had a mistress and it was common knowledge that Ike was messing with Miss Summersby as Mamie was baking cookies back home. J.F.K. was boffing everything in sight and R.F.K. had sloppy seconds. George Bush was involved in Irangate. Andrew Johnson faced impeachment. Warren Harding was no choir boy when it came to the Teapot Dome Scandal. These are off the top of my noggin and if I really researched the subject, I'd be able to list hundreds of incidents of misconduct by Presidents, their men and other prominents in the capitol limelight. Washington,D.C. has always been rife with scandal and suddenly the kids have reacted only to Clinton?

Sure, Clinton was wrong and his conduct was deplorable but it sure didn't detract from his ability to run this nation for close to 8 years which has seen the biggest economic boon in American history. Why? Because no President ever inspired more consumer confidence then he. His mistake was joining in the sexual revolution instead of defying it therefore he too was swept up in history, that same history that's dictating the disintegration of the United States. Let's all work together to DEFY IT.

Quite interesting today. I listened to Rush and he was talking about the upcoming Camp David Peace Talks and how he felt that Barak was giving away far too much of Israel to Arafat. I listened intently and was certainly surprised but then his left hook appeared. BLAMED the peace talks on Clinton who, according to Rush, wanted to do something really concrete before leaving office. In other words according to Rush, Clinton's pushing the peace process was merely self serving. I don't believe it.

I've had very good luck with the Chinese 3-500Z's that I bought for
$210 a pair plus $6.00 shipping from ESRC Corporations of Boynton
Beach, FL. Although they're not matched pairs, they seem to tune up
nice in my Drake L-7. Their phone number is 561-737-8044. Web site
is:

Unless this came directly from the RS sight, it will probably cause damage to the radio. There have been several requests, and repsonses for Mods to the 202, and 404. RS had them manufactured so the could NOT be modified. I believe I saw that the only way to modify these radios, was to replace the CPU and then adjust the rest of the circuit. I like my 202 and 404 as they are, as I do not get interference from nearby radio sights unlike my Alinco, Kenwood, and Yaesu

HT's.

What you are looking for is a counterpoise. What you need is an MFJ ground tuner. Will make you rig think RF ground is right at the back of the rig, even if you just stretch a wire across the floor, or use the long run to earth ground.

Texas has passed such a law state wide. I wish Tennessee would, also. Lately the roads are full of Volvo-station-wagon-driving-soccer-moms who can't walk and chew gum but who think they can talk on a cell phone and drive.

I agree that the existing reckless driving laws should apply, but somehow they don't seem to. If it takes a "no cell phone talking while driving" law to stop them, then so be it.

My favorite is the bumper sticker that says "Hang Up and Drive".

We've got to make Big Al more dynamic, his speeches come across too slowly and deliberately like he's giving a eulogy at a funeral ZZZZZ ... A sex scandal involving Big Al just before the election might even shoot his popularity up momentarily like it did Clinton. Our last hope is that DuhBya makes a serious gaffe like choosing Ken Starr, Dan Quayle, Pat Robertson or Newt Gingrich as a running mate.

Eerily conservative, Doc. I'm impressed.

Although I disagree with the rulings against prayer in school, and Biblical readings, for the most part I have to agree, that what has happened in our culture, in the schools, is a combination of many things. Although I do think that an absence of faith and biblical reading is one of them, it's by far not the sole or even leading element leading to the decline. More likely the mentality that took faith, prayer and biblical content out of the schools is also the mentality that has led to the permissivess, the lack of discipline, the contempt for authority, and the general negative approach to life, living and citizenship we've encountered in the past 40 years.

Putting the Bible back into the schools will have only a small impact in the direction of meaningful change. But the mentality that would permit it's return would also return the discipline and the emphasis on being good and productive citizens to the schools. Which are the necessary steps to putting things back on the right track.

The Bible in schools isn't so much a cause as an effect, a symptom. Related, but only by philosophy, not intent. On these points we agree.

However, don't look to government to make that change. It's government that has moved us away from the values to which you ascribe the power to make these changes. And it's government that will try most tenaciously to prevent their return.

The change you seek must some from teh people. From teh citizens. They must speak and they must be heard. Government, sadly to say,

will not be the force of which you speak.

That's my point, Peter. THE PEOPLE DON'T CARE and that attitude hurts the entire nation. Without a strong government and the controls it exercises, greed runs rampant and so do indifference, callousness, barbarism and everything else counterproductive to society.
Remember, a child lacking good parental guidance grows up to become an animal. Government therefore is our parents.

Chipster,
You're gonna be surprised at Gore's vitality during the debates. He's given the impression of being too laid back but in reality he's a dynamo and the public will be shocked by his brilliance and delivery. Bush will just stand there with egg on his face while wearing that expression of innocence and bewilderment.

Did you hear about "Dubya's" latest gambit? He's now trying to woo the black voters despite his slobbering mumbling bumbling address at racist Bob Jones University. Wouldn't you expect a joint like that to try and gain credibility by calling itself Robert Jones University? And quite surpisingly, "Colon" Powell is willing to serve in his cabinet as Secretary of Bowels."

I recall reading a TIME magazine about "Dubya" concerning ALCOHOLISM, DRUGS and WIFE ABUSE but dammit I can't remember specifics. JAMES CARVILLE WILL, guaranteed. So far the only real negative about Gore is his stuffed toilet which was complained about by that hunk of white trash renting from him. Claimed she was thirsty and couldn't get a drink because of it. So Al sent down 500 cases of Evian with the note, "For drinking purposes only but then again what do you know about bathing?"

Nader is a putz who's at least twenty years over the hill. For decades he was for abolishing everything besides birds, ants, trees and clouds. It'd be a shame for Dems to deprive Al of votes thanks to that weirdo but hopefully Pat will do the same and even more to "Dubya." But once again I'm discouraged by the latest poll concerning "Hey Ralphie Boy." Who knows-maybe Ed Norton will be his running mate?

There was this 747, the chief pilot was Jewish, the co-pilot was Chineese. It was obvious that they didn't like each other. After being in flight for about an hour, the chief pilot said, "I don't like the Chineese, they bombed Pearl Harbour". The Chineese co-pilot said, " Oh, no. Chineese not bomb Pear Harbour,
Japaneese bomb Pearl Harbour". The chief pilot said, "Chineese, Japaneese, Vietnameese, they're all the same". About an hour later the Chineese co-pilot said, "I no like jews". The Jewish chief pilot said, "Why?". The Co-pilot said, "Cause Jews sank the Titanic". The chief pilot looked at him in amazement and said, "Jews didn't sink the Titanic, an iceberg did". The Chineese co-pilot said, " Iceberg, Rosenberg, Goldberg, makes no difference, they all same."

Hello I have aquired a COM-RAD Ind. CR4010A antenna and was looking for info on it. It is the werdest looking thing, a big coil 6" in dia. made of 1/2" alum. tubing with a copper strap that is used to change the resonant freq. by attaching to a different spot on the coil and two replacement car antenna whips used as a cap. hat I think sticking out to the side. Anyone know anything else about it?

Thank you in advance,
Randy KB8ASO

2397. Re: URGENT - You can't talk while you drive in Marlboro, NJ

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-10 00:00:00 UTC
From: k5dh@raytheon.com
Message-ID: <k1ka5.39$S4.8426@bos-service2.ext.raytheon.com>
Source record: 107611
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.cb

Numerous states have laws under consideration that would ban the use
of mobile telephones while the vehicle is in motion, except for those
that are hands-free. The ARRL has been keeping close tabs on all of
these laws and publishing information in QST Magazine. So far, NONE
of the laws affect the use of two-way radios. Most, in fact, specify
that the use of two-way radios is NOT included in the law, ONLY the
use of telephones. Most also exempt law enforcement officials from
the phone law.

Don't get up in arms about them "having privileges" that we don't.
MANY law enforcement agencies are going to PCS phones because it's
impossible to de-scramble them. Too many criminals use scanners to
know where the police are and what they're doing, and it interferes
with law enforcement, especially drug busters and other covert ops.

For the time being, and likely the future, radio ops are safe from
these laws.

Personally, I whole-heartedly support making it illegal to use a
phone while driving. I've lost track of how many dozen times some
jackass on a telephone has nearly collided with me or someone else
on the Dallas highways and byways. And then there are those who
get into the left lane, get a phone call, and gradually slow down
as they drive, not realizing that they're clogging up traffic by
doing 10 to 20 MPH under the speed limit in the "hammer" lane.
DUH!

73,
Dean

Yes, that's true..but why is that? Because of government rulings and programs driven by the NEA that have robbed the schools of the discipline, and productivity to which you refer. Everything that has been removed from the schools has been removed by the power and force of government ruling. What drives that power of law is the program of non productivity by the NEA.

Example. I was in 2nd or third grade...having a tough time in arithmetic. My father, no brain surgeon himself, was helping me with my homework. My grades began to improve. The teacher asked what I was doing differently, and I told her, my father was helping me see how the numbers worked.

She IMMEDIATELY called for a parent/teacher conference at which they were reminded that helping me with my homework was not fashionable. Bearing in mind that this was a Lutheran School, you might be surprised to find out that the principal was called in to also tell my father that the teachers were to do the teaching and the parents were to offer support, but no more.

My parents, offended by this, took me immediately out of the Lutheran School, and put me into public school. Where I again, had began to have difficulty, and where, again, my father helped me to get through the numbers. When the question came up again as to how I was improving, I was told that I was NOT to go to my parents for help, and I was NOT to take help from them. And I was told this by Mrs English in a most forceful and humiliating way.

A week later, my parents were called in to the public school for the quarterly parent/teacher conference, and Mrs English SCREAMED at the top of her lungs at them about helping me with my lessons....how DARE they, just who the hell did they think they were...I was pretty surprised by the tone. I could hear her from the car in the parking lot.

Moreover, when asked why I was having trouble, and why SHE couldn't seem to get me to understand simple arithmetic, she said, 'I don't answer questions. I teach, they learn...if they're too stupid to get it, that's not my problem.' Direct quote...I will

NEVER forget it.

When the subject of classroom discipline came up, I was more than
a bit entertaining in those days, (I know, you're shocked) and Mrs
English was told that she had their permissin to use whatever means
necessary, she laughed and screamed again, I remember the one
phrase, "that's not my job," coming back time and again.

This insanity was supported by the principal, who reminded my
parents that these policies were in the process of becoming
standardized throughout the schools and that disciplinary punishment
would soon become illegal, as the legislature was debating the issue
at that time.

Several widely publicized court cases beat them to it.

NOW the NEA is complaining that the parents are not involved, and
not participating and pleading for parental involvement in the
education process, while still protected with hands off national
policies, and legal limitations on the level of discipline that may
be maintained in the classroom.

Ironic that it was their own actions and decisions, backed by the
power and force of government that got them where they so dislike to
be.

And government is inclined to keep them there.

Yes, the power and force of government enforcing discipline,
driving results oriented programs is probably a decent compromise
from doing it on the local level, but the government has no interest
in providing the framework in undoing what it has taken 40 years to
put in place.

> Remember, a child lacking good parental guidance grows up to become an
> animal. Government therefore is our parents.
> AF2Y
>
Again, a nicely conservative thing to say. And you're right, a
child lacking discipline does become an animal. But don't look to
government to fix that. The government may have become our parents,
but the government is just as permissive and uninvolved in the
discipline and productivity of education as the parents it kicked
out of the process all those years ago.

Government is not the answer.

Pete, if parents can't be counted on for guidance; if schools can't be; if religious charlatans can't be and if government can't be, who can? Are you saying it's a lost cause? If so, you may be right.
I contend the crap we encounter in our daily lives with respect to failing education, violence, crime, drugs and disobedience is all part of living in a democracy versus a totalitarianism. Freedom is relative. For example let's go back to the days of the Soviet Union.
Then and now WE were free to blast our government as now illustrated on this board and we revelled and still revel in it. In Russia, if anyone did that, off to the gulags baby, pronto and how we screamed at Moscow about such atrocious behavior.
BUT and it's a biggie, a Muscovite could sit on a bench in Gorki Park at midnight without a care in the world while here, if someone tried that in Central Park, NYC, MUGSVILLE! And so who was freeer, the guy under communism or the guy under capitalistic democracy? As I said FREEDOM is just a relative term.
HOPEFULLY in time positive changes will occur in the basic thinking and behavior of us because change never stops, but if it doesn't occur in my lifetime and yours, I wouldn't be surprised. And if Bush gets elected, the change in D.C. will NOT significantly change the situation either. That's because EVERY President and EVERY Congresss MUST adhere to the basic principles of the Constitution which DEMANDS that one word that both helps and hinders progress----RIGHTS. Remember the philosophical adage,"Within every government lie the seeds of its own destruction?" How true.
Yep, I'm afraid we have the RIGHT to destroy ourselves and it's happening.
Oh why worry? We always have God to pray to.
Doc,AF2Y

Sigh. What happened to personal responsibility? Dateline recently
broadcast a road test which clearly demonstrated that driving while
tired is just as bad as driving while drunk.

If you are in a collision (I have an intense disliking to the word
"accident") and it was your fault, you should pay. The issue of
whether you were drunk, tired, applying makeup, shaving, talking on
the phone, drinking coffee, or reading a map is irrelevant.

Those who screw up should make things right. If they have subsequent
offenses the license should be placed on probation. If there are many
other violations, then the license should be pulled. We shouldn't
have people driving while stupid. It's that simple.

We should make a law against such laws :-)

I had one of these antennas and it has a very narrow bandwidth.
It also had a clear, plastic radome. I sold the documentation and
antenna together.

Surely. And why not assume that everyone who owns a piano can play
like Alfred Brendel? Does it take more than quill pen and a stack of
paper to write "Tom Sawyer?"

The shooting skills required by the above feats of marksmanship are of
the quality to be expected only among the professional killers in SWAT
teams (and action-movie actors, of course).

Bet he comes home with some great fish stories, too. Great war heroes
always tell the truth to their families about the fine things they did
and the terrible odds they faced in battle.

> > Incidentally, the autopsy of Davidian Peter Gent shows exactly the

>
> Nope. Maybe he tried to leave the compound and ol Davey boy didn't
> like it much.

And you demonstrate a classic example of incurious assumption and willful invention -- in complete ignorance of the facts.

Peter Gent was cleaning the water tower when the raid was launched. He was unarmed and not threatening the soldiers. He was shot with sniper accuracy in the aorta and he died on top of the water tower. His death had nothing to do with Koresh. I brought up the subject because of the similarity of his wounds to those on the ATF soldiers -- professional sniper quality assassinations.

[...]

>
> More of a reason to off the Davidians. They were killing their own.
> They were killing women and children.

More ignorant and hate-ridden slander in complete ignorance of the facts. The government has never charged any of the Davidians with murdering other Davidians. Instead, the government tells lies about the dates of the deaths -- rather like they were covering for government crimes.

> And whom ever did the autopsies must have been pretty good. All I
> saw in the pictures were charred bodies. Ever seen burnt flesh?
> Pretty hard to tell the entrails were mushy when they are hard
> boiled.

If the autopsy reports say they were mushy, do you know better from seeing a few photographs? The autopsies for the young women and children found in the old concrete pantry are available on-line at http://www.public-action.com/SkyWriter/WacoMuseum. Many are accompanied by autopsy photographs. The pantry, being concrete, did not burn like the rest of the house.

> > Why would they lie about a thing like that?
>
> Who said they did?

It is obvious to anyone familiar with the evidence.

For example, the fact that the soldiers strafed Mt. Carmel from the air is supported by a variety of independent evidence.

1. Children who left Mt. Carmel early in the siege reported bullets coming through the roof to a psychologist assigned to interview them. The psychologist's findings were reported in Newsweek Magazine, May 17, 1993.

2. Catherine Mattson, a 75 year old Davidian who as not charged, told of the helicopter gun-ship attacks on Mt. Carmel, and the fear among the women and children as the gun-ships came overhead planting bullets through the roof.

3. Dick Deguerin (sp?), an early lawyer for the Davidians, visited Mt. Carmel early in the siege and witnessed the bullet exit holes in the ceilings.

4. The video "Waco: the rules of Engagement" includes some of the dialogue purportedly from the negotiations, wherein the government "negotiator" admitted helicopter gunfire had been leveled at the Davidians.
http://www.public-action.com/SkyWriter/WacoMuseum/burial/doc/wre_scr3.html

5. Jaydean Wendel died of a bullet entering through the top of her skull on February 28.
http://www.public-action.com/SkyWriter/WacoMuseum/death/78/78_pg06.gif

6. Linda Thompson included in her "Waco: The Big Lie" video footage of the black helicopters used that day at Mt. Carmel, and shots of bullets hitting the roof from above.

A full discussion of this subject is available at
http://www.public-action.com/SkyWriter/WacoMuseum/war/page/w_l.html

It is just one more example of the lies the US government has propagated about the attack on the Davidians.

> Oh well, this is all useless. You will not convince me and I will
> not convince you.

You are quite wrong about that -- it is not useless. I have not been writing to convince you, for you have aptly shown yourself to be a prejudiced, hate-filled fool, insensitive to government barbarity, blind to evidence, and deaf to human misery.

For the others who read this, however, you have provided a useful foil for discussion of the evidence.

> Have a nice day.

We are providing the Technician, General and Extra exams, along with several other categories.

http://www.webexams.com

It is free. We are not charging or requiring e-mail addresses.

You can take predefined or randomly generated tests, design your own tests, browse through questions and answers, have exams and questions emailed to you, and more. Exams can be timed or open-ended, and you can pause or suspend exams as interruptions occur. You can track your progress, and focus on your own weak areas, all free of charge.

Visitors to the site have told us it is very helpful in preparing for the radio exams, and a fantastic confidence builder.

We are very excited about providing this free, the way we think it should be, and would love to have feedback on how to improve the work we have done. In addition, if there are other exams you would like to see up, please let us know!

Dave

The Marlboro Township, NJ council has introduced an "emergency" ordinance to prohibit the use of cell phones while driving.

This ordinance is a knee-jerk reaction to a CNN story about an individual killed by a driver "distracted" while on a cell phone. The ordinance sets a dangerous precedent and is unnecesary. We already have a careless driving statue in New Jersey which can be used to prosecute such cases. The ordinance may violate the 14th amendment to the Constitution by creating a class of drivers who would de facto be profiled and lose their right to equal protection under the law. And it singles out only one of the many possible distractions which can cause such inattentive driving.

Councilman Barry Denkensohn, in an interview on "Spectrum" (Saturday WWCR 5070 kHz 11 PM ET), indicated that this ban WOULD LIKELY APPLY TO HAM RADIO AND CB as well since one would not have two hands on the wheel while talking!

This ordinance must be stopped! There is a hearing on the ordinance Thursday, 13 July, at 8 PM EDT. Show up if you can, but at least contact the Marlboro Township council and voice your opposition. The names and addresses you need are available at http://www.marlboro-twp.com under Organizations>Township Council

FIGHT THE PHONE BAN!

Don, you have it backasswards. The government is anti-Christian? You're crazy and brainwashed; once again we have someone who believes nonsense. Our Feds went after a sexfiend, a crazed pseudo-Jesus who had the credentials of a turd and who bore no semblance whatsoever to Christian values and ethics.

It's similar to a bum wearing a T shirt emblazoned with a crucifix and "I LOVE JESUS" across the chest. So this guy goes in and tries to rob a bank to be shot dead by the cops. As he's lying there in a mass of blood waiting to be shlepped to the morgue, his "Christianity" is in full view and some freaked out schmuck goes running down the block screaming, "The Feds hate Christians..the Feds hate Christians."

Stop hiding behind the sacraments and smell the roses. It was a fringe element of Christianity, the rightwing Christian Coalition, which created a lot of trouble for ALL Christians. These pushy obnoxious people, with infiltration, subversion and power on their minds, got in everybodys' hair and the government and general public rebelled and are still doing so. My comments to them apply to all religious leaders in this nation..KEEP THE HELL OUT OF ALL POLITICS.

You say our government is socialist? How? Does our government OWN certain means of production? If so, which? That's the problem with you fools who use the term "socialist" without really understanding what it means. You constantly mistake socialist for SOCIAL PROGRAMS which are mandatory and if you resent that term, if you're close to 62, start sending me all your social security checks rather than accepting them from"socialism". And rip up your Medicare card as well.

We're not going to have progress until we turn back to God? WHICH GOD are you talking about. Yeah, that's a good idea. Let's all stop working and stay home and pray. I'm sure some God will provide for us, right? If you read a reputable weekly news magazine, you're bound to see a section entitled RELIGION. THAT SECTION is alive and well, thank you. One article I recall stated we have a very large upsurge in interest in religion here and churches and synagogues are doing well. Lots of plates being passed and UJA donations coming in.

The NEA is socialist? My wife's a teacher, an NEA member and the furthest thing from a socialist possible. Once again you stupidly toss around terms you know nothing about but it's expedient isn't it? Fits in with the dopey crowd you revere, right? Don, you are an anti-government propagandist's best friend.

Trust me, Aaron, this guy was so oblivious, he never even saw me screaming at him (the windows were closed). About the only thing he heard was the horn (and I'm not even completely certain of that).

But, I agree. Things are different today. Today, these clowns drive like this, put our lives at risk, and then think they are the victim when someone gets mad at them.

Yaesu FT301D for auction. This HF unit (which includes 11 meters which was installed by previous owner) was returned today from Yaesu USA. I sent it off to have it tuned up and aligned so I could put it up for auction. Radio is within all Factory Specs. I just hooked it up and connected to a dipole with a tuner and made 3 contacts with 3 attempts on 20 meters. Radio is putting out a little over 200 watts on 20 meters USB and 50 on AM. Although this radio is aged a bit, I always thought it had one of the better front end receivers of all the Yaesu's. It's reception is even a bit better than on my new FT840.

> They'd weave under any other kind of distraction!

Kim, I think most cops would have a problem justifying such a stop.
As long as they were not breaking the law (weaving into other lanes,
etc.), they would have a hard time justifying the stop because of
"slight" weaving.

Of course, the cop could follow the person until the person actually
does weave into another lane, or breaks some other law, but few would be
willing to put that much time into such an effort (they have other
things to deal with).

The other option is to stop the driver for suspected DUI, but even
that gets a little difficult if the driver stays in their lane (no
excessive weaving).

Actually, the solution might be to redesign cell phones for mobile
use. Make them more like a conventional radio, with a handheld
microphone and speaker on the dash. People using a conventional radio
don't seem to tune out as much - they stay more aware of what is going
on around them.

Another option is to improve the sound quality of the cell phone. I
usually have to listen hard to understand what is being said on my cell
phone, unlike my radio where I can simply turn the volume up. It is
that concentration used when trying to understand what is being said
that distracts from the other things around the cell phone user. Make
cell phones easier to hear, and understand, and I think the distraction
would decrease somewhat.

>Drake R7

The R-7 is worth anywhere up to $850 if it's in pristine shape, with the noise blanker, 6 kHz filter, and 1.8 kHz filters installed. Add $50.00 if you have the box, service manual, and original instruction manual. Without the noise blanker, it's worth about $75 less. Lack of the 6 kHz filter subtracts about $60. Lack of the 1.8 kHz filter subtracts about $40.

These are highly desirable among shortwave broadcast listeners and they are considered one of the best receivers around for shortwave DX'ing.

>Drake TR7

The TR-7/PS-7 with a full complement of filters in pristine shape with the noise blanker is worth about $700 maximum. Add $50 for original packaging, instruction manual, and $25 for the service manual. Subtract about $50 if the TR-7 doesn't put out at least 60 watts on 10 meters. There's a couple of switching diodes on the front of the high pass filter assembly that go bad quite often and reduce the power output on 10, 15, and sometimes 20. Although they're easy and cheap to replace, the value of the TR-7 suffers if they're bad. A bare-bones TR-7/PS-7 with only the SSB and CW filters goes for about $500.

How about a few more solutions while we're at it...

Redesign cigarettes so that they go out if they fall between your legs. Billboards that reverse as you go by so you can't look at them. Car radios with no knobs and no readout to take away your attention. Speedometers and gauges that can be seen without taking your eyes off the road. Duct tape for your passengers mouths. Soundproof back seat with handcuffs installed for children. Yea, there are lots of ways to redesign things to make driving safer...

I think a federal government issued radio license would have precedent
over such state laws, so I seriously doubt we have that much to worry
about. But, its worth keeping an eye on this to see if any ham operator
is subjected to such a law in the coming months. This may be another
situation where the FCC has to step in to clear things up (such as they
did with PRB-1).

I almost got ran over once by a guy reading a newspaper while driving. He decided to change lanes, and was half into my lane before he even noticed I was there (thanks to a firm use of my horn - and a few choice words of encouragement to get back in his lane).

This was about twenty years ago, so bad driving is certainly not a new thing. I remember it so well because it scared the hell out of me (I was young and this was my first run in with such a driver).

I almost got ran over once by a guy reading a newspaper while driving. He decided to change lanes, and was half into my lane before he even noticed I was there (thanks to a firm use of my horn - and a few choice words of encouragement to get back in his lane).

This was about twenty years ago, so bad driving is certainly not a new thing. I remember it so well because it scared the hell out of me (I was young and this was my first run in with such a driver).

Stan, I certainly don't need a study to tell me what I've seen on the
highway. Not a day goes by that I don't see a person weaving all over
the road while talking on a cell phone. If accidents have gone down, as
you suggest, it is more likely because others are more aware of
cellphone users and give them a wider berth (thereby avoiding an accident).

>bullroar.

Principal? Never said that...

Gripers? Did you see your reflection? :)

Point being: if HE doesn't have to claim responsibilty, why should
anyone else? As in how can we expect mere kids to behave when the
leader of the Free World can't/won't?

Principal reason? Nahhhhh...don't give the man THAT much credit! =)

Kids are "going to hell" partially because nobody is accountable
any more. Saw a Canadian woman on the tube tonite who wants to make
spanking children illegal across the board. She wants the government
to be able to prevent cause and effect in people's homes. (and, no,
I am not suggesting that parents have carte blanche for child abuse, as
the woman was suggesting was happening).

Using Clinton as an example of lack of accountabilty is,
simply, due to the fact that he's put himself firmly in that role.

Look at it this way. Pretend he's a Republican, then realize how
many times you'd use him as a PRIME example for how not to do things.

I am trying to home-brew a linear amplifier. I sent Amidon Assoc. an E-Mail and tried calling, three times, for a recommendation for what size and core material to wind a power transformer out of. This is not something exotic. The local electronic store has a box of 12V 5A toroidal transformers surplus and Baltimore Transformer has been making this type of transformer since at least the late 1970's. They have yet to have been able to answer this question, " What do I need to order for a 350W 50/60Hz power transformer?"

Yes, I have been to their web site. They list sizes, but not core material to order. We are only talking about $20, so it is not a big order, but it is not like I will need to spend weeks or months savings up for it. For them it was basically a guaranteed order, I just needed to know what to order. If they take plastic, I would probably order right there and then.

In my opinion, find an old microwave oven and rewind the power transformer. As for rf cores, buy from their competitors, at least they will answer E-mails.

If we are to use words as they are currently understood, the
Founding Fathers of the United States were neither "liberal" nor
conservative.

Were they alive today, the Founders would be quite properly
described as radical White separatists who advocated a severely
limited government. Even Lincoln would fit that description, though
with a bit less emphasis on the "limited government" part.

With all good wishes,

I's already illegal in the UK. And so it should be, some people (not all, so dont attack me) cannot drive and talk for shit - I have seen many near accidents due to distracted drivers with cell phones. But, if you already have a law that covers it, why bother - I dont know!

'Had a lot of rag chews with those guys. If the subject of
Masada is broached, the 4X'ers get all misty eyed. And yet,
for the life of me, I can't see any difference between Masada,
Waco, Jonestown and a lot of other places. The Maccabees,
the Koreshes and the Jones's were all alike. They were all
heavily armed and deemed to be a threat to the power structure.
They all met the same kind of fate, and yet the Masadans are
looked upon as being heroic, whereas the Davidians and the
good people at Jonestown are called kooks or crazies. All
comments are cordially solicited.

Morons are a specialty of the US Federal Service assassination squads,
both military and civilian. You should read Lon Horiuchi's excuses
for shooting Vicki Weaver. He bragged he could hit a quarter (or was
it a dime?) at 200 yards, then backed off and claimed he hit Vicki's
head accidentally, aiming for someone else.

Vicki was Randy Weaver's wife, and she was holding the door open with
a nursing infant in her arms when the US Government decided America
needed her summary execution. Janet Reno went to court to defend
Horiuchi, and prevented the people of Idaho from trying him for his

crime.

> among the faithful no doubt)

Hate to bust your bubble again, pal, but acquittal effectively negates all charges. Charges are filed on the basis of appearances. Verdicts are rendered on the basis of evidence. Charges are meaningless after acquettal, regardless of the original charges.

Lon Horiuchi, on the other hand, was charged and NEVER acquitted. He got the charges dropped by political maneuvering. Which of the two is less guilty?

Interesting. From your supportive statements for Rick Ross, it is evident you also approve of kidnapping and coercive deprogramming (illeagal imprisonment and torture) of people when you do not approve of their religion.

> found in an interior bunker;

Note that word, "bunker". That word alone should inform you that your text is propaganda rather than fact. A bunker is "a fortification set mostly below the surface of the ground ... and fitted with openings through which guns may be fired." [Random House]

Here is a picture of the Mt. Carmel structure after the fire:
http://www.public-action.com/SkyWriter/WacoMuseum/death/page/d_l.html

Note that there are no openings for guns. The structure was just an old walk-in safe from an earlier building on the site. When the

Davidians built theMt. Carmel Center, they fitted this structure with a refrigerator and used it for a pantry. The door was removed from the only opening and the pantry was accessible only through the main (wooden) building.

In other words it had no use, function, or purpose as a "bunker" or fortification. And the federal soldiers knew it. But it was their habit to characterize everything about the Davidians in military terms, so America would not realize the soldiers were murdering civilians.

> the pile in the photograph is approximately 5 feet high, 20 feet

> of the 'Bible Students' knew which end of a weapon to use' ? Maybe
> they forgot how to use them from the PRIOR GUNFIGHT in 1988 ??

Take a REAL live hand grenade and put it through a house fire where everything burns to the ground. Take another live grenade and put it into an ammunition dump full of bullets "cooking off". Now tell me which grenade will still be "live" after the treatment.
http://www.public-action.com/SkyWriter/WacoMuseum/fire/fig/f_fig01.jpg

Is there ANY reason we should believe this text you dug up?

Incidentally, if the Davidians had 300 weapons on the property, that would still be only about 3 per adult, which is not many for Texas. But they were not stockpiling them -- they earned part of the community income by buying and selling at local gun shows. Wonder why your report does not mention this vital information?

> What makes you think religious people can't fire weapons accurately
> ? Maybe a trip to the Middle East or a visit to the Taliban in
> Afghanistan is in order for you ? Or are US religious people somehow
> different ?

There are few people of any religion or nationality who can place bullets with the accuracy that killed those ATF soldiers, without damaging the cars, trucks, and trailers behind which the targets were hiding.
http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21.jpg
http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21a.jpg
http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21b.jpg
http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21c.jpg
http://www.public-action.com/SkyWriter/WacoMuseum/war/fig/w_fig21d.jpg

That shows the use of very smart bullets. Or maybe the Davidians were not shooting back like you pretend they were.

> >> Why's that Bonnie? They owned firearms, right? No question

> >of paper to write "Tom Sawyer?"
>
> See above, there was probably enough lead exchanged that day that if
> all melted down it would provide ballast for an oil tanker.

Probability has nothing to do with issues of historical fact. We know the government lied about the volume of fire from the Davidians because the automobiles where the soldiers were hiding have NO bullet scars, no broken windows, and no flat tires. Even the trailer canvas is not torn. Compare with the ravaged windows of the church. The Treasury Report:

"Koresh appeared at the front door and yelled, 'What's going on?' The agents identified themselves, stated they had a warrant and yelled 'freeze' and 'get down.' But Koresh slammed the door before the agents could reach it. Gunfire from inside the Compound burst through the door. The force of the gunfire was so great that the door bowed outward. The agent closest to the door was shot in the thumb before he could dive for cover into a pit near the door. Then gunfire erupted from virtually every window in the front of the Compound." (Pg. 96)

That was a STEEL door. It takes a brave man to shoot point-blank at a steel door, but the government says the Davidians did it. That door could have proved (or disproved) this vital piece of the story, but it was LOST by the FBI and never made it to the trial. Isn't that amazing?

One other fact: Apparently, the issue of who shot first is a little muddier than the official government report would have you believe: Koresh was wounded by a bullet in the hip in that initial incident at the front door. The Davidians claim he was shot by the soldiers while the door was still open.
http://www.public-action.com/SkyWriter/WacoMuseum/death/8/8_pg01.gif

Isn't it amazing the things a government report leaves out when they are trying to tell a story?

[Taken to extreme:]
I'd love to see just how the "two hands on the wheel" rule would be enforcable with cars that have manual transmissions.... How does one shift gears if one can't take a hand off the wheel to do so? Or does this law implicitly forbid stick-shift cars from being driven?

Even if it passes, it sounds unenforcable.

Source record: 107521

Hi all

This evening I was given an FT-80c. Looks like a nice radio except all the nice functions have been blanked off - this was probably a commercial version?

My question is, is there anywhere where I can get the buttons to make all the functions available? I am not too keen on using this tiny allen key.... Also, I see something about CAT which i deduce is computer control. Where will I find specs on the protocol?

Sadly there are no Yaesu agents left in this country :((

Kind regards
Craig Gibson

So how do you misc.rural newsgroup types connect to the internet? Of course I want to hear stories like "from isolated backwoods cabin used x-29 relay system on generator, beam off relay to transceiver satellite", etc, and not stories like myself, using plain old telephone line from 0.57 hectares [1.41 acres] on Taiwan hilltop.
Same question to the GPS crowd reading my tastefully crossposted message,
there you are off in highly remote XXXistan, whatever, with your faithful GPS unit,
high tech as you are, how do you beam in for your daily dose of netnews? Same question for amateur radioers, ok, big thrills from static filled conversations, but what's your fancy internet mobile setup? etc. etc.

It would be a surprise to learn he is Jewish, but I doubt whether any
respectable Jewish organizations would endorse his criminal
activities. He would be an embarassment to anyone short of the
Communist Party.

That's because you are ignorant of the lecture circuit.

Shall we look up a list of sites where L. Ron Hubbard has lectured?
How about Yuri, the spoon-bender? Are you interested in Verner Erhart
founder of EST? How about the Maharishi Mahesh Yogi?

Universities are free-speech institutions where anyone can lecture,
and just about anyone can get an invitation to lecture if two or more
students request it. And even a request may mean only that people
want something to laugh at.

The above list is little more than Ross's own confession that he is
desparate for credentials.

Basic fact: You do not have to take the stand to state your innocence
at trial; The courts have ruled many times that the fact that you do
not testify in your own defense cannot be considered evidence against
you. Filing a plea of Not Guilty is all that is required.

Are you so ignorant of Anglo-Saxon Constitutional principles of
justice?

Most all ALINCO radios are EASILY modified..... Does anyone know if
any or the 2 meter/450 Mhz. Alincos...can be modified to go into the
462 Mhz. FRS and/or GMRS frequencies? (The lower 7 FRS freqs. are in
the 462 range.. Reply by removing the 'NOSPAM' or post here!!
Thanks......

Maybe you've been watching too many westerns on TV ? Or did I forget
about some *law* that states those returning fire must be directly in
front of their opponent ? No shooting from angles is allowed ? Is
that it ?

>
>> My uncle got shot in the head and died in WWII when he raised his

They could have called it the 'Sanctuary' , my interest was the number
of weapons and the amount of ammunition. A pile of ammo 5ft high by 12
ft wide by 20 ft long sounds a bit much for hunting / personal
protection.

>

>
>Is there ANY reason we should believe this text you dug up?

IIRC it was entered as evidence in the trial and the Davidians (who
never took the stand for some reason) and their attorney's had their

>
>That shows the use of very smart bullets. Or maybe the Davidians were
>not shooting back like you pretend they were.

Well *something* caused the *retreat* of what 80-100 ATF agents that day. Was it death-angels called down by Koresh ? Alien spacecraft ? Super secret double-cross operatives from Iran-Contra ? Or gunfire from the Davidians ? Your choice pal.

>
>> >> Why's that Bonnie? They owned firearms, right? No question

Something caused about 80+ ATF agents to *retreat* - Angels from heaven ? Gunfire from alien spacecraft ? The secret operatives again ? Or the gunfire from the Davidans ? Your choice or enter some other wild-eyed conspiracy theory here:

> The
>Treasury Report:
>
>"Koresh appeared at the front door and yelled, 'What's going on?' The

>steel door,

And yet you accuse the ATF of doing it but say the Davidians couldn't have.

> but the government says the Davidians did it.

A regular residential steel door which is thin steel over a wood/foam core ? LOL I'd do it in a second. I've had many a quarter that's been shot through with a lowly .22 much less the weapons the ATF/Davidians had that day.

>That door
>could have proved (or disproved) this vital piece of the story, but it
>was LOST by the FBI and never made it to the trial. Isn't that
>amazing?

Almost as amazing as the innocent Davidians (all of the men anyway
IIRC) *never* taking the stand in their own defense. That's their
right, but I'd have been YELLING my side if I were on trial pal.

>
>One other fact: Apparently, the issue of who shot first is a little

That's just part of his bio. One big plus for him is no mention of
NWO, the Illuminati , double-crossing Davidians now in bed with the
FBI/ATF to defraud the US Treasury etc.

And yours are ? Do you have a URL for his 'felony' ? If so offhand
I'd suspect it has to do with 'kidnapping' someone out of a nutty
religious cult of some sort.

I'd use him in a nanosecond to 'kidnap' my own mother (even against
her will) if she got involved with some group like the Davidians or
say the Snake Handlers (Praise the Lord and pass the Cotton-Mouth)
YMMV.

Why do you think that is? Could it be that we have allowed the standard to be lowered? Could it be that we don't expect any better from our kids? Lets see, your attitude is, they are going to do it any way so just hand them a condom. I don't believe that. The Bible is a standard and a standard that this nation's people mostly used to adhere to until it became the target of the government to have it removed from our nation. Why has the government been on this crusade against any form of Christianity?

I think it is because it reminds our teachers, government officials and many of the people in our nation that there is a Holy God and there is a standard that we have left behind. We are not going to see improvement in our nation until we realize this and turn back to God. What I don't understand about the whole thing is that all of this has been forced upon us against our will by our government. What happened to our Representative Republic (which is the form of government we have, not Democracy) to cause the government to turn socialist?

I say give me a voucher to pay for my childs school and let me send them to where I want to send them to school. Let the schools compete for my child and do not force me to send them to wherever the government dictates. Let me raise MY (not the government's child) CHILD with my values and values that have been passed down to me from my parents. Dissolve the NEA, we don't need them. Less government interference in our lives.

Do you realize that before the NEA and the socialist agenda from it, the United States was the world leader in education?

It would be even better if you told what RCKARA stood for, which country you were it, etc. Even under the Club Informatin there is no clue as to what planet the 'rckara' is on.

other than that, pretty good site -- nice html. I like the buttons on the side -- that is a very good way to navigate!

now, where are you?

cheers

Probably when they raised up their head or stuck their head out to
fire their weapons at the Davidians. Sounds *pretty* logical to me.
My uncle got shot in the head and died in WWII when he raised his head
to fire from a foxhole, one of my church friends (an inexperienced
2nd Lieutenant) in Viet Nam got shot through the neck when he raised
up for a look see.

> one behind the ear, and the
>> > fourth in the aorta from the front.

<Yawn> The shot *coincidentally* got the aorta. In a gunfight one
usually aims for the middle of the upper chest or the head, (ever seen
human silhouettes in target practice ??) The upper middle chest is a
prime area, in this case it *happened* to hit the aorta. You'd have
to find a MORON 'assassin' to aim specifically for the aorta which is
probably 3/8" or so in diameter and not aim for something much larger
and just as deadly to hit called the *HEART*

>That shooting is just too
>> > good to credit to Bible students shooting at live targets and
>> > hiding from return fire.

Well the 'Innocent', "Peaceful' 'Bible Students' had at least a
little practice from a *PRIOR* GUNFIGHT in 1988.

Koresh and 7 other Davidians were even charged with ATTEMPTED MURDER
but eventually were acquitted. (Just a slight misunderstanding among
the faithful no doubt)

---
http://www.shadeslanding.com/firearms/waco.horn.html

(Under Roden Gunfight)

"By late 1987 things were faring badly for George Roden. He had almost
no money, few followers, mounting debts and an angry Texas Supreme

Court Justice on his trail [70] . So Roden decided to conclusively settle the leadership dispute with Koresh. He went to a graveyard and dug up the body of a man who had been dead 25 years, put the casket in the Mt. Carmel chapel, and said that whoever could raise this man from the dead was the one to lead the Davidians. "

"Koresh reported the action to the Sheriff's Department. He was told that his word alone wasn't enough -- proof was needed. So on November 3, 1987, Koresh and several men went out to Mt. Carmel to take pictures of the body in the casket. The Sheriff had warned them to be careful, because Roden was dangerous, so they armed themselves. The plan was to open the casket, take the pictures, and leave, but Roden caught them, and a gunfight ensued in which Roden was wounded [64] ."

--

That's how we've ALWAYS settled disputes in my church .. GUNFIGHTS.

---

http://www.treas.gov/press/releases/pr950713.html

"The photographs make clear that the Davidians possessed an extensive arsenal. The first photograph displays some of the hundreds of weapons recovered from the compound. The second photograph "government exhibit 594" presents a portion of the ammunition rounds that were destroyed by heat ("cooked off") and found in an interior bunker; the pile in the photograph is approximately 5 feet high, 20 feet long, and 12 to 14 feet wide. The cooked-off ammunition is being shoveled into a Bob Cat front-loader in "government exhibit 593." "Government exhibit 599" shows one of the live hand grenades found on the premises. "

Gee, 100's of weapons, a pile of ammo 5' x 12' x 20' long and none of the 'Bible Students' knew which end of a weapon to use' ? Maybe they forgot how to use them from the PRIOR GUNFIGHT in 1988 ??

What makes you think religious people can't fire weapons accurately ? Maybe a trip to the Middle East or a visit to the Taliban in Afghanistan is in order for you ? Or are US religious people somehow different ?

>>
>> Why's that Bonnie? They owned firearms, right? No question about
>> that? Why shouldn't we believe they knew how to use them?
>
>Surely. And why not assume that everyone who owns a piano can play
>like Alfred Brendel? Does it take more than quill pen and a stack of

Yes, just a coincidence. Or maybe again you're showing investigative
skills the Davidian's lawyers didn't have ??

What attack? I merely spoke the truth. And you know damn well it's the truth, Doc, so don't act so shocked. Besides, you have no room to complain, what with your many many bigoted remarks against Christians and such. If you can't take it, then maybe you need to clean up YOUR act and apologize to all the folks you've insulted.

And what makes you think I'm a Republican? BOTH major political parties are corrupt and filled with treasonous, lying, opportunists. As usual, voting time boils down to holding one's nose and voting for the lesser of two evils. It's a damn shame that America fallen so low.

I'd agree if there was any evidence to back it up. However, the results of several studies show only a statistical correlation NOT a causal relationship between cell phone use and crashes. In fact, the number of crashes versus cell phones in use can actually be shown to have DECLINED. The general conclusion of almost all the studies is that the data are inadequate and inconclusive.

I wondered this too. Maybe the passenger can see that when you have difficult
driving situations and shuts up, or he can warn you of a problem you may miss.

I noticed that I "space out" from my surroundings when talking on the phone
at home or work. I don't have a cell phone myself.

This is exactly one of the conclusions reached by the National Highway Traffic Safety Administration. One of the things that does affect inattentiveness either on the phone or "in person" was the emotional content of the conversation - according to the best (inconclusive) data, emotional state might be the bigger factor. The problem is that even the best epidemiological study can't separate the factors sufficiently to conclusive say using a "wireless device" is the cause.

The reason they have to have a law is because there are so many who haven't a shred of common sense. Like trying to argue with their spouse, the boss, the kids, passing the latest gossip, discussing sports, the news, ect., ect., ect., on a cell phone while weaving in and out of traffic, changing lanes and endangering their life as well as others while driving 70 mph in heavy traffic on the freeway and not paying any attention to driving. I see these idiots all the time, they haven't a clue that anyone else is on the road. I wish they would ban cell phone use by the driver of a moving vehicle.

So now, you are saying that a religious person should not be involved in politics? The lack of Christian involvement has been part of the problem up to now. Christians have not been involved enough and have not made their voice known. Its funny to me that someone is usually labeled as obnoxious when they have a different viewpoint.

I don't agree with everyway that the Christian Coalition has conducted itself, but compared to other organizations pushing their own agendas, the Christian Coalition has conducted itself rather well.

The attitude that Christians should not be involved in politics is what has caused the Christian Coalition to come to be in the first place - to counter

this attitude and to give Christians a voice in politics.

>

The federal government is gaining more and more power over the state governments and the social programs are causing people to be much too dependant on the government. The representatives in Congress and the President seem to have agendas of their own that do not reflect the will of the people. The Supreme Court is often making rulings on items that should be decided by a vote of Congress. They are suppose to only rule on the bases of the existing law, not make the law. This doesn't sound like a representative republic to me.

However, the move towards trying to get people back out into the workforce and off of welfare lately has been good and I am glad to see that.

I have seen some small changes toward smaller federal government (which is how this nation should operate and was designed to operate by the founding fathers). I have been glad to see some of these changes.

>

You sure have a weird view of people who worship God. You know, we do work for a living, we help our community and the people in it. I don't think it would hurt a bit for all of us to take the time to pray and to read God's book. It might improve some peoples lives. Maybe you think that prayer is wasted time. I think it is time well spent.

I am glad that worship of God is doing well in your area. It is encouraging to hear that. Maybe this means that people are beginning to turn back to God. I am referring to the God of the Christian Bible. He is the God that this country is founded on for its morality and laws.

You know what is really sad, if this were about 100 years ago and we had this kind of forum for ideas, what I said in the previous post wouldn't have sounded odd at all.

> The NEA is socialist? My wife's a teacher, an NEA member and the furthest

> friend.
>

Glad to hear that your wife is the furthest thing from a socialist. You know I didn't say that every teacher that is a member is putting forth the same agenda as the NEA. Let me ask you a couple of questions. Is she required to be a member of the NEA? Could she teach in a public school without being a member of the NEA?

The attitude that I get from the NEA is that my kids are not really mine and that I am just one of the ignorant masses that don't know any better about how to raise my children. In a socialist country, parents would have no choice about what school to send their child to or what was taught the child. The curriculum would be filled with a particular philosophy (secular humanism?). Sounds similar to what we have doesn't it? Only the ones who can afford private schools can get out of the system and the NEA has tried to take control of private schools in the past as well. Why does the NEA oppose school choice by parents?

I still have to wonder why have the education of our kids seem to have suffered so greatly since the NEA came upon the seen? What happened to our world class education system? The envy of the world. Is it just coincidence or is it the NEA?

You may not even be concerned with religious rights, but I see and read over and over where the religious rights of individuals are being questioned by our own government especially when it comes to school children's religious rights. All it takes is one person to complain and the courts are all over it even if the community standard and the desire of the community as a whole is contrary to the courts. Of course, I understand that the courts have to rule on the existing laws of the land, but frequently, they don't even do this. It seems that the courts will take any opportunity to rule against religious rights of the individual. This is how I see the government opposing Christianity. I have read of children being berated by teachers because they brought a Bible to school. Small children being told that they cannot talk about God because it violates the separation of church and state. These things happen because of rulings by our government. Maybe they are sometimes just overzealous teachers, or teachers that don't understand about religious freedom but often the principle of the school defends the teachers action and the case has to go to court to be settled. Parents are having to stand up for their childrens religious rights more and more in this way.

Just about a year ago a judge in an adjacent county to mine decided that students could not pray at school in any way whatsoever any more and not even have the look of praying (bowed head). There was nothing more than just the judge deciding that it was unconstitutional because of the separation of church and state. The people of the county rebelled and a higher court had to overturn his decision. Why did this happen in the first place?

I pray in restaurants with my family out loud to give thanks for my food to God. How long will it take until someone somewhere is offended by my action of praying with my family in public?

The courts have turned freedom of religion into freedom from religion with the separation of church and state clause.

Your focus seems to be that government is the answer to our problems. I don't. I believe the problem is deeper than just the government although it has compounded the problems in our nation with people in power or influence with their own social agendas, which are in my opinion anti American. The problem is with people themselves. The Bible says that all have sinned and fallen short of the glory of God. Without God's influence in our life we will act sinfully and selfishly. This is the reason that I stated that without a turning back to the God of the Bible, we are going to continue down the same path that we are on now. The path that we are on now will eventually destroy us as the morality of the nation continues to decline. Look at how far down we have come already. Kids killing other kids, road rage, parents killing children, sexual immorality and all we seem to be concerned about is how well the economy is doing! The only answer that government can give us is more gun control - what a joke. We need God back in this nation in an awfully bad way.

I hate to see all of this happening, because I love America.

Maybe my point of view is a little more clear now.

Don Cotton

You misunderstand cores. The cores amadon sells are for RF not 60 Hz.
A torroid for 60 Hz is usually a tape wound core of silicon steel.
Amadon does not sell that type.
So your question is like asking a Ford dealer about Mazda parts.
I have had excellent results buying from Amadon for many years now.

I have a di-lithium crystal power generation system in my covered wagon and a laser communications system which beams a light signal to a microwave antenna mounted on the back of a cow grazing on the nearby hilltop :-)

Actually I have CenturyTel as a phone company which provides phone service to rural areas and small towns and CenturyTel.net as an ISP. CenturyTel is even installing DSL. I am told that equipment is there, but not hooked up yet. We also have AT&T cable modems available here as well, but I'm waiting for DSL. (Mid-Willamette Valley Oregon) Also two way satellite is on the way. See following link...

Subject: ** FLEA at MIT ** Sunday July 16th Cambridge MA
Summary: Buy Sell SWAP Ham Radio Electronics Computers 9AM - 2PM

This coming SUNDAY !!

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday July 16th 2000
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $4 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $10.00-each at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23-W1BOS/R and W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

I don't know which number you have called, but be sure you are using the correct technical support line, not the sales or general number. Most companies (with the notable exception of Bill Frost at Drake) will not answer technical questions by email, unless they are very, very simple (ex: what is the permeability of core-X?). Amidon probably received several hundred emails, at least, of this type daily, so it is impractical to answer them, and as we all know, you are not likely to get the best answer via email.

I shared your concern, until I contacted ARRL's legal affairs office. Basically, your ham license pre-empts any state or local ordinance against radio use. I carry mine in my wallet. The land-mobile industry has been our ally in this issue, at least. Imagine if cabbies/repairmen/private security/tow-truck operators, and every other commercial radio user were not allowed to operate a two-way radio in a moving vehicle! You get the picture. The Federal license is an affirmative, absolute defense. The principle has already been well tested in localities where there are laws against mobile use of scanners.

Those factors are *extremely* relevant. If you can show that you were paying attention to the road, both hands on the wheel, and doing all that is reasonable to drive in a safe, courteous manner, then your liability is reduced, or none. Talking on the phone, eating, applying make-up, and certainly drunk, when you well know that those activities can potentially be hazardous, increase your liability. If road conditions reduce your visibility, ability to stop, chang elanes, or whatever, and you go ahead anyway and do these things, you are clearly being less responsible, and should be held accountable as such.

As a follow up, a judge has ruled that the town in Pa that originally
wrote the law that Marlboro fashioned theirs after is (1) not enforceable
and (2) already covered by PA DMV laws concerning reckless driving. Both
NY and NJ have similar laws as well so it is conceivable that the Marlton
will also be voted down. According to broadcast radio, there isn't
enough support amongst Marlboro's feuding lawmakers anyway.

Again, much ado over nothing.

I voted for Jimmy in '76 because I was afraid klutz Ford would suffer even bigger concussions banging his head against plane doors and falling down tarmac ramps. Carter nearly bankrupted the nation. A nice Baptist but a buffoon at management. Gave away Nicaragua, Angola and Ethiopia to the commies. Allowed El Salvador to be commie undermined to the point of near collapse. Allowed out guys to be taken by the Ayatollah. One gigantic incompetent peanut- farming schmuck. A lousy liberal who loved socialism and whose mismanagement led to interest rates as high as 24%. Thank God a great Republican, Ronnie Reagan, stepped in to rescue us; in fact, he was so handsome, he should have been in movies. It is true however that he was responsible for the peace accord between Anwar Shutup and Bar Levi Jeans which still holds fast twenty years later proving that both Israelis and Arabs can be at peace providing there's MUTUAL willingness. I have my doubts about what's going on in Camp David now therefore a trip up there by Peanuts would help.

Chipmunk BASIC used to come with several ham-related samples, but I've noticed that newer versions have omitted most of these (still includes one or two). You might be able to find an older version somewhere on the internet that still has them.

There once was an excellent site like this in Germany. It had about three dozen ham-related programs, nearly all written in Chipmunk BASIC (complete with the text for you to modify). Sadly, the web site designer announced one day that the site was moving, with a notice that the new address would be announced soon. The new address was never announced, and eventually the site disappeared completely.

I wish I could offer you more, but I'm not aware of any site available today that has what you're looking for.

About 8 years ago we finished bringing all 10 of our
remotely controlled radio telescope antennas on-line. They
are spread out from Hawaii to the St. Croix, USVI. They are
all controlled through the Internet. The simplest, most
reliable, most fulliest digital lines were to the antenna in
North Liberty, Iowa. So there! :-)

> and wake up to reality !

Jeff, you use the words "all those weapons" like there is something wrong with the number of weapons they owned. What does it matter how many guns they had? I was not aware that it is illegal to own more than one gun. Or more than one box of bullets, for that matter.

My problem with the entire Waco incident was the initial police raid over what amounted to a minor misdemeanor gun violation. Armed troops, complete with helmets, body armor, and assault weapons, breaking into a second story window, seemed a little excessive, to put it mildly.

Those officers used the most aggressive, the most confrontational, method they could use. And the result was exactly that - aggressive and confrontational.

For me (as a concerned citizen), the entire rest of the Waco incident is of no real importance - a distraction. The initial police who raided that compound used extreme, excessive, force (especially in relationship to the charges). Every single thing that happened after that was as a result of that initial incident.

Therefore, as Americans, we should be focusing on that initial raid and asking ourselves if we are going to accept excessive police behavior when it comes to minor law violations. This American cannot accept it.

Again, it is not a crime to keep "supreme reign over...women and girls," as long as they were willing participants. As for the claim that he had sex with a minor, that has never been proven. Even the government has backed off this claim, simply because no real evidence exists to support it.

But, even if you accept this (sex with children) as true, the charges used by the police to justify that initial raid did not include anything about sex with minor children (that was only brought up later by the police in an effort to take the attention off of the excessive force used during the initial raid).

> Who said the crimes they commited were
> minor? Better read up on your Waco!

The initial raid on that compound was to serve a warrant concerning a minor, misdemeanor, weapons violation. Everything else that happened after that was, in my opinion, caused by the excessive force used during that initial raid. Had other, more intellegent, less aggressive, tactics been used in the beginning, the entire incident after that could have been avoided.

Subject: How I connect....

While we are probably not rural enough for your desires, here's what
we are
currently doing. We live on 10 acres close to the City limits (San
Luis
Obispo, CA, USA). Originally used dialup, but the cables got wet in
the
winter and my connect speed dropped as my desire for speed went up. We
moved to ISDN. 45,000 cable feet from the CO meant that Pac Bell
needed to
install a repeater, but, still, they had to make ISDN work better than
dialup. With ISDN. I added an ISDN router so our entire home network
(up to
7 computers) had net access.

ISDN is metered during work days here, and I really wanted a 24/7
connection with a static IP address. We are on a hilltop. Our ISP is
almost
line of sight from here, about 2.5 miles. It took some doing and
convincing
at the ISP, and an intermediate repeater bridge on another hilltop,
but now
we connect to the ISP full time with a wireless full time 11mb
connection.
We added a Linux firewall box to replace the ISDN router. Even though
we
share the T1 at the ISP end, the wireless link is way cool. My ISP
runs NT
servers, and we run Win9x here except for the firewall, so our website
hosted at the ISP is a virtual folder on the desktop and mapped to a
letter
drive. We can work directly on the web pages without FTP, and the
webcam,

weatherstation, and lightning detector programs all think they are
writing
to a local disk.

Chris

Wednesday July 12 8:24 PM ET
Sun Eruption Causes Radio Blackouts

WASHINGTON (AP) - A strong solar flare early Wednesday morning caused some radio blackouts on parts of the Earth facing the sun and more are possible as the active solar region rotates toward the center of the sun, NASA announced.

The space agency said on its science web site that the Solar and Heliographic Observatory (SOHO) satellite recorded a massive solar flare, called an X-class flare, about 6:37 a.m. EDT Wednesday.

Streams of electromagnetic energy erupting from the flare disrupted some radio communications, the announcement said.

SOHO, a joint project of NASA and the European Space Agency, also detected two coronal mass ejections, huge clouds of electrified gas, erupting from the sun on Monday and Tuesday.

The National Oceanographic and Atmospheric Administration, which predicts the effects of solar eruptions, said there was a 40 percent chance that the mass ejection would trigger a disruption of the Earth's magnetic field by Friday. This could create aurora lights reaching into the mid-lattitudes, which would include the southern U.S. Aurora lights are common in the far northern and southern latitudes.

The coronal mass ejection sent a bubble of plasma, or electrified gas, toward the Earth at more than 2 million miles an hour. The first shock wave of the fast-moving mass was expected to smash into the Earth's magnetosphere, the magnetic field that surrounds the planet, on Thursday. Material from a second, more powerful ejection is expected on Friday.

The aurora, or northern and southern lights, are a shimmering glow in the sky caused when energetic particles from the sun strike atoms of gas in the upper atmosphere of the Earth. The Earth's magnetic field protects the planet from these solar particles, but the field dips low over the poles. For this reason, the aurora is most commonly seen at high northern and southern latitudes. Unusually powerful solar bursts can produce the blue and green lights in the night sky closer to the equator.

Experts say that the aurora is best viewed around midnight, local time.

The corona mass ejection poses no health risk to people on the ground, but such solar bursts have been known to damage spacecraft and to disrupt electrical power grids. Most utility systems and satellites now are designed to resist such effects, however.

The sun is currently at the peak of its 11-year cycle of intense activity.

An ISP. There ARE still a lot of rural areas where you can't dial in to
an ISP without making a long distance phone call.

>Sounds to me like this guy was affected by the film, "Frequency."

Not at all, provided that his quoted event exists at the intensity that is needed to provoke the display.

The occurance of the visible Aurora as far south as the Central Texas area of the USA, for example, is very unusual. I'm 60 now. In my lifetime I've only seen it here a handfull of times here at W5WQN.

At least three times I can remember, the news media has also made it a point to post the alert to the general public, which as made it possible for many more folks to see the rare southward displays.

They are striking, even though not near as noteable as the normal Northern stuff, when they do make it this far down.

Taking a look tonight and tomorrow is a small price to pay for a chance to see it. However if you are out in the country, it's much more likely you'll be rewarded if it is there, as the lights of a city can mask the far less visible display intensity down here..

--> Sleep well; OS2's still awake! ;)

Dwight, please read "Designed to Fail" and offer your comments.

If the degree of force used against the Davidians was justified, why
was the raid conducted in broad daylight? Why did they announce the
impending raid with a showy convoy more than a mile long, and book a
hundred rooms into a Waco hotel? Why did the soldiers ride up in
canvas-topped trailers, and draw them broadside across the front of
the Mt. Carmel Center, offering the best possible target to the

supposed Davidian extremists?

And why did they get involved in a gun battle with a group advertised to be spoiling for a gun fight with the government, and leave themselves nothing but parked cars to hide behind from the anticipated volley of bullets?

The entire raid had been planned for months, and drilled at Ft. Hood with military advisors. Can you imagine this unusual stupidity would go unnoticed?

>

I'm at a loss for words why none of you want to believe me when I say
that ND8V is in prison.

I did a extreme amount of checking & rechecking late last week and got
to the truth of this whole thing.

YES I DID speak with a offical of the Michigan Prison System...His
EXACT quote is under my "ND8V in prison" posting.

Mike was a lot of things to a lot of hams. Some say he was a QRM'er,
others respect his electronic knowledge....I have said and will keep on
saying he is nothing more than a FAT PORK who is now a convicted FELON!

I no longer want his radio gear...it is "stained" by the same fingers
that landed him behind bars.

The offical I spoke with would not comment on the reason why ND8V is in grey stone college...he would only CONFIRM that Mike G. was there...there must be some kind of court records that will state the nature of the downfall of one, ND8V.

I would like Bob Youngblood (KT4TR) to do some checking into this whole mess....Bob only knows the truth when- ever I have heard him speak. Above all KT4TR is NEUTRAL in this whole thing, as stated if anyone can find out, Bob can.

ND8V has been a thorn in the side of ham radio from day 1. His "know it all" QSO's can only be matched by WB2OTK & AF2Y....Porky will be off the air soon, now we have to get AF2Y outta here. It's nice to see that they are starting to fall down already.

So there you have it...I have calmed down quite a bit since last week when we all learned about ND8V...I'm ready to start using my vast amount of knowledge to to get to the truth of this story.

If I must, I will go to the prison board hearing of ND8V & put my two cents in as to why ND8V SHOULD REMAIN IN PRISON!!!

It's nice not hearing "CQ CQ CQ from ND8V, CQ CQ CQ this is ND8V calling CQ and standing by".

> >attorney's to dig up. Enjoy

Jimmy "The Killer" O'Brien spew again! With his Jerry Lee Lewis hairdo,
and threatening that "He killed once, and he might kill again," the ex-
Navy "weatherman" with the PTSD goes off the deep end. He looks for
others to blame for his on-air behavior.

> You gotta have money to hire a lawyer, Dimmy. Stop with the threats,
> moron, because you ain't Doc.
>

Bwhahahahahahahahaha!!!!!!! The only reason he manages to keep his head
above water is that wood floats.

While your there Dwight back your browser a bit to the 'SkyWriter'
site here:

http://www.public-action.com/SkyWriter/

You can read about 'Life in Zionist Controlled America' then you can
click a link from there to read how the German Holocaust never
happened, here:

http://www.codoh.com/incon/inconstrtchdex1.html

Then you can skip over to this page about Ramsey Clark (scroll down a
bit)

http://www.public-action.com/SkyWriter/WacoMuseum/burial/page/b_wsws01.html#Ramsey

You remember Ramsey Clark from the Kennedy / Johnson years ? Well this
ties him back in with Jim Garrison and Clay Shaw (remember those two
in the JFK plot ??) It seems now he *along* with the surviving
DAVIDIANS and the judge, FBI/ATF etc etc are *ALL* in some kind of
HUGE plot to defraud the US Treasury !!

Which is called 'Waco Suits for Waco Suckers' here:

http://www.public-action.com/SkyWriter/WacoMuseum/burial/page/b_wsws.html

I've book marked this whole mess as my one *authoritative* site for
getting to the bottom of all these plots and conspiracies that seem to
abound on the internet. Nothing at all *spacey* about these folks.

YMMV.

>
>If the degree of force used against the Davidians was justified, why

1. Why do you need a ATU running if the "antenna and coax are ok??"

2. What does the high swr light do if you run it into the dummy load,
without using or trying to tune with the tuner?

A. If the radio operates properly, and with no high swr light
showing to the dummy load. Go to the next step...hit the tune
button and see if the tuner operates properly to a good match.
(the dummy load).

B. If steps above work then you have a antenna problem. If they
don't then you have a tuner/swr sense circuit problem.

On my 1000MP the tuner does a excellent job, however it can not handle
all possible load conditions. In otherwords the range is limited. I
would assume the 920 is similar.

What's a 2 year old AL80B worth that still has the same tube and gets full output? I'm thinking of selling it but to someone in the North Jersey area. Don't want to ship.
AF2Y

2563. Question on thicknet cable for amateur use.

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-13 00:00:00 UTC
From: "Randy E. Randall" <randy_randall@hotmail.com>
Message-ID: <smrtlbornd677@corp.supernews.com>
Source record: 107410
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.misc

Hello. I have just acquired two large rolls of new thicknet cable. It is double shielded, approx. the same dia. as RG-8, 50 ohm, solid center conductor, and looks as if it would take up to 500-750 W with no problem. Has anyone used this in their setup? Since old thick ethernet runs @ 10 meg. I am assuming the losses at least to 14 MHz. to be tolerable. Will it be useable in the long run?

Thanks,
Randy. KB8ASO

l

You need a course in remedial reading, "chip".

You failed to notice one of your favorite lawyers is also in on the scam: Kirk Lyons. If you don't already have a dossier on him, let me start you out with the information that he makes it his business to contact personally every white racist, militia member, and KKK member who gets into a legal pinch and offer his "services" -- if there is money involved.

It seems he can't make enough just chasing ambulances like an honest lawyer. He is an "issues" person. Somehow, his agenda crossed paths with Ramsey ("Hiz Honor, the Libbral") Clark. Just two lawyers of high (but opposite!) principles working together for Truth and Justice.

On behalf of their clients (and of course, in pursuit of Justice and Truth), they sued the US Treasury for more than One Billion Smakkeroons.

So now you're a little trailer park family off in East Mudhole, Texas someplace, and these big lawyers come to you with a lawsuit they're getting together for a Billion Samolas because you had a son, daughter, or other relative killed at Mt. Carmel.

Are you going to sic the dogs on them? Nope. Sign here, here, and here. The lawyers take it from there (you must know how it goes in Big Lawsuit Country). Anything the lawyers do on your behalf -- you may or may not know about it or understand it, but you are responsible for it anyway.

> I've book marked this whole mess as my one *authoritative* site for
> getting to the bottom of all these plots and conspiracies that seem
> to abound on the internet. Nothing at all *spacey* about these
> folks.

No, no, don't be shy. Ramsey Clark working with Kirk Lyons is very spacey -- very, very spacey.

It is even spacey-er when the lawyers file a wrongful death suite for a body that has never been found and a death certificate that has never been issued. Why is this spacey? The defendant (US Gov't) never protests the missing body or certificate.

AND THE JUDGE NEVER MENTIONS IT EITHER. The case goes forward, everyone interested in Truth, Justice, and Apple Pie.

But you never met a government scam without instantly falling in love with it. For you, there has never been a dishonest lawyer or a crooked judge. Or a lying President.

The outfit I work for operates a remote radar facility in the middle
of the New Mexico desert about 40 miles NE of Truth of Consequences
near the Elephant Butte resivoir.

We use a telco supplied (GTE/Verizon) micro power (maybe 100-200 mW)
transceiver in the low GHz frequency range (2 Ghz or thereabouts) that
sends and receives a signal from a mountain that's 35 miles to the
south! (yes, that's kinda far, but it is line of sight!) Telco has a
microwave link to T or C where its switched and hops on the POTS
network.

We have 2 voice grade lines (regular voice and fax line), and two
leased telco lines for data. The system is capable of 24 voice grade
circuits (basically a T1) and does have ISDN capability but we haven't
used that part of it yet.

We get about 24,000 baud out of the voice grade lines, which isn't too
bad considering the set up!

Except the criteria for "tolerable loss" would be relative to a receiver directly connected to the cable (when used on ethernet). I don't know what determines max-power handling specifically, but remember that this stuff normally gets used at miniscule power levels! I'd say it's optimized for noise rejection, not power handling.

T'would be interesting if someone could check it out with a cable tester, though. That stuff is definitely out of style and no doubt would be cheap.

Keep in mind that Mike loves pussycats and no man who loves animals can wind up behind bars. He indeed is a kind soul who has the welfare of everbody at heart and the negative posting about him is certainly libelous. If Mike is anywhere near jail it's voluntary. He brought his cat over there for the inmates to pet to lower their blood pressure readings. On behalf of Mike, I demand a retraction of such defamation.

We use a P-Com (formerly Cylink) Voice Xtender (wireless, digital, spread spectrum, 900mhz). Perfect voice. Good for between 16 and 19k at 14 miles range (perfect line of sight) to the base unit, which is connected to Telco lines. Combined with DirecPc satellite service, we can browse at about 60k, and download at an average of about 300k. We often get 40 Kbytes per second on FTP. $20 for unlimited local ISP, and another 20 for 25 hours of satellite time. I also tried a computer on the same type of units, but which had close to 40 miles of less than ideal line of sight to the base unit, where it was connected to over-extended copper. Unassisted speed was about 12k.

My problem with the Waco incident was that they didn't go in there
sooner. My problem was that Koresh not only considered himself a "god" [I
NEVER use a capital "g", damn athiest (agnostic?) that I am!], but he kept
supreme reign over all of the women and girls in the compound. That's
right, poor Davey had sex with minors. Sick bastard.

>
> Those officers used the most aggressive, the most confrontational,

>confrontational.

Just the way it should have been done. In my opinion it wasn't agressive
enough. Time for the ole USA to take some clues from our less-crime-laden
neighbors and start setting some examples.

>

Terry, you need to go back and read my message again. I never once claimed that the "degree of force used" was "justified." In fact, I clearly stated that the force used was "excessive," "extreme," "aggressive," and "confrontational." And I clearly stated that I disagree with the use that level of force when it comes to minor law violations.

As for the rest of the junk you posted, I simply cannot go along with you. All of these conspiracy theories are nothing more than a distraction from the real issue.

The real issue is the initial use of excessive force for what amounts to a minor law violation. Everything else after that was a direct result of that initial behavior by the police.

That is what we, as American citizens concerned with the future of this country, should be focusing on, because all the other things would not have happened if other, less aggressive, and more intellegent, tactics had been used during that initial confrontation.

>> virgin mothers. The local authorities couldn`t make a case against
>> Koresh because they couldn`t find a complaining witness.
>
>The name of the "local authorties" was social worker Joyce Sparks.
>She is recorded on video tape (1992) saying that there was nothing
>wrong with the Davidians and she could find NO EVIDENCE of child
>abuse in her visits to Mt. Carmel. She changed her story after the
>massacre to retain her job and keep up with the civil service flock,
>but the fact remains she took no action and no charges were brought.

Well it looks like the above author must be *lying* as well as the
FORMER Davidians interviewed here by reporters for the Waco
Tribune-Herald (Mark England, and Darlene McCormick) here:

http://www.rickross.com/reference/waco9.html

"An eight-month Waco Tribune-Herald investigation that involved
numerous interviews with Breault and more than 20 other former cult
members and a review of court records and statements to law
enforcement officials revealed complaints that Howell: "

"abused children physically and psychologically;
boasted of having sex with underage girls in the cult;
and has had at least 15 so-called "wives." "

>If the local authorities could not find a complaining witness, how
>come all these "complaining witnesses" pop up after the fact with
>incontrovertable testamonials?
>
>It is true, or it is not true, but it cannot be both.

It seems *everyone* is against poor Koresh for having sex with
underage girls, The author of 'The Ashes of Waco', former Davidians,
etc etc. What's a good pedophile to do ?

Too bad you can't even post flame-bait properly. Since you have read enough posts on this newsgroup to know the callsigns of some regular posters, you were obviously entertained by them. But you come up with a juvenile post that completely misses the point of the debate...

We aren't anti-coders, we are anti-code-requirements.

> This place sounds like it's made up of a bunch of
> pre-schoolers.

Actually, while I don't agree with them, at least they have my respect. You however, as an anonymous poster, deserve NO respect. Now go away and bother another newsgroup, or you will be dealt with in proper fashion - silence.

> intermod

You got THAT right.

> Logic is Truth, and Truth is Logic.
> This is all we know in Life, and all we need to know.

<<<<<<<<Who says? For example, there has been no crime committed in the hamlet of Farkas, Kansas, population 95, in 20 years. Joe Smith, recently released from prison for doing 10 years for theft, moves to Farkas. A month later, Ozzie Evans's barber shop is broken into and $100 is taken from his cash register.
LOGICALLY the cops come after Joe Smith but on the night of the robbery, Smith proves he was at Madam Snorkel's house of ill repute. How then is logic truth?
Logic is REASONING which MIGHT lead to truth. It can be based on assumption which is completely fallacious, induction or deduction. Logic then is variable as events unfold while truth is constant. Logic is therefore related to truth insofar as a method of attaining it but should never be considered as equivalent.

This is a bit of a silly question, but what exactly is meant by the term "non-smoker" when used by people selling equipment? Does it mean the obvious, that the seller does not smoke? Because I don't see how that would affect the equipment...other than maybe cause it to smell faintly...

Obviously, you've never worked on a piece of equipment which has been owned by
a heavy smoker. YUCK!!!

And to think, these morons are either too stupid or too ignorant to realize
that the insides of their bodies look as bad (or worse) than the insides of
their radios.

>So how do you misc.rural newsgroup types connect to the internet?

I used to dial up to one of the two local ISP's, but I got tired of connecting at only 26.4k, so I rented an office in town in a building connected to a citywide fiber optic network connected to Iowa Network Services statewide fiber optic network. When I want high-speed Internet access I go the office.

Since for whatever reason the home phonelines weren't supporting 56k modem connections and since my ISP's load sharing software was always kicking me off after being logged on for several hours I figured that I may as well just have the home machine dial into my own box at the office. So I stuffed a Linux box with a modem in the corner of the office, got a phoneline, a network hub, and two more IP addresses, and now the home machine logs onto the office box when I boot up, and it stays connected until I shut it down. And, oddly enough, those two old USR X2 modems usually connect with each other at 28.8k and sometimes 31.2k whereas with my old ISP it was almost always 26.4k and very occasionally 28.8k.

Years ago, when I left the Air Force, I needed a job toot
sweet. 'Had a commercial 1st phone from years before, so
I went to work servicing 2-way Motoralas & such in Galveston.
One of my stops was a taxi stand. It was the worst of times,
(Winter) The stand was closed up due to the cold, and the
smoke was literally so thick that it could be cut with a
knife. The tubes in the Motracs' where so yellowed up with
tar that a rag was needed to extract them. If any of you
hamsters smoke, check yourself into the hospital for a week
of back surgery. Come home for another week or two when you
can't bathe yourself, and you're off the smokes.
It's one of the worst psychological addictions you'll ever
have. After I got off the drug I vowed that I'd never
throw rocks at someone's addiction again. Funny thing.
In the hospital, you hurt so much that you don't even miss
the smokes. The hospital food? God awful bad! Same as
most hospitals. Gotta Run; got a sked with Bhutan after
while. Anybody believing that needs help....hi....73

You do where you are, do you?

guess what, large areas here don't.
GTE hasn't replaced the old switches everywhere yet and there's
still party lines around. Even where I live, in a town of
35,000 when it rains you lose your connection (and it rains
an average of 129"/year here).

Some areas still don't have power lines, and forget piped water
or wells, large areas of Hawaii Island are on catchment (i.e.
your gutter connected to an above ground tank).

Maren, glad to have county water at home, but the farm land is
6 miles from the nearest spigot.

According to the 11 PM WABC-TV News tonight, the Town Council
of Marlboro has, indeed, passed the ordinance banning
cell phone use while driving in the township of Marlboro, NJ.

I don't know if that was "on first or second reading"
of the ordinance or not. Depending on the type
of government in Marlboro, the mayor may have
10 days to veto the ordinance.

I'll see what the local papers say about this tomorrow.

Don't kill the messenger, I'm just reporting the news.

Cheers,

2616. domestic qsl card question

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-14 00:00:00 UTC
From: goldenbadger@mindspring.com
Message-ID: <396fec61.6964794@nntp.mindspring.com>

It seems that all the attention is focussed on DX QSL cards in regards to bureaus and such.

What is the proper and/or expected way that domestic cards should be handled? Direct mail with a SASE?

Any help and guidance will be appreciated.

Thanks

http://www.rickross.com/reference/waco9.html

The Waco Tribune-Herald Series, Fort Worth Star-Telegram, Wednesday,
March 3, 1993

by Mark England and Darlene McCormick:

*[Howell or Vernon Howell as mentioned below is David Koresh before he
changed his name]*

An eight-month Waco Tribune-Herald investigation that involved
numerous interviews with Breault and more than 20 other former cult
members and a review of court records and statements to law
enforcement officials revealed complaints that Howell:

abused children physically and psychologically;
boasted of having sex with underage girls in the cult;
and has had at least 15 so-called "wives."

Breault told the Michigan court, and nine former cult members
confirmed in separate interviews - that Howell talked in Bible studies
of having sex with his wife's 12-year old sister.

Robyn Bunds, 23, a former cult member, said Howell told the story as
if he found it amusing - saying that the girl thought he was getting
in bed with her to get warm.

"That's what he said. When he tried to pull down her panties, she tired to get him not to," Bunds said. "She was 12 years old. She trusted him. He's her sister's husband. She was 12. I remember being 12. She resisted, but he kept on going because he said Gold told him to."

The girl gave birth in February 1989 to a daughter. By then, she was fourteen years old. The space on the birth certificate for naming the father is blank. A dozen of Howell's former followers, including one of the girl's brothers, insist that because Howell is the baby's father.

Howell denies the accusation.

He claims to have only two children in the cult, Cyrus and Star, whose mother is Rachel Howell is was 14 years old when a 24-year old Howell married her in 1984.

Branch Davidian women, however, have left a trail of birth certificates listing no father. Former cult members - including Bunds, who says Howell is the father of her son, Shaun - said that's because Howell fathered the children.

In addition, McLennan County records show no birth certificates for many children whom former cult members said have been born to Branch Davidian women since the late 1980's. A former cult member once registered as a midwife in McLennan County said she delivered twin girls in 1991 to a young Branch Davidian woman living at Mount Carmel. The midwife said Howell ordered her not to register the babies with local officials, a violation of state law.

Former cult members - in some cases, relatives the women involved - say Howell restricted the filing of birth certificates out of fear that authorities would chart the number of babies born at Mount Carmel with a known father and focus unwanted attention on the Branch Davidians.

Why would anyone join such a group?

Many of Howell's followers are former Seventh-day Adventists. Their faith allows for end-time prophets. Breault said this means most feel obligated to hear out anyone who claims to be anointed. Even Howell's critics say he has spellbinding ability to roam through the Bible, stringing verses together to support his beliefs.

Former cult members also said Howell uses traditional mind-control techniques to entrap listeners; putting Branch Davidians through rigorous to entrap listeners putting Branch Davidians through rigorous daily Bible studies, some lasting more than 15 hours.

>Besides, even if the allegations were true, since when is it within the
>jurisdiction of the BATF to go after sex offenders?

They didn't. go after the Davidians for sex offenses.

Source record: 107349

I've seen many QSL cards sent thru the mail as postcards. This, of course, means they get tattered and torn sometimes but always marred somehow. I, as many folks do, get a cheap box of envelopes and 1st class stamps and just mail them that way. I like to send them the way I would like to receive them...in decent shape. It costs a little more per card, but I thinks it's worth it...but then again, I only send out 5 to 10 a month if that many. If I send the card first this way, the effort is (almost) always reciprocated, and the return card is in an envelope. My return rate is (only guessing) nearly 90% (domestic) and I never send a card with an SASE unless it's going to a DX station that I really "need" the QSL card from.

the PA courts have just repealed one of those silly laws here in pa.. they said since it's not a state wide measure, they can't enforce it in just one small area like that.. if i didn't just get home from working 14 hours, i'd post the entire article.. basically a township passed the law after someone got killed by a person on a cell phone.. so they passed a law saying you couldn't use cell phones while driving, it didn't apply to cb radios.. anyway, a guy got stopped, fought it, and the court said there's no way they could uphold such a law unless it is state-wide.. take care, i'm dragging my ass to bed!

It's a 'main' story on the CNN/US page.

To quote....

The Township Council voted 4-0 Thursday night in favor of the ban. Mayor Matthew Scannapieco signed the ordinance a short time later.

Under the ban, anyone caught driving with a hand-held cell phone is subject to a fine of up to $250. Hands-free cell phones are permitted, however.

"It is in the public interest to prevent injuries and save lives, and if I can save just one life with this ordinance, then I'll have done my job as an elected official," council Vice President Barry Denkensohn said.

First off, notice the "If it saves just one life" bulls___! Ban cars idiot!!

It is unclear if the law applies to other 'hand held' devices, or just cell
phones.

Hand-held cell phones are legally distinguishable as they are interactive
in both directions.

However, if the law also applies to HAM and CB, then I think it would be very appropriate for citizens to file summary complaints against any police, fire, and ambulance operation of radios by the driver while the vehicle is in motion. I mean, an officer is doing a lot more than just driving, so his operation of a radio would be even more dangerous!

goldenbadger,
There are a number of options. You can use the ARRL domestic 'buro', but I'm not too thrilled with them. Many nets have QSL bureaus which helps you save on postage. Sending an S.A.S.E. is nice. There are many hams how because of something special about their call sign, location, or what ever, get a lot of cards. If he has to pay for a lot of postage, the QSL may not be too fast in returning. Just common courtesy. Maybe the worst way to QSL is by 'postcard'. Some of the required information is almost sure to be obliterated by postal markings.
Now that there is secure(?) email, wonder why emailing a QSL isn't accepted as valid? (that last part is 'troll bait', don't bother answering-LOL)
'Doc

For whatever reason Alabama seems difficult to get a card from. This
is the way I do it.

After 39 years of operation I do not initiate a qsl. But I acknowledge
ALL that I receive. I respond in the following manner.

If a SASE sent...next day reply.
If no SASE.......when I get around to it.
If QSL only......when I get around to it.
DX Bureau cards..when I get around to it.
DX Bureau cards with a "special note". I.E. working on WAS, etc.
Immediatly by return MAIL, not bureau.

That say anything?

Why don't you extend the same courtesy to the "domestic crowd"? Or
should I ask...why send a card in an envelope that you don't want a
reply from? You obviously want the guys card, or you wouldn't send
yours. So why not put a SASE in it? Most of the guys you send a QSL
to probably don't need NJ. Can you help me with your logic there?

Body handling: HTML body converted to readable text

I've been communicating with a zealot, a rather nice chap but awfully misguided and naive. I prefer keeping his name confidential and I guess I spilled the beans since he goes by Ernest Confidential. All kidding aside, he means well, is deeply imbued with the spirit of Jesus and is saved, so says his last statements:

<<<<>>>>>>>

Now the reason he brought up the Pope was because I did so in a genuine way, however he doesn't need the Pope because he has the Son. Where? And he's been forgiven of sin too which is a great allusion, even better than Copperfield can pull off at Caesar's Palace in Vegas. We were going to see him back in '97 but the $120 seats were all the way in the rear so if he thinks he saw us, it was an allusion. I'm talking about Copperfield, not Jesus.

Now this pen pal of mine got a bit bent out of shape after my telling him that I thought the Christian Coaltion just plain sucked because he took it as an indictment of all of Christendom. Therein lies the basic problem. The Coaltion thinks it speaks for all of Christendom while in reality they are a mere pimple on an elephant's tuchus. Talk about self-centered, egotistical, ebullient and arrogant frauds-they're number one. Let me qualify those remarks.

I'd like all of you to consider the following: when taking into consideration all of this "JEEEEEEEESUS" pushing hazerei, pushing into schools, libraries, city governments, infringing personal rights, movies, TV..you name it, how many Catholic and well established Protestant denominations have gone along with it? When I mention well-established Protestants, I'm not talking about something like the screwy Branch Davidians but instead Lutherans, Espiscopalians, Presbyterians, Witnesses, Mormons and Baptists not below the Mason-Dixon Line?
Do you think anyone of them would stoop so low as to affix a bumper sticker proclaiming, "Honk if you love Jesus?" What a disgrace. It's odd enough that they put metal fish on their trunks but Jesus bumper stickers? Like the dyslexic rabbi would say, "Yo."

Last week my wife and I went to dinner with Catholic friends. We discussed politics and the upcoming Nov. election and then broached the subject of school prayer. They shared my exact sentiments-UNNECESSARY and an infringement upon the sensitivities of ALL. I asked why they thought so much was being made of that issue by the Born Agains and got this for an answer,"They think they are big shot spokesmen for all Christians but represent no one but themselves."

Well anyway, my pen pal had his say, I mine and we parted friends. He never admitted being one of the "Gentile Chosen Few" i.e. Born Again but I suspect it beyond question. Without a doubt they have the weirdest interpretation of scripture conceivable but what's dangerous is that they insist upon applying their weirdness to everyday life. Move over Papillon on Devil's Island and make room for a whole new contingent. If they don't stop bothering people and upsetting society, that would be a perfect spot for them. Hells bells-in a week they'd have everyone convinced it was Angels Island.

First I have to start the horse-drawn generator to boot up the
computer. Then I just pick up my phone and tell Mabel, the local
telephone operator who's always at the other end, to connect me to the
internet. Then I hang up and she calls me back after everyone else on
our party line has hung up. Then I listen to her tell me all the gossip
she has learned from listening to everyone's conversations while she
makes the connection by placing a call to the ISP in the big city. When
she gives me the go-ahead I put my telephone handset into the acoustic
coupler and I'm off!

If Mabel's on break, or if the line doesn't clear, I have to wait till
later. This is called retry logic.

After I'm finished, Mabel tells everyone in the area where I surfed,
what I downloaded, etc.

:) :)

seriously, I routinely get 44-48kpbs on my Sprint rural line. The
closest major city is a local call because we have a very large local
calling area (luckily).

Now look at what just happened here: T Cross recommended that we read the evidence that the February 28, 1993 raid was "desigined to fail," that it was NOT a bungled law enforcement effort, that the "failed raid" was actually a domestic Gulf of Tonkin incident used to justify overt military interference in civilian life.

And what did Chip do? Why ... he changed the subject. Looks like Chip would rather have this subject -- the raid that was desgined to fail -- forgotten about.

Changing the subject is a favorite tactic used by truth suppressors. Here is David Martin's "Seventeen Techniques of Truth Suppression, which you can read at David Martin's webpage, [http://thebird.org/host/dcdave]

Look at Technique No. 13. That is what Chip just did.

==== Seventeen Techniques for Truth Suppression ===

Strong, credible allegations of high-level criminal activity can bring down a government. When the government lacks an effective, fact-based defense, other techniques must be employed. The success of these techniques depends heavily upon a cooperative, compliant press and a mere token opposition party.

1.Dummy up. If it's not reported, if it's not news, it didn't happen.

2.Wax indignant. This is also known as the "how dare you?" gambit.

3.Characterize the charges as "rumors" or, better yet, "wild rumors." If, in spite of the news blackout, the public is still able to learn about the suspicious facts, it can only be through "rumors." (If they tend to believe the "rumors" it must be because they are simply "paranoid" or "hysterical.")

4.Knock down straw men. Deal only with the weakest aspect of the weakest charges. Even better, create your own straw men. Make up wild rumors and give them lead play when you appear to debunk all the charges, real and fanciful alike.

5.Call the skeptics names like "conspiracy theorist," "nut," "ranter," "kook," "crackpot," and of course, "rumor monger." Be sure, too, to use heavily loaded verbs and adjectives when characterizing their charges and defending the "more reasonable" government and its defenders. You must then carefully avoid fair and open debate with any of the people you have thus maligned. For insurance, set up your own "skeptics" to shoot down.

6.Impugn motives. Attempt to marginalize the critics by suggesting strongly that they are not really interested in the truth but are simply pursuing a partisan political agenda or are out to make money (compared to over-compensated adherents to the government line who, presumably, are not).

7.Invoke authority. Here the controlled press and the sham opposition can be very useful.

8.Dismiss the charges as "old news."

9.Come half-clean. This is also known as "confession and avoidance" or "taking the limited hangout route." This way, you create the impression of candor and honesty while you admit only to relatively harmless, less-than-criminal "mistakes." This stratagem often requires the embrace of a fall-back position quite different from the one originally taken. With effective damage control, the fall-back position need only be peddled by stooge skeptics to carefully limited markets.

10.Characterize the crimes as impossibly complex and the truth as ultimately unknowable.

11.Reason backward, using the deductive method with a vengeance. With thoroughly rigorous deduction, troublesome evidence is irrelevant. For example: We have a completely free press. If they know of evidence that the Bureau of Alcohol, Tobacco, and Firearms (BATF) had prior knowledge of the Oklahoma City bombing they would have reported it. They haven't reported it, so there was no prior knowledge by the BATF. Another variation on this theme involves the likelihood of a conspiracy leaker and a press that would report the leak.

12.Require the skeptics to solve the crime completely. For example: If Vince Foster was murdered, who did it and why?

13.Change the subject. This technique includes creating and/or publicizing distractions.

14.Scantly report incriminating facts, and then make nothing of them. This is sometimes referred to as "bump and run" reporting.

15.Baldly and brazenly lie. A favorite way of doing this is to attribute the "facts" furnished the public to a plausible-sounding, but anonymous, source.

16.Expanding further on numbers 4 and 5, have your own stooges "expose" scandals and champion popular causes. Their job is to pre-empt real opponents and to play 99-yard football. A variation is to pay rich people for the job who will pretend to spend their own money.

17.Flood the Internet with agents. This is the answer to the question, "What could possibly motivate a person to spend hour upon hour on Internet news groups defending the government and/or the press and harassing genuine critics?" Don't the authorities have defenders enough in all the newspapers, magazines, radio, and television? One would think refusing to print critical letters and screening out serious callers or dumping them from radio talk shows would be control enough, but, obviously, it is not.

Anything with Mark Breault's name on it is questionable. He had a score to settle because he was kicked out of the compound. His story is a fabrication of lies for which there is no proof. If you don't have anything other than biased newspaper articles proving there was sexual misconduct or child abuse taking place, don't bother posting. Sex crime and abuse charges were never brought

against Koresh.

They don't have a clue themselves Kent.

What I do find utterly amazing is that whenever
a topic of a technical nature comes up in a ham
radio newsgroup, it does not take long for it
to degenerate to a name-calling session, a discussion
about "who's-QRM'ing-who" or a combination of both.

I think this may be the result of an effective job
by Mr Hollingsworth of cleaning up places like
14.313 and 3.894.5 and 3.901 - it looks like all
the kooks are now taking up residence on the internet.

(I personally wish he'd left 14.313 and 3.894 be alone.
this way all the pathological screwballs and looneys
would stay in those two spots on the dial. A "Ham Radio
Bellview State Hospital" or such.

This way their all in ONE or TWO places. Like effluent
safetly stored in a septic tank.

Too late now I guess.

In <8kkubo$a8u$1@news3.infoave.net>, "John Garrison" <corrjng@rbnet.com> writes:

>Methinks you confuse Mike with Martin!

Methinks you know something! Huge grin..

Martin was related to me, but I am not related to Martin! Chuckle. The Luther group from whence I'm sprung was the John Luther crew that came in with the family to the Swanzy, Mass, site from England with the Pilgrims.

That branch of the Luther group was in England some two hundred odd years before Messr. Martin wast born, I'm told! Cousin Martin did prove, however, that it seems possible to go out on a limb, saw it off on the tree side from you, and fall into Grace. Chuckle.

To keep this into DX perspective, you really need to go out on a dark night, not one lit with a half-moon, which, incidentally is pretty obscurative while looking for weak other visual things. Take a two cell "D" flashlight or bigger. Shine it up in the dark night sky and take a look at the beam as it goes up there.

Then, stop to consider that about the same power, on a VERY good propagation night with a decent gain antenna on 40 meters ..

can be heard and copied on CW all the way around the other side of the World.

One watt or so is really copyable between Central Texas and Australia on 40 CW at times. I and a lot of serioys low band folks have done it many, many times.

You really perhaps don't understand and respect what is really going on here in this world of DX until you stop to think that, as well, if there were a thousand hams listening at the same time ..

all of them at the receiving end of the path could copy simultaneously..

yeah .. one watt

That's around the same power level as your flashlight beam or maybe a bit above it...

No aurora was visable in the Centex area to me on the way back from Beaumont to Bryan-College Station around midnight to two am last night. However it sure didn't cost me anything extra to look up rather

reverently in the sky ..

;)

I'd like to sell my linear which has the original 3-500Z tube and gets out 1000 Watts P.E.P. I think I bought it from AES no more than 2 years ago. Do not want to ship it anywhere so if anyone from New Jersey or the NYC metro area is interested, contact me by personal e-mail instead of on this board of snoopers, slimeballs and religious freaks. I live in Clifton,NJ which is 12 miles NW of NYC. And I might pay someone to take my TR4C and Swan500CX with power supplies.

Uhhh did you see where it said 'Breault and more than *20* other
former cult members' ?

Here's another one for you:

http://rampages.onramp.net/~djreavis/faq/index.htm

Did Koresh abuse children?
Yes, and no. Child abuse is a name for various crimes. One of them is
brutality towards children. The evidence that Koresh and his followers
were guilty of that is negligible, and was exaggerated by the FBI and
press. On the other hand, Koresh was guilty of statutory rape, or of
having sexual relations with females who had not reached the age of
consent.

Why didn`t local authorities pursue statutory rape charges?
Before having sexual relations with an underage female, Koresh usually
obtained permission from the parents, who conceded it because they
believed that it was his religious duty to father 24 children by
virgin mothers. The local authorities couldn`t make a case against
Koresh because they couldn`t find a complaining witness.

Howdy Mike,

Thanks for the interesting and useful insight. I'm in the TX panhandle and look forward to seeing the event.

Looks like the sun is getting very active. Lots of activity since the 12th.
reference: http://www.spaceweather.com/

"
Aurora Alert: Sky watchers in both hemispheres are advised to watch for auroras during nighttime hours on July 14-15. The best times to see the Northern and Southern Lights are usually near local midnight. Tonight's nearly-full Moon will outshine faint Northern Lights, but intense aurora could be visible in spite of the lunar interference.
"

The spaceweather site is great, lots of interesting material.

"Tips on Viewing the Aurora"

>
> Any help and guidance will be appreciated.

If you really want a domestic card, send yours
in an envelope with a SASE.

Hams are notoriously cheap. Using a SASE will
improve your odds of getting a reply, however
I have somethmes not even received a reply
(2 out of 10 times) even with a SASE. In this
cast the cheap ham probably clipped off the
return postage and glued it to his light bill
envelope. It's unfortunate, but as these cheap
bastards die off more and more, this trend will
probably diminish as time goes on.

2649. **"Paddles" for Paddle Switches: TS-520SE (Kenwood)

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-14 00:00:00 UTC
From: xtx99@aol.com
Message-ID: <20000714150616.20914.00000565@ng-fs1.aol.com>
Source record: 107377

I recently purchased a used Kenwood TS-520SE (I'm new to this...am taking my first test next week). The left side of the front panel has 5 paddle switches including "Send Rec" and "Off Slow". The switches appear to work but it seems that the plastic "paddles" that apparently pop into the switches are missing on these two paddle switches. For me to work the switches I've inserted the end of a pencil into them. I've called several Kenwood parts retailers with no success. The Ham that sold me the transceiver said I'd have no trouble finding the "paddles" for the switches (he's since moved). Any suggestions are appreciated.

You might want to take a look at Warwick Valley Telephone Company. They are an independent in Orange County, NY and parts of very Northen NJ. They are extremely progressive offering an ISP, DSL etc.

Quite an impressive organization!

>

I've seen #13 used in grievance arbitration where I work. It's also commonly used in court rooms to damage credibility of a witness. #5 is pretty lame, but for some reason, effective. I remember #14 being used during the Oklahoma City Bombing when "two, middle-eastern looking men" were supposedly seen leaving the scene prior to the blast. Nothing more on that was ever said.

Thanks for posting this.

> Koresh because they couldn`t find a complaining witness.

The name of the "local authorties" was social worker Joyce Sparks.
She is recorded on video tape (1992) saying that there was nothing
wrong with the Davidians and she could find NO EVIDENCE of child
abuse in her visits to Mt. Carmel. She changed her story after the
massacre to retain her job and keep up with the civil service flock,
but the fact remains she took no action and no charges were brought.

If the local authorities could not find a complaining witness, how
come all these "complaining witnesses" pop up after the fact with
incontrovertable testamonials?

It is true, or it is not true, but it cannot be both.

Hi,
I am 16 and I live in VA and am wondering if there is any place where I can take my license test. In the latest issue of Nuts & Volts there was a listing that the Timonium hamfest on the 30th would have exams but I might not be able to make it to that one. Is there any place that I can take it without going to a hamfest? Timonium is awful far for me. Is there some local place where they are given on weekends or monthly? Any help is appreciated since I have studied my you-know-what off and have taken several practice tests. I am ready. Now all I need is a place to take it.

Thanks!

Paul,
If you don't stop using my "handle," we're gonna have a war. Your post makes a hell of a lot of sense. Why not a QSL E mail as being valid in the eyes of the ARRL? A GREAT IDEA. Didn't Riley Hollingsworth accept Rich's accidental letter of resignation by E-mail a year ago even though the lawfulness of it didn't go into effect until now? Hell, if something like that was considered valid when it wasn't then why shouldn't the ARRL consider an E QSL valid when it is? Gee you're a bright dude and I don't care what the guys say about you. My suggestion is that all of us hams with computers write to the ARRL and demand that printouts of E QSLs be accepted. Of course one must understand that to be legal, all headers must be included. Stop to think about how much is postage one will save by your idea. I say the ARRL will buy it so long as it doesn't, in some way, impact their income. Congrats Doc Paul on a splendid brilliant idea for which the entire worldwide ham community thanks you.

Nice idea! A properly constructed "Faraday Cage" should also do the trick.
It's too bad that most public places are in buildings with lots of glass, so
even the wire mesh in the stucco walls isn't sufficient. Perhaps a change in
building codes is needed! All buildings must be RF secure, except for
permanently mounted two-way or broadcast radio stations installed on the
premises. Think that will ever fly? It would certainly take care of the
problem!

Why is jamming limited to just HF-using amateurs? You've never been to
Southern California and/or listened to our 145.460- or 147.435os repeaters.

One can still do these things. It's just that now, one has to pull off the road or park to make the call.....

What may also be interesting is: Does this implicitly ban use of a phone by a passenger? Some states have rather strange definitions of "operating a motor vehicle" (for which the "operator" could be more than just the driver).

> Now, you would never see them pass a law that triples the standard fine for

Actually, technology has progressed to the point where that law (18 USC 2512(?) ff.) should be repealed. If people want private conversations, use a digital phone or a scrambler (and what the FBI wants is of no concern).

Control codes and tones vary according to the equipment used and its programmability.

Your best approach for this system is to contact the trustee or other designated control operator (including reviewing the repeater's or club's web page, if any).

> The GROL might.

Bzzzt. Sorry, wrong answer.

You have to do it in a band that allows pulse assuming you want a ranging
radar. 13cm and above.

If you had to use "radio for communications" only, that would make beacons
and R/C airplanes (among many other things) illegal. They are not.

Actually this isn't a marine transport group - and those interested in GPS
have some passing interest in satellites. Want two way satellite access?
Take a look at www.gilat2home.com. I am not in any way connected to Gilat,
just a guy who lives way beyond the end of the phone lines who needs
internet access to live! Currently connected by wire, but anxious to go
satellite direct.

Look at www.gilat.com

You can! Pull off the road and make your call. Just don't make the call while driving down the road at 70 mph with other drivers around. I don't really think that is too much to ask.

Heck, I think most radio operators have enough sense to put down the microphone when they're in heavy traffic. Why does it take a law to make cellphone users display the same intellegence?

Check 47CFR97.305, Authorized emission types.

You will find mode K0N (which would be ranging radar if you receive and time
the returns) authorized on 13 cm and above.

I can find no authorization for mode N0N, so cw doppler radar is probably
not legal in the ham bands.

Tobacco smoke stains dials, glass and the exterior of equipment. It can also affect the efficiency of bearings aside from giving off an odor. You'd want a rig that smells like an ash tray if you were a non-smoker? Not I.

You can get a free "drive now, talk later" bumper sticker from National Public Radio by sending them a s.a.s.e. See

http://cartalk.cars.com/About/Drive-Now

for details.

Several motorcycling organizations are on the anti cell phone bandwagon and handi hams (http://www.mtn.org/handiham/05-03-00.htm) has even recommended getting one of those stickers.

It seems that the cell phone proliferation now has rude owners accepting calls in restaurants, churches, darkened theaters, and even at one symphony concert where the conductor stopped the orchestra, turned around to face the audience, and lambasted the owner for her rudeness.

But are bumper stickers and new laws really sufficient?

Some establishments have quietly been using cell phone jamming devices sold in Japan to prevent the use of phones on their premises. Unfortunately, the devices are illegal in the U.S. and the FCC recently began cracking down on the importers of such devices.

But a minister can still buy the "wave wall", have it sent directly to the church, and make every cell phone in the congregation display "no service" to its users during services. He just has to go to

http://www.gingin.ne.jp/wavewall/index.html

and order one. A hand-held jammer is available too (you'll have to find it yourself if you want one), and I carry one with me to any restaurant where I want peace and quiet while dining. It looks like a camera, and no one is the wiser. To be safe, I only activate it when a boorish customer actually

starts to use her cell phone. One click of the switch, and her phone is disabled. I *love* it.

Instead of worrying about passing new laws, buy yourself a jammer!

Remember, jamming is an honored pastime among HF hams, so join the fun.

Negative on the CB angle. The low class who posted it did so through an organization called MUNSON HEALTHCARE in Michigan. His writing reflects that of someone educated and familiar with medical terminology. It's simply incomprehensible to believe that any educated person, especially one associated with the health care industry, could post such filth. I'd say he makes the average foul mouthed CBer look like Plato.

I agree with the philosophy of banning cellular phone use in restaurants, churches, etc., places like that. I think store use, and places like that, are fine.

I adamantly stand ground on using a cellular phone while driving. It's bunk that cellular phone use has any impact on a driver's distraction level. Bunk...

Yes but, who's the biggest turd? I'd have to say its W5TIT for size, N0MHS
for smell, and W6RCA for deepest shade of brown.

It makes me wonder. Here we are, a pile of 'turds', and this
'intermod' keeps bitting at us, nipping at out heels, poke'n a
finger at us, and so on. Guess 'intermod' is one of those people
who have a fecal fetish... Mercy!

I note with interest that no one has asked the obvious...how was this
tape made? If it was made inside during the tank attack, then why was
it not burned up in the fire. If it was made outside of the building
by directional mic pickup or whatever, how come the outside noise was
just in the background? If it was made by a planted bug how did the
bug get planted?

> AF2Y, Doc>>>>>>>>>

You are describing some branches of deductive reasoning, which (like syllogistic and Boolean logic) deliberately ignore the truth value of premises in order to concentrate on the process of deduction. In those studies, writers often pick deliberately untrue premises in order to emphasize the process of deduction.

However, there are other branches of logic that concentrate on the qualification of information (premises) and study the conclusions that can and cannot be drawn from unconfirmed origins.

When people base their ideas on non-logic, they stray into flat earth models of the universe, and non-circulatory blood. Because they have abandoned logic, they cannot be proven wrong in their own eyes, even by carefully organized facts. They are beyond the reach of Truth.

Of these people, it is said, "Even the gods are powerless against a fool's opinion of himself."

Typical government knee-jerking... A few people (who probably drive just as poorly when talking to someone INSIDE the car) trigger more stuipd laws that then adversely impact EVERYONE. Why shouldn't I be able to call for directions when I can't find someone's house? Or to call and say I'm late for an appointment - instead of screaming down the highway at 20-over the speed limit (not that I do that, because I don't)?

Now, you would never see them pass a law that triples the standard fine for someone "driving under the influence of a cellphone" when they start driving recklessly, would you? Nope, that makes too much sense.

Where's the law against eating or reading or smoking or putting on makeup while driving? Did a Newt Gingrich wanna-be have a near-miss with someone using a cellphone? (those of you who miss this point - he initiated the cell-blocked scanner law)

HIRAM, GA: The FCC on June 28, 2000, sent a Warning Notice to General licensee James V. O'Brien III, W4AMP, and a Notice of Intent to designate O'Brien's Amateur Radio station license for a revocation hearing and his operator license for suspension for the remainder of its term. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth said monitoring information before the Commission dating from January of this year indicates that the licensee is "seriously misinformed about the basis and purpose" of Amateur Radio and about the FCC's enforcement of the prohibition against obscene or indecent transmissions. The FCC alleges the offending transmissions took place on 3894.5 kHz, 144.35 MHz and 223.5 MHz. Hollingsworth said if the alleged operation recurs, the FCC would designate W4AMP for a revocation hearing and O'Brien's General license for suspension. Hollingsworth noted that the FCC's rules prohibit transmitting obscene or indecent words or language and that, for indecency purposes, the FCC uses the same standard for commercial and amateur transmissions. "Obscene speech is not protected by the First Amendment and cannot be broadcast at any time," Hollingsworth said in the letter, which also defined and detailed the proscriptions against indecent and obscene transmissions. In a lengthy e-mail response to Hollingsworth that he shared with the ARRL and others, O'Brien vigorously denied making any obscene transmissions. He said he keeps a "complete and accurate log" of his radio operations and would "gladly submit it for inspection." Additionally, O'Brien said, he has not operated on 3894.5 kHz at all this year. He suggested that any profanity monitored on the two VHF frequencies cited by the FCC was directed at him by an ex-FCC employee who, O'Brien asserted, has been harassing him for more than four years. O'Brien pledged to operate "in full accordance" with FCC rules. He also requested that the FCC provide any recordings, log information, and FCC monitoring information it has regarding the present allegations.

I'll thank you for an apology to members of the Navy Reserve. Just one small example will put the lie to what you've written. There are countless others. Navy Hospital Corpsmen live, fight and die with fighting men of the Fleet Marine Forces and have since there was a Navy. There are no "medics" in the Marine Corps. Half of my Hospital Corps School company were Reservists doing their two-year Active Duty obligation. Many finished out their Active Duty with a thirteen month tour with the Marines in Vietnam. I was among those. One of my classmates didn't come back. He was also a Reservist from another part of my home state.

People who think that the seaborne Navy in recent wars was a bed of roses had also better think again. Look up what happened on a carrier on Yankee Station in July of 1969. John McCain survived that explosion and fire. Many Navy Reservists didn't. When you put on the uniform, you are in harm's way.

Being ignorant is forgiveable. Even being ignorant and a loudmouth. Apologize and I'll forgive you.

2713. AF2Y: Internet warfare

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-15 00:00:00 UTC
From: "radiosigs@mindspring.com" <radiosigs@mindspring.com>
Message-ID: <8kq7gfpik1@slb1.atl.mindspring.net>
Source record: 107263

Hey guys, can I step in to this conflict between Jimmy O'Brien and Roger Wiseman and others too?I'm not taking sides but only want to appeal to the common sense of all. Listen up guys, okay?

No one had a bigger problem with Jimmy than I. Who was to blame? You all might be inclined to point the finger at HIM but I share in said responsibility. Yes it's true that he tossed a lot of anti-Semitic remarks my way and even threatened to kill me but guys...keep in mind...IT'S HAM RADIO. Did I do something to provoke the man? YES. I didn't like his stand on some ham subjects and kept throwing up to him his ex trouble with the law. And then he threw more mud at me and I insulted his upbringing, family etc. Jimmy was WRONG. Doc was WRONG and as soon as we came to that realization, he and I haven't had words on the radio or Internet in more than a year.

Once again I stress the fact that I am NOT taking sides in the present wars but am trying to prove that if everybody takes one step back and analyzes the situation, things just might improve and the need for lawyers and threats and everything attendant to litigation will be obviated.
No one need to apologize to anyone-the secret is for everyone to SHUT UP and let sleeping dogs lie.

Guys, my son is a lawyer and believe me; what he tells me about Internet legal battles is true. You simply don't realize what the hell is going on out there because of LIBEL, CHARACTER ASSASSINATION, DEFAMATION.. you name it. And if these battles between Jimmy and others don't stop, one or more involved will be spending a lot of money on legal counsel. Don't you have better uses for your hard earned money than to squander it on meaningless Internet warfare?

All of this stuff being written by W4AMP and his enemies really convinces no one who's right or wrong and that alone is a big unproductive waste of time. Furthermore who really cares who's right or who's wrong..it's just HAM RADIO related and has no impact on our daily lives. My suggestion is this: debate is great and so is this board. Concentrate on the issues/topics instead of the issuer of those topics. Stop the name calling, insinuations and family attacks. Seriously consider what I write because I do it with sincerity. Enough is enough.

Doc,AF2Y

>I said "Anyone can make a tape".

Agreed.

The question is , is the tape REAL or FAKE ? Again if you follow Ms.
Valentine it must be neither. If it's real why would the gumm't , FBI.
Davidians, the Judge etc introduce a *REAL* tape to shoot down their
chance to defraud the Treasury (as she claims) .. If it's 'Fake' why
would they make a *FAKE* tape to do the same ?? So it must be
neither real nor fake. ;)

Of course someone made it. I've yet to see a microphone hook/feed
itself into a recorder, take itself to the correct location and begin
taping ;-)

2718. Help with MFJ-1798 Antenna Problem??

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-15 00:00:00 UTC
From: WI5O <WI5O@bigchihuahua.com>
Message-ID: <ta2c5.22803$EQ3.675245@news-east.usenetserver.com>
Source record: 107268

I have recently installed an MFJ-1798 10 band vertical antenna. I think something is amiss about the antenna, however, after several emails to MFJ and calls to them (They are always closed when I can call them), I have not come up with any solution and would greatly appreciate any help to resolve my problem. Here is what's going on:

After constructing the antenna and performing initial testing at 5 feet off the ground per MFJ's suggestions, I can see that MFJ's claims appear to be false. Or so I think. I am supposed to get 1.2:1 SWR tyupically on 10,12,15,17,20 and on 30, 40 and 80 a much more narrow resonance. When I tested the antenna, I was not even close in most all bands. Per the manual, I decided to use a tuner with it and thus, I installed the antenna up in the air. I have RG8-U Coax with a run of 62 Feet, 3 inches from the antenna feedline point to my tuner's feedline connection. I am using a MFJ-969 Deluxe Versa Tuner II and it is connected to my HF radio - a Kenwood TS140-S running at 100 watts. All equipment is well grounded with 8 feet long ground rods all the way into the earth very close to the connections. The Kenwood is powered by a 25 Amp Power supply running at 13.8 VDC.

Here's what happens:

When I switch the tuner to the tuner's internal dummy load, I can tune the radio output very easily to 1:1 on each band. Once that is done, I follow the Kenwood's instruction manual and place the rig into full break in cw mode to tune the output on the antenna. A few times, I have gotten the antenna to tune on a couple of bands, but most of the time it will not on any band. I seem to be stuck at about 2 - 2.5:1 SWR and about 30 watts output on the tuner's meter. The antenna is up about 30 feet in the air at the base of the antenna. What I have noticed is that during the times that I did get the antenna to tune flat, a couple of minutes later or after keying the mic or key again, the SWR would jump to the figures I described above and the power would drop to 30 watts or so.

I don't know what is causing this. I have nearly scratched a hole in my head. I have checked the coax connectors to make sure they weren't shorted, I have switched the coax to the second coax connector on the tuner, etc. But I still have not figured why I can't tune the antenna. It again is well grounded. I double and triple checked the assembly and installation of the antenna, made sure the ground wires were secure and tried it all over - with the same problem.

Have any of you ever used the atenna and had the same problem? I have not even tried an amplifier on the antenna - just a simple tuner to radio connection running only 100 watts or less. What does this problem sound like? A matching problem, antenna problem, tuner problem???? It acts like a match problem to me - however that antenna has a matching network on it -

so I am wondering if that could be causing the problems as well.

Here I sit, hoping someone out there can help me resolve the problem. If you know the answer, please, please email me at: WI5O@bigchihuahua.com

Thanks so much for any help in advance.

2719. Amateur RADAR

Newsgroup: rec.radio.amateur.misc

I like amateur radio but I'm just not much of a talker. I was curious if anyone knows of an amateur RADAR community. Web pages, newsletters, books, etc.

I'd be interested in anything from homebrew RADAR detectors to full scale RADAR capable of detecting aircraft or vehicles. Do any of the amateur licenses even cover this sort of thing?

Thanks,
Jeff

Description of yourself ? Despite your big-worded obfuscation Doc shot
you down with ease. Logic as well as math are both *tools* man has

invented to help us get to the *TRUTH* But when the *TRUTH* is different than what our 'tools' say, then the methods we've used to get to the *truth* (logic/math) is wrong. A prime example is quantum physics, things appear to happen there that defy our logic and math, back to the drawing board.

Here's Doc's line again, maybe you can understand it this time.

>>Logic is therefore related to truth

You have seen the TRUE ham radio.

Look at my WWW page and see more.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chic being held by a female ham!.
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in".
7. The writings of me and others on ham radio, hear a typical ham contact.
8. The warm side of K1OIK, hear me speak, see me with famous people.
9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

From: Ken Linder <radstream@lvcm.com>
Message-ID: <sn1hknqtnd66@corp.supernews.com>
Source record: 107278

Hi,

Being inspired by QRZ's online log and my desire to know who is on an HF or VHF net without needing to listen through the entire list, I created a couple of PHP programs that will let listeners check to see who is on a net and allow a manager (or whoever) to Activate a net, Deactivate, clear the list, and check people in & out of the net. Please take a look at it here: http://radstream.com/net/ When you get to the Login screen, use the following for any of the nets:

Admin Callsign: KC7RAD
Admin Password: ka9rvk

Please note that it is case sensitive.

I know it needs a few minor things done to it, but is pretty much done for testing. I would appreciate it if some people would give it a little test & let me know what you think.

'Small world with all these lawyers hanging off the family
trees. What's satire and what's slander? 'Ever see a
caricature of Bill Clinton which depicted his nose as being
as big and red as the bulbous bow of the Exon Valdez? Was
it funny? Yep. Where any cartoonists sued? Nope.
What's the difference between calling somebody a silly
jerk and a g d#&**&@ f--- head fool? Besides my lawyer
says that frivolous lawsuits are downright entertaining.
One very major point, however. I've read on this ng of
some folks receiving unwanted subscriptions,etc. You've
got postal inspectors sitting on their hands just
looking for something to do. If you've got suspicions,
take it down to the post office. If anyone knows of the
U. S. mail being used for purposes of harassment, that
person has no real comprehension of what trouble is.
This is one of the most easily tracked things there is,
because it originated somewhere. When you're talking
to a couple of feds, you'd be surprised what all you'll
tell them! As for that Radiosigs, you're 100% right.

2734. DTMF codes for repeaters?

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-15 00:00:00 UTC
From: Robert Joshua Chen <rjchen@Stanford.EDU>
Message-ID: <8kqk75$8s7$1@nntp.Stanford.EDU>
Source record: 107284

I've been monitoring repeater activity in my area for about
a week now. Occasionally, I hear somebody doing a signal test in which
they would type in a two tone DTMF code and the repeater would respond
with an s-report. I'd like to be able to do this also since I'd like to
use least amount of power I can get away with and still hit the
repeater. The question is, are these tones standardized for all
repeaters? or are they specifically programmed according to the repeater
operator's preferences? If they are standardized, then where can I find a
list of these codes?

Thanks,
-Robert

I obtained a copy of the Marboro
Township law today by FAX, but it is
missing one page. From what I do have, I
can offer the following:

The title of the law is:

Ordinance 2000-18
Marlboro Code Defining and Regulating the Use of
Mobile Telephones while operating a motor vehicle.

Of the pages I did receive, the following is of significance:

The definition of Mobile Telephone is: "including but not
limited to cellular, analog, wireless and digital telephones.

The definition of USE is: "to use a mobile telephone in
(a) dialing, (b) answering, (c) talking, (d) listening.

The RESTRICTION specifically is as follows:
"No person shall operate a motor vehicle on any street
or highway while engaged in any conduct defined as the USE
of a mobile telephone unless the operator is using a mobile
telephone with hands-free technology for dialing, answering, talking
and listening."

The penalty (fine) is: a fine not to exceed $250.

From the above, I don't see this aw directly impacting
use of ham radios and/or CB radios as neither can
be construed as being a mobile telephone. Indeed,
the constant direct use of the word "telephone"
appears (IMHO) to clearly limit the scope of the
law to ONLY telephone type equipment as opposed to
traditional two-way radios such as ham, CB, FRS,
private radio, etc.

Once I get the missing page I'll add an update.

Cheers,
Bill K2UNK

http://www3.sympatico.ca/aquariusr/sale1.htm

A friend has set up a web site for me to sell off a 28 year accumulation
of electronic components including:

Coaxial Power switch,
RF power and other transistors, RF I.C.'s,
Ceramic 455kHz and 10.7MHz filters,
Minicircuits mixers, power splitter/combiner,
variable capacitors, both panel mount shaft type and trimmer
variable inductors and coil forms, RF feedthrough and standoff capacitors,
High voltage vacuum relays, rectifiers, resistors and capacitors,

Other capacitors including, Photoflash, polypropylenes, tantulums,
Switches, such as foot switches and industrial limit (micro) switches,
Ferrites beads and cores, Transformers and inductors,
and lots, lots more.

2743. Help - Naval Academy ham radio club in danger!

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-15 00:00:00 UTC
From: k3for@aol.com
Message-ID: <20000714223257.20048.00000254@ng-fj1.aol.com>
Source record: 107313

Help!

I am looking for other Naval Academy graduates or US Naval personnel who can assist me in saving the amateur radio club at USNA.

I have been the officer rep for the past 2.5 years, but a decision was just made in the past 48 hours (over the summer while the mids are conveniently out at summer training or on leave) without notice or discussion, to disestablish the station W3ADO (also Navy MARS station NNN0NNN). Perceived lack of participation, lack of knowledge of our various missions and accomplishments ("oh, ham radio is dead..."), and funding probably played a role.

Mailing address for support letters:
Captain Sam Locklear, USN
Commandant of Midshipmen
101 Buchanan Road
US Naval Academy
Annapolis, MD 21402

cc me at:
Ryan "Skip" Johnson
510 Norton Lane
Arnold, MD 21012
k3for@aol.com
if you can

Or if you can't write a letter, please email me something and I will forward it to the Deputy Commandant by email.

Thank you ! I only hope its not too late -- I have to run down there and see if they've thrown out the gear already...

Message-ID: <200007150648.CAA13415@anon.cotse.com>
Source record: 107319

One James O'Brien stated, "I also feel that being a decorated combat veteran has enhanced my credibility" etc. Since when has a Navy Reservist been put in harm's way? Is launching weather balloons from the fantail of a peace time ship "hazardous duty"? Aside from falling drunkenly overboard, how hazardous can this duty be?
This man is NOT a decorated veteran, much less a combat veteran, save for the accolades he may have heaped upon himself.
I would suggest that this man is delusional at best, and an accomplished liar at worst. He does a real injustice to the REAL veterans who risked life and limb in the service of their country.

2750. LPFM Application Info...

NEW: Pay 50% now, 50% after filing! You won't get THESE arrangements anywhere else!

We'll NEVER throw you that tired old line which states: "Payment in full must be received BEFORE services will be performed..."!

We are now accepting applicants for the second LPFM filing window. We will only accept a limited number of applicants for the second LPFM filing window. To be one of the clients for the second filing window (Connecticut, Illinois, Kansas, Michigan, Minnesota, Mississippi, Nevada, New Hampshire, Puerto Rico, Virginia, Wyoming), go to our credit card acceptance page or contact us by whatever method you prefer from our contact page.

Some lessons soon to be learned by LPFM applicants: At LEAST four of the applications which will be returned as "flawed" are from applicants who assured me, personally, that they "can file this application without having to pay for any technical help"... Looks like they fell into an NAB sponsored(?) "dis-information" trap...

True !

So the tape must be a FAKE right ?
But Ms. Valentine told us in "Waco Suits for Waco Suckers"

http://www.public-action.com/SkyWriter/WacoMuseum/burial/page/b_wsws.html

That the Davidian's, their attorneys (Including Ramsey Clark etc) the
US, and the judge were all in this together to defraud the US Treasury
right ? But why would they make a FAKE tape and lose the chance to
defraud the Treasury ?

So the tape must be ACTUAL correct ? But why would the above submit an
ACTUAL tape when they knew that could lose the case for them ?

So the tape is neither ACTUAL nor a FAKE ;-) ... Call it Valentine's
paradox.

Hello
I am new to ham radio . What a mistake . I thought it would be a good experience but what a bunch of old farts and low lifes that have nothing of any importance to say at all. I went to Dayton for the first time with 11 guys in a van. I thought it might be a good experience. What a bunch of immature old men. One guy thought it was funny to keep farting in the van and then he would laugh like a 14 year old who farted in class. Field day was it for me. My wife agreed to go with me and she brought a girlfriend They laughed at me all that night for socializing with OLD FARTS

Altho i have no idea who the person you refer to is and what he has said i take extreme exception to your generalized comment about Naval Reservists. My father was in the naval reserve and i am just as proud of that fact as i am of all the other fighting men (and women) that maintain our freedom. Please dont lump everyone together under one heading.

And once again, the discussion was about doing radar on HAM frequencies,
NOT on any other frequency allotment.

Have a look at http://www.gilat.com/gilat/
2 way internet service via satellite, should be available through your local
DishNetwork dealer in September. $39.95 a month for unlimited service. Not
sure what the subscriber equipment will cost yet.

Aaron, you can't seem to be able to separate a cell phone from other stuff in the car. When a person is talking on a cell phone, they are concentrating both on trying to understand what the other person is saying (because of poor sound quality, static, and others) and trying to participate in the actual conversation.

This takes a considerable amount of attention. I know. I've tried to use a cell phone in a car before and found it extremely distracting. There is no way to listen carefully to the caller, participate in the conversation, and drive with even reasonable amount of attention to the road.

Because of that, I don't use a cell phone in the car anymore - I use my radio instead. From personal experience, I have found that the radio is far less distracting. Because I can turn up the volume, and the sound quality is generally better, I don't have to concentrate so hard at understanding what is being said.

In addition, I've found the conversation to be far more short, and more to the point with radio. Unlike the cell phone user, who often spends time gossiping, talking about what the kids had for breakfast, discussing business deals, or other nonsense, conversations on the radio are often far less involved (Hi, I'm on my way home. Be there soon. Okay? Catch you later.).

Other stuff in the car is also less distracting. The stereo has big buttons for changing memorized channels. The controls on the dashboard are large and easily worked (unlike a cell phone with the tiny buttons). And conversations with passengers don't require dedicated effort to participate. In other words, none of these items should distract the average driver like a cell phone does.

Anyway, I support the cell phone bans. I think they're reasonable and wise.

2770. Please help me identify the source of RF interference in AM band from a perpetual data transmission

Newsgroup: rec.radio.amateur.misc
Date: 2000-07-16 00:00:00 UTC
From: no spam <nospam@no.spam.org>
Message-ID: <cCuc5.1735$K04.1118386@typhoon.snet.net>
Source record: 107090
Cross-posted to: comp.dcom.modems.cable,comp.dcom.xdsl,sci.electronics.design,rec.radio.amateur.misc

Went home this weekend to my parents to find them complaining that every AM radio
in the house was useless.

As a amatuer radio operator and electrical engineer, I still don't have enough information
to figure out who to call.

We have something that sounds like high speed data with peaks at 550Khz 650KHz 750Khz
then fades. Signal is perpetual, its not likely a ham transmitter. Sounds like there is a constant basic frame time of 2-4 seconds. There are no other transmitters in this residential area. Nothing at 1054 khz.

I took a battery radio and held it up to the incoming phone line. Signal wiped out the receiver.
I then held the radio up to the cable TV line. Signal wiped out the receiver.

They ran new phone lines and cable lines coincidentally through the neighborhood just prior to the start of the interference. Right on the nearest telephone pole there is a tap into the cable
from which individual house feeds are taken. Right next to it is some kind of phone company
splice. Its a box about 4 inches * 24 inches and individual house feeds are tapped off this as
well. And both companies are starting to advertise dsl and cable modems for the area.

Is this a DSL signature or a Cable modem signature? Im kinda leaning against DSL cause its
supposed to be balanced. If the cable company does not use AM band, is it possible
that the tap is active device creating interference in the AM band.

Hopefully some one has seen this and can share the info.

Thanks.

Aaron, Jones wrote:
>
> Would you like to ride on that road with someone driving and eating a
> hamburger?

Never seen anyone with a hamburger stuck in their ear trying to hear what is being said, trying to carry on a conversation through it, or trying to dial a phone number with the tiny buttons. A person can chew a hamburger without being a threat to other drivers. In other words, these (cell phone and hamburger) are not equal.

> Talking on his 2 meter rig?

A radio has a volume control, so the person is not straining so hard to hear the other caller. Nor are the conversations so involved (gossip, business deals, etc.). Most radio conversations are casual, requiring only a casual effort to participate. Again, these (cell phone and radio) are not equal.

> Looking for his cigarettes?

It only requires two fingers to hold a cigarette. And again, most people don't stick them in the ear trying to carry on a conversation. So, again, these (cell phone and cigarette) are not equal.

But, I know you're going to try to come up with a thousand examples of how these (eating, radio, cigarettes, etc) are equal to a cell phone. And I'm sure there are bad examples of each of these. But, you're wasting your time. Trying to excuse bad cell phone users by pointing at other bad drivers is not the way to win support. In other words, that is no reason to stop these cell phone laws - only a reason to pass more laws to affect those others things as well. Think about it.

You're right, Dwight. Hams don't try to understand each other and
rarely participate in an actual informational conversation. :-)

From: gbowne <gbowne@email.msn.com>
Message-ID: <OPp38g67$GA.283@cpmsnbbsa09>
Source record: 107094

I have an interesting chance to purchase some nice RCA AM transmitters from the 1940's to 1950's (and possibly earlier) in various stages of completeness very, very cheaply before they are broken up for parts and surplus.

First of all, does anyone know what models were made in that era and can give me the numbers and data?

I need manuals ; i.e. ; Parts, service, mainenance, owners, installation, etc.

Are original parts and tubes still available? If anyone has anything that will work with these transmitters email me with what you have and prices.

They will be made to go back on air by a local non profit AM radio station.

Thanks,

TRUTH has been around since the beginning of time. Why haven't we
discovered it all yet ? The _logic_ isn't there yet it's still
unfolding / being developed. Therefore logic is *NOT* necessarily
truth as Doc pointed out to you. A pathway or related yes, equals no.

Darmed well said, Dwight. Thanks for backing me up.
For instance, ALL of the USAF's heavy lifting
capability is in the Reserve. That's right, the C5A is
flown by citizen-airmen. And did you know that 70% of
the Army's medical assets are in the Reserves? (It may
be more now, I left the Army Reserve in 1998.)

>Warfare is a dangerious game. At times, training for
war

Quite possible they were *well* aware of Koresh's prior gunfight and
armaments and weren't exactly willing to stick their neck(s) out. You
be the *first* to make statements concerning child sex to the
authorities about that Drug Gang down the street ?

>
>The one surviving record of Koresh's own words on this subject is a 1992

>own picture of reality?

Neither, I find the idea of Koresh and company spending 51 days in
their compound after 4 ATF agents have been shot to be a bit
'strange.' And quite fitting with the rest of their behaviors. As far
as Koresh and the adults go I couldn't care less, my concern is that
the SOB didn't order the children out.

Source record: 107143

The Radiosigs-Meister fears that ..
>Hillary would HURT Gore's chances.

Right again, as usual, Sigster-Dude. You're always on target. Sad to say, Mrs. Rodham-Finklestein has stepped in a bucket of schmuck lately. She called President Rodham-Clinton's 1974 campaign manager a "f***** Jew bastard". Read all about it in the Times of London:
http://www.sunday-times.co.uk/news/pages/sti/2000/07/16/stifgnusa02007.html
http://www.sunday-times.co.uk/news/pages/sti/2000/07/16/stifgnusa03008.html

Naturally, Mrs. Rodham-Finklestein has already rushed forward to "deny, deny, deny", but the Jewish voters in New York ain't buyin' none of it.

The victim of the comment is sticking to his story. And they're listening to HIM not her. For now anyway. Maybe President Rodham-Clinton will lend Mrs. Rodham-Finklestein some of his Teflon.

Ok .. here comes Chipster to set us straight. Let's see .. the Times of London got the story from either http://www.drudgereport.com or http://www.national-enquirer.barf
And the guy who wrote the book got the story from a right-wing web page about Waco.

Be that as it may, it looks like Mrs. Rodham-Finklestein is in deep schmuck in her run for US Senate. Hey, maybe this is a blessing in disguise. Maybe they'll toss her outa the Senate race and then Vice President Gore can ask her to be his running mate after all.

Picture the bumper stickers.
"Gore / Rodham-Finklestein 2000".
I like it. Has a real nice ring. Better'n
"Dub-Yah for Prez" ... ain't it?

Obviously, I cannot speak for you. But I can speak authoritatively as a ham for nearly 50 years.

To me, the beauty of the hobby/service is the spectrum we have the privilege of using--20 meter SSB specifically. Here you can aim for the ionosphere, leaping and landing everywhere on earth. In what other endeavor can you erect a tall tower on your own property, topping it with a state-of-the-art antenna, such as the incomparable Sommer?

I am surely an "old geezer," having started in 1952 at 13. Yes, ham radio is indeed graying because of the escalating computer revolution. But drawing negative inferences from this fact is mistake. After all, aging is a natural process; and, like the non-ham community, ham radio cannot be stereotyped strictly from the conduct of some.

See me as a person, not a statistic.

..yes, the dayside propagation was dead, dead, dead yesterday.
I wonder if it will be just as adversely affected today
(Sunday)? What's really disappointing, though, is that any
visible aurora that might have ocurred was completely obscured
by the overcast conditions last night, here in the Northeast.
This was also what happened with the last solar belch a few
weeks ago.

In response to the marine.transport question i'll post this story for a friend.

My friend often goes sailing on Lake Michigan but since he's a network tech for an internet company, he needs to be online if at all possible. He's a Licenced Amateur Radio Operator so he fastens an antenna to the top of the mast, rigs his radio and TNC (the radio equivelant of a modem) to the notebook computer and runs a whopping 1200 baud using a ip-like protocol designed for radio. He connects to his home computer (also connected to his home radio) which is on a dedicated internet connection.

Needless to say he doesnt get pages downloaded in 2 seconds. But he does have full access to the internet. He has several times talked to me on ICQ and IRC from the middle of lake michigan.

Yeah, so? Who said anything about "designated radar frequencies"?

The 13 cm and above bands I was referring to are HAM bands. What would the
police be doing on HAM bands?

<rest snipped>

Tell me what else you would do with mode K0N. Part 97 also addresses "other
one way transmissions" and experimentation.

In any case, I can see this is a pointless arguement.

If anyone is REALLY concerned, they can write a letter to the FCC and ask if
they can transmit mode K0N (already authorized) on the 13 cm and up bands for
the express purpose of investigating radar techniques.

Sounds like a gun control argument, Dwight. Did the cell phone stick
its antenna in her eye or what? Inanimate objects cannot cause anything.
I'm sorry that the lady went over the side but the obvious cause was her
own stupidity and/or negligence. When are we going to return to the days
when people were responsible for their own actions?

It's part of the 'Conspiracy' don't you know ?

(I found the below on another newsgroup and just *had* to share it
with you ;-))

All jurors are in on the Big Conspiracy.

All judges are in on the Big Conspiracy.

All the Press is in on the Big Conspiracy.

Clinton and Gore are in on the Big Conspiracy.

All three arson experts hired by the govt are in on the Big
Conspiracy.

The British firm analyzing the infrared is in on the Big Conspiracy.

Reno is in on the Big Conspiracy.

The jurors in the San Antonio trial of the Davidians were in on the
Big Conspiracy.

The Teletubbies are no doubt also in on the Big Conspiracy.

Everyone here knows that.

>Stalin would be proud.

He is in on the Big Conspiracy too.

The whole world, other than the Waco Wackos, are in on the Big Conspiracy.

It is all just a great big CONSPIRACY TO MAKE US LOOK INSANE!!!!!

>, I just found it on the article on the British media page.

Sigh. Where to begin?

First of all, you shouldn't be kissing up to the ageists. They are just mindless idiots who happen to be amateur radio operators.

Anyone who bases his / her opinion of another based on age is no different than a racist. They need to be recognized as such and vilified as such.

And it works in both directions. People who are younger than the local norm typically are discriminated against too. So youth is no protection; trust me. Try being the youngest supervisor in your company and see how you are routinely ignored by the older supervisors at meetings.

People who exhibit their ignorance by using terms like "old farts" are no different than people who say "nigger". They are damned idiots who should be identified as such.

So instead of saying "we old geezers can be good guys", tell those guys "screw you!" That, they may understand, because it's within their limited mentality.

Mumble, mumble ...

Well actually I was Active Duty my first enlistment from 1979-1984. That is when I earned my Navy and Armed Forces Expeditionary medals, Presidential and Meritorious Unit Citations, and various others. I received my first Honorable discharge from that enlistment in 1985. I then re-enlisted in the Naval Reserves for eight years, wher I earned a Humanitarian medal and others while digging survivors out of the I-880 Cyprus Structure in Oakland Ca. after the 1989 Loma Prieta earthquake. I received my second Honorable discharge for this enlistment in 1993. So how many do you have, gutless COTSE puke anon that started this stupid thread? My two honorable discharges can also be seen at http://www.qsl.net/kd4cdb Now run along anon and send me more magazine subscriptions, send me more anon death threats, and fake some more tapes for Hollingsworth. YOUR time will come, sooner than you think.

Already done Mr. Wolf. Astronomy, Aviation Week, Maxim, and several other magazines have been sent to my house with obscene variations of my surname. When I called the subscription numbers to these mags they gladly forwarded me the subscription cards. All of them had illiterate scrawl and the same postmark: Pittsburgh, Pa. which by a remarkable coincidence handles all the mail from the panhandle of West Virginia. Right now we are looking at 30 counts of mail fraud for the clown, the Postal Inspectors are on it. Each count punishable up to a 10,000$ fine and up to ten years in a Federal Prison. The idiot would have been better off just buying the mag and sending it to me in a manila envelope with the harassing name printed on it. But of course, that would take money, and when you are unemployed, living with mama, and spend 24/7 insulting hams in the newsgroups and conspiring with others how to submit perjured info to the FCC, cash flow is a problem. The simpleton needs to be in here flaming away, I doubt his up coming cell will come equipped with a data port.

I know one friend the hatemonger has: Riley Hollingsworth. I would say they are reaaaaallllll close. 10,000 hateful posts, and Hollingsworth likes the guy enough to discuss confidential enforcement investigations with him. Riley even knows about the mail fraud investigation, but the Special Counsel for Amateur Radio Enforcement and the hatemonger KC8JBO are still two peas in a pod. Sad but true. More on this as the investigations unfold.

My new friend Chipster reminds me ..
>now that you're one of us how about a bit more support for Big Al ?

I'm right here, Chipster-Dude. Posted a biggie this am on how Vice President Gore may yet have a chance to get Mrs. Rodham-Finklestein as a running mate.

That ticket should trash Dub-Yah for good. The mere thought of that ticket could have both Dub-Yah and Nader on a tramp steamer to Tim-Buc-Too. Running for their lives. Hey .. maybe they could get jobs as day laborers at the new Occidental drilling site.

Chipster further inquires:
>Have you forgotten your lines already ??

Oh .. you want lines? Ok .. here ..

I sure hope Vice President Gore makes a roaring come-back in the polls.
I don't think Mrs. Rodham-Finklestein made that comment about Mr. Fray.
I think the middle class should pay more taxes.
I think the Great Society programs have been remarkably cost-effective in reducing poverty in this country.
I'm sure glad President Rodham-Clinton was a planned and wanted child.
Those darned Republicans .. all they think about is their rich friends.
Rush Limbaugh should be banned from radio.
I bet there's lots of skeletons in Rick Lazio's closet. I bet it was him and not Mrs. Rodham-Finklestein who called Mr. Fray a "f***** Jew bastard" back in 1974.
I think all NRA members should have their doors kicked in by the ATF. Whether they own guns or not.
I think it was great that the jury found the ATF innocent at Waco.
He did NOT have sex with that woman - Miss Lewinski.
He was NOT fund-raising at that Buddhist Temple.
I think General Reno should send army tanks to blow up churches more often.

There, Chipster-Guy .. how's that for lines?
Let's close with this ..
Gore / Rodham-Finklestein 2000 ..

...but that's not "for the advancement of the communications art" (which is one
of the purposes of amateur radio). Granted that experimentation (by itself)
is, but I bet that you will find that this involves experimentation regarding
communication modes, of which radar is not.

Great, except I think he should have Bill Clinton as his VP ..
Clinton can't run for reelection but IIRC I don't think ?? There's
anything stopping him from becoming Vice President. ;-)

Snip:

No no no, those were your old lines, here's your new ones (with some
additions) . Gotta keep reminding you.

All jurors are in on the Big Conspiracy.

All judges are in on the Big Conspiracy.

All the Press is in on the Big Conspiracy.

Clinton and Gore are in on the Big Conspiracy.

Hillary, Chelsea and Tipper Gore and in on the Big Conspiracy.

All three arson experts hired by the govt are in on the Big
Conspiracy.

The British firm analyzing the infrared is in on the Big Conspiracy.

Reno is in on the Big Conspiracy.

The jurors in the San Antonio trial of the Davidians were in on the Big Conspiracy.

(New ones)

The FBI is in on the Big Conspiracy. (natch)

The ATF is in on the Big Conspiracy. (natch)

The Pentagon is in on the Big Conspiracy.

All the Armed Services are in on the Big Conspiracy.

Ramsey Clark is in on the Big Conspiracy.

Vince Foster was in on the Big Conspiracy

Ron Brown was in on the Big Conspiracy.

JFK Jr, was in on the Big Conspiracy.

The DAVIDIANS are in on the Big Conspiracy.

ZOG is in on the Big Conspiracy.

The Illuminati is in on the Big Conspiracy.

The UN is in on the Big Conspiracy.

The Anti-Missle system is part of the Big Conspiracy,

The Teletubbies are no doubt also in on the Big Conspiracy.

Everyone here knows that.

>Stalin would be proud.
>
He is in on the Big Conspiracy too.

The whole world, other than the Waco Wackos, are in on the Big Conspiracy.

It is all just a great big CONSPIRACY TO MAKE US LOOK INSANE!!!!!

Let's close with this:

Gore - (Bill) Clinton in 2000 ;-)

Just spoke to a couple other hams in other states. They are requesting cards as well and one already has several from the same Pittsburgh PO. I would say increase the counts previously mentioned and now the scope of the investigation has gone country-wide. It looks to me like Riley's friend is going to be nailed in a country wide mail fraud scheme. And that is just the tip of the iceberg. I sure wish our Government officials would keep better company. You know what they say, Wish in one hand and...

Chipster is my hero ..
>No no no, those were your old lines, here's your new ones (with some
>additions) . Gotta keep reminding you.

Ok, Boss, I admit I need some new material. And yours is better. But you left out a few ..

David J. Smith is part of the conspiracy.
"Prophet" Stair is part of the conspiracy.
Pat Robertson is part of the conspiracy.
Jerry Falwell is part of the conspiracy.
Jesse Helms is part of the conspiracy.

10-4 on President Rodham-Clinton being a good choice for Vice President. Then he could give President Gore a one-way ticket on the train to Mena and, that woman - Miss Lewinski, could give him a nice warm welcome back to the oval office.

President Rodham-Clinton is probably way ahead of us on the possibilities. I bet he already has a box of cigars ready for the office warming party.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1JN, K1XN, N2OO, WB2YQH/WB2RAJ & THE 59(9) DX REPORT, W3UR & The Daily DX, K4VUD, N6HR, K7BV, K8YSE, NR8U, WB8YJF, CU3AN, EA4ATI, F5LMJ, F6AJA & Les Nouvelles, G3NUG, GI0TJJ, GU0SUP, HL1TXQ, IK1QBT, IK0YVV, JT1CD, LA9VDA, PA5ET, PP5LL, PS7AB, PY2TNT, SM3CVM, UA6AF, UT5UGR, VK3DYL, VK8AM and YO3JW for the following DX information.

" DX IS (???) "..... Is what? (Update). Your editor was very impressed with the responses received last week to the question below. Most of the answers were to the point, some witty and some dissatisfied that I chose to seek the true meaning of "DX IS". Anyway, keep your inputs coming. For those who missed it last week, here it is again:
DX IS ..... We hear this incomplete sentence all the time. Well, here is your chance to finish the sentence or explain what this phrase means. Your editor is working on a project and would like your input. If the response and input is good, I (editor) will put something in print in the future. So, send to your editor the completed phrase/sentence in two to three lines only (if longer, the delete key will be used) at:
kb8nw@barf80.nshore.org

3B8, MAURITIUS. After 4 years for the conversion of his French Ham licence, Piero is now officially "3B8GO" with a Mauritian Ham Licence. No QSNs have been reported with his new callsign, but check out his Web page at:
http://pages.intnet.mu/ingepru

3W, VIETNAM. Jani, YB0US (ex-3W6US), is now active as 3W2US due to the district changes in Vietnam. He was heard this past week on 20 meters CW/RTTY on 14083 and 14245 (DX Net) between 1300 and 1500z. QSL via N2OO, PO BOX 345, Tuckerton, NJ 08087 USA. Also, active this past week was Hans, WA1LWS, as 3W2LWS, on 20 meters CW (1330-1600z). He will be there until July 30th.

A5, BHUTAN. Gerard, F2VX, President of the Clipperton DX Club (CDXC), reports that their project is now "on the road". They will fly from Paris to Bangkok/Timphu on September 1st and return on the 15th. The team consists

of: F6ANA/Alain, F6HWU/Denise (YL), F5LMJ/Alain, F5MBO/G0LMX/Vincent, FH/TU5AX/Christian and F2VX/Gerard. They will travel with five tranceiver: 2 Kenwood TS50, 2 Icom IC706 and 1 Yaesu FT757. They have the authorization of the MOC to use one of the A52A antennass (a Cushcraft triband A3S). Also, they will have verticals and dipoles for the other bands and the WARCs. Power is still limited to 100 watts. They ask the DX community to help them with their project. Since the past 20's years, the CDXC has sponsored many international DXpeditions, for other DX Club from all around the world. They hope some clubs or associations could help them. The cost for this "A5" activity with travel, staying in A5 and licence is around 23 000 F (or 3400 USD) for each operator! The QSL manager will be F8RZ (Jean). All the team's members are both member of the Clipperton DX Club and REF-Union.

AX8, AUSTRALIA. Steve, AX8AM, will be operating as AX8AM, mainly on CW, from Darwin Northern Territory until November 2nd. He has been spotted on the 20 meters CW as early as 0630z and as late as 1300z. Also, check 40 meters around 1230z. QSL via VK8AM, Steve Salvia, 1 Elliott Point, Larrakeyah, NT 0820, Australia.

CARIBBEAN TOUR 2000. The Low Land DXpedition Team (LLDXT) is proud to announce this year's Caribbean Tour 2000 which will take place in August and September. The will be active from the beautiful islands of Antigua and Barbados. This year's team members are Ronald/PA3EWP, Peter/PA4EA, Rob/PA5ET and Dennis/PA7FM. Activity is scheduled as follows:
Antigua - August 11-24th, callsigns V26WP, V26EA, V26ET and V26FM.
Barbados - August 24th through September 4th, callsigns unknown until arrival.
There will be two HF stations (160-10 meters) active around the clock on the modes CW, SSB, RTTY and PSK31. As other years, on-line logs will be available during the tour as well the tour diary and digital photos. Alex, PA1AW, will be their Web master and will send out mailings with up-to-date information. The guestbook will be forwarded to the team on a daily basis. Also, 6 meters will be activated on a low profile, the grids are as follows: V2 - FK97, 8P - GK03. The team will be active in the WAE CW contest and SART and SCC RTTY contest. A Caribbean Tour 2000 web site has been setup on the LLDXT Home site which is fully operational now at:
http://www.qsl.net/lldxt/v2_8p_2000/index.html
The aim is to focus again on Europe and Japan and especially on the WARC bands. Because they will operate from two excellent sites, they also expect to work a lot on topband. The QSL manager for this tour will be Rob, PA5ET (ex PA3ERC): Rob Snieder, Van Leeuwenstraat 137, 2273 VS, Voorburg, The Netherlands.

F, FRANCE (Island DXpedition). Look for Marc, F6HQP, to be active as F6HQP/P from some island in the Gulf of Morbihan. These islands do not count for the IOTA award, but they do count for the DIFM award. His activity will take place between August 1-12st.

FM, MARTINIQUE. Gerard, F2JD (ex-PY2ZDX, HK3JBR, HP1XBI etc...), will be active as FM/F2JD from early August for 4 months. He will be active on SSB and CW as usual. During this period he will try to be active from some

other islands in the Caribbean Sea.

FY, FRENCH GUIANA. Laurent, F5AEG, will be active as FY/F5AEG from August 8th through the 22th. His activity will be will on 10, 15 and 20 meters SSB.

IOTA NEWS.....
NEWS -- Heorhei, UY5XE, reports that the results of the EM5UIA activity from the following IOTAs is as follows:
EU-180 (For UIA BS-12) [Lebyazh'yi Island]: July 2-4th (1128-0459z - 43 hours); 4500 QSOs, 96 entities (Ops: UR5LCV, UT8LL, UY1LA, UY5XE)
EU-179 (For UIA BS-08) [Kalanchakskiye Island]: July 5-6th (1143-0352z - 15 hours); 1700 QSOs, 57 entities (Ops: UR5LCV, UT8LL, UY5XE)
EU-182 (For UIA DU-01) [Poludennyi Island]: July 7-8th (0833-0825z - 24 hours); 2400 QSOs, 74 entities (Ops: UR5LCV, UT8LL, UY5XE)

AS-NEW. A Group of UA6s plans to activate NEW IOTA reference in the Black Sea Coast Group (Sudzhuk Island). They are going to use the callsign UE6AAA. Activity will be July 22-23rd. QSL either via the bureau or direct to UA6AF (Victor Kravchenko, PO Box 33, Novorossiysk-22, 353922 RUSSIA). Please do not enclose "green stamps"... IRC is enough for direct reply.

AS-041. Takeshi "TAKE", JI3DST, will operate from Oki Archipelago (Oki-Gun Shimane) from 0800z July 28th through 0200z July 31st and 0800z August 6th through 0200z August 15th. His callsign will be JI3DST/4. Activity will be on 40/15/10/6 meters SSB. For the IOTA Contest look for him on 40/15/10 meters. QSL via the JARL Bureau or direct to: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN (Please do not send USD).

AS-085. Look for Duk-Nam/HL1OYF, Phil/HL1TXQ and Park/DS1CJE to be active from Soan Islands (located in the Chunranam-do Islands) on July 28-30th. Their callsigns will be HL1OYF/4, HL1TXQ/4 and DS1CJE/4. They will be active during the IOTA contest CW/SSB on 40/20/15/10 meters. They plan to bring 2 transceivers and 4 element beam antennas. QSL via HL1OYF (Duk-Nam Kim, P.O.Box, Dong-Jack, Seoul 156-600, Korea) or via homecall's CBA.

EU-008. Bill, M0BNN, will be active from the Isle of Skye between July 24th and August 2nd as MM0BNN/P. His modes and bands were not reported. QSL via homecall.

EU-052. Gerard, F2VX, will be active as SV8/F2VX from July 29th to August 13th from Kefalonia Island.

EU-077. Dani, EA4ATI, will take part in the 2000 IOTA Contest from Sisargas Island with the callsign EA4ATI/1 (category Single Op SSB, only 12 hours). QSL via direct or bureau to his home

callsign.

EU-079. Trond, LA9VDA, will be active as LA9VDA/P from Runoy Island (Soroyane) August 20-21st. Activity will be on the usual IOTA frequencies 40-10 meters. Look for LC3NAT to be active on 2 and 6 meters from JP22 grid square. QSL to home callsigns. For more information, check the Web page at: http://home.online.no/~la7sl/la9vda/

EU-083. Operators Tony/IK1QBT, Nino/IK1ZOZ, Vincenzo/IK1YEK and Gianni/IZ1DFI will be active from Bergeggi Island (Ligurian Group) from 0700-1900z on July 30th. Operators will sign homecall/P and activity will be on all HF bands SSB/CW (WARC included) around the standard IOTA frequencies. There will also be activity on 6 meters, CW and SSB. Tony, IK1QBT/p, will participate as a Single Op/Low Power entry in the IOTA Contest. Reference number of Bergeggi Island for the Italian Island Award (IIA) is SV-02. QSL cards via their respective home callsign, bureau or direct CBA.

EU-122. Ernie and Jim will sign GI0GDF/P and GI0PGC/P respectively from Rathlin Island now through Wednesday, July 19th. They will try to operate on all the usual HF bands. QSL to their home callsign.

EU-175. Look for members of the Graciosa Island Radio Association to use the callsign CU4ARG to activate Praia Island near Graciosa Island. Operators will be CU4AH, CU3AN and CU3DJ. Activity will be from August 5-6th on 80-10 meters SSB. QSL via CU3AN.

EU-183. Pit, YO3JW, was recently active from Sacalinu Mare Island last weekend as YP1W for 12 hours on July 8th, running only 40 watts (powered by batteries) into an inverted V for 14 and 21 MHz. He plans to go back during the period of July 23-30th for three days and may enter the IOTA Contest as a low power station. He states that EU-183 is a natural wild life reservation (like Navassa Island) and is very difficult to receive permission to operate on. QSL to YO3JW.

NA-062. Jon/WB8YJF and Jim/NM8O will be active from Conch Key, FL (USI FL-066S) from July 28-31th. Activity will be on all modes, 40-10 meters. They will be active in the RSGB IOTA Contest as a Multi-Multi (2 xmtr, 2 ops) entry. Also, look for them to be active on RTTY before and after the contest. QSL via home callsigns.

NA-075. Elsie/N7WDX and Hillar/N6HR want to remind everyone that they will be active from Galiano Island of the Southern Gulf Islands, British Columbia during the IOTA Contest. The callsign will be VE7DX/7. Weather permitting, they hope to be on the air before the contest beaming Europe.

SA-NEW. A group of Brazilian operators consisting of PP5, PY5 and
PY2 operators will activate the South Catarina South Group
on August 2nd (beginning after 1800z on 20 or 15 or 10 meters)
through August 7 at 1200z. Activity will be on CW/SSB on all
bands including the WARC bands, 2m, 6m and 160m. Their callsign
will be PV5IOTA. QSL via PP5LL.

SA-028. Operators Anderson/PY2TNT, David/PY2DCE, Adriano/PY2AHX,
Andres/PY2XIS and Alex/PY2RAZ will be operating as ZW2I from
S. Sebastiao Island (DIB 016) July 27-30th in the RSGB IOTA
Contest. QSL via direct to: Anderson Serevincis, P.O.Box 2605,
Mogi das Cruzes - S.P. - Brazil - CEP- 08780-990 or via Bureau.

SA-046. Operators PR7SD, PR7SM, PR7FB and PR7AR will activate Itamaraca
Island (also Orange Fort) (DIB 18, DFH PE 01) July 29-30th as
ZV7I. Activity will be on CW/SSB 40, 20, 15 and 10 meters. QSL
via PR7SD, Manoel - POB 008, Joao Pessoa-PB, 58001-970, Brasil.

SA-059. Ray, DL2GG/YV5, reports that the DXpedition to Los Frailes in
the Caribbean Sea had to be cancelled because of logistic
problems for the "YV Navy". He will announce the next schedule
soon. Right now it seems that the DXpedition will take place
in August.

IS0, SARDINIA. Marco, IK0YVV, will be active now through July 31st
signing IS0/IK0YVV. He will be active in the IOTA Contest as Single Op
on CW ONLY. The QSL is OK via home callsign or the ARI Bureau.

JW, SVALBARD. Look for YL Unni, LA6RHA, to operate as JW6RHA from July 21st
through the 26th. Unni will only operate 20 meters and will probably use
the frequencies of 14222-14248 or 14288 kHz in the mornings and late
evenings. QSL to her home address: Unni Gran, Mellomaasvn.128,
N-1414 Trollaasen, Norway.

NEW ELECTED OFFICIALS. The following committee was elected on July 1st
to serve until June 30, 2001, as Chiltern DX Club (CDXC) officials:
President - Bob Whelan G3PJT Secretary - Shaun Jarvis M0BJL
Chairman - Neville Cheadle G3NUG Treasurer - Barry Cooper G4RKO
Vice Chairman- Mike Devereux G3SED Member - John Butcher G3LAS
Digest Editor- Don Field G3XTT Member - Ian Capon G0KRL

NEW "GOLIST" WEB DOMAIN. John Shelton, K1XN, reports that the Golist has a
new Web domain at: http://www.golist.net
Also, new are John's and the GOLIST's E-mail addresses which are:
golist@golist.net --- and --- k1xn@golist.net
The Golist is also the world distributor for "DXTelnet" program for DXers
and Sysops. Visit the Web site's products page for descriptions and use
the order form to make purchases.

QSL INFO AND NEWS...........
A52JS QSL Bureau cards. Jim, VK9NS, now confirms that arrangements have
been made to handle Bureau QSL cards for the recent A52JS operation.
Cards should be sent to A52JS via M0BJI at the RSGB QSL Bureau only.
No other route will work or at least Jim cannot guarantee it. OPDX

InterNet Subscribers will receive the complete press release by Jim as an additional bulletin.

Charly, K4VUD, who operated as XW1UD, is still in the process of supplying the ARRL DXCC Desk with all the documentation (permission papers, photos, Laos visa, etc...) it wants to accept his XW1UD operation from last December. He is currently getting some papers translated into English. More details will be forthcoming, and Charly states to hold onto those XW1UD QSL cards you may have pending the outcome of this activity.

Dennis, K7BV, has returned from his European trip. He made a few hundred DL/K7BV QSOs 50 km from Frankfurt at the QTH of the newest CQ Hall of Fame inductee Walter, DJ6QT. His next stop was in Crete where over 2,500 CW QSOs were logged with a heavy emphasis on the WARC bands from the beachside QTH of Manos, SV9ANJ. A few hundred more QSOs were made as S5/K7BV from the mountain cottage of S57U and S57KAA - the site of the S566Z callsign used by Dennis and his teammate Ralph K9ZO in WRTC 2000 July 8-9th. QSL all via Steve KU9C.

Bob, NR8U, the "O" QSL Manager for the ARRL 8th Area Incoming QSL Bureau, states that N8OW is not the QSL Manager for VQ9TW. In addition, VQ9TW appears to be a pirate operation as no information could be found from various internet sources on the callsign. Cards have been coming into the Bureau with N8OW listed as the QSL Manager for the period of 1992 through late 1994. Most claimed the operation was on 15m sideband with some CW contacts during the period.

QSL the following Mongolian stations to their respective QSL routes:
JT1FCY via I1QOD JT1FDA via KO6UW
JT1FCZ via I1ZB JT1FDB via DL2ECW

Phil, GU0SUP, informs OPDX that there is a GOOD, accurate, on-line callbook for all GU/MU/2U callsigns. It is on the site of the Guernsey Amateur Radio Society, and the precise URL is:
http://www.gars.org.gg/calls.html

Special QSL and photo of the WRTC Ukraine Team (callsign S548X) is available via UT5UGR (Dimitry Stashuk, P.O. Box 115, Kiev-147, 02147, Ukraine). QSLs of S5/UT5UGR and S5/UU2JZ are available also via UT5UGR.

QSL ZY3PEI via PY3MHZ. Activity was from the Itapoan State Reserve to celebrate the 27th aniversary of the Reserve. Reference numbers mentioned are: DFH RS 05 and DFB RS 15

QSL info for special event station W1S, OP SAIL 2000, New London, CT, active July 12-15th is as follows: QSLs will be automatically sent via the bureau for DX stations. Stateside and DX direct requests send SASE to K1JN.

SI9, SWEDEN (Attention Prefix Hunters!). Injuction with "King Chulalongkorn Day", the new "Visiting Station in Sweden", SI9AM, will officially be opened July 19th around 0900-1000z at the permanent QTH Utanede near the King

Chulalongkorn Memorial Building (Grid Locator is JP82iw). Special HF activities will take place until July 23rd, at 1700z. QSL via SM3CVM, bureau or CBA. After July 23rd, visiting operators are welcome to use SI9AM. The prefix is very rare and SI9AM is the only station in Sweden using the SI9 prefix! For more information, send E-mail to " si9am@qsl.net " or check the Web page at: http://www.qsl.net/si9am

TK, CORSICA. "The 59(9) DX Report" reports that Serge, F6AUS, is active as TK/F6AUS until July 31st. OPDX has found that Serge was active on 15 meters RTTY last weekend between 1400 and 1500z. He will try to be active from EU-100 or EU-164 in IOTA Contest.

ZK1, SOUTH COOK ISLANDS. After operating on Penrhyn in the North Cook Islands, Gerard, PA3AXU/ZK1AXU, has returned to Rarotonga in the South Cook Islands and will be active until July 20th. Over the past weekend, he was heard on 20 meters SSB between 0730 and 1200z. He was also on 40 meters CW working JAs 1015z. QSL via PA3AXU.

Since the police are restricted to such a TINY portion of the assigned
RADAR frequencies why would transmissions on any of the many RADAR bands
interfere with police?

As it happens the gendarme radar guns are located right outside the amateur freqs and have all the selectivity of a barn door in any case. It was possible, and was done in the past, to transmit within the ham band with an FM tone (31.5 hz per mph sticks in my mind but don't bet on it) and make the gun read anything you want. This is not as great an idea as it sounds for two reasons:

a) you will forget and get tagged for 55 in a 25.

b) you will set off every radar detector for miles and bring hiway traffic to a crawl.

The capture effect with doppler radar means that the strongest echo wins, not necessarily the one you are pointed at. This is how the politzi clock 80 mph cows. The nature of the beast also means that one cannot tell going away from coming toward so that big stainless reflector being towed down the road may be the reason you got ticketed. Laser is one hell of an improvement and is a bit less likely to cause shriveled nuts.

Be real careful with microwave. Learn about it and the next time some bozo clocks your kid at a Little League game with his handy-dandy gun, you will arrange for him to be wearing it around his ears.

Yes indeed, I am well aware of Hillary's statement even though it hasn't
been proven. I'll tell you who used to throw anti-Semitic terms around-Nixon
BUT when the Arabs attacked Israel on Yom Kippuer 1973 and Prime Minister
Golda Meir called him and made a desperate plea for weapons(NOT MANPOWER),
he complied immediately.
Jesse Jackson called NYC "Hymietown", was attacked for it, apologized and
it never happened again. But who knows how many Jews in NYC refer to Blacks
perjoratively?
Nobody's perfect; all of us have deep seated prejudices and let's wait until
November to see how many Jewish New Yorkers believe what she supposedly
said.
I will say this. Whoever concoted the story about a bunch of ragtag Jews
2000 years ago demanding from Pilate he crucify one of their own which is
100% implausible, has sure had a field day with it and not necessarily in
June either. CQ.

Jim, if Roger has any friends to speak of, Somebody had better
tell him what kind of hole he's digging for himself. About
all I can see is his unplugging the radio and computer and
taking up bird-watching. It's beyond the point of a few hams
being riled up, it's gone to the Postal authorities.
Pittsburgh is indeed the hub for the "Panhandle" so it was
easily tracked.

Chipster-Dude .. where did you get ..
>Stalin would be proud.

That must be from another thread. Cause Stalin would be dead. Since about 1954. But if you want the grandma of all conspiracies, it's Lenin you gotta look out for. Did you know that ..

Lenin's body is being kept in a temperature controlled container and they're pumping saline solution through his veins. So when there is a cure for the disease that killed him, they can revive him and cure it and he can take over Russia again.

Betcha hadn't heard that one. :-)

Well I sure hope President Rodham-Clinton lives to see Mr. Lenin's awakening. Cause according to a prominent personality on 3950, President Rodham-Clinton "never met a communist dictator he didn't like". This will give him a chance to like another one.

So for another line ..
Lenin will be part of the conspiracy .. again .. after his resurrection.

Like it?

Gore / (Bill) Rodham-Clinton 2000 ! ! !

I don't think anyone in this newsgroup can say for sure who started the fire, or if the tape is a phony, etc. The very fact that so many of us doubt the government's version of Waco is a sad commentary on how low our government has become. The government has proven time and time again that it is not truthful, and can not be trusted to follow the law (of course, it expects US to follow every decree it makes).

Regardless of who fired the first shot or who started the fire, the fact remains that the government had no right .. NONE .. to invade the Waco church like it did. This government likes to play Rambo on top of of citizens' rights WAY TOO MUCH. It is an out of control monster.

R/C is communication. Nothing said that it had to be communication with
another person.

Radar is not communication. You're not telling something or someone else about
anything or what to do (or trying to even contact someone or something). Show
me where in 47 CFR 97.117 that it allows a transmission for determining ranging
and movement of remote objects (which is what radar is used for).

Wrong again. Not you, not anyone has seen a "quantum". All quantum
theory is a *product* of logical and mathematical thought, not an
exception.

When deductive reasoning began to conflict with observations, inductive
logic was used to derive quantum physics.

I understand his limited definitions very well. He confuses the process
(logic) with the product (concept), then states the product of logic
should not be confused with truth. Of course, when concept is frozen
and substituted for truth, you get blind loyalties and fixed opinions --
but those are, of course, not logic. He has shot down nothing but a
shoddy homily.

Since the only tools we have for perceiving truth are encompassed by the
subject of logic, we have no other avenue to the truth.

Unless you have a time machine or a crystal ball for reading Koresh's
thoughts (as you have done) and for telling us what Koresh really did
and did not do?

Is that the root on your hostility to logic?

TCross

OK, guess I spoke too soon. I guess my bandscan was too early in the evening since signals are being heard now, albeit a lot weaker than usual. Its still a strong auroral effect, though.

(Assuming anyone cares).

"Political Correctness is nothing but tyranny with manners."
